INTERNATIONAL SOCIETY FOR COMPUTERS AND THEIR APPLICATIONS

Eighth International Conference on Parallel and Distributed Computing Systems

Orlando, Florida USA

September 21-23, 1995

TECHNICAL PAPER INDEX

Session T1A: Fault Tolerance I

1. **Monitoring Membership Changes in a Fault-Tolerant Distributed System**
M. R. King, L. E. Moser, P. M. Melliar-Smith, D. A. Agarwal (University of California, Santa Barbara) 1
2. **Modeling and Analysis of a Fault-Tolerant Remote Procedure Call**
Anita Nuthi and Mansoor Alam (The University of Toledo) 9
3. **An Algorithm for Fault-Free Embeddings in a Faulty 2D Torus**
Ramakumar Kosuru and S. H. Hosseini (University of Wisconsin-Milwaukee) 15
4. **A Genetic Algorithm Based Approach for Generalization of Min-Cut Partitioning to Tree Structures**
Anup Kumar, Shantha Konda and Rajashekar Ramamurthy (University of Louisville) 21

Session T1B: Algorithms I

1. **An Optimal Load Sharing Strategy for Divisible Jobs with Time-Varying Processor Speed**
Jeeho Sohn and Thomas G. Robertazzi (SUNY at Stony Brook) 27
2. **Fast Parallel Tree Search with Static Load-Balancing Forward Checking Technique**
Wei-Ming Lin and Bo Yang (University of Texas - San Antonio) 33
3. **A New Convex Hull Algorithm on Linear Arrays**
Doris L. Carver, Jigang Liu and S. Q. Zheng (Louisiana State University) 39
4. **Using Fuzzy Logic for Task Scheduling in Multiprocessor Systems**
Shaharuddin Salleh (University of Technology Malaysia) and Albert Y. Zomaya (University of Western Australia) 45

Session T1C: Distributed Computing

1. **Enhanced Gradient Model: A Dynamic-Threshold Based Load Balancing Model for Applicative Multiprocessor System**
Dae J. Hwang and Tai M. Chung (Sung Kyun Kwan University) 52
2. **On the Design and the Proof of Correctness of a Distributed Lock Protocol**
Mukund M. Buddhikot, Roy Jenevein and B. F. Womack (University of Texas at Austin) 60
3. **An Extended A* Model for Task Allocation**
Larry Dunning (Bowling Green State University) and Sub Ramakrishnan (Universitat Salzburg) 66

4. Dynamics of Distributed Transaction Processing: Load Sharing versus Locality Preference	
Edward A. Billard (University of Aizu)	70
5. Efficient Recovery Policies in Client-Server Systems	
Shalini Yajnik and Yennun Huang (AT&T Bell Laboratories)	77
Session T2A: Real Time	
1. Veritable Time Representation for Clock Synchronization in Distributed Computer Systems	
Mario R. Sanchez, Cyril U. Orji (Florida International University) and Kingsley C. Nwosu (AT&T Bell Laboratories)	85
2. Selectively Fault-Tolerant, Hard Real-Time Multiprocessor Scheduling	
Nicole Marie Sabine and Edwin Hsing-Mean Sha (University of Notre Dame)	89
3. Optimal Multicast Routing with Real-Time Constraint in ATM Networks	
Xiaohua Jia (University of Queensland), C. H. Lee, J. M. Ng and E. Chan (City University of Hong Kong)	95
Session T2B: Languages	
1. Pipe Line Scheduling of DOACROSS Loops on Message Passing Multiprocessors	
Sharad Garg, Howard A. Sholl and Reda A. Ammar (University of Connecticut)	99
2. Improving WHILE Loop Dynamic Scheduling in Shared Memory Parallel Computers	
Robert Bowne and Hesham El-Rewini (University of Nebraska at Omaha)	105
3. Array Data Layout for the Reduction of Cache Conflicts	
Naraig Manjikian and Tarek Abdelrahman (The University of Toronto)	111
4. A Unified Scheme for Partitioning and Clustering of Iteration Space Loops for Execution on Multiprocessors	
Safiullah Faizullah and B. Arafeh (KFUPM)	119
Session T2C: Concurrency and Parallelism I	
1. Parallel Algorithm for Switching Function Minimization	
Ahmed E. Barbour and David W. Moody (Georgia Southern University)	125
2. Incremental Exploitation of Parallelism in Prolog	
Enrico Pontelli and Gopal Gupta (New Mexico State University)	131
3. Application Specific Communication Scheduling on Parallel Systems	
David R. Surma and Edwin Hsing-Mean Sha (University of Notre Dame)	137
4. A Parallel VLSI-Implementable Thinning Algorithm	
W. Zhang and R. Shankar (Florida Atlantic University)	140
Session T3A: Performance	
1. An Evaluation of Load Balancing Algorithms through Simulation	
Avi Kumar (SES Inc.), C. Bala Kumar, Nasr Ullah (Motorola Inc. and University of Texas at Austin), and Stephen A. Szygenda (University of Texas at Austin)	142
2. Performance Modeling and Analysis of Correlated Parallel Computations	
Wei-Ming Lin and Bo Yang (University of Texas at San Antonio)	146

3. Analytical Performance Model for Futurebus+ Systems Ulrich Stern (Stanford University), Howard A. Sholl, Reda A. Ammar and Cheng-Hsien Tung (University of Connecticut)	152
4. Multi-layered Semaphore Queue with Coxian Arrivals and Exponential Servers Hsing P. Luh (National ChengChi University)	159
5. Performance Measurements of Automatic Prefetching James Griffioen and Randy Appleton (University of Kentucky)	165

Session T3B: Networks I

1. Efficient Perfectly Secure Message Transmission in Synchronous Networks Hasan Md. Sayeed (Texas A&M University) and Hosame Abu-Amara (University of Nevada)	171
2. Asynchronous Agreement Algorithms for General Networks with Byzantine Faulty Links Hasan Md. Sayeed (Texas A&M University), Marwan Abu-Amara (Bell-Northern Research) and Hosame Abu-Amara (University of Nevada)	177
3. Packet Switched Multistage Interconnection Networks with Multiple Packet Movement Per Network Cycle Hee Yong Youn and Hyunseung Choo (University of Texas at Arlington)	183
4. Hypernetworks: A Class of Interconnection Networks for New Generation Parallel Computers S. Q. Zheng (Louisiana State University)	189
5. Black Holes, Sacrificial Lambs, and a Robust Approach to Transaction Routing Donald Ferguson, J. Sairamesh and R. A. Cieslak (IBM T. J. Watson Research Center)	195
6. Traffic Analysis and Characterization of a Local Area Network with Different Classes of Users Abdelsalam A. Helal and K. Khalil (University of Texas at Arlington)	203

Session T3C: Architecture I

1. A New Shared Memory Concept for Multiprocessor Systems with High-Speed Communication Links Eugen Brenner and R. Weiss (Graz University of Technology)	210
2. Strategies for Processor Allocation in k-ary n-cubes Gopal Commy (Ohio State University), Vipin Chaudhary (Wayne University), Bikash Sabata (SRI International)	216
3. Optimal Clustering of Three-Level Coma Multiprocessors Based on the Modified MVA Model Ting-Li Hu and Fadi N. Sibai (University of Akron)	222
4. Unallocated Memory Space in COMA Multiprocessors Sujat Jamil and Gyungho Lee (University of Minnesota)	228
5. A Case Study of Parallel Hierarchical Radiosity Algorithms on a DSM-COMA Architecture Chegu Vinod and Vipin Chaudhary (Wayne State University)	236

Session F1A: Operating Systems

1. Predicting Results of Programs for Meeting Timing Constraints and Overcoming Communication Delays Hasan Cam (KFUPM)	242
2. Operating System Design Principles for Scalable Shared Memory Multiprocessors Rajat Mukherjee (IBM T. J. Watson Research Center) and John K. Bennett (Rice University)	248

3. Multithreaded Multiprocessor System	
<i>G. M. Chaudhry and X. C. Li (University of Missouri-Columbia)</i>	256
4. Effects of Job Interactions Due to Scattered Processor Allocations in 2-D Wormhole Networks	
<i>Dugki Min (Kon-Kuk University) and Matt W Mutka (Michigan State University)</i>	262

Session F1B: Reliability

1. Subcube Reliability of a Modular Fault-Tolerant Hypercube Architecture	
<i>Mostafa H. Abd-El-Barr, M. A. Abdul Hai and M. S. T. Bente (KFUPM)</i>	268
2. Fault-Tolerance and Reliability Analysis of Multi-Stage Data Manipulator Networks	
<i>Mostafa Abd-El-Barr, Khalid Al-Tawil and Osama Abed (KFUPM)</i>	275
3. Parallel Reasoning in Model-Based Fault Diagnosis	
<i>Ralph F. Grove (Indiana University of Pennsylvania) and James H. Graham (University of Louisville)</i>	281
4. Computing Submesh Reliability in Two-Dimensional Meshes	
<i>Chung-yen Chang and Prasant Mohapatra (Iowa State University)</i>	287
5. Reliability Analysis of Large-Scale Ring-Based Hierarchical Networks	
<i>Mohammad AL-Rousan, LeRoy Bearnson and James Archibald (Brigham Young University)</i>	293

Session F1C: Networks II

1. Personal Information Processing Properties for Dynamic Network Security	
<i>Howard A. Sholl and Lisa B. Lancor (University of Connecticut)</i>	301
2. A Network-based Model for Application-Oriented Communication Protocols	
<i>Eyas Al-hajery and Salim Hariri (Syracuse University)</i>	307
3. A Scaleable Multibuffer ATM Switch Architecture	
<i>Paul Shipley and Magdy Bayoumi (University of Southwestern Louisiana)</i>	313
4. On The Implementation of the Quorum Consensus Protocol	
<i>Mei-Ling L. Liu (Cal Poly State University), D. Agrawal and A. El Abbadi (University of California, Santa Barbara)</i>	318

Session F2A: Multiprocessor Systems

1. Performance Evaluation of VAX and SUN SPARC versus 80X86 Personal Computers	
<i>D. Kaur, D. Shaheen and Yong G. Park (University of Toledo)</i>	326
2. Performance of Processor-Memory-Oriented-Partial-Multiple-Bus System	
<i>G. M. Chaudhry and A. N. Khan (University of Missouri-Columbia)</i>	331
3. Distributed Processing Techniques for Generation of Dertouzos Tables	
<i>Jason Sodergren, Harpreet Singh and Ece Yaprak (Wayne State University)</i>	337
4. An Efficient Algorithm for Computation of Reliability in Distributed Networks	
<i>Nabil A. Hachem (Lawrence Tech. University) and Jatinder S. Bedi (Wayne State University)</i>	343
5. Optimal Configuration of Distributed Monitoring Systems	
<i>Jiainnong Cao (City University of Hong Kong), Kang Zhang (Macquarie University), Olivier de Vel and Ling Shi (James Cook University)</i>	351

Session F2B: Applications

1. **A Middleware for Distributed Multimedia Applications**
Michael Weiss, Tom Gray (MITEL Corporation), and Aurora Diaz (National Research Council) 357
2. **Remote Control with Remote Procedure Calls**
Gerhard Eschelbeck (University Linz) 360
3. **A High-Performance Arabic Character Recognition System**
Jasir Alherbish and Reda Ammar (University of Connecticut) 364
4. **A New Parallel Heuristic for the Quadratic Assignment Problem**
Nishit Kumar and Narsingh Deo (University of Central Florida) 370
5. **Memory-Based Parsing in Natural Language Using Semantic Networks**
Mohamed Nour and Nadia Hegazi (Electronics Research Institute) 377

Session F2C: Algorithms II

1. **Communications in Binary Fat Trees**
Vassilios V. Dimakopoulos and Nikitas J. Dimopoulos (University of Victoria) 383
2. **Locating Congruent and Similar Regions in a Planar Graph by a Mesh of Trees**
Fenglien Lee (Winston-Salem State University) and S. Q. Zheng (Louisiana State University) 389
3. **Distributed Systems Task Allocation: A Genetic Algorithm Perspective**
Tarek A. El-Sadany, Safaa M. El-Gendy and Khaled A. Kamel (University of Louisville) 393
4. **A Graph-Based Allocation Scheme for Assigning Acyclic Task Graphs onto Multiprocessors**
Niteen N. Athavale and Rammohan K. Ragade (University of Louisville) 397
5. **A Hybrid Dynamic Load Sharing Algorithm for Improving the Performance of Distributed Systems**
Anil Rao and Reda A. Ammar (University of Connecticut) 404

Session F3A: Mathematical Algorithms and Software

1. **Parallel Computation of Large Least Squares Problems on Connection Machine 5**
Charles T. Fulton and Limin Wu (Florida Institute of Technology) 411
2. **The Use of Parallel Virtual Machines in Air Traffic Control**
John H. George, Jan Collins, David Ross, Eddie Bugg, and Howard Abrams (Embry-Riddle Aeronautical University) 415
3. **Parallel Solution of TPBVP Using Collocation on a Hypercube**
Laurene V. Fausett (Florida Institute of Tech.) 420
4. **Direct Reduction to a Similar Near-Tridiagonal Form**
Gary W. Howell (Florida Institute of Technology), and G. A. Geist (ORLN) 426
5. **Matrix Transposition Algorithm on a Distributed Memory Parallel Computer**
Hany Hashish and Donald W. Fausett (Florida Institute of Technology) 433

Session F3B: Architectures II (Hypercube)

1. **Processor Allocation in Hypercube Multicomputers: The Random Allocation Strategy**
Debendra Das Sharma (Hewlett-Packard Company) 439
2. **Performance of an ATM Based Hypercube**

	<i>Brian Mackay (University of Connecticut)</i>	446
3. Hypercube Hypernetworks: Implementations of Hypercube with Increased Wire Sharing		
	<i>S. Q. Zheng (Louisiana State University)</i>	452
4. The Associative SIMD Hypercube		
	<i>Q. M. Malluhi (Jackson State University), Magdy Bayoumi, R. A. Ayoubi (University of Southwestern Louisiana)</i>	458
5. A Processor Allocation Scheme for Hypercube Computers Based on a Novel Approach		
	<i>Jose R. Sua and Imad Mahgoub (Florida Atlantic University)</i>	465
 Session F3C: Parallel and Distributed Simulation		
1. An Improved Chandy-Lamport Snapshot Algorithm for GVT Approximation in Distributed Simulations		
	<i>Hussam M. Soliman and Adel S. Elmaghraby (University of Louisville)</i>	473
2. Performance Study of a Parallel-Event Simulator		
	<i>Hussam M. Soliman and Adel S. Elmaghraby (University of Louisville)</i>	478
3. An Electrostatic Particle-in-Cell (PIC) Simulation on the INTEL Paragon		
	<i>Armagan Ozkaya and Tarek El-Ghazawi (George Washington University)</i>	482
4. Simulating Particle Travel with Lattice Computers		
	<i>John Case (University of Delaware), Dayananad S. Rajan (DCS), and Anil M. Shende (Roanoke College)</i>	488
5. Improving Performance of the Qualitative Simulator QSIM - Design and Implementation of a Specialized Computer Architecture		
	<i>Marco Platzner and Bernhard Rinner (Graz University of Technology)</i>	494
6. Methodology and Tool Suite for Large-Scale Information Systems Architectures		
	<i>James Sidoran (USAF Rome Laboratory), Richard A. Berthiaume (TASC) and Hollis H. Bond (International Software Systems Inc.)</i>	502
 Session S1A: Fault Tolerance II		
1. On Fault-Tolerant Ring Embedding in DeBruijn Graphs		
	<i>Arunabha Sen (Arizona State University) Abhijit Sengupta and Suresh Viswanathan (University of South Carolina)</i>	510
2. CRAFT: CRiticAlity based Fault Tolerance for Real-Time Distributed Systems with Resource Constraints		
	<i>Santhanam Srinivasan and Niraj K. Jha (Princeton University)</i>	513
3. Enhanced Fibonacci Cubes		
	<i>Haifeng Qian and Jie Wu (Florida Atlantic University)</i>	521
 Session S1B: Software Environments		
1. An Overview of the CHIP'S Performance Prediction Toolset for Parallel Systems		
	<i>E. Papaefstathiou, D. J. Kerbyson, G. R. Nudd, T. J. Atherton (University of Warwick)</i>	527
2. Priority: An I/O Instrumentation, Measurement, and Analysis Tool		
	<i>Steven H. VanderLeest and Ravishankar K. Iyer (University of Illinois)</i>	534
3. UTE: A Unified Trace Environment for IBM SP Systems		
	<i>C. Eric Wu, Hubertus Franke, and Yew-Huey Liu (IBM T. J. Watson Research Center)</i>	540

Session S1C: Database

1. **A Heuristic Algorithm for Beneficial Semijoins**
Ye-In Chang and Bor-Miin Liu(National Sun Yat-Sen University) 548
2. **Two-Phase Commit in Gigabit-Networked Distributed Databases**
Yousef J. Al-Houmaily and Panos K. Chrysanthis (University of Pittsburgh) 554
3. **A Methodology for the Design of Distributed Object Oriented Databases**
Marinette Savonnet and Kokou Yetongnon (Universite de Bourgogne) 561

Session S2A: Architecture III

1. **Resource Placement in Cube-Connected-Cycles Networks**
Lisa A. Calitri and Yuanyuan Yang (University of Vermont) 568
2. **An Optimal Bound on the Gain of Using One Large Processor Cluster instead of a Number of Small Clusters**
Lars Lundberg and Kakan Lennerstad (University of Karlskrona/Ronneby) 576
3. **Process Mapping in a Multiprocessor System by Means of a Hardware Monitor**
Robert Ginthoer-Kalcsics and Karl Heinz Laher (Graz University of Technology) 583
4. **CAM-8: A Virtual Processor Cellular Automata Machine**
Norman Margolus (Massachusetts Institute of Technology) 589
5. **A Class of Cache Coherence Schemes with Cache-Based Directories**
S. C. Heragu and Imad Mahgoub (Florida Atlantic University) 595

Session S2B: Algorithms III

1. **Optimal Fault-Secure Scheduling**
Jie Wu, Eduardo B. Fernandez and Donglai Dai (Florida Atlantic University) 603
2. **Optimal Parallel Algorithms for Fully Dynamic Maintenance of Extremal Sets**
Hong Shen (Griffith University) 609
3. **Performance of an Adaptive Algorithm for Dynamic Load Balancing**
Gregory S. Wolfe, S. H. Hosseini and K. Vairavan (University of Wisconsin-Milwaukee) 613
4. **A Model and an Algorithm of Subsystem Construction**
Z. P. Tao, G.v. Bochmann and R. Dssouli (Universite de Montreal) 619

Session S2C: Concurrency and Parallelism II

1. **A Data-Redundant Systolic Algorithm for Transitive Closure on Linear Arrays**
Kevin J. Rappoport (Pacific-Sierra Research) 623
2. **Parallelism Detection Algorithm for Extended Sisal Programs in Centaur**
Yung-Syau Chen and Jean-Luc Gaudiot (University of Southern California) 628
3. **An Approximation Algorithm for Scheduling Independent Parallel Tasks and Its Analysis**
Keqin Li (SUNY at New Paltz) 634
