**INTERNATIONAL SOCIETY FOR COMPUTERS
AND THEIR APPLICATIONS**

**International Conference on Computer Applications
in Design, Simulation and Analysis**

March 10 - 12, 1993

Marvin Center, George Washington University
Washington, D.C. U. S. A

TECHNICAL PAPER INDEX

Session I - Architecture I

1. **Embedding Complete Binary Trees into Twisted Hypercubes**
E. Abuelrub and S. Bettayeb (Louisiana State University) page 1
2. **A Graph Labelling Method to Test Systolic Arrays**
A. Minaie (Southern University at New Orleans) page 5
3. **Debugger Support in a Virtual Memory Operating System**
W. Peckham (Inter-Tel, Inc.) and D. C. Pheanis (Arizona State University) page 9

Session II - Fault Tolerant Computing

1. **Fault Tolerant Computer Programs: A Performance Evaluation**
R. S. Pamula (California State University) page 13
2. **System and Component Failure Prediction in Fault Tolerant Systems**
W. V. Subbarao and V. Ordax (Florida International University) page 17
3. **A Personal Computer Based System for Quantifying Human Spasticity**
J. Hochberg, W. V. Subbarao and L. Elbaum (Florida International University) page 21

Session III - Parallel Processing I

1. **A Study of Sequential Algorithm Parallelization Problems in the Context of Transputer-Based Machines**
I. Dancea (Universite du Quebec a Hull) page 25
2. **Adaptive Fault Management for Dependability in Distributed Systems**
R. E. Gantenbein (Univ. of Wyoming) and S. Y. Shin (South Dakota State Univ.) page 29
3. **RTGTool: A Tool for Distributed Real-time Systems Design**
H. Mei (University of Texas at Arlington) and S-M. Yang (SoongSil University) page 33

Session IV - High-Speed Networks

1. **Blood Flow Data Exhibit Chaotic Properties**
M. E. Cohen (California State University), D. L. Hudson and M. F. Anderson, (University of California, San Francisco) and C. Vazquez (California State University, Fresno) page 37
2. **Computer Simulation of a Hydraulic Rail Car Stabilization System**
K. Thai, G. Whitmer and H. El-Sherief (TRW Space and Technology Group) page 41
3. **Predicting the Binding of Class II MHC Molecules with Protein Segments Through Discriminant Analysis**
R. R. Mallios (University of California, San Francisco) page 45
4. **Discrete-Event Simulation for Modeling of a Closed System**
J. Zadeh (Illinois Institute of Technology) page 49

Session V - Parallel Processing II

1. **The TBN: A Versatile Building Block for VLSI Parallel Architectures**
O. M. Digne, R. Vaidyanathan and S. Q. Zheng (Louisiana State University) page 52
2. **Using Transputers as a Parallel Computer**
S. A. M. Makki (The Univ. of New South Wales) and N. Pissinou (Univ. of Nevada, Las Vegas) page 56
3. **A Neural Network Approach to Transform Raster Images into Vectors**
T. S. Tsui (National Chung Hsing University), H-Y. Hau (National Taiwan University) and C. M. Hsieh (National Chung Hsing University) page 60

Session VI - Software Reliability

1. **Coding Techniques to Produce Maintainable Assembly-Language Programs**
P. A. Reinert and D. C. Pheanis (Arizona State University) page 65
2. **A Flexible Experiment Package for EVB-based Laboratories**
W. T. Neumann and M. C. Woodfill (Arizona State University) page 69
3. **A Critical Look at Domain Analysis**
S. Ames and M. K. Zand (University of Nebraska at Omaha) page 73
4. **Optimizing Assembler**
D. C. Pheanis and R. J. Sterbenz (Arizona State University) page 77

Session VII - Communications

1. **A Solution Algorithm for the Shortest Path Problem with Application to Communications Networks Design and Operation**
H. Arsham (University of Baltimore) page 81
2. **Amplitude Limiters**
D. R. Loker (The Behrend College) page 85
3. **Signal Processing and Communication Applications with Motorola's DSP56001 and DSP96012 Digital Signal Processors**
M. El-Sharkawy, W. Eshrawy and J. Saffle (Purdue University) page 89

Session VIII - Networks

- 1. Performance Analysis of a High-speed ISDN Packet Switch**
K. Rao (California Dept. of Transportation) and I. Ghansah (California State University) page 94
- 2. The Star-Hypercube Hybrid Interconnection Networks**
S. Q. Zheng (Louisiana State University), B. Cong (South Dakota State University)
and S. Bettayeb (Louisiana State University) page 98
- 3. Evaluation of Computer Network Topologies**
B. Cong, A. Salehnia, S. Shin, S. Sharma, and S. Joshi (South Dakota State
University) and Y. Lin (Yunan Normal University) page 102

Session IX - Data Bases I

- 1. Providing a Universal Relation View for INGRES**
H. N. Lin and L. L. Miller (Iowa State University) and M. M. Owrang O. (American University) page 106
- 2. Update Policy for a Generalized Notion of Objects in Object Databases**
L. R. Hansen and L. Miller (Iowa State University) page 110
- 3. Application of Machine Learning in Multidatabase Schema Integration**
C. Azarbod (Mankato State University) and W. Perrizo (North Dakota State University) page 115

Session X - Software Reliability II

- 1. Experiences With Developing/Using A Code Walkthrough Checklist for FORTRAN**
J. B. Herring, Jr. (Lockheed Advanced Development Company) page 119
- 2. Integer Goal Programming for Optimal Path Selection Model of Structural
Program Testing**
K-J. Fam (Industrial Technology Research Institute) and K-S. Lin (Apex Science and
Engineering Corporation) page 124
- 3. Using Causal Analysis in Software Safety**
M. Y. Yap and L. D. Gowen (Mississippi State University) page 130

Session XI - Data Bases II

- 1. Integrating Knowledge Based Systems in Heterogeneous Distributed Databases**
W. Perrizo, P. Ram, B. Panda, S. Kaliappan, V. Goli, H. Hakimzadeh, R. Dharanidharan,
V. Yadlapati (North Dakota State University) and R. Haraty (Moorhead State University) page 134
- 2. A Prototype of the Generation of Views for an Object-Relational Interface**
J. L. Roberts and L. Miller (Iowa State University) page 138
- 3. Global Information Access: Multidatabases and Beyond**
S. Pakzad (The Pennsylvania State University) and M. Bright (IBM Corp.) page 142

Session XII - Expert Systems/Neural Networks

1. **Optimal Neural-Based Navigation Satellite Selection**
D. Simon and H. El-Sherief (TRW Systems Integration Group) page 147
2. **The Impact of Fuzzy Logic Implementations in Knowledge-Based Systems**
D. L. Hudson (University of California, San Francisco), M. E. Cohen (California State University, Fresno) and M. F. Anderson (University of California, San Francisco) page 151
3. **Non-Linear System Identification Using A Gabor/Hopfield Network**
C. Q. Zhang and M. S. Fadali (University of Nevada) page 155

Session XIII - Data Bases III

1. **Fine Granularity Locking for Object-Oriented Databases**
H. Hakimzadeh and W. Perrizo (North Dakota State University) page 159
2. **Modified Two Phase Locking in Distributed Databases**
B. Chandra (Indian Institute of Technology) page 163
3. **An Approach to Compiling Non-Linear Recursive Formulas in Deductive Databases**
C. S. Ku and C. Youn (Bell Communications Research) page 169

Session XIV - Expert Systems I

1. **On Answering Queries under the Generalized Closed World Assumption**
H. D. Kim (Northeastern Illinois University) page 173
2. **Packaged Expert Systems Languages**
A. R. Salehnia, B. Cong, S. Y. Shin (South Dakota State Univ.) and
M. Pourmoghshband (University of Arkansas at Monticello) page 177
3. **xAction: an Abstract Base for Different Action Models**
W. Yu and P. Verbaeten (Katholieke Univ. Leuven) page 180

Session XV - Data Bases IV

1. **An Experimental Object-Oriented DBMS Design and Application**
J. B. Liu and M. S. Yang (Bradley University) page 184
2. **FDBS: An Unified Access to Heterogeneous Distributed Databases**
L. Sham (Hong Kong Polytechnic) page 188
3. **A Comparative Case Study in Object-Oriented Systems Analysis Methodologies**
I.-Y. Song, M. Evans, M. Bello-Pillows (Drexel Univ.) and E. K. Park (U.S. Naval Academy) page 195

Session XVI - Expert Systems II

1. **Strategies for Controlling and Optimizing a Query in Logic Based Systems**
S-C. Yoon (Widener University) and I-Y. Song (Drexel University) page 199
2. **I/O Language and I/O Computer Development for Intelligent Machines**
W. V. Subbarao and D. L. DeQuintana (Florida International University) page 203

Session XVII: Parallel Processing II

- 1. A Software Tool for Performance Evaluation of Parallel Algorithms**
R. A. Ammar, H. A. Sholl and S. Ramamurthy (University of Connecticut) page 207
- 2. Imprecise Computation in Parallel Systems Using Processor-Sharing**
C. Gary Rommel (Eastern Connecticut State University) page 212
- 3. A Simple and Adaptable Parallel Algorithm for the Selection Problem**
J. Howe and K. Makki (Univ. of Nevada, Las Vegas) page 217

Session XVIII - Control I

- 1. A Distributed Real-Time Control Architecture for an Automated Pavement Sealing Machine**
S. Busovaca (California State Univ.), G. Kasbekar and K. Rao (California Dept. of Transportation) page 221
- 2. Motorola DSP56001 Implementation of a Real-Time Self-Tuning PID Controller**
W. K.N. Anakwa and J-H Lan (Bradley University) page 225
- 3. A Discrete Self-Tuning Controller for Time-Varying Systems**
S. S. Giang and G. K. F. Lee (North Carolina State University) page 229

Session XIX - Architecture II

- 1. On Exact Algorithms for the Steiner Tree Problem**
K. Makki (Univ. of Nevada, Las Vegas), N. Pissinou (Natl. Supercomputing Center for Energy and the Environment) and S. Busovaca (California State Univ.) page 233
- 2. Computer Simulation of Piecewise Linear Circuits**
M. B. Broughton (Royal Military College) page 237
- 3. Solar Collector Analysis for System Simulation**
H. J. L. Thomason and C. Wu (U.S. Naval Academy) page 241

Session XX - Control II

- 1. Control of Large Displacements of a Rigid Body**
C. J. Maday (North Carolina State University) and S. S. Kulkarni (Copeland Corp.) page 245
- 2. Multiple Control Variable Constraints in Feedback Control**
H.K. Lee (Agency of Defense Development, Korea) and C. J. Maday (North Carolina State Univ.) page 249
- 3. Processor Validation in Embedded Real-Time Systems**
E. K. Park (U.S. Naval Academy) and T. Picciotti (Johns Hopkins Univ.) page 254
