

2012 IEEE 20th International Conference on Program Comprehension

(ICPC 2012)

**Passau, Germany
11 – 13 June 2012**

IEEE Catalog Number: CFP12009-PRT
ISBN: 978-1-4673-1213-4

Contents

Preface

Message from the Chairs
Committees

Invited Papers

Agile Software Assessment (Invited Paper)	
Oscar Nierstrasz and Mircea Lungu — <i>University of Bern, Switzerland</i>	3
Studying Developers for Fun and Profit (Keynote Abstract)	
Robert DeLine — <i>Microsoft Research, USA</i>	11
A Retrospective View on: The Role of Concepts in Program Comprehension (MIP Award)	
Václav Rajlich and Norman Wilde — <i>Wayne State University, USA; University of West Florida, USA</i>	12

Main Research Track

Cognitive Processes

Program Complexity Metrics and Programmer Opinions	
Bernhard Katzmarski and Rainer Koschke — <i>University of Bremen, Germany</i>	17
Women and Men- Different but Equal: On the Impact of Identifier Style on Source Code Reading	
Zohreh Sharafi, Zéphyrin Soh, Yann-Gaël Guéhéneuc, and Giuliano Antoniol — <i>École Polytechnique de Montréal, Canada; University of Ngaoundéré, Cameroon</i>	27
A Lightweight Visualization of Interprocedural Data-Flow Paths for Source Code Reading	
Takashi Ishio, Shogo Etsuda, and Katsuro Inoue — <i>Osaka University, Japan</i>	37
Is the Derivation of a Model Easier to Understand Than the Model Itself?	
Janet Feigenspan, Don Batory, and Taylor Riché — <i>University of Magdeburg, Germany; University of Texas, USA; National Instruments, USA</i>	47

The Role of the Developer

Evaluating Forum Discussions to Inform the Design of an API Critic	
Chandan R. Rupakheti and Daqing Hou — <i>Clarkson University, USA</i>	53
Mining Source Code Descriptions from Developer Communications	
Sebastiano Panichella, Jairo Aponte, Massimiliano Di Penta, Andrian Marcus, and Gerardo Canfora — <i>University of Sannio, Italy; Universidad Nacional de Colombia, Colombia; Wayne State University, USA</i>	63
Measuring Programming Experience	
Janet Feigenspan, Christian Kästner, Jörg Liebig, Sven Apel, and Stefan Hanenberg — <i>University of Magdeburg, Germany; Philipps University of Marburg, Germany; University of Passau, Germany; University of Duisburg-Essen, Germany</i>	73

Measurement

High-MCC Functions in the Linux Kernel	
Ahmad Jbara, Adam Matan, and Dror G. Feitelson — <i>Hebrew University of Jerusalem, Israel</i>	83

Understanding Registration-Based Abstractions: A Quantitative User Study	93
John-Jose Nuñez and Gregor Kiczales — <i>University of British Columbia, Canada</i>	
Concern-Based Cohesion: Unveiling a Hidden Dimension of Cohesion Measurement	103
Bruno Silva, Claudio Sant’Anna, Christina Chavez, and Alessandro Garcia — <i>Federal University of Bahia, Brazil; PUC-Rio, Brazil</i>	
Understanding Reuse in the Android Market	113
Israel J. Mojica Ruiz, Meiyappan Nagappan, Bram Adams, and Ahmed E. Hassan — <i>Queen’s University, Canada; École Polytechnique de Montréal, Canada</i>	

Understanding and Architecture

Programmer Information Needs after Memory Failure	123
Chris Parnin and Spencer Rugaber — <i>Georgia Tech, USA</i>	
Identifying Computational Phases from Inter-process Communication Traces of HPC Applications	133
Luay Alawneh and Abdelwahab Hamou-Lhadj — <i>Concordia University, Canada</i>	
Tracking and Visualizing Information Flow in Component-Based Systems	143
Amir Reza Yazdanshenas and Leon Moonen — <i>Simula Research Laboratory, Norway</i>	

Empirical Studies

Do Static Type Systems Improve the Maintainability of Software Systems? An Empirical Study	153
Sebastian Kleinschmager, Stefan Hanenberg, Romain Robbes, Éric Tanter, and Andreas Stefik — <i>University of Duisburg-Essen, Germany; University of Chile, Chile; Southern Illinois University at Edwardsville, USA</i>	
Professional Status and Expertise for UML Class Diagram Comprehension: An Empirical Study	163
Zéphyrin Soh, Zohreh Sharafi, Bertrand Van den Plas, Gerardo Cepeda Porras, Yann-Gaël Guéhéneuc, and Giuliano Antoniol — <i>École Polytechnique de Montréal, Canada; University of Ngaoundéré, Cameroon; University of Namur, Belgium; Université de Montréal, Canada</i>	

Semantics and Traceability

Modeling the Ownership of Source Code Topics	173
Christopher S. Corley, Elizabeth A. Kammer, and Nicholas A. Kraft — <i>University of Alabama, USA</i>	
A Semantic Relatedness Approach for Traceability Link Recovery	183
Anas Mahmoud, Nan Niu, and Songhua Xu — <i>Mississippi State University, USA; Oak Ridge National Laboratory, USA</i>	
Using IR Methods for Labeling Source Code Artifacts: Is It Worthwhile?	193
Andrea De Lucia, Massimiliano Di Penta, Rocco Oliveto, Annibale Panichella, and Sebastiano Panichella — <i>University of Salerno, Italy; University of Sannio, Italy; University of Molise, Italy</i>	
A TraceLab-Based Solution for Creating, Conducting, and Sharing Feature Location Experiments	203
Bogdan Dit, Evan Moritz, and Denys Poshyvanyk — <i>College of William and Mary, USA</i>	

Source-Code Analysis

Can Clone Detection Support Test Comprehension?	209
Benedikt Hauptmann, Maximilian Junker, Sebastian Eder, Elmar Jürgens, and Rudolf Vaas — <i>TU Munich, Germany; CQSE, Germany; Munich Re, Germany</i>	
A Controlled Experiment on Software Clones	219
Jan Harder and Rebecca Tiarks — <i>University of Bremen, Germany</i>	
Code Querying by UML	229
Carlos Noguera, Coen De Roover, Andy Kellens, and Viviane Jonckers — <i>Vrije Universiteit Brussel, Belgium</i>	

Tool Demonstrations

CriticAL: A Critic for APIs and Libraries	241
Chandan R. Rupakheti and Daqing Hou — <i>Clarkson University, USA</i>	
Supporting Comprehension Experiments with Human Subjects	244
Janet Feigenspan and Norbert Siegmund — <i>University of Magdeburg, Germany</i>	

SeByte: A Semantic Clone Detection Tool for Intermediate Languages	
Iman Keivanloo, Chanchal K. Roy, and Juergen Rilling — <i>Concordia University, Canada; University of Saskatchewan, Canada</i>	247
CRat: A Refactoring Support Tool for Form Template Method	
Keisuke Hotta, Yoshiki Higo, Hiroshi Igaki, and Shinji Kusumoto — <i>Osaka University, Japan</i>	250

Poster Presentations

Toward Structured Location of Features	
Hiroshi Kazato, Shinpei Hayashi, Satoshi Okada, Shunsuke Miyata, Takashi Hoshino, and Motoshi Saeki — <i>NTT, Japan; Tokyo Institute of Technology, Japan</i>	255
Extraction and Improvement of Conditionally Compiled Product Line Code	
Bo Zhang — <i>University of Kaiserslautern, Germany</i>	257
Applying Bioinformatics in the Analysis of Software Variants	
Vasil L. Tenev and Slawomir Duszynski — <i>Fraunhofer IESE, Germany</i>	259
Parallel Code Clone Detection Using MapReduce	
Hitesh Sajnani, Joel Ossher, and Cristina Lopes — <i>UC Irvine, USA</i>	261

Student Research Symposium

Automatic Software Architecture Recovery: A Machine Learning Approach	
Hitesh Sajnani — <i>UC Irvine, USA</i>	265
Toward an Effective Automated Tracing Process	
Anas Mahmoud — <i>Mississippi State University, USA</i>	269
Characterization of the Linux Configuration System	
Ahmad Jbara — <i>Hebrew University of Jerusalem, Israel</i>	273
Leveraging Clone Detection for Internet-Scale Source Code Search	
Iman Keivanloo — <i>Concordia University, Canada</i>	277
