

41st Symposium on Engineering Geology and Geotechnical Engineering 2008

**Boise, Idaho, USA
9-11 April 2008**

Editors:

**Thomas Weaver
Sunil Sharma**

ISBN: 978-1-62276-251-4

TABLE OF CONTENTS

Organizing Committee – 2008 Symposium	i
Invited Speakers	i
Symposium Committee – 2008	i
Table of Contents	iii
Index of Authors	vi
 Session 1: Innovations in Geologic/Geotechnical Engineering 1	
Civil and Geotechnical Engineering in 2025, <i>Blaine D. Leonard, P.E.</i>	1
Innovations in Foundation Load Testing, <i>Kyle Rollins</i>	17
 Session 2: Soil, Rock, and Material Properties 1	
Large Diameter Unconfined Tested of Cemented Rock Fill, <i>Richard L. McNearny, Ph.D., and Cassie Ward</i>	19
Investigation of the Variability of Engineering Properties (Stiffness and Unconfined Compressive Strength) of Hydrocal and Polylite, <i>Sara Morrison, Mary MacLaughlin, Nick Hudyma, and Jesse Parkhurst</i>	29
The Influence of Macropores on Strength and Mode of Failure of Square Specimens 2D Numerical Simulation and Experimental Validation, <i>Colleen Jespersen, Randy Spence, Mary MacLaughlin, Jesse Parkhurst, and Nick Hudyma</i>	37
 Session 3: Innovations in Geologic/Geotechnical Engineering 2	
The CSM Mixing System, <i>Alan Macnab, P. Eng.</i>	49
 Session 4: Deep Foundations	
Axial Capacity Of Piles Founded in Permafrost: A Case Study on the Applicability of Modern Pile Design in Remote Mongolia, <i>Kyle L. Scarr and Robert L. Mokwa, Ph.D., P.E.</i>	51
Pile Foundation Interaction with a Nearby Retaining Wall, <i>Thomas Weaver, Ph.D., P.E. and Heejung Youn</i>	67
Development and Assessment of Post-Grouting Methods to Increase the Load Carrying Capacity of Deep Foundations, <i>J. D. Pooranampillai, MSCE, S. Elfass, Ph.D., P.E., W. Vanderpool, P.E., G. Norris, Ph.D., P.E.</i>	77
Axial Capacity of Piles Founded in Intermediate Geomaterials: A State-of-the-Practice Review, <i>Heather Brooks and Robert L. Mokwa, Ph.D., P.E.</i>	93

Session 5: Landslides and Slope Stability 1

Three Mile Dam Preliminary Slope Stability Analysis,
Luke Bentley, Sara Morrison, Joel Jacobson, and Mary MacLaughlin, Ph.D. 107

Logan Bluff Landslide Slope Monitoring Program – Preliminary Results,
Richard Buhler, Robert Pack, Jim Bay, and Susit Chairakaikeow 119

Borax Mine Slope Stability Analyses - A Sensitivity Study,
Ericka Sholey, Mary MacLaughlin, and Ray Yost 133

Session 6: Case Histories and Field Studies

Geotechnical Instrumentation Program and Monitoring for the Milltown Bridge
Infrastructure Mitigation Project,
John H. Barker, E.I.T. 143

Use of USU’s New Full-Waveform Airborne Lidar in the Topographic
Mapping of a Landslide Area near Logan, Utah,
*Robert T. Pack, Paul Israelsen, Brad Petersen, Randy Christensen,
and Gary Crum* 155

Inspection and Observed Performance of Mechanically Stabilized Earth (MSE)
Walls,
Travis M. Gerber, Ph.D., P.E., James A. Bay, Ph.D., and Ryan B. Maw 167

Session 7: Soil, Rock, and Material Properties 2

Laboratory Testing of High Density Sintered Snow,
Robert Mokwa, Ph.D., P.E., Cole Peebles, and Edward Adams, Ph.D. 183

A Discussion of Alternatives to Terzaghi’s Theory of One-Dimensional
Consolidation,
Andrew J. Abrams, P.E. 197

Development of a Cyclic Pullout Test Protocol for Geosynthetics Used in Base
Reinforcement Applications,
Tim Holley and Eli Cuelho, P.E. 211

Use of Thin, Spray-On Linings for Structural Material Protection and
Fire Damage Mitigation,
A. Philip Dirige, Ph.D. and James Archibald, Ph.D., P.E. 227

Session 8: Landslides and Slope Stability 2

Preliminary Loess Undrained Shear Strength Resistance Factors for Use in Load
and Resistance Factor Design,
David Arellano, Ph.D., P.E. and Melanie R. Anderkin 245

A New “GREEN” Method of Slope Stabilization Using Plate Piles or
Why Hasn’t Someone Thought of this Before???

William V. McCormick, M.S., CEG and Richard Short, M.S., G.E. 261

Gold Quarry Phase 4 North Slope Failure,
Christopher S. Sherman and Russell J. Sheets 269

Session 9: **Geologic Hazards**

Summer 2007 V_s Data Acquisition Campaign in Las Vegas; Lessons Learned, <i>Helena Murvosh, P.E. and Barbara Luke, P.E., Ph.D.</i>	277
Sediment Lithology as a Surrogate for $V_{s(30)}$ in Seismic Site Classification, <i>Eduardo Gonzalez, Helena Murvosh, P.E., and Barbara Luke, P.E., Ph.D.</i>	287
Earthquake-Induced Landslide Susceptibility of Tri-State Region, <i>Manoochehr Zoghi, Ph.D., P.E. and James Mahar, Ph.D., LPG, PG, PHG</i>	295
