

**3rd RILEM-JCI International  
Workshop on CONtrol of CRACKing in  
Concrete Structures 2012  
(CONCRACK 3)**

**Crack Control of Mass Concrete and  
Related Issues Concerning Early-Age of  
Concrete Structures**

**Paris, France  
15-16 March 2012**

**Editors:**

**F. Toutlemonde**

**J.-M. Torrenti**

**ISBN: 978-1-62276-254-5**

**Printed from e-media with permission by:**

## Contents

### Recent research results of the French CEOS.fr Project on early-age thermal effects

Jean-Michel Torrenti, Laurie Buffo-Lacarrière & Francis Barré, on behalf of CEOS.fr Program partners. *CEOS.fr experiments for crack control of concrete at early age*..... p. 3

Alain Sellier, Laurie Buffo-Lacarrière, Stéphane Multon, Marie Salgues, Pierre Souyis & Batian Kolani. *Recent modelling advances to predict early age behaviour and prevent induced disorders in concrete structures*..... p. 11

Farid Benboudjema, Matthieu Briffaut, Adrien Hilaire, Jean-Michel Torrenti & Georges Nahas. *Early age behavior of massive concrete structures: from experiments to numerical simulations*..... p. 21

### Early-age thermal effects and DEF prevention

Bruno Godart & Loïc Divet. *DEF prevention in France and temperature control at early age*. ..... p. 35

Renaud.-Pierre Martin, Céline Bazin, Joël Billo, Marc Estivin, Jean-Claude Renaud & François Toutlemonde. *Experimental evidence for understanding DEF sensitivity to early-age thermal history*..... p. 45

Jean-François Seignol, Othman Omikrine-Metalssi & François Toutlemonde. *Recent advances in modeling DEF effects*. ..... p. 55

Shunsuke Hanehara, Tetsuya Oyamada & Makoto Tanimura. *Delayed Ettringite Formation: the case and research progress in Japan*..... p. 69

François Cussigh. *Experience in limiting early age concrete temperature for DEF prevention*. ..... p. 79

### Control of thermal effects at early age: experimental results and models

Frédéric Grondin, Pierre Mounanga, Emmanuel Rozière, Ahmed Loukili, Mounia Farah, Jean-Pierre Regoin & Arnaud Pertué. *Improving the characterization of early age cracking of concrete: Engineering issues and scientific answers*..... p. 89

Stéphanie Staquet, Brice Delsaute, Aveline Darquennes & Bernard Espion. *Design of a revisited TSTM system for testing concrete since setting time under free and restraint conditions*..... p. 99

Claude Boulay. <i>Test rig for early age measurements of the autogenous shrinkage of a concrete</i> .....	p. 111
Miguel Azenha & Rui Faria. <i>Issues on monitoring and simulating the thermo-mechanical behaviour of concrete since early ages</i> .....	p. 123
Giuseppe Sciumè, Bernhard A. Schrefler & Francesco Pesavento. <i>Thermo-hygro-chemo-mechanical modelling of the behavior of a massive beam with restrained shrinkage</i> .....	p. 133
Geert de Schutter. <i>Degree of hydration concept for early age concrete - A summary</i> .....	p. 145
 <b>Control of thermal effects at early age: applications</b>	
Calin Mircea & Andrei Faur. <i>Thoughts upon shrinkage induced cracking of concrete. A structural designer perspective</i> .....	p. 157
Gabriele Bertagnoli & Giuseppe Mancini. <i>Autogenous deformations in massive concrete structures</i> .....	p. 167
Laurent Boutillon, Lionel Linger, Batian Kolani & Edouard Meyer. <i>Effects of sun irradiation on the temperature and early age stress distribution in external concrete structure</i> ...p.	181
Taira Yamamoto & Takeshi Ohtomo. <i>Practices for crack control of concrete in Japan</i> ..	p. 193
Antonio R. Mari, María D. Crespo, Climent Molins, Jesús M. Bairán & Denise Ferreira. <i>A filament beam-column model for the non-linear analysis of RC frames including the early age effects</i> .....	p. 201
Luca Sorelli, François Toutlemonde, Franz-Josef Ulm, Vic Perry, Dominique Corvez & Alireza Sheikh. <i>Analysis of early-age cracking for UHPFRC elements (cast-in-place or prefabricated) based on experience of Glenmore / “Passerelle des Anges” footbridges</i> .....	p. 211
 <b>Authors’ Index</b> .....	p. 223
