34th Annual Meeting of the Cognitive Science Society 2012 (CogSci 2012)

Building Bridges Across Cognitive Sciences Around the World

Sapporo, Japan
1-4 August 2012

Volume 1 of 3

Editors:

Naomi Miyake
David Peebles
Richard P. Cooper

ISBN: 978-1-62276-304-7

Table of Contents

Introduction 1

Organizing Committee 3

Program Committee 4

Sponsors 5

Conference Awards 6

Gluskho Dissertation Prizes and NSF Fellowships 8

Invited Plenary Presentations 9

Workshops

Women in Cognitive Science sponsored interactive panel discussion: Professional advancement, leadership and international collaboration 10
Laurie Beth Feldman, Janet van Hell, Judith Kroll, Suparna Rajaram

Teleoperated Android as a Tool for Cognitive Studies, Communication and Art 12
Shuichi Nishio, Hiroshi Ishiguro

Modeling the Perception of Intentions 14
Barbara Tversky, Shimon Ullman, Dare Baldwin, Frank E. Pollick, Joshua Tenenbaum, Tao Gao, Peter Pantelis, David Pautler

Tutorials

And Now for Something Completely Different: Python in Cognitive Science 16
Mark Andrews, Jesse Diaz

Full day tutorial on Quantum models of cognition and decision 18
Jerome Busemeyer, Peter Bruza, Taiki Takahashi, Jennifer Trueblood

Using Bayes to Interpret Non-significant Results 20
Zoltan Dienes

Nengo and the Neural Engineering Framework: From Spikes to Cognition 22
Chris Eliasmith, Terrence Stewart

Probability, programs, and the mind: Building structured Bayesian models of cognition 24
Noah Goodman, Joshua Tenenbaum

Using Machine Learning for Exploratory Data Analysis 26
Joshua Lewis, Virginia de Sa

Practical Advice on How to Run Human Behavioral Studies 28
Frank Ritter, Jong kim

Symposia

Robotics and Emotion 30
Rolf Pfeifer, Hiroshi Ishiguro, Yuichiro Anzai, Naomi Miyake

Computational Models of Intuitive Physics 32
Peter Battaglia, Tomer Ullman, Joshua Tenenbaum, Adam Sanborn, Kenneth Forbus, Tobias Gerstenberg, David Lagnado

The role of comparison in structure learning: Developmental, learning science, and computational perspectives 34
Stella Christie, Dedre Gentner, Mutsumi Imai, Etsuko Haryu, Hiroyuki Okada, Ji Y. Son, James Stigler, Leonidas Doumas, Robert G. Morrison, Lindsey E. Richland

Neural Computations Supporting Cognition: Rumelhart Prize Symposium in Honor of Peter Dayan 36
Kenji Doya, John O'Doherty, Alexandre Pouget, Peter Bossaerts, Nathaniel Daw, Yael Niv

Thirty years of Marr's Vision: Levels of Analysis in Cognitive Science 38
Chris Eliasmith, Tom Griffiths, Valerie Gray Hardcastle, Brad Love, William Bechtel, Richard P. Cooper, David Peebles

New Frontiers in Computational Models of Grammatical Development 40
Micah Goldwater, Scott Friedman, Dedre Gentner, Kenneth Forbus, Cynthia Fisher, Michael Connor, Dan Roth, Franklin Chang, Gary Dell

Computational, Cognitive, and Neural Models of Decision-making Biases 42
Jonathan Malmaud, Joshua Tenenbaum, Peter Dayan, Laurence Maloney, Edward Vul, Nick Chater

Governing Board Symposium: Cognitive Science and the Learning Sciences 44
Naomi Miyake, Roy Pea, Reinhart Pekrun, Kurt Van Lehn, Richard Catrambone, Stella Vosniadou

How Vertical Spaces Are Perceived and Represented 46
Daniele Nardi, Frank Durgin, Kate Jeffery, Steven Weisberg

What Can Cognitive Science Say or Learn about Economic Crises? 48
Magda Osman, Björn Meder, Gerd Gigerenzer, Nick Chater, Daniel Read, Hansjörg Neth

Dynamic decision making: neuronal, computational, and cognitive underpinnings 50
Magda Osman, Maarten Speekenbrink, Peter Dayan, Masataka Watanabe, Nigel Harvey

Grammatical Approaches to Written and Graphical Communication 52
Colin Wilson, Neil Cohn, James Myers, Stephen Goldberg, Ariel Cohen-Goldberg

Papers

Constructing a hypothesis space from the Web for large-scale Bayesian word learning 54
Joshua Abbott, Joseph Austerweil, Tom Griffiths

Predicting focal colors with a rational model of representativeness 60
Joshua Abbott, Terry Regier, Tom Griffiths

Gestures in Communication through Line Graphs 66
Cengiz Acarturk, Ozge Alacam

Distributional Learning of Vowel Categories Is Supported by Prosody in Infant-Directed Speech 72
Frans Adriaans, Daniel Swingley

Emotion-Based Reinforcement Learning 78
Woo-Young Ahn, Olga Rass, Yong-Wook Shin, Jerome R. Busemeyer, Joshua W. Brown, Brian F. O'Donnell

Cooperation in risky environments: Decisions from experience in a stochastic social dilemma 84
Florian Artinger, Nadine Fleischhut, Vittoria Levati, Jeffrey R. Stevens

Modeling individual differences in socioeconomic game playing 90
Derrik Asher, Shunan Zhang, Andrew Zaldivar, Michael Lee, Jeffrey Krichmar

Lexical Access Across Languages: A Multinomial Model of Auditory Distraction 96
Philip Beaman

Diagramming Phenomena for Mechanistic Explanation 102
William Bechtel, Adele Abrahamsen

Route choice in individuals—semantic network navigation 108
Nicole Beckage, Mark Steyvers, Carter Butts

Competent Deontic Reasoning: The Abstract Deontic Selection Task Revisited 114
Sieghard Beller, Andrea Bender

That's what she (could have) said: How alternative utterances affect language use 120
Leon Bergen, Noah Goodman, Roger Levy

Word predictability and frequency effects in a rational model of reading 126
Klinton Bicknell, Roger Levy

The retriever-connector model: Matching Classroom Data and Agent-Based Computer Models to Simulate Students' Use of Multiple Epistemological Resources 132
Paulo Blikstein

Inducing Mathematical Concepts from Specific Examples: The Role of Schema-Level Variation ... 138
David Braithwaite, Robert Goldstone

Learning to recognize unfamiliar voices: the role of language familiarity and music experience 144
Micah Bregman, Sarah Creel

Misconceptions Regarding Emergent Phenomena Vary By Domain 150
Sarah Brem, Glenda Stump, Gale Sinatra, Raymond Reichenberg, Benjamin Heddy

Do I know that you know what you know? Modeling testimony in causal inference 156
Daphna Buchsbaum, Sophie Bridgers, Andrew Whalen, Elizabeth Seiver, Tom Griffiths, Alison Gopnik

Revisiting the Relationship between Allocentric-Heading Recall and Self-Reported Sense of Direction 162
Heather Burte, Mary Hegarty

Space-Time Interdependence and Sensory Modalities: Time Affects Space in the Hand But Not in the Eye 168
Zhenguang Cai, Louise Connell

Sentic Panalogy: Swapping Affective Common Sense Reasoning Strategies and Foci 174
Erik Cambria, Daniel Olsher, Kenneth Kwok

Object discovery and inverse physical reasoning 180
Christopher Carroll, Charles Kemp

Category structure modulates interleaving and blocking advantage in inductive category acquisition 186
Paulo Carvalho, Robert Goldstone

Implicit Learning of L2 word stress rules 192
Ricky Chan, Janny Leung

Generating Realistic Semantic Codes for Use in Neural Network Models 198
Ya-Ning Chang, Steve Furber, Stephen Welbourne

Word Form Encoding in Mandarin Chinese Typewritten Word Production 204
Jenn-Yeu Chen, Train-Min Chen

What Counts in Mandarin Chinese: A Study of Individuation and Quantification 210
Pierina Cheung, Peggy Li, David Barner

The Role of Preview and Incremental Delivery on Visual Search 216
Eric Chiu, Michael Spivey

Determining Relevance: Close Enough is Good Enough 222
Sheldon Chow

Subject Relative Production in SLI Children during Syntactic Priming and Sentence Repetition .. 228
Moreno Coco, Maria Garraffa, Holly Branigan

Segmenting Visual Narratives: Evidence for Constituent Structure in Comics 234
Neil Cohn, Phillip Holcomb, Ray Jackendoff, Gina Kuperberg

Framing attention in American and Japanese comics 240
Neil Cohn, Amaro Taylor-Weiner, Suzanne Grossman

Early-Talker and Late-Talker Toddlers and Networks Show Different Word Learning Biases 246
Eliana Colunga, Clare Sims

Do you see what I'm singing? Visuospatial movement biases pitch perception 252
Louise Connell, Zhenguang Cai, Judith Holler

Flexible Shortcuts: Linguistic Distributional Information Affects both Shallow and Deep Conceptual Processing 258
Louise Connell, Dermot Lynott

Exploring Decision Rules and Sampling Dynamics in Recognition Memory 264
Gregory Cox, Richard Shiffrin

Reverse appraisal: The importance of appraisals for the effect of emotion displays on people's decision making in a social dilemma 270
Celso de Melo, Jonathan Gratch, Peter Carnevale, Stephen Read

Neural correlates of social perception: The posterior superior temporal sulcus is modulated by action rationality, but not animacy 276
Ben Deen, Rebecca Saxe

The Role of Linguistic Labels in Infants' Categorization: An Eye Tracking Study 282
Sophia Deng, Vladimir Sloutsky

Learning Deterministic Causal Networks from Observational Data 288
Ben Deverett, Charles Kemp

Enhanced Performance for Recognition of Irrelevant Target-Aligned Auditory Stimuli: Unimodal and Cross-modal Considerations 294
Andrew Dewald, Scott Sinnett

The semantic structure of sensory vocabulary in an African language 300
Mark Dingemanse, Asifa Majid

The Sound of Thickness: Prelinguistic Infants' Associations of Space and Pitch 306
Sarah Dolscheid, Sabine Hunnius, Daniel Casasanto, Asifa Majid

What explains variability in brain regions associate with Theory of Mind in a large sample of neurotypical adults and adults with ASD? 312
Nicholas Dufour, Elizabeth Redcay, Liane Young, Penelope Mavros, Joseph Moran, Christina Triantafyllou, John Gabrieli, Rebecca Saxe

Explanations of Counterfactual Inferences 318
Brian Edwards, Lance Rips

Learning Conceptual Hierarchies by Iterated Relational Consolidation 324
James Foster, Fabian Canas, Matt Jones

"Eyes Closed" and "Eyes Open" Expectations Guide Fixations in Real-World Search 330
Tom Foulsham

Maximum utility unitary coherent perception vs. the Bayesian brain 336
Charles Fox, Tom Stafford

Measuring children's visual access to social information using face detection 342
Michael Frank

The Effects of Feedback During Exploration Depend on Prior Knowledge 348
Emily Fyfe, Bethany Rittle-Johnson

Children's Inferences in Generalizing Novel Nouns and Adjectives 354
Annie Gagliardi, Erin Bennett, Jeffrey Lidz, Naomi H. Feldman

When Suboptimal Behavior is Optimal and Why: Modeling the Acquisition of Noun Classes in Tsez 360
Annie Gagliardi, Naomi H. Feldman, Jeffrey Lidz

Verbal Satiation of Chinese Bisyllabic Words: A Semantic Locus and its Time Course 366
Bruno Galmar, Jenn-Yeu Chen

Online learning of causal structure in a dynamic game situation 372
Yue Gao, Eyal Nitzany, Shimon Edelman

Noisy Newtons: Unifying process and dependency accounts of causal attribution 378
Tobias Gerstenberg, Noah Goodman, David Lagnado, Joshua Tenenbaum

Explaining children's failure in analogy making tasks: A problem of focus of attention? 384
Yannick Glady, Jean-Pierre Thibaut, Bob French, Agnes Blaye

Knowledge and implicature: Modeling language understanding as social cognition 390
Noah Goodman, Andreas Stuhlmüller

Analogical Problem Solving: Insights from Verbal Reports 396
Linn Gralla, Thora Tenbrink, Michael Siebers, Ute Schmid

Comparing the inductive biases of simple neural networks and Bayesian models 402
Thomas Griffiths, Joseph Austerweil, Vincent Berthiaume

Cooperation in Prisoner's Dilemma Game: Influence of Social Relations 408
Maurice Grinberg, Evgenia Hristova, Milena Borisova

Evaluating the Relationship Between Neuropsychological Function and Cognitive Performance 414
Glenn Gunzelmann, L. Richard Moore

The Interplay between Feature-Saliency and Feedback Information in Visual Category Learning Tasks 420
Rubi Hammer, Vladimir Sloutsky, Kalanit Grill-Spector

Self-Terminated vs. Experimenter-Terminated Memory Search 426
J. Isaiah Harbison, Erika Hussey, Michael Dougherty, Eddy Davelaar

The use of ACT-R to develop an attention model for simple driving tasks 432
Kerstin Sophie Haring, Marco Ragni, Lars Konieczny, Katsumi Watanabe

Testing the Split Attention Effect on Learning in a Natural Educational Setting Using an Intelligent Tutoring System for Geometry 438
Robert Hausmann, Annalies Vuong

The effect of "Maverick": A study of Group Dynamics on Breakthrough in Collaborative Problem solving 444
Yugo Hayashi

Tightening up Joke Structure: Not by Length Alone 450
Christian F. Hempelmann, Julia M. Taylor, Victor Raskin

Logical or Pragmatic, as Long as it Suits our Convenience: Scalar Inferences in a Pro-and Contra-attitudinal Context 456
Tom Heyman, Walter Schaeken, Katrijn Pipijn

Do repeated references result in sign reduction? 461
Marieke Hoetjes, Emiel Krahmer, Marc Swerts

When gestures catch the eye: The influence of gaze direction on co-speech gesture comprehension in triadic communication 467
Judith Holler, Spencer Kelly, Peter Hagoort, Asli Ozyurek

Learning from speaker word choice by assuming adjectives are informative 473
Alexandra Horowitz, Michael Frank

Finishing each other's . . . Responding to incomplete contributions in dialogue 479
ChrIstine Howes, Patrick G. T. Healey, Matthew Purver, Arash Eshghi

Identifying representations of categories of discrete items using Markov chain Monte Carlo with People 485
Anne Hsu, Jay Martin, Adam Sanborn, Tom Griffiths

Social Networks are Encoded in Language 491
Sterling Hutchinson, Vivek Datla, Max Louwerse

Memory Indexing of Sequential Symptom Processing in Diagnostic Reasoning 497
Georg Jahn, Janina Braatz

Gestures Alter Thinking About Time 503
Azadeh Jamalian, Barbara Tversky

The Role of Task Characteristics in Children's Scalar Implicature Production 509
Leen Janssens, Walter Schaeken

Learning What is Where from Social Observations 515
Julian Jara-Ettinger, Chris Baker, Joshua Tenenbaum

Generalization of Learning in Games of Strategic Interaction 521
Ion Juvina, Christian Lebiere, Cleotilde Gonzalez, Muniba Saleem

Actively Learning Nouns Across Ambiguous Situations 527
George Kachergis, Chen Yu, Richard Shiffrin

Learning Nouns with Domain-General Associative Learning Mechanisms 533
George Kachergis

Testing a Distinctiveness Explanation of the Primacy Effect in Free Recall Using Event-Related Potentials 539
Siri-Maria Kamp, Glen R. Forester, Anthony R. Murphy, Ty Brumback, Emanuel Donchin

Modeling Learning of Relational Abstractions via Structural Alignment 545
Subu Kandaswamy, Kenneth Forbus

From Hands to Minds: Gestures Promote Action Understanding 551
Seokmin Kang, Barbara Tversky, John Black

An experimental investigation of consistency of explanation and graph representation 557
Nana Kanzaki, Kazuhisa Miwa

The Influence of Virtual Agents' Gender and Rapport on Enhancing Math Performance 563
Bilge Karacora, Morteza Dehghani, Nicole Krämer-Mertens, Jonathan Gratch

A tripartite trans-modal relationship among sounds, shapes and emotions: A case of abrupt modulation 569
Shigeto Kawahara, Kazuko Shinohara

Negating compound sentences 575
Sangeet Khemlani, Isabel Orenes, Philip N. Johnson-Laird

mReactr: A computational theory of deductive reasoning 581
Sangeet Khemlani, Greg Trafton

The Specificity of Online Variation in Speech Production 587
Christo Kirov, Colin Wilson

Running it through the body 593
David Kirsh

A belief-updating model of adaptation and cue combination in syntactic comprehension 599
Dave F. Kleinschmidt, Alex B. Fine, T. Florian Jaeger

A continuum of phonetic adaptation: Evaluating an incremental belief-updating model of recalibration and selective adaptation 605
Dave F. Kleinschmidt, T. Florian Jaeger

ERP Responses to Violations in Japanese Verb Conjugation Patterns 611
Yuki Kobayashi, Yoko Sugioka, Takane Ito

Event Segmentation of Agent Interactions: Comparing the Whole with Its Parts 617
Bryan Koenig, Bryan Koenig, David Pautler, Jonathan Herberg, Kum Seong Wan, Brian Monroe, Brian Monroe, Edwin Wirawan

Thinking in Patterns: using multi-voxel pattern analyses to find neural correlates of moral judgment in neurotypical and ASD populations 623
Jorie Koster-Hale, James Dungan, Rebecca Saxe, Liane Young

A Unified Model of Categorical Effects in Consonant and Vowel Perception 629
Yakov Kronrod, Emily Coppess, Naomi Feldman

Early and Repeated Exposure to Examples Improves Creative Work 635
Chinmay Kulkarni, Steven Dow, Scott Klemmer

Role of Error Monitoring Mechanisms in Attribution of Sense of Self-Agency 641
Neeraj Kumar, Jaison A. Manjaly, Krishna P. Miyapuram

Pragmatic interpretation of contrastive prosody: It looks like speech adaptation 647
Chigusa Kurumada, Meredith Brown, Michael Tanenhaus

A Graph-Oriented Approach to Measuring Expertise- Detecting Structural Differences between Experts and Intermediates 653
Andreas Lachner, Johannes Gurlitt, Matthias Nückles

Concept learning as motor program induction: A large-scale empirical study 659
Brenden Lake, Ruslan Salakhutdinov, Joshua Tenenbaum

How many kinds of reasoning? Inference, probability, and natural language semantics 665
Daniel Lassiter, Noah Goodman

A Behavioral Investigation of Dimensionality Reduction 671
Joshua Lewis, Laurens van der Maaten, Virginia de Sa

Modeling Melodic Perception as Relational Learning Using a Symbolic-Connectionist Architecture (DORA) 677
Ahnate Lim, Leonidas Doumas, Scott Sinnett

The persisting benefits of using multiple-choice tests as learning events 683
Jeri Little, Elizabeth Ligon Bjork

The perception of simplified and traditional Chinese characters in the eye of simplified and traditional Chinese readers 689
Tianyin Liu, Janet Hsiao

The Chinese Route Argument: Predicting the Longitude and Latitude of Cities in China and the Middle East Using Statistical Linguistic Frequencies 695
Max Louwerse, Sterling Hutchinson, Zhiqiang Cai

Modeling Multiple Strategies for Solving Geometric Analogy Problems 701
Andrew Lovett, Kenneth Forbus

A unified theory of counterfactual reasoning 707
Christopher Lucas, Charles Kemp

Superspace extrapolation reveals inductive biases in function learning 713
Christopher Lucas, Douglas Sterling, Charles Kemp

Does the utility of information influence sampling behavior? 719
Doug Markant, Todd Gureckis

One piece at a time: Learning complex rules through self-directed sampling 725
Doug Markant, Todd Gureckis

Shallow learning as a pathway for successful learning both for tutors and tutees 731
Noboru Matsuda, Evelyn Yarzebinski, Victoria Keiser, Rohan Raizada, William W. Cohen, Gabriel Stylianides, Kenneth R. Koedinger

Going with TRACE beyond Infant Mispronunciation Studies: Lexical Networks and Phoneme Competition 737
Julien Mayor, Kim Plunkett

Causal Status meets Coherence: The Explanatory Role of Causal Models in Categorization 743
Ralf Mayrhofer, Anselm Rothe

Sparse category labels obstruct generalization of category membership 749
John V. McDonnell, Carol A. Jew, Todd M. Gureckis

Automated and Partner-Specific Factors Influencing Lexical Entrainment 755
Lisette Mol, Rens Bogers, Tommy Bouwens

Gesture structure affects syntactic structure in speech 761
Lisette Mol, Sotaro Kita

Modeling Millisecond Time Interval Estimation in Space Fortress Game 767
Jungaa Moon, John Anderson

The Role of Gesture in Second Language Learning: Communication, Acquisition, & Retention ... 773
Laura Morett, Ray Gibbs, Brian MacWhinney

The Role of Imitation in Generating a Shared Communication System 779
Junya Morita, Takeshi Konno, Takashi Hashimoto

Force Dynamics as a Basis for Moral Intuitions 785
Jonas Nagel, Michael Waldmann

Preservation of the Initial Analysis in Absence of Pragmatic Inference with Japanese Relative Clause Sentences 791
Chie Nakamura, Manabu Arai

The Role of the Amygdala in the Process of Humour Appreciation 797
Tagiru Nakamura, Tomoko Matsui, Akira Utsumi, Mika Yamazaki, Kai Makita, Hiroki C. Tanabe, Norihiro Sadato

The Footbridge Dilemma Reflects More Utilitarian Thinking Than The Trolley Dilemma: Effect Of Number Of Victims In Moral Dilemmas 803
Kuninori Nakamura

Anticipating changes: Adaptation and extrapolation in category learning 809
Daniel Navarro, Amy Perfors

Language-induced Biases on Human Sequential Learning 815
Luca Onnis, EriK Thiessen

Semantic Coherence Facilitates Distributional Learning of Word Meanings 821
Long Ouyang, Lera Boroditsky, Michael Frank

Grounding spatial language in non-linguistic cognition: Evidence for universal and relative spatial semantics in thought 827
Michael Pacer, Alexandra Carstensen, Terry Regier

Elements of a rational framework for continuous-time causal induction 833
Michael Pacer, Tom Griffiths

Musicians are better at learning non-native sound contrasts even in non-tonal languages 839
Amy Perfors, Jia Hoong Ong

Probability matching vs over-regularization in language: Participant behavior depends on their interpretation of the task 845
Amy Perfors

An Operational Model of Joint Attention - Timing of Gaze Patterns in Interactions between Humans and a Virtual Human 851
Nadine Pfeiffer-Lessmann, Thies Pfeiffer, Ipke Wachsmuth

Manipulating Manner: Semantic Representations of Human Locomotion Verbs in English and German 857
Katherine Phelps, Steve Duman

"Less is More" in Bayesian Word Segmentation: When cognitively plausible learners outperform the ideal 863
Lawrence Phillips, Lisa Pearl

Categorial compositionality continued (further): A category theory explanation for the systematicity of recursive cognitive capacities 869
Steven Phillips, William Wilson

Modeling Concept Activation in Working Memory during Online Sentence Processing 875
Patrick Plummer, Hsueh-Cheng Wang, Marc Pomplun, Yuhtsuen Tzeng, Keith Rayner

Exploring the Role of Representation in Models of Grammatical Category Acquisition 881
Ting Qian, Patricia Reeder, Richard Aslin, Joshua Tenenbaum, Elissa Newport

Acoustic analysis supports the existence of a single distributional learning mechanism in structural rule learning from an artificial language 887
Okko Räsänen, Heikki Rasilo

Optimally Designing Games for Cognitive Science Research 893
Anna Rafferty, Matei Zaharia, Thomas Griffiths

Cognitive Workload and the Motor Component of Visual Attention 899
Jason Ralph, Wayne Gray, Mike Schoelles

Order effects in diagnostic reasoning with four candidate hypotheses 905
Felix G. Rebitschek, Agnes Scholz, Franziska Bocklisch, Josef F. Krems, Georg Jahn

Gaze cues in complex, real-world scenes direct the attention of high-functioning adults with autism 911
Elizabeth Redcay, Daniel R O'Young, Lloyd R Slevc, Penelope L Mavros, John D Gabrieli, Pawan Sinha

Examining the Representation and Understanding of Large Magnitudes Using the Hierarchical Alignment model of Analogical Reasoning 917
Ilyse Resnick, Thomas Shipley, Nora Newcombe, Christine Massey, Theodore Wills

The Development of Joint Belief-Desire Inferences 923
Hilary Richardson, Chris Baker, Joshua Tenenbaum, Rebecca Saxe

Expectations About the Temporal Structure of the World Result in the Attentional Blink and Repetition Blindness 929
Cory Rieth, Edward Vul

Relating Activity Contexts to Early Word Learning in Dense Longitudinal Data 935
Brandon Roy, Michael Frank, Deb Roy

Modeling Cognition: How Fiction Relates to Fact 941
Anna-Mari Rusanen, Otto Lappi

Role of Kolmogorov Complexity on Interest in Moral Dilemma Stories 947
Antoine Saillenfest, Jean-Louis Dessalles

Using Concept Map to Evaluate Learning by Searching 953
Hitomi Saito, Yuka Egusa, Masao Takaku, Makiko Miwa, Noriko Kando

Towards a cognitive science of literary style: Perspective-taking in processing omniscient versus objective voice 959
Manami Sato, Hiromu Sakai, Jennifer Wu, Benjamin Bergen

Beyond one's own understanding: How text comprehensibility affects laypeople's decision about scientific claims 965
Lisa Scharrer, M. Anne Britt, Marc Stadtler, Rainer Bromme

Subjective Confidence of Acoustic and Phonemic Representations During Speech Perception 971
Jordan Schoenherr, John Logan, Amy Winchester

Enough is enough: Inductive sufficiency guides learners' ratings of informant helpfulness 977
Patrick Shafto, Hyowon Gweon, Chris Fargen, Laura Schulz

Investigating the Locus of the Word Frequency Effect in Spoken Word Recognition 983
Cynthia Siew, Melvin Yap, Winston Goh

Zero anaphora and object reference in Japanese child-directed speech 989
Cybelle Smith, Michael Frank

Sources of uncertainty in intuitive physics 995
Kevin Smith, Edward Vul

Change detection under autocorrelation 1001
Maarten Speekenbrink, Matthew Twyman, Nigel Harvey

Using listener gaze to augment speech generation in a virtual 3D environment 1007
Maria Staudte, Alexander Koller, Konstantina Garoufi, Matthew Crocker

The effect of metabolic loading on statistical learning 1013
David Stevens, Joanne Arciuli, David Anderson, Mark Williams

Spaun: A Perception-Cognition-Action Model Using Spiking Neurons 1018
Terrence Stewart, Feng-Xuan Choo, Chris Eliasmith

Perception of Randomness: Subjective Probability of Alternation 1024
Yanlong Sun, Hongbin Wang

Time Course of Inhibitory Control During Analogical Reasoning: An Event-Related Potential Approach 1030
Brian Sweis, Krishna Bharani, Robert Morrison

Effects of explicit knowledge on transfer of visuomotor sequence learning 1036
Kanji Tanaka, Katsumi Watanabe

Spontaneous body movements in spatial cognition 1042
Sergiu Tcaci Popescu, Mark Wexler

Auditory Saliency Using Natural Statistics 1048
Tomoki Tsuchida, Garrison Cottrell

A Multi-Measure Analysis of Context Effects in Multi-Attribute Decision Making: Examining the Similarity, Attraction, and Compromise Effects 1054
Takashi Tsuzuki, Jerome Busemeyer

Mental Arithmetic Efficiency: Interactivity and Individual Differences 1060
Frederic Vallee-Tourangeau

Conceptual alignment in reference with artificial and human dialogue partners 1066
Koen van Lierop, Martijn Goudbeek, Emiel Krahmer

Neural Circuits for Any-Time Phrase Recognition with Applications in Cognitive Models and Human-Robot Interaction 1072
Richard Veale, Matthias Scheutz

An Integrated Model of Associative and Reinforcement Learning 1078
Vladislav Veksler, Christopher Myers, Kevin Gluck

The Impact of Colour Difference and Colour Codability on Reference Production 1084
Jette Viethen, Martijn Goudbeek, Emiel Krahmer

Bayesian Logic and Trial-by-Trial Learning 1090
Momme von Sydow, Klaus Fiedler

Color word learning is a gradual inductive process 1096
Katie Wagner, Karen Dobkins, David Barner

The Role of the Primary Effect in the Assessment of Intentionality and Morality 1102
Michael R. Waldmann, Alex Wiegmann

Children's Causal Learning from Fiction: Assessing the Proximity Between Real and Fictional Worlds 1108
Caren M. Walker, Patricia A. Ganea, Alison Gopnik

Explaining Influences Children's Reliance on Evidence and Prior Knowledge in Causal Induction 1114
Caren M. Walker, Joseph Jay Williams, Tania Lombrozo, Alison Gopnik

An Abductive Approach to Covert Interventions 1120
Hongbin Wang, Yanlong Sun

Choosing quantity over quality: syntax guides interpretive preferences for novel superlatives 1126
Alexis Wellwood, Darko Odic, Justin Halberda, Jeffrey Lidz

Expertise and the Wisdom of Crowds: Whose Judgments to Trust and When 1131
Matthew Welsh

Complex First? On the Priority of Nouns in Language Acquisition and Evolution 1137
Markus Werning

Order Effects in Moral Judgment. Searching for an Explanation 1143
Alex Wiegmann, Yasmina Okan

Explaining increases belief revision in the face of (many) anomalies 1149
Joseph Jay Williams, Caren Walker, Tania Lombrozo

Olfaction in a hunter-gatherer society: Insights from language and culture 1155
Ewelina Wnuk, Asifa Majid

Learning (to Learn) from Spatial Attention Cues During Infancy 1161
Rachel Wu, Natasha Kirkham

Adaptive Information Search and Decision Making over Single and Repeated Plays 1167
Dirk U. Wulff, Thomas T. Hills, Ralph Hertwig

Stable Self-to-Object Spatial Relations Acquired from Sequential Spatial Learning 1173
Chengli Xiao, Fudan Chen

Mutual Affects in Computer-mediated Collaborative Learning: Positive Feelings Shared by Collaborators Enhance System Evaluations 1179
Takashi Yamauchi, Takehiko Ohno, Momoko Nakatani, Yoichi Kato, Art Markman

Implicit Learning: A Demonstration and a Novel SRT Paradigm 1185
Fayme Yeates, Fergal Jones, Andy Wills, Mike Aitken, Ian P. L. McLaren

The Effect of Semantic Similarity is a Function of Contextual Constraint 1191
Hongoak Yun, Gail Mauner, Douglas Roland, Jean-Pierre Koenig

Mutual Exclusivity and Vocabulary Development 1197
Daniel Yurovsky, Ricardo Bion, Linda Smith, Anne Fernald

Quantitative Linking Hypotheses for Infant Eye Movements 1203
Daniel Yurovsky, Shohei Hidaka, Rachel Wu

Does Statistical Word Learning Scale? It's a Matter of Perspective ..... N/A
Daniel Yurovsky, Linda Smith, Chen Yu

Inferring Covert Events in Logical Metonymies: a Probe Recognition Experiment 1215
Alessandra Zarcone, Sebastian Pado, Alessandro Lenci

Sparse Population Code Models of Word Learning in Concept Drift 1221
Byoung-Tak Zhang, Jung-Woo Ha, Myunggu Kang

The role of recent versus future events in children's comprehension of referentially ambiguous sentences: Evidence from eye tracking 1227
Lu Zhang, Lily Kornbluth, Pia Knoeferle

Updating: Learning versus supposing 1233
Jiaying Zhao, Vincenzo Crupi, Katya Tentori, Branden Fitelson, Daniel Osherson

Publication-Based Talks

Humor, Emotions and Communication: Human-like Issues of Human-Computer Interactions ... 1238
Pawel Dybala, Kohichi Sayama

Meta-Representational Competence as an Aspect of Spatial Intelligence 1240
Mary Hegarty

Posters

Rationality-Guided AGI as Cognitive Systems 1242
Ahmed M. H. Abdel-Fattah, Tarek R. Besold, Helmar Gust, Ulf Krumnack, Martin Schmidt, Kai-Uwe Kühnberger, Pei Wang

Musical Relevance: a Computational Approach 1248
Edoardo Acotto, Daniele Radicioni

Examining the Connection Between Dynamic and Static Spatial Skills and Video Game Performance 1254
Deanne Adams, Rich Mayer

Erroneous Examples Versus Problem Solving: Can We Improve How Middle School Students Learn Decimals? 1260
Deanne Adams, Bruce McLaren, Kelley Durkin, Rich Mayer, Bethany Rittle-Johnson, Seiji Isotani, Martin van Velsen

A Multi-Category Theory of Intention 1266
Henny Admoni, Brian Scassellati

A Narratological Approach for Narrative Discourse: Implementation and Evaluation of the System based on Genette and Jauss 1272
Taisuke Akimoto, Takashi Ogata

A Bayesian Model of the Effect of Object Context on Visual Attention 1278
Ben Allison, Frank Keller, Moreno I. Coco

The Theory of Visual Attention without the race: a new model of visual selection 1284
Tobias Andersen, Søren Kyllingsbæk

The Development of Second-order Social Cognition and its Relation with Complex Language Understanding and Memory 1290
Burcu Arslan, Annette Hohenberger, Rineke Verbrugge

Learning of motor maps from perception: a dimensionality reduction approach 1296
