TABLE OF CONTENTS

Volume 1

Turboelectric Distributed Propulsion System Modelling for Hybrid-Wing-Body Aircraft 1
Chengyuan Liu, Georgios Doulgeris, Panagiotis Laskaridis, Riti Singh

Sensitivity of Mission Energy Consumption to Turboelectric Distributed Propulsion Design Assumptions on the N3-X Hybrid Wing Body Aircraft 14
James Felder, Julio Chu, Michael Tong

Hybrid Axial and Cross-Flow Fan Propulsion for Transonic Blended Wing Body Aircraft 28
Joseph Kummer, Jimmie Allred, James Felder

Development of a Wave Disk Engine Experimental Facility 54
P. Parraga-Ramirez, M. Varney, E. Tarkleson, Norbert Müller, Pezhman Akbari, Janusz Piechna

Thermodynamics of the Wave Disk Engine 66
G. Sun, Pezhman Akbari, B. Gower, Norbert Müller

Experimental Optimization of Static Valveless Self-Aspiration of a Pulse Detonation Engine 80
William Stoddard, Andrew St. George, Robert Driscoll, Ephraim Gutmark

Experimental Study of Shock Transfer in a Multiple Pulse Detonation-Crossover System 90
Robert Driscoll, William Stoddard, Andrew St. George, Bradley Romanchuk, David Munday, Ephraim Gutmark

Current Status of Superheat Spray Modeling with NCC 99
Manthena Raju, Dan Bulzan

Theoretical Prediction of Droplet Diameters Based on Energy Conservation Law 120
Chihiro Inoue, Toshinori Watanabe, Takehiro Himeno, Seiji Uzawa, Mitsuo Koshi

Nanopropulsion from High-Energy Particle Beams via Dispersion Forces in Nanotubes 135
Fabrizio Pinto

USAF High Energy Laser (HEL) Systems: Multi-Spectral Algorithm Efficiencies Susceptibilities During Missile Staging [Case: GHADR 110 MOD 2 (SEJIL-2)] 166
Clifford Paiva, H. Slusher

Phase-Change Thermal Energy Storage and Conversion: Development and Analysis for Solar Thermal Propulsion 187
David Scharfe, Matthew Gilpin, Marcus Young

Effect of Nuclear Side Reactions on Magnetic Fusion Reactors in Space 198
Georg Herdrich, Roland Gabrielli, Hans-Peter Röser, Sebastian Haid, Martin Heyn, Dejan Petkow

Shape of Characteristics of a Transonic Compressor 215
Christian Pixberg, Martin Müller, Sebastian Leichtfuss, Heinz-Peter Schiffer

The Sensitivity of Multistage Compressor Performance to Inlet Boundary Conditions 227
John Brossman, Patrick Ball, Natalie Smith, Jeanne Methel, Nicole Key

Performance Measurements of a Low-Speed Single-Stage Axial-Flow Compressor 239
Bradley Butler, Vincent Capece

Effect of Diminishing Particle Size on Solid Rocket Combustion Instability Symptom Suppression 245
David Greatrix

Studies on Effect of Head Cavity on Resonance Damping Characteristics in Solid Rocket Motors 261
Qiao Zhang, Junwei Li, Wanxing Su, Yan Zhang, Ningfei Wang

Reaction Rate Analysis for Selected Solid-to-Solid-Reaction Pyrotechnic Compositions 285
Lien Yang

A Particle Level-set Based Eulerian Method for Simulating Explosively Driven Metal Pipe 324
Kihong Kim, Bohoon Kim, Jack Yoh

The Effects of Background Pressure on Hall Thruster Operation 341
Kevin Diamant, Rotislav Spektor, Edward Beiting, Jason Young, Thomas Curtiss

Analysis of a Plasma Test Cell Including Non-neutrality and Complex Collision Mechanisms 354
Paul Giuliano, Iain Boyd

A Step Towards Electric Propulsion Testing Standards: Pressure Measurements and Effective Pumping Speeds 367
John Dankanich, Michael Swiatek, John Yim

Capillary Extraction of the Ionic Liquid [Bmim][DCA] for Variable Flow Rate Operations 380
Benjamin Prince, Shawn Miller, Joshua Rovey

Demonstration of an Automated Mass Flow Control System for Condensable Propellant Hall-effect Thrusters 393
Mark Hopkins, Lyon King

Power and Propulsion Options for Piloted Solar System Exploration 404
Brice Cassenti

An Overview of the NASA Ames Millimeter-Wave Thermal Launch System 412
David Murakami, Kevin Parkin

Atmospheric Mining in the Outer Solar System: Resource Capturing, Storage, and Utilization 422
Bryan Palaszewski

Ground Testing a Nuclear Thermal Rocket: Design of a Sub-scale Demonstration Experiment 435
Steven Howe, David Bedsun, Deborah Lee, Margaret Townsend, Clay Cooper, Jenny Chapman, Mel Bulman, Ronald Samborski, Daniel Brasuell, Stanley Borowski

Simulation of a Shear Coaxial GO2/GH2 Rocket Injector with DES and LES Using Flamelet Models 445
Siddharth Thakur, Jeffrey Wright, Matthias Ihme, Kevin Tucker

The Impinging-type Injector Design of MMH/NTO Liquid Rocket Engine 462
Tony Yuan, Cetera Chen, Berlin Huang, Marx Tang, Yu-Ta Chen
A Mechanistic Assessment of Swirl Injection and Atomization by X-ray Radiographic and Optical Techniques 474
Chad Eberhart, David Lineberry, Robert Frederick Jr., Alan L. Kastengren
Experimental Evaluation of a Reverse Engineering Swirl Atomizer 486
M. Ziraksaz, F. Ommi, D. Ganji, M. Ashjaee
Numerical Investigation of Hybrid Motors for the EU FP7 SPARTAN Program 496
Marta Lazzarin, Nicolas Bellomo, Francesco Barato, Martina Faenza, Davide Rondini, Marco Manente, Alberto Bettella, Daniele Pavarin
Combustion Modeling and Analysis of Hybrid Rocket Motor Internal Ballistics 519
Yensen Chen, Y. Y. Lian, L. Yang, B. Wu, T. H. Chou, J. S. Wu
Numerical Modeling of Paraffin-Based Fuels Behavior 530
Francesco Barato, N. Bellomo, M. Lazzarin, F. Moretto, Alberto Bettella, Daniele Pavarin
Fundamental Jet Noise Reduction Science and Technology 549
Kailas Kailasanath, J. H. Liu, A. Corrigan, R. Ramamurti
Jet Noise Reduction Potential from Emerging Variable Cycle Technologies 556
Brenda Henderson, James Bridges, Mark Wernet
The Structure of Near Field Pressure Fluctuations Surrounding a Supersonic Jet 571
Dean Long
Feasible Study on Low Frequency Plasma Jet as Ignition System for HAN Based Propellant 584
Toshiaki IIzuka, Minori Komatsu, Toru Tajika, Junichiro Aoyagi, Haruki Takegahara, Taiichi Nagata
Development of a 90% Hydrogen Peroxide Mono-Propellant Propulsion System for the Warm Gas Test Article 592
Wayne Neumaier Jr., Mark Wells, Anthony Brinkley, Thomas Talty
One Newton Thruster by Plasma-assisted Combustion of HAN-based Monopropellant 603
Akira Kakami, Keisuke Ideta, Takuya Ishibashi, Takeshi Tachibana
Development of Mono-Propellant Propulsion System for a Japanese Microsatellite 'Hodoyoshi-1' 608
Shutaro Nishikizawa, Nobuyoshi Suzuki, Hironori Sahara, Naoki Miyashita, Yusuke Kuramoto
Two-Mode Active Thrust Modulation of a Solid Propellant Rocket Motor 612
Masafumi Tanaka, Yoichi Osawa, Yasushi Yokomine
Performance Improvement of a Laser-Ignition Micro Solid Rocket by Controlling the Combustion Wave Front 618
Hiroyuki Koizumi, Yusuke Masuda, Masakatsu Nakano, Kimya Komurasaki, Yoshihiro Arakawa, Tomoyuki Hayashi
Kinetic Modeling of Hypergolic Propellants Using Impinging Element Injectors 625
Swanand Sardeshmukh, Steve Heister, Guoping Xia, Charles Merkle
Time-Averaged Characteristics of a Reacting Fuel Jet in Vitiated Cross-Flow 644
Ryan Sullivan, Benjamin Wilde, David Noble, Karthik Periagaram, Jerry Seitzman, Tim Lieuwen
Characteristics of a Supersonic Model Combustor with Two-Staged Injections of Supercritical Kerosene 657
Taichang Zhang, Yueming Yuan, Jianguo Li, Xuejun Fan
The Design of a Kerosene Turbopump for a South African Commercial Launch Vehicle 669
Jonathan Smyth, Jeffery Bindon, Michael Brooks, Graham Smith, Glen Snedden
Analysis of a Distributed Hybrid Propulsion System with Conventional Electric Machines 681
Michael Green, Benjamin Schiltgen, Andrew Gibson
Benefits and Concerns of Hybrid Electric Distributed Propulsion with Conventional Electric Machines 693
Benjamin Schiltgen, Michael Green, Andrew Gibson, David Hall, Darold Cummings, Craig Hange
Dynamic Response and High Cycle Fatigue Analysis of Fan Blades under Inlet Distortion 712
Georgios Doulgeris, Guillaume Lelias, Riti Singh, Panagiotis Laskaridis, P. Pilidis
Examining Non-Uniform Generator and Propulsor Control Schemes for a Hybrid Electric Propulsion Concept 724
David Trawick, Christopher Perullo, Dimitri Mavris
Exploratory Simulations of the HIFiRE 2 Scramjet Flowpath 735
Robert Yentsch, Datta Gaitonde
Numerical Simulation of a Hypervelocity Scramjet Engine Using Silane - Hydrogen Fuel 757
Patrick Vogel, Jack Edwards
High Fidelity Analysis of a Reacting Pulsed Supersonic Combustor 775
Faure Malo-Molina, Houshang Ebrahimi
Radiative Heating in Hydrocarbon-fueled Scramjet Engines 789
Jiwen Liu, Michael Brown
Characterization of Supersonic Flow Interaction with Shockwaves Using Laser-based Diagnostics 806
Steven Etheridge, Jong Guen Lee, Campbell Carter, Mark Hagenmaier, Ryan Milligan
Novel Glow Plug for Compact High Density Engine Applications Operating on Heavy Fuels 816
Benjamin Baird, Shahrokh Etemad
Turbine-Burner Model: Cavity Flameholding in a Converging, Turning Channel Flow 826
William Sirignano, Ben J. Colcord, Feng Liu
Modeling and Simulation of Enhanced Reactant-Product Mixing in Ultra Compact Combustors 859
Alejandro Briones, Balu Sekar, Hugh Thornburg
Combination of Fluidic Thrust Modulation and Vectoring in a 2D Nozzle 876
Ashraf Ali, Carlos Rodriguez, Andrew Neely, John Young
Effect of Ambient Pressure Fluctuations on the Dual-Bell Transition Behavior 889
Shashi Verma, Ralf Stark, Oskar Haidn
Preliminary Trajectory Analysis of Microwave Rocket with Reed Valve Air-breathing System 899
Masafumi Fukunari, Anthony Arnault, Toshikazu Yamaguchi, Kimiya Komurasaki, Hiroyuki Koizumi, Yoshihiro Arakawa, Ikkoh Funaki, Hiroshi Katsurayama

Design of a Laboratory Hall Thruster with Magnetically Shielded Channel Walls, Phase II: Experiments 907
Richard Hofer, Dan Goebel, Ioannis Mikellides, Ira Katz

Volume 2

Design of a Laboratory Hall Thruster with Magnetically Shielded Channel Walls, Phase III: Comparison of Theory with Experiment 946
Ioannis Mikellides, Ira Katz, Richard Hofer, Dan Goebel

Potential Contours in Ion Focusing Hall Thruster 972
Kunning Xu, Hoang Dao, Mitchell Walker

Dependence of Lifetime on Magnetic Field Configuration in a Hall Thruster 990
Naoji Yamamoto, Hideki Nakashima, Azer Yalin

Investigating Ion Fragmentation in Electrospray Thruster Beams 995
Thomas Coles, Paulo Lozano, Timothy Fedkiw

Simulated Beam Extraction Performance Characterization of a 50 cm Ion Thruster Discharge 1012
John Foster, Sarah Nowak-Gucker, Aimee Hubble, Peter Peterson, Chris Davis, Eric Viges, Dave Chen

An Experimental Study of Single Cathode Gridded Ion Thrusters 1024
Yukio Hayakawa, Katsuhiro Miyazaki, Hiroshi Nagano, Yasushi Ohkawa, Toshiahru Higuchi, Shoji Kitamura

Numerical Lifetime Evaluation of Ion Thruster's Ion Optics Using the JIEDI Tool 1031
Ikkoh Funaki, Hiroki Watanabe, Masakatsu Nakano, Yoshihiro Kajimura, Takeshi Miyasaka, Yoshinori Nakayama, Hitoshi Kuninaka, Iku Shinohara

Annular-Geometry Ion Engine: Concept, Development Status, and Preliminary Performance 1042
Michael Patterson, Daniel Herman, John Foster, Rohit Shastry, Jonathan Van Noord

Failure Mode Analysis of V-Shaped Pyrotechnically Actuated Valves 1055
Jai Sachdev, Ashvin Hosangadi, James D. Chenoweth, Regor Saulsberry, Stephen McDougle

Analyzing the Effects of Electromagnetic Exposure on Energetic Compositions 1066
Charlie Crane, Michelle Pantoya, Brandon Weeks

The Investigation of a Low Pressure Anomaly in a Pressure Cartridge Containing a Double-Base Propellant 1074
William Sanborn, Robert McCoy

2012 CAD/PAD Technology Roadmap Update 1083
Thomas Blachowski, John Burchett

Split Stream Flow Past a Blunt Trailing Edge with Application to Combustion Instabilities 1093
Ivett Leyva, Vicky Tian, Beverley McKeon

Numerical Analysis of Nozzle Material Thermochemical Erosion in Hybrid Rocket Engines 1105
Daniele Bianchi, Francesco Nasuti

Biglobal Stability of Cylindrically-Shaped Hybrid and Solid Rockets with Injecting or Reactive Headwalls 1129
Trevor Elliott, Joseph Majdalani, Joshua W. Batterson

Multi Design Point Cycle Design Incorporation into the Environmental Design Space 1147
Jeff Schutte, Jimmy Tai, Dimitri Mavris

Turboshaft Engine Predesign and Performance Assessment 1160
Stephane Burguburu, Pierre-Marie Basset

Improved Pareto Optimal Engine Cycle Designs Through the Use of a New Pareto Quality Indicator 1172
Nicholas Molino, Jonathan Sands, Scott Duncan, Eriks Osvalds, Dimitri Mavris

A Family of Thrusters for ADN-Based Monopropellant LMP-103S 1186
Mathias Persson, Kjell Anflo, Aaron Dinardi, J.-M. Bahu

Life Test Results for a New 4N (1 lbf) Thrust Class Hydrazine Monopropellant Engine 1201
Vincent C. Yarnot, Gerald T. Brewster

Performance Improvement of Hydrogen Peroxide Monopropellant by Blending Ethanol 1212
Jeongsub Lee, Dongwuk Jang, Sejin Kwon

Fabrication and Testing of CERMET Fuel Materials for Nuclear Thermal Propulsion 1217
Robert Hickman, Jeramie W. Broadway, Omar R. Mireles

Adjoint Design Methods for Nozzles for Reduced Noise in High-Speed Jets 1222
Philip Morris, Nidhi Sikarwar, Dennis K. McLaughlin, Ching-Wen Kuo, Michael Lurie

Investigation of an Axisymmetric Transonic Jet with High Resolution Time-Resolved PIV 1243
Zachary Berger, Kerwin Low, Stanislav Kostka, Sivaram Gogineni, Mark Glauser

Aeroacoustic and Performance Simulations of a Test Scale Open Rotor 1254
Russell Claus

Pressure Oscillations Numerical Simulation in Solid Rocket Motors 1263
Enrico Cavallini, Viviana Ferretti, Bernando Favini, Ferruccio Serraglia, Maurizio Di Giacinto

Theoretical Investigation of the Parietal Vortex Shedding in Solid Rocket Motors 1278
Germain Boyer, Gregoire Casalis, Jean-Luc Estivalezes

The Influence of Thermal Inhibitor Position on Pressure Oscillations in Solid Rocket Motors: Numerical Study 1296
Wanxing Su, Zhijun Wei, Qiao Zhang, Yandong Zhao, Junwei Li, Ningfei Wang

Development of a 6-DoF Simulation of a VFDR Propulsion System 1307
Chistoph Bauer, Norman Hopfe, Pedro Caldas-Pinto, Guido Kurth

Effects of Gas Generator Burn Rate Variability on Variable Flow Ducted Rocket Design and Performance 1319
Daniel Macinnis

Effects of the Distance of High Temperature Metal Particles in a Secondary Combustor of Ducted Rockets 1330
Aya Kamisaka, Kenichi Takahashi, Takuo Kuwahara

Numerical Investigation on Cavity Length for Solid Fuel Scramjet 1336
Xinyan Pei, Zhiwen Wu, Junyi Liu, Zhijun Wei, Ningfei Wang
Development of a Robust and Efficient Parallel Solver for Unsteady Turbomachinery Flows 1347
Jeffrey Wright, Siddharth Thakur, Edward Luke, Nathan Grinstead, Jeffrey West
Major Achievements Reached Through the LAPLACE-BCER Cavitation Test Turbopump Program 1366
Patrick Alliot, Julien Vigouroux, Benoit Pouffary, S. Legoupil, P. Nivet, V. Begin, A. Deneuve
Experimental Results of a Centrifugal Pump Using Hydrazine and MON-3 1371
Hideshi Kagawa, Taiichi Nagata, Akira Okayasu, Shohki Shimizu, Toyohiko Ota
Scaling Study of Wave Rotor Turbo Normalization of an Internal Combustion Engine 1378
Marc Polanka, Brandon Smith, Daniel E. Paxson, John L. Hoke
Aerodynamic Analysis of High Rotation and Low Reynolds Number Propeller 1390
Lucas Oliveira, Hernán Cerón-Muñoz, Fernando Catalano
Thrust Augmentation Using High Power Beam and Reed Valve Air-breathing System 1401
Masafumi Fukunari, Shohei Saitoh, Toshikazu Yamaguchi, Kimiya Komurasaki, Reiji Komatsu, Yasuhisa Oda, Ken Kajiwara, Koji Takahashi, Keishi Sakamoto
Two-Fluid and PIC-Fluid Code Comparison of the Plasma Plume in a Magnetic Nozzle 1409
Jaume Navarro, Mario Merino, Eduardo Ahedo
Towards Computation of Resistive Magnetohydrodynamic Magnetic Nozzle Plasma Flow 1418
Frans Ebersohn, Sharath Girimaji, John Shebalin, David Staack
An Analytical Model for the Flow of Collisionless Plasma Along Magnetic Fields 1429
Justin Little, Edgar Choueiri
Magnetic Nozzle Far-Field Simulation 1445
Mario Merino, Eduardo Ahedo
A Numerical Study on Combustion-Stability Rating of Impinging-Jet Injectors in a Subscale Chamber 1456
Chae Hoon Sohn, Hyo Hyun Choi
Soot Emission Control through Electron Injection for Hydrocarbon Flames 1462
Junya Suzuki, Hideyuki Horisawa, Yuya Matsuzawa, Itsuro Kimura
KHz Particle-image Velocimetry and Emission Measurements of Induced Turbulence in Premixed Propane/Air Flame by Millisecond Pulsed Current-Voltage 1472
Jake Schmidt, Stanislav Kostka, Sukesh Roy, James Gord, Biswa Ganguly
Visualization of Vaporized Kerosene Combustion in a Supersonic Combustor Using Pulsed Schlieren System 1483
Yueming Yuan, Meng Yang, Taichang Zhang, Xuejun Fan
Conceptual Study on Rocket Engine Test Facility for Higher Operability 1493
Toyosaku Ueda, Naoki Nagao, Hideaki Nanri
Cryogenic Propellant Delivery and Controls Facility Development for LOX/Methane Propulsion Research 1502
Francisco Pineda, Jesus Betancourt-Roque, Ahsan Choudhuri
Development and Utilization of Rocket Engine Test Database (REDAK) in Japan Aerospace Exploration Agency 1507
Daizo Sugimori, Toyosaku Ueda, Hideaki Nanri, Toshiro Kanno, Takayuki Shibasaki
A review of Propulsion Industrial Base Studies and an Introduction to the National Institute of Rocket Propulsion Systems 1515
Rajiv Doreswamy, Emma K. Fry
High Density Hall Thruster Propellant Investigations 1530
James Szabo, Bruce Pote, Michael Robin, Surjeet Paintal, Vlad Hruby
Performance and Environmental Test Results of the High Voltage Hall Accelerator Engineering Development Unit 1545
Hani Kamhawi, Thomas Haag, Wensheng Huang, Rohit Shastry, Luis Pinero, Todd Peterson
High Pressure Optically Accessible Rocket Combustor Testing and Evaluation 1559
Christopher Navarro, Jesus Betancourt-Roque, Louis Sanchez, Ahsan Choudhuri
Investigation of the API-Injection Concept in a LOX/LH2 Combustion Chamber at GG/PB Operation Conditions 1565
Dimitry Suslov, Jan Deeken, Oskar Haidn
Interaction of Acoustic Pressure Fluctuations with Supercritical Nitrogen Jets 1574
Martin Schmid, Thomas Sattelmayer
Study on Self-Pulsation Characteristics of Gas/Liquid Shear Coaxial Injector with Annular Liquid Sheets 1584
Jungsoo Yoon, Youngbin Yoon, Jae Mook Chung
Faster-Than-Light Space Warps, Status and Next Steps 1593
Eric Davis
Recent Results of an Investigation of Mach Effect Thrusters 1611
James Woodward, Heidi Fearn
RAMA Experiment - Persistence of Anomalous Thrusting Effects Using Laser Vibration Sensing 1626
Hector Brito, Carlos Dominguez, Roque De Alessandro, Eugenio Galian
Development of a Superconducting Helicon Thruster 1634
John Vitucci, Raymond Sedwick
Investigation of Plasma Properties in a Helicon Injected Inertial Plasma Electrostatic Rocket (HIIPER) 1643
Akshata Krishnamurthy, Benjamin Ulmen, George Chen, Paul Keutelian, Michael Reilly, George Miley
Experimental Assessment of Double Langmuir Probe Analysis Techniques in a Hall Thruster Plume 1652
Daniel Brown, Brian Beal, Joseph Blakely
Ion Current Density Study of the NASA-300M and NASA-457Mv2 Hall Thrusters 1665
Wensheng Huang, Rohit Shastry, Daniel Herman, George Soulas, Hani Kamhawi
A Comparison of Ion Acceleration Characteristics for Krypton and Xenon Propellants within a 600 W Hall Effect Thruster 1694
Gregory Azarnia, William Hargus Jr., Michael Nakles

Optical Emission Spectra of the Iodine Hall Thruster 1704
Benjamin Prince, Yu-Hui Chiu
Progress of the Development of an All-electric Control System of a Rocket Engine 1712
Patrick Alliot, Jean-Noel Chopinet, Francois Lassoudiere, Sylvain Guedron, H. Pinhède, G. Roz, O. Faye, S. Le Gonidec
Experimental and Numerical Study of Thrust-Vectoring Effects by Transverse Gas Injection into a Propulsive Axisymmetric C-D Nozzle 1719
Vladeta Zmijanovic, Viviana Lago, Luc Leger, Mohamed Sellam, Amer Chpoun
Best Practices from the Design and Development of the Ares I Launch Vehicle Roll and Reaction Control Systems 1735
Adam Butt, Chris Popp, Frankie Jernigan, Lila Paseur, Hank Pitts
Application of Sweep to Low Pressure Turbine Blade for Tip Flow Containment 1756
Rachel Trehan, Bhaskar Roy
Aerodynamic Investigation of Incidence Angle Effects in a Large Scale Transonic Turbine Cascade 1765
Ashlie McVetta, Paul Giel, Gerard E. Welch
Heat Transfer Investigation on a Transonic Turbine Cascade with Pulsating Trailing Edge Cooling 1780
Bayindir Saracoglu, Guillermo Paniagua
Design of a High Power Rocket Aerodynamics DAQ Payload 1788
Daniel Cavender, Brandon Setayesh, Nathan Toy, Robert Frederick
Microfluidics in the First-Year Classroom: Understanding the Foundation 1808
Barbara Carruthers, Scott Abernathy, Michael Snyder, Hannah Driscoll, Paul Clingan
Student Design/Build/Test of a Throttleable LOX-LCH$_4$ Thrust Chamber 1821
Thomas Feldman, Andrew Rettenmaier, William Anderson, Michael J. Bedard
Institution and Community Wide Approach to Engineering Workforce Development 1832
Nathaniel Robinson, Ahsan Choudhuri
One-Dimensional, Two-Phase Flow Modeling Toward Interpreting Motor Slag Expulsion Phenomena 1837
Timothy Kibbey
Agglomeration/Breakup Studies on Radial Slot Flows in Solid Rocket Motor 1853
Ki Sun Park, Stephen Heister

Volume 3

Propellant Effects on SRM Upper Stage Internal Ballistics and Performance with Nozzle Erosion Characterization 1872
Enrico Cavallini, Daniele Bianchi, Bernando Favini, Maurizio Di Giacinto, Ferruccio Serraglia
Large Solid Rocket Motors for Future European Launcher 1888
Didier Boury, Aude Copey, Philippe Cloutet, Eric Robert, Nathalie Cesco
How Fast Can We Go To Mars Using High Power Electric Propulsion? 1899
Richard Epenoy, Nicolas Berend, Elisa Cliquet, Jean-Marc Ruault
Analysis of Roll Steering for Solar Electric Propulsion Missions 1919
Dylan Pederson, Jeffery Hojnicki
Executive Summary of Propulsion on the Orion Abort Flight-Test Vehicles 1928
Daniel Jones, Syri Koelfgen, Marvin Barnes, Rachel McCauley, Terry Wall, Brian Reed, C. Duncan
The Vortex Reloaded Project: Numerical Investigation on Fully Tangential Vortex Injection in N_2O - Paraffin Hybrid Motors 1947
Nicolas Bellomo, Francesco Barato, Martina Faenza, Alberto Bettella, Daniele Pavarin
Combustion Characteristics of Paraffin-Fueled Swirling Oxidizer-Flow-Type Hybrid Rocket Engines 1969
Daisuke Saito, Saburo Yuasa, Kousuke Hirata, Takashi Sakurai, Noriko Shiraishi
A Study of Hybrid Rockets with Multi-Section Swirl Injection Method 1977
Yoshihide Hirata, Sho Ohyama, Shigeru Aso, K. Araki, K. Ohe, Yasuhiro Tani, Toru Shimada
Effects of Injector Design and Impingement Techniques on the Atomization of Self-Pressurizing Oxidizers 1989
Benjamin Waxman, Brian Cantwell, Greg Zilliac
Numerical Study of Heat Transfer in Film Cooled Thrust Chambers 2002
Barbara Betti, Emanuele Martelli, Francesco Nasuti, Marcello Onofri
Modelling and Simulation of Film Cooling in Liquid Rocket Engine Propulsion Systems 2017
Francesco Di Matteo, Matteo Venanzi, Barbara Betti, Marco De Rosa, Marcello Onofri
Assessment of Analytical Models for Film Cooling in a Hydrocarbon/GOX Rocket Combustion Chamber 2029
Oskar Haidn, Christoph Kirchberger, Gregor Schlieben
Using Intra Cooling Channel Measurements for Film Cooling Investigations in a GOX/Kerosene Rocket Combustion Chamber 2042
Gregor Schlieben, Christoph Kirchberger, Oskar Haidn
Performance and Weight Estimates for an Advanced Open Rotor Engine 2053
Eric Hendricks, Michael Tong
Fuel Burn Benefits of a Variable-Pitch Geared Fan Engine 2065
Ian Halliwell, Karleine Justice
An Integrated Assessment of an Advanced Open Rotor Configuration Using the Environmental Design Space 2089
Christopher Perullo, Benjamin Havrilesko, Jimmy Tai, Dimitri Mavris
On the Reality of Gravity-Like Fields 2100
Jochem Hauser, Walter Dröscher
Physics of the Electromagnetic Control of Spacetime and Gravity 2119
Lance Williams

Optimal Inlet Shape Design of N2B Hybrid Wing Body Configuration 2130
Hyoung Jin Kim, Meng-Sing Liou

Hybrid Wing Body Engine Cycle Design Exploration for Boundary Layer Ingesting (BLI) Propulsion Systems Under Design Uncertainty 2160
Jonathan Sands, Jonathan Gladin, Brian Kestner, Dimitri Mavris

The UltraFan Engine and Aircraft Based Thrust Reversing 2177
Bruce McKay, Andrew Barlow

Parametric Heat Exchanger Design for Next Generation Advanced Vehicle and Propulsion System Analysis 2187
Phillip Gray, Brian Kestner, Dimitri Mavris

Performance of a Rocket-Ramjet Combined-Cycle Engine Model under Ramjet-Mode Operations 2201
Sadatake Tomioka, Kanenori Kato, Kouichiro Tani, Susumu Hasegawa, Masatoshi Kodera, Shuichi Ueda

Research on Flow Structure of Supersonic Combustion Chamber Based on Cavity - Strut Flame Holder 2211
Yanhui Zhao, Jian-Han Liang, Yuxin Zhao, Mingbo Sun, Long Yang

Experimental Study on Combustion Mode Transition in an Aero-ramp Based Scramjet 2219
Baoxi Wei, Yan Zhang, Liang Tian, Ganglin Song, Xu Xu

Study of Forebody Injection and Mixing with Application to Hypervelocity Airbreathing Propulsion 2228
Erik Axdahl, Ajay Kumar, Alan Wilhite

LES/RANS Simulations of Turbulent Mixing in Gas Plumes 2252
Ilya Zilberter, Jack Edwards

Three-Dimensional Heat Transfer Analysis and Optimized Design of Actively Cooled Strut for Scramjet Applications 2293
Fengquan Zhong, Tongying Chen, Xuejun Fan, Lihong Chen, Xinyu Chang

Effect of Inductive Coil Geometry on the Operating Characteristics of an Inductive Pulsed Plasma Thruster 2301
Ashley Hallock, Kurt Polzin, Adam C. Kimberlin, Kevin A. Perdue

Numerical and Experimental Efforts to Explain Delayed Gas Breakdown in θ-pinch Devices with Bias Magnetic Field 2317
Warner Meeks, Joshua Rovey

VASIMR® VX-200 Improved Throttling Range 2328
Benjamin Longmier, Leonard Cassady, Chris S. Olsen, Maxwell G. Ballenger, Jared Squire, Mark Carter, Andrew Ilin, Tim Glover, Greg E. McCaskill, Franklin Chang Diaz, Edgar Bering III

Simulation of Particle Recirculation in the VASIMR® Plasma Engine Backfield 2342
Michael Martin, Thomas Lalk, David Staack

Current Status of the Technology Development Project for a New Storable Propellant Upper Stage Engine Demonstrator 2353
Richard Arnold, Georg Obermaier, Andreas Götz, Katharina Quering, Louis Souverein, Jean-Noel Caruana

An End-to-End High Fidelity Numerical Simulation of the LE-X Engine - Combustion Chamber Risk Evaluation 2363
Naoki Tani, Nobuhiro Yamanishi, Akihide Kurosu

Design and Development of a LOx/LCH_4 Technology Demonstrator 2375
Vito Salvatore, Francesco Battista, Raffaele Votta, Marco Di Clemente, Michele Ferraiuolo, P. Roncioni, D. Ricci, P. Natale, M Panelli, D. Cardillo, Pierpaolo De Matteis

Airfoil Base Region Control with Dielectric Barrier Discharge 2399
Guillermo Paniagua, Pablo Rocandio, Yacine Babou

Estimation of Heat Transfer Performance for Compressor Stators Heat Exchangers in a New Intercooled and Recuperated Aviation Gas-Turbine Engine 2407
Yutaka Ito, Naoki Yamamoto, Takao Nagasaki

Stability of the Phase-Lag Boundary Condition in Turbomachinery Simulations 2417
Ambady Suresh, Akil Rangwalla

Impact of Engine Icing on Jet Engine Compressor Flow Dynamics 2426
Reema Kundu, J. V. R. Prasad, Prashant Tiwari, Andrew Breeze-Stringfellow, Peter Szucs, Tsuguji Nakano, Byron Pritchard

Performance Test Results of the NASA-457M v2 Hall Thruster 2439
George Soulas, Hani Kamhawi, Daniel Herman, Thomas Haag, Wensheng Huang, Rohit Shastry

Electric Propulsion of a Different Class: The Challenges of Testing for MegaWatt Missions 2456
Roland Florenz, Thomas Liu, Alec Gallimore, Hani Kamhawi, Daniel Brown, Richard Hofer, James Polk

Modeling Exhaust Effects in Rotating Detonation Engines 2469
Douglas Schwer, Kailas Kailasanath

Design of an Optically-Accessible Rotating Detonation Engine 2484
David Dausen, Christopher Brophy, Robert Wright, J. D. Marder

Experimental Research on the H_2/Air Continuous Rotating Detonation Engine 2496
Shijie Liu, Zhiyong Lin, Jin Zhou, Jian-Han Liang

Experimental Research on Transition Regions in Continuously Rotating Detonation Waves 2502
Yuhui Wang, Jianping Wang, Tianyi Shi, Yusi Liu

Micro Radio-Frequency Ion Propulsion System 2514
Michael Tsay, Kurt Hohman, Nathaniel Rosenblad, Eric Ehrbar, Michael Robin, Cody Farnell

Near-Surface Cusp Confinement for Weakly Ionized Plasma 2525
Richard Wirz, Samuel Araki, Ben Dankongkakul

Development of the Miniature Ion Propulsion System for 50 kg Small Spacecraft 2540
Hiroyuki Koizumi, Kimya Komurasaki, Yoshihiro Arakawa

Miniature Ion Thruster Using a Cylindrical Micro ICP 2545
Yoshinori Takao, Koji Eriguchi, Kouichi Ono

A Fluiddynamic Performance Model of a Helicon Thruster 2556
Eduardo Ahedo, Jaume Navarro, Mario Merino
Laboratory Model Development of Lissajous Acceleration for Electrodeless Helicon Plasma Thruster 2566
Takeshi Matsuoka, Ikkoh Funaki, Syuhei Satoh, Takayasu Fujino, Shota Iwabuchi, Takahiro Nakamura, Hiroyuki Nishida, Shunjiro Shinohara, Takao Tanikawa, Tohru Hada, Konstantin P. Shamra
Helicon Injected Inertial Plasma Electrostatic Rocket (HIIPER): Experimental Proof of Principle 2577
Akshata Krishnamurthy, Benjamin Ulmen, George Chen, Paul Keutelian, George Miley
Small Fast Spectrum Reactor Designs Suitable for Direct Nuclear Thermal Propulsion 2586
Bruce Schnitzler, Stanley Borowski
Thermal, Fluid, and Structural Analysis of a Cermet Fuel Element 2599
Mark Stewart, Bruce Schnitzler
Cycle Analysis of a 200MW Class CERMET Based NTR Engine 2620
James Fittje, Bruce Schnitzler
Visualization of the Liquid Layer Combustion of Paraffin Fuel for Hybrid Rocket Applications 2630
Ashley Chandler, Elizabeth Jens, Brian Cantwell, G Scott Hubbard
Design and Testing of FDM Manufactured Paraffin-ABS Hybrid Rocket Motors 2641
Jonathan McCulley, Andrew Bath, Shannon Eilers, Stephen Whitmore
Paraffin Fuel and Additive Combustion in an Opposed Flow Burner Configuration 2665
Christopher Zaseck, Timothee Pourpoint, Steven Son, Steven C. Shark
Enhanced Evaporation of Nanofluid Fuels under Radiation 2676
Yanan Gan, Li Qiao

A Micro PPT for Nano-satellite Applications: Design and Experimental Results 5859
Aloha Mingo Perez, Michele Coletti, Stephen Gabriel
Numerical Simulation of a Water Propellant Pulsed Plasma Thruster 5867
Siyu Wang, Zhiwen Wu, Xiangyang Liu, Lei Yang, Yue Cheng, Ningfei Wang
Plasma Behavior Analysis of a Laser-Assisted Pulsed Plasma Thruster 5876
Haruki Kobayashi, Hideyuki Horisawa, Ikkoh Funaki
Demonstration of Sub-system Level Simulations: A Coupled Inlet and Turbofan Stage 5891
Robert Webster, Kidambi Sreenivas, Daniel Hyams, Bruce Hilbert, W. Briley, David Whitfield
Progress in Boundary Layer Ingesting Embedded Engine Research 5906
Anthony Ferrar, Walter O'Brien
AEDC/UTSI J85 Turbojet Test Stands 5929
Robert Baltz, Gregg R. Beitel, Nickolas Galyen, Trevor Moeller, Maurice May
Vortex Shedding of Various Bluff Bodies in Cross Flow 5939
Christopher Ruscher, John Dannenhoffer III, Mark Glauser, Barry Kiel, Balu Sekar
Propulsion Analysis of Demeter Microsatellite Fluidic Passivation 5950
Guillaume Boudier, N. Merat
Brayton Cycle Conversion for Space Solar Power 5963
Brendan Dessanti, Narayanan Komerath
NASA in-Space Propulsion Technologies and Their Infusion Potential 5973
David Anderson, Eric Pencil, Todd Peterson, John Dankanich, Daniel Vento, Michelle Munk, Louis Glaab
Progress Toward Demonstration of Remote, Autonomous Attitude Control of a CubeSat Using Ion Electrospray Propulsion Systems 5990
Louis Perna, Paulo Lozano, Fernando Mier Hicks, Chase S. Coffman, Hanqing Li
Modeling of an Ionic Liquid Electrospray using Molecular Dynamics Model 6000
Arnaud Borner, Zheng Li, Deborah Levin
Cesium Exposure Test of the Colloid Micro-Newton Thruster for the LISA Pathfinder Mission 6013
John Anderson, John Ziemer, Alexandra Bulit
Prediction of Liquid Slosh Damping Using a High Resolution CFD Tool 6035
Hong Yang, Ravi Purandare, John Peugeot, Jeff West
Investigation on Pressure Change Induced by Cryogenic Sloshing 6049
Takehiro Himeno, Katsutoshi Ishikawa, Yutaka Umemura, Chihiro Inoue, Toshinori Watanabe, Satoshi Nonaka, Yoshihiro Naruo, Yoshifumi Inatani, Kiyoshi Kinefuchi, Daizo Sugimori, Koichi Okita
EUCLID Mission: Theoretical Sloshing Model and CFD Comparison 6065
Marta Lazzarin, Mattia Biolo, Alberto Bettella, Roberto Da Forno
Design of an Experimental Platform for Acquisition of Liquid Slosh Data aboard the International Space Station 6086
Sunil Chintalapati, Charles A. Holicker, Richard E. Schulman, Esteban Contreras, Hector M. Gutierrez, Daniel Kirk
Two-phase Flow Modeling Combining the CICSAM with the Projection Method 6103
Markus Gauer, Markus Lambert, Roland Kessler, Klaus Hannemann
Progress in Magnetohydrodynamic and Particle Simulations of Magnetoplasma Sail 6113
Ikkoh Funaki, Yoshihiro Kajimura, Hiroyuki Nishida, Yasumasa Ashida, Hiroshi Yamakawa, Iku Shinohara, Yoshiki Yamagiwa
Laser Ablation Thrusters for Atmospheric Flight Applications 6124
Keiji Hagiwara, Hideyuki Horisawa, Kota Fukuda
Current Collection Experiment of Bare Electrodynamic Tape Tether by Using Sounding Rocket 6134
Yoshiki Yamagiwa, Akeru Takagi, Naoyoshi Yoshimura, Makoto Matsui, Koji Tanaka, Takumi Abe, Hironori Sahara, Hironori Fujii
The "Vortex Reloaded" Project: Experimental Investigation on Fully Tangential Vortex Injection in N2O - Paraffin Hybrid Motors 6145
Nicolas Bellomo, Francesco Barato, Martina Faenza, Alberto Bettella, Daniele Pavarin, A. Selmo
Catalytic Decomposition of Nitrous Oxide Monopropellant for Hybrid Motor Re-Ignition 6172
Matthew Wilson, Shannon Eilers, Stephen Whitmore
Nuclear Thermal Rocket Element Environmental Simulator (NTREES) Upgrade Activities 6186
William Emrich Jr., Robert P. Moran, J. Boise Pearson
Affordable Development of a Nuclear Cryogenic Propulsion Stage 6192
Michael Houts, Stanley Borowski, Jeffrey George, Tony Kim, William Emrich, Robert Hickman, Jeramie Broadway, H. Gerrish, R. B. Adams
Evaluation of Polyurethane Binder Additivated with Paraffin and Tested with a Swirl Injector 6203
Susane Gomes, Leopoldo Rocco Jr., Jose Rocco, Koshun Iha
Design and Development of a Thrust Vector Controlled Paraffin/Nytrox Hybrid Rocket 6211
Laura Simurda, Adrien Boiron, Katrina Hornstein, Keith Stober, Elizabeth Jens, Alex Fletcher

Nammo Hybrid Rocket Propulsion TRL Improvement Program ..... N/A
Jan Erik Ronningen, Johanne Husdal, Morten Berger, Roy Vesterås, Geir Raudsandmoen
The Phoenix Hybrid Sounding Rocket Program: A Progress Report 2012 6225
Michael Brooks, Jean Pitot, Bernard Genevieve, Seffat Chowdhury, Kirsty Veale, Lance Roberts
One Dimensional Hybrid-Vlasov Simulation of a Hall Thruster 6239
Kentaro Hara, Iain Boyd, Vladimir Kolobov
Modeling the Effects of Discharge Voltage on Hall Thruster Performance 6253
Aysegul Yilmaz
Characterization of CAMILA Hall Thruster Discharge using Electrical Probe Measurements 6256
Igal Kronhaus, Alexander Kapulkin, Vladimir Balabanov, Maksim Rubanovich, Mauricio Guelman, Benveniste Natan
Investigation of Singly Ionized Iodine Spectroscopy in Support of Electrostatic Propulsion Diagnostics Development 6273
William Hargus Jr., Jordan Lubkeman, Kahli Remy, Ashley Gonzales
Coupled CFD Analysis of Thermochemical Erosion and Unsteady Heat Conduction in Solid Rocket Nozzles 6284
Daniele Bianchi, Alessandro Turchi, Francesco Nasuti, Marcello Onofri
Investigation of the Effect of Gelling Agents on Dicyclopentadiene's Rheological Characteristics for Improvement of Composite Solid Propellant Quality 6299
Patrick O'Neil, Stephen Heister
Evaluation of Ballistic and Mechanical Properties of Polymerized-Dicyclopentadiene-Based Composite Solid Propellants 6311
Patrick O'Neil, Stephen Heister
Experimental Evaluation of Processing and Aging Characteristics of Polymerized Dicyclopentadiene for Use as a Composite Solid Propellant Binder 6324
Patrick O'Neil, Stephen Heister
Research on NEPE Solid Rocket Motor Grain Storage Damage 6335
Qing-Ya Zhang, Hong-Yu Xie, Hai-Liang Ma, Xiang Feng, Zhi-Yu Zhang
Simulation of Reacting Spray in a Multi-Point Lean Direct Injection Combustor 6343
Dipanjay Dewanji, Arvind Gangoli Rao, Mathieu Pourquie, Jos Van Buijtenen
Critical Ignition Criteria for Monomethylhydrazine and Red Fuming Nitric Acid in an Impinging Jet Apparatus 6362
Jacob Dennis, Timothee Pourpoint, Steven Son
Experimental Investigation of Atomization and Combustion of Organic Gel Propellant 6376
Songjiang Feng, Bo He, Haobo He, Lingyu Su, Zhiyong Hou, Wansheng Nie
Comparison of CFD Predictions and Experimental Measurements of Liquid Jet Injection into a Vitiated Crossflow 6381
Christopher Brown, Ulises Mondragon, Vincent McDonell, B. V. Kiel
High-Fidelity Numercial Simulations of Impinging Jet Atomization 6396
Xiaodong Chen, Vigor Yang, Dongjun Ma
The SDO Propulsion Subsystem 6414
William Willis
LRO Propulsion System Design & On-Orbit Operations 6436
Mark Fiebig, Charles Zakrzwski
LRO Propulsion System Testing 6451
Mark Fiebig, Charles Zakrzwski
Design, Fabrication, and Testing of the Radiation Belt Storm Probes Propulsion Systems 6476
Stewart Bushman
Flight Performance of the MESSENGER Propulsion System from Launch to Orbit Insertion 6491
Marc Wilson, Carl Engelbrecht, Michael Trela
Development and Testing Status of the Vinci Thrust Chamber 6514
Dietrich Haeseler, Frank Haidinger, Ludwig Brummer, Juergen Haeberle, P. Luger
A New State-of-The-Art in AF-M315E Thruster Technologies 6529
Robert K. Masse, Ronald A. Spores, J. A. Overly, M. Y. Allen
Performance of a Helicon Hall Thruster Operating with Xenon, Argon, and Nitrogen 6537
Adam Shabselowitz, Alec Gallimore, Peter Peterson
