

# **2012 IEEE/IPSJ 12th International Symposium on Applications and the Internet (SAINT 2012)**

**Izmir, Turkey  
16 – 20 July 2012**

**IEEE Catalog Number: CFP12214-PRT  
ISBN: 978-1-4673-2001-6**

# **2012 IEEE/IPSJ 12th International Symposium on Applications and the Internet**

## **SAINT 2012**

### **Table of Contents**

|                                                       |        |
|-------------------------------------------------------|--------|
| Message from General Chairs.....                      | xiii   |
| Message from Program Chairs.....                      | xiv    |
| Message from Workshop Co-chairs.....                  | xv     |
| Message from Doctoral Symposium<br>Co-chairs.....     | xvi    |
| Organizing Committee.....                             | xvii   |
| Program Committee.....                                | xix    |
| Reviewers.....                                        | xxiii  |
| Message from HSNCE 2012 Workshop<br>Organizers.....   | xxvii  |
| Message from WS-ITeS 2012 Workshop<br>Organizers..... | xxviii |
| Message from NETSAP 2012 Workshop<br>Organizers.....  | xxix   |
| Message from HEUNET 2012 Workshop<br>Organizers.....  | xxx    |
| Message from C3NET 2012 Workshop<br>Organizers.....   | xxxi   |
| Message from EUCASS 2012 Workshop<br>Organizers.....  | xxxii  |
| HEUNET 2012 Plenary Speakers.....                     | xxxiii |

## Authentication & Privacy

|                                                                                                                    |    |
|--------------------------------------------------------------------------------------------------------------------|----|
| Location I-Diversity against Multifarious Inference Attacks .....                                                  | 1  |
| <i>Shinya Miyakawa, Nobuyuki Saji, and Takuya Mori</i>                                                             |    |
| Proposal of Movie CAPTCHA Method Using Amodal Completion .....                                                     | 11 |
| <i>Takuma Mori, Ryuya Uda, and Masayuki Kikuchi</i>                                                                |    |
| Design and Implementation of a Secure Public Wireless Internet Service<br>Model Using Host Identity Protocol ..... | 19 |
| <i>Akihiro Takahashi, Tomotaka Maeda, and Yasuo Okabe</i>                                                          |    |

## Security

|                                                                                        |    |
|----------------------------------------------------------------------------------------|----|
| Detecting Malicious Websites by Learning IP Address Features .....                     | 29 |
| <i>Daiki Chiba, Kazuhiro Tobe, Tatsuya Mori, and Shigeki Goto</i>                      |    |
| Scalable and Performance-Efficient Client Honeypot on High Interaction<br>System ..... | 40 |
| <i>Mitsuaki Akiyama, Yuhei Kawakoya, and Takeo Hariu</i>                               |    |
| SSH Dictionary Attack Detection Based on Flow Analysis .....                           | 51 |
| <i>Akihiro Satoh, Yutaka Nakamura, and Takeshi Ikenaga</i>                             |    |

## Networking

|                                                                                                                    |    |
|--------------------------------------------------------------------------------------------------------------------|----|
| A Design and Implementation of OpenFlow Controller Handling IP Multicast<br>with Fast Tree Switching .....         | 60 |
| <i>Daisuke Kotani, Kazuya Suzuki, and Hideyuki Shimonishi</i>                                                      |    |
| Inter-AS Locator Allocation of Hierarchical Automatic Number Allocation in<br>a 10,000-AS Network .....            | 68 |
| <i>Kenji Fujikawa, Hajime Tazaki, and Hiroaki Harai</i>                                                            |    |
| Simulator-Assisted Joint Service-Level-Agreement and Vertical-Handover<br>Adaptation for Profit Maximization ..... | 74 |
| <i>Ismaeel Al Ridhawi, Nancy Samaan, and Ahmed Karmouch</i>                                                        |    |

## Application

|                                                                                                                                             |    |
|---------------------------------------------------------------------------------------------------------------------------------------------|----|
| Proposal of Web Framework for Ubiquitous Sensor Network and Its Trial<br>Application Using NO2 Sensor Mounted on Bicycle .....              | 83 |
| <i>Takayuki Nakamura, Yukio Kikuya, Yutaka Arakawa, Motonori Nakamura,<br/>Yuka Higashijima, Yasuko Yamada Maruo, and Masayuki Nakamura</i> |    |
| Emotion Communication Model Based on Life-Log Comparison: Mutual<br>Understanding through Comparable Experiences .....                      | 91 |
| <i>Rika Mochizuki, Tomoki Watanabe, and Toru Kobayashi</i>                                                                                  |    |

|                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Sensor Data Collection Method Based on the Constraint of Collected<br>Number of Data and Granularity of Characteristics on an Overlay Network ..... | 100 |
| <i>Jun Shinomiya, Yuuichi Teranishi, Kaname Harumoto, and Shojiro Nishio</i>                                                                          |     |

## Architecture

|                                                                                                                                    |     |
|------------------------------------------------------------------------------------------------------------------------------------|-----|
| An Academic Community Cloud Architecture for Science Applications .....                                                            | 108 |
| <i>Shigetoshi Yokoyama and Nobukazu Yoshioka</i>                                                                                   |     |
| Zero-Watt Networked Standby: Development and Evaluation of a Home A/V<br>Network System .....                                      | 113 |
| <i>Yoshimichi Tanizawa, Takeshi Ishihara, Yuichiro Oyama, Takaomi Murakami,<br/>Tsuyoshi Kogawa, Eiji Kamagata, and Kotaro Ise</i> |     |
| Jobcast - Parallel and Distributed Processing Framework: Data Processing<br>on a Cloud Style KVS Database .....                    | 123 |
| <i>Ikuo Nakagawa and Kenichi Nagami</i>                                                                                            |     |

## Management & Analysis

|                                                                                                  |     |
|--------------------------------------------------------------------------------------------------|-----|
| DNS Traffic Analysis: Issues of IPv6 and CDN .....                                               | 129 |
| <i>Kazunori Fujiwara, Akira Sato, and Kenichi Yoshida</i>                                        |     |
| A GMPLS-based Power Resource Reservation System<br>toward Energy-on-Demand Home Networking ..... | 138 |
| <i>Takuya Miyamoto, Youichi Koyama, Kazumi Sakai, and Yasuo Okabe</i>                            |     |
| Accelerating Flow-Level Network Simulation with Low-Pass Filtering of Fluid<br>Models .....      | 148 |
| <i>Yusuke Sakumoto, Hiroyuki Ohsaki, and Makoto Imase</i>                                        |     |

## Short Papers I

|                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------|-----|
| i-Path: Improving Path Visibility for the Future Internet .....                                                                       | 155 |
| <i>Dai Mochinaga, Katsushi Kobayashi, Ryo Yamada, Shigeki Goto,<br/>Akihiro Shimoda, and Ichiro Murase</i>                            |     |
| Markov Chain-Based Routing Algorithm in Delay-Tolerant Networks .....                                                                 | 161 |
| <i>Chenji Pan, Jiaping Gui, Jiaju Yan, and Yue Wu</i>                                                                                 |     |
| PIPER: A Framework for Exploring the Privacy Implications of Pervasive<br>Computing Applications in Their Physical Environments ..... | 166 |
| <i>Ryan Babbitt, Hen-I Yang, and Johnny Wong</i>                                                                                      |     |

## Short Papers II

|                                                                                               |     |
|-----------------------------------------------------------------------------------------------|-----|
| Extraction and Annotation of Personal Cliques from Social Networks .....                      | 172 |
| <i>Maïke Erdmann, Tomoya Takeyoshi, Gen Hattori, and Chihiro Ono</i>                          |     |
| Access Control Architecture Separating Privilege by a Thread on a Web<br>Server .....         | 178 |
| <i>Ryosuke Matsumoto and Yasuo Okabe</i>                                                      |     |
| Performance Analysis of Fountain-Based Protocol in CSMA/CA Wireless<br>Networks .....         | 184 |
| <i>Zan-Kai Chong, Hiroyuki Ohsaki, Bok-Min Goi, Hong-Tat Ewe,<br/>and Cheng-Kuan Bryan Ng</i> |     |
| Elekspot: A Platform for Urban Place Recognition via Crowdsourcing .....                      | 190 |
| <i>Minkyu Lee, Suk Hoon Jung, Sangjae Lee, and Dongsoo Han</i>                                |     |
| A Mobile Platform for Managing Mobile MapReduce Participatory Sensing<br>Data .....           | 196 |
| <i>Theofilos Kakantousis and Vana Kalogeraki</i>                                              |     |

## Posters

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| A Study on Transport Framework for Transaction Communication<br>with Network Aggressive Supporting ..... | 202 |
| <i>Takuya Omizo</i>                                                                                      |     |
| Modeling I/O Interference in Data Intensive Map-Reduce Applications .....                                | 206 |
| <i>Sven Groot</i>                                                                                        |     |

## HSNCE 2012: Network Aware High Performance Computing

|                                                                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Can SDN Help HPC? .....                                                                                                                             | 210 |
| <i>Eiji Kawai</i>                                                                                                                                   |     |
| Strategic Optimization of Computation Nodes Allocation in a Coupled<br>Simulation: Computational Fluid Dyanmics and Aero Acoustic Simulations ..... | 211 |
| <i>Kazunori Nozaki, Hiroyuki Ohsaki, Masao Tanaka, Annemie Vanhirtum,<br/>and Eisaku Sakane</i>                                                     |     |

## HSNCE 2012: Widely Distributed Application and Large Scale Data Management

|                                                                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Multilevel Modeling of Physiological Systems and Simulation Platform:<br>PhysioDesigner, Flint and Flint K3 Service .....                                               | 215 |
| <i>Yoshiyuki Asai, Takeshi Abe, Masao Okita, Tomohiro Okuyama,<br/>Nobukazu Yoshioka, Shigetsohi Yokoyama, Masaru Nagaku,<br/>Ken-Ichi Hagihara, and Hiroaki Kitano</i> |     |
| Survey of Network Metrology Platforms .....                                                                                                                             | 220 |
| <i>Anne-Cécile Orgerie, Paulo Gonçalves, Matthieu Imbert, Julien Ridoux,<br/>and Darryl Veitch</i>                                                                      |     |
| Dynamic Communication Protocol for Quick Response in Interactive<br>Communication .....                                                                                 | 226 |
| <i>Naoki Oguchi and Shunji Abe</i>                                                                                                                                      |     |

## ITeS 2012: Keynote & Real-Time Application of ITeS

|                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------|-----|
| New Horizon of IT-enabled Services .....                                                                                    | 232 |
| <i>Shiro Uesugi</i>                                                                                                         |     |
| Evaluation Study of Usability Factors on Mobile Payment Application on Two<br>Different Service Providers in Thailand ..... | 233 |
| <i>Nagul Cooharajanane, Pongjit Kongnim, Aratchaporn Mongkolnut,<br/>and Okada Hitoshi</i>                                  |     |
| A Resilient Service for Survivor Identification in Large-Scale Disasters .....                                              | 239 |
| <i>Shigeichiro Yamasaki</i>                                                                                                 |     |

## ITeS 2012: Community Application of ITeS

|                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------|-----|
| The Study on the Effect of Facebook's Social Network Features<br>toward Intention to Buy on F-commerce in Thailand ..... | 245 |
| <i>Wannapon Suraworachet, Sarawadee Premisiri, and Nagul Cooharajanane</i>                                               |     |
| A Local Currency System Reflecting Variety of Values with a Swarm<br>Intelligence .....                                  | 251 |
| <i>Kinoshita Hirotsugu, Tajima Yoshiaki, Morizumi Tetsuya, Noto Masato,<br/>Kanabe Hideyuki, and Miyata Sumiko</i>       |     |

## NETSAP 2012: Malware Analysis

|                                                                                            |     |
|--------------------------------------------------------------------------------------------|-----|
| A Malware Classification Method Based on Similarity of Function Structure .....            | 256 |
| <i>Yang Zhong, Hirofumi Yamaki, and Hiroki Takakura</i>                                    |     |
| Malware Detection Method by Catching Their Random Behavior in Multiple<br>Executions ..... | 262 |
| <i>Takahiro Kasama, Katsunari Yoshioka, Daisuke Inoue, and Tsutomu Matsumoto</i>           |     |

## **NETSAP 2012: Traffic Analysis**

|                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Behavior-Based Detection Method for Outbreaks of Low-Rate Attacks .....                                                              | 267 |
| <i>Yaokai Feng, Yoshiaki Hori, Kouichi Sakurai, and Jun'ichi Takeuchi</i>                                                              |     |
| Unknown Attacks Detection Using Feature Extraction from Anomaly-Based<br>IDS Alerts .....                                              | 273 |
| <i>Masaaki Sato, Hirofumi Yamaki, and Hiroki Takakura</i>                                                                              |     |
| A Proposal for Anomaly Traffic Detection in the IP Multimedia Subsystem<br>Using Tanimoto Distance and a Modified Moving Average ..... | 278 |
| <i>Noppawat Chaisamran, Takeshi Okuda, and Suguru Yamaguchi</i>                                                                        |     |
| An Efficient Dynamic Detection Method for Various x86 Shellcodes .....                                                                 | 284 |
| <i>Takayoshi Fujii, Katsunari Yoshioka, Junji Shikata, and Tsutomu Matsumoto</i>                                                       |     |

## **HEUNET 2012: Network Deployment and Reliability**

|                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------|-----|
| A DHT-based HTTP Access Control System with Access Ticket Issuing<br>Mechanism .....                          | 290 |
| <i>Satoshi Uemura and Shigehiro Ano</i>                                                                       |     |
| Evaluating the Performance of Locator/ID Separation Based on LISP Map<br>Cache Emulation .....                | 296 |
| <i>Masafumi Watari, Atsushi Tagami, and Shigehiro Ano</i>                                                     |     |
| Comparative Study on Meta-heuristics for Achieving Parabolic Fairness<br>in Wireless Channel Allocation ..... | 302 |
| <i>Mario Köppen, Kaori Yoshida, Rodrigo Verschae, Masato Tsuru, and Yuji Oie</i>                              |     |

## **HEUNET 2012: Network Design and Control**

|                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------|-----|
| Two-Level Heuristic Algorithm for Utility-Based Data Placement and Rate<br>Allocation in Content-Aware Networks ..... | 308 |
| <i>Dariusz Gasior and Maciej Drwal</i>                                                                                |     |
| Distributing Link Stress for Internet TV Systems .....                                                                | 314 |
| <i>Seung Chul Han</i>                                                                                                 |     |
| Detecting Critical Links for Keeping Shortest Distance from Clients to Servers<br>during Failures .....               | 320 |
| <i>Nao Maeda and Hiroyoshi Miwa</i>                                                                                   |     |
| Real-Time Disaster Evacuation Guidance Using Opportunistic<br>Communications .....                                    | 326 |
| <i>Akihiro Fujihara and Hiroyoshi Miwa</i>                                                                            |     |

## **C3NET 2012: Mobility and Traffic Engineering**

|                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------|-----|
| Vertical Handover Control Considering End-to-End Communication Quality<br>in IP Mobility .....                    | 332 |
| <i>Takuya Hourai, Kaori Maeda, Yasuhiro Ohishi, Hayato Morihiro,<br/>and Tomoki Harase</i>                        |     |
| Design and Evaluation of Global Live Migration with Mobility Support for IP<br>Multicast .....                    | 338 |
| <i>Keisuke Kamada, Tohru Kondo, Kouji Nishimura, and Reiji Aibara</i>                                             |     |
| An Adaptive Approach for Network Traffic Load Balancing by Using One-Way<br>Delay .....                           | 345 |
| <i>Hiroki Kashiwazaki, Satoshi Kobayashi, Shugo Kawai, Norikatsu Ohishi,<br/>and Yoshiaki Takai</i>               |     |
| Multihoming Method Using Routing Header in IPv6 Environment .....                                                 | 351 |
| <i>Takuya Yamaguchi, Yong Jin, Ryoichi Tokumoto, Nariyoshi Yamai,<br/>Kiyohiko Okayama, and Motonori Nakamura</i> |     |

## **C3NET 2012: Network and Distributed System Management**

|                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------|-----|
| A Location Free Network System Applicable to Geographical Terms of<br>the Electronic Journal Site License ..... | 357 |
| <i>Yoshihiro Ohsumi, Kiyohiko Okayama, Nariyoshi Yamai, Takaoki Fujiwara,<br/>and Takashi Hieda</i>             |     |
| Koshien-Cloud: Operations of Distributed Cloud as a Large Scale Web<br>Contents Distribution Platform .....     | 363 |
| <i>Yoshihiro Okamoto, Satoru Noguchi, Satoshi Matsuura, Atsuo Inomata,<br/>and Kazutoshi Fujikawa</i>           |     |
| An Account Provision and Management Architecture for Messaging Services<br>in Emergency .....                   | 369 |
| <i>Kazuyuki Tasaka, Yasutaka Nishimura, and Kiyohito Yoshihara</i>                                              |     |
| An Execution Control System for Application Software Reducing<br>Administrative Burden of Educational PCs ..... | 375 |
| <i>Masanori Fujiwara, Keita Kawano, and Nariyoshi Yamai</i>                                                     |     |

## **C3NET 2012: Network Security**

|                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------|-----|
| Spam Mail Discrimination System Based on Behavior of DNS Servers<br>Associated with URLs .....      | 381 |
| <i>Shuji Suwa, Nariyoshi Yamai, Kiyohiko Okayama, Motonori Nakamura,<br/>Keita Kawano, and Gada</i> |     |
| A Casual Network Security Using a Portable Sensor Device and Wiki Software .....                    | 387 |
| <i>Takashi Yamanoue, Kentaro Oda, and Koichi Shimozono</i>                                          |     |

## **EUCASS 2012: Platform and Deployment**

|                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------|-----|
| Workshop Keynote: Ubiquitous Service Platform and Field Trial in CUBIQ<br>Project .....                | 393 |
| <i>Makoto Suzuki</i>                                                                                   |     |
| A Proposal of the System for Automatic Sharing Information of Movements<br>in Growing Vegetables ..... | 394 |
| <i>Hayato Shibahara, Masato Yamanouchi, and Hideki Sunahara</i>                                        |     |
| Development of Arkas Sensor Platform and Application for Heavy Snowfall<br>Observation .....           | 399 |
| <i>Hiroshi Yamamoto, Shohei Minomi, Katsuichi Nakamura, and Katsuyuki Yamazaki</i>                     |     |

## **EUCASS 2012: Design and Application**

|                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------|-----|
| On Socio-technical Enablers for Ubiquitous Computing Applications .....                                                    | 405 |
| <i>Kurt Geihs, Jan Marco Leimeister, Alexander Roßnagel, and Ludger Schmidt</i>                                            |     |
| Distortions in QoE Measurements of Ubiquitous Mobile Video Services<br>Caused by the Preconceptions of Test Subjects ..... | 409 |
| <i>Péter András Kara, László Bokor, and Sándor Imre</i>                                                                    |     |
| Personalized Clothing-Recommendation System Based on a Modified<br>Bayesian Network .....                                  | 414 |
| <i>Lin Yu-Chu, Yuusuke Kawakita, Etsuko Suzuki, and Haruhisa Ichikawa</i>                                                  |     |

## **EUCASS 2012: Overlay Network Technologies**

|                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------|-----|
| An Adaptive Vertical Handover in Service Specific Overlay Networks .....                               | 418 |
| <i>Yousif Al Ridhawi, Ismaeel Al Ridhawi, Nancy Samaan, and Ahmed Karmouch</i>                         |     |
| A Divide and Merge Method for Sensor Data Processing on Large-Scale<br>Publish/Subscribe Systems ..... | 424 |
| <i>Ryota Miyagi, Satoshi Matsuura, Satoru Noguchi, Atsuo Inomata,<br/>and Kazutoshi Fujikawa</i>       |     |
| Author Index .....                                                                                     | 430 |
