Contents

VOLUME 1

Preface

Stability, Non-Linear Behaviour and Design of Steel Structures
Special session organised by D. Camotim and C. Basaglia

1 The Influence of Residual Stresses on the Buckling Behaviour of Rack Uprights 1
M.M. Pastor, J. Bonada, F. Roure and M. Casafont

2 Interactive Buckling of Thin-Walled I-Section Columns 14
M.A. Wadee and L. Bai

3 The Behaviour of Beam-Column Elements with Variable I Cross-Sections considering Lateral Restraints 31
I.M. Cristutiu and A.I. Dogariu

4 Finite Element Analysis of Failure Modes for Cellular Steel Beams 46
B. Dervinis and A.K. Kvedaras

5 Numerical Evaluation of Column Base Rigidity 66
J. Razzaghi and A. Khoshbakht

6 Computational Non-Linear Buckling Analysis of an Elastically Restrained Steel Beam 80
I. Misiunaite and A. Juozapaitis

7 Calculation of Initial Post-Buckling Behaviour of Moderately Thick Plates using an Exact Finite Strip 93
S.A.M. Ghannadpour, H.R. Ovesy and E. Zia-Dehkordi

8 Finite Element Analysis of Light Gauge Steel Plate Shear Walls 109
E.B. Machaly, S.S. Safar and M.A. Amer

9 Thin-Walled Structures: Warping Modes 129
R.F. Vieira, F. Virtuoso and E.B.R. Pereira

10 Shear Strength of End Web Panels 150
S.S. Safar

11 Numerical Analysis and Measurement of Non-Uniform Torsion 169
J. Murin, T. Sedlar, V. Kralovic, V. Goga, A. Kalas and M. Aminbaghai

12 The Torsion Effects on the Non-Linear Behaviour of Thin-Walled Beams: A Finite Element Approach 187
F. Mohri, N. Damil and M. Potier-Ferry

13 Progressive Collapse and Robustness of Steel Framed Structures 207
A. Formisano and F.M. Mazzolani

14 Axial-Shear Force-Bending Moment Interaction in Elastoplastic Analysis of Steel Frames 225
M.M.S. Manola and V.K. Koumousis

15 On the Imperfection Sensitivity of Thin-Walled Frames 243
S. Gabriele, N. Rizzi and V. Varano

16 Imperfection Sensitivity Analysis of the Behaviour of Single Storey Frames with Tapered Web Members 260
I.M. Cristutiu and D.L. Nunes

17 The Influence of Elastic Boundary Conditions on the Stability of Steel Frames 272
P. Luhakooder and I. Talvik

18 Structural Design of Frames Able to Prevent Element Buckling 283
F. Giambanco, S. Benfratello, L. Palizzolo and P. Tabbuso

19 Nonlinear Flexural-Torsional Dynamic Analysis of Beams of Variable Cross Section using the Boundary Element Method: Application to the Analysis of Wind Turbine Towers 299
E.J. Sapountzakis and I.C. Dikaros

20 Non-Linear Dynamic Analysis of Steel-Concrete Composite Floors subjected to Human Rhythmic Activities 316
E.D.C. Lopes, S.G. Gonçalves, C.M.R. Gaspar, J.G. Santos da Silva and S.A.L. de Andrade

21 The Effects of Seismic Loading on Pallet Rack Semi-Rigid Joints 328
K.O. Kwarteng, R.G. Beale, M.H.R. Godley and S.D. Thomson

22 Computer-Based Nonlinear Analysis for the Seismic Performance Assessment of Three-Dimensional Steel Frameworks 352
C.G. Chiorean, G. Tarta, I. Marchis and M. Buru

23 Finite Element Analysis of Walking Vibration Problems for Tubular Steel-Concrete Composite Footbridges 372
G.L. Debona, J.G. Santos da Silva, A.C.C.F. Sieira, P.C.G. da S. Vellasco and L.R.O. de Lima

24 A Hysteretic Displacement Based Fibre Beam Element 385
I.A. Gkimousis and V.K. Koumousis

25 Direct Strength Method to Predict the Resistance of Cold-Formed Steel Columns against Local-Distortional Interactive Failure 402
P.B. Dinis and D. Camotim

26 Numerical Analysis and Model Calibration for Perforated Pallet Rack Uprights 435
A. Crisan, V. Ungureanu and D. Dubina

27 The Optimal Drift Design Method to Control the Elastic and Inelastic Performance of Steel Moment Frames 455
S.W. Choi, J.H. Lee, Y.S. Kim and H.S. Park

28 Buckling, Post-Buckling, Collapse and Design of Thin-Walled Steel Continuous Beams and Frames 463
C. Basaglia, D. Camotim and H.B. Coda

29 A Finite Element Study of the Severe Temperature Effect on the Behaviour of Elliptical Hollow Section Columns 499
N. Goodfellow, F. Ali, T. Scullion, A. Nadjai and J. Gardner

30 Application of Direct Strength Method Design to Distortional Buckling Resistance of Thin-Walled Steel Columns Exposed to Fire 511
A. Landesmann and D. Camotim

31 Local and Global Stability Analysis of a Large Free Span Steel Roof Structure 552
Z. Nagy, M. Cristutiu and Z. Kiss

32 Numerical Evaluation of Chord Failure Resistance for Multi-Intersection Tubular Joints with Non-Regular Geometry: A Case Study 563
R. Gori, A. Mastropasqua and M. Zanchin

33 A Parametric Study of Cold-Formed Steel Bolted Joints in Pitch-Roof Portal Frames 574
Z. Nagy and P. Pernes

34 A Study on the Behaviour of H-shaped Beam-to-Column Connections with Newly Reformed T-Stubs 589
S.M. Shin and D.K. Lee

35 Nonlinear Finite Element Modelling of Welded Pinned Connections with and without Web Angles 602
J. Razzaghi and A. Pourali

36 Introducing an Innovative Column Splicing Technique for Steel Structures 620
M. Foroughi and M.A. Barkhordari

Composite, Sandwich and Adaptive Structures: Modelling, Optimization, Simulation and Testing
Special session organised by C.M. Mota Soares, A.L. Araujo and F. Moleiro Duarte

37 A Finite Element for Bending Analysis of Sandwich Composite Beams 630
P. Belbute, A.L. Araújo, S. Teixeira de Freitas and M. de Freitas

38 Finite Element Modeling of Shear Deficient Beams Bonded with Aluminum Plates 643
A. Abu-Obeidah, R. Hawileh and J.A. Abdalla

39 Multiscale Design and Optimization of Bi-Material Laminated Structures 651
P.G. Coelho, H.C. Rodrigues and J.M. Guedes

40 Local and Global Pareto Dominance in Multi-Populations Evolution applied to Optimization of Composites 664
C.A.C. António

41 A Two-Node Finite Element for Linear Magneto-Electric Laminated Timoshenko Beams 681
A. Milazzo and C. Orlando

42 A Mathematical Model of a Five Layer Sandwich Beam 694
K. Magnucki, M. Smyczynski and P. Jasion

43 Collapse of Carbon and E-Glass Composite Tubes under External Hydrostatic Pressure 703
P.T. Smith, A.P.F. Little and C.T.F. Ross

44 Analysis of Cracked and Notched Composites applying a New Formulation of the Scaled Boundary Finite Element Method 714
R. Dieringer and W. Becker

45 Modelling of Piezocomposite Functionally Graded Plates for Active Vibration Control 730
M. Pietrzakowski

46 Numerical Analysis of the Initiation of Delamination in Fibre Composites 743
J.-W. Simon and S. Reese

47 Large Deformation Analysis of Laminated Composite Plates 761
T. Yıldız, Y. Olcay and H. Darendeliler

48 Analysis of the Mechanical Behaviour of Composites and their Bonded Assemblies under Tensile or Compression Shear Out-of-Plane Loads 776
L. Sohier, J.Y. Cognard and P. Davies

49 A Finite Element Model for Analysis of Laminated Soft Core Sandwich Structures 791
A.L. Araújo, C.M. Mota Soares and C.A. Mota Soares

50 Elastic Solids Reinforced with Random Fibres Developing Large Deformations: A Finite Element Approach 806
M.S.M. Sampaio, H.B. Coda and R.R. Paccola

51 Thermal Postbuckling Behaviour of Rectangular Functionally Graded Plates using the Finite Strip Method 823
H.R. Ovesy, S.A.M. Ghannadpour and M. Nassirnia

52 A Passive Approach to the Development of High Performance Composite Laminates with Improved Damping Properties 837
J.M. Silva, M. Piriz, P.V. Gamboa, R. Cláudio, N. Nunes and J. Lopes

53 The Dispersion Function of a Quasi Two-Dimensional Periodic Sandwich using a Dirichlet-to-Neumann Map 848
N.T. Bagraev, G.J. Martin, B.S. Pavlov, A.M. Yafyasov, L.I. Goncharov and A.V. Zubkova

54 Impact Resistance of Metallic Cellular Materials: Effects of Cell Shape and Base Material Ductility 866
E. Law, K.K. Tan, S.D. Pang and S.T. Quek

55 A Mixed Mode Cohesive Law for Z-Pinned Composite Delamination 886
H. Cui, S. Koussios, Y.-L. Li and A. Beukers

56 Investigation of Lightweight Composite and Hybrid Primary Aircraft Structures 900
A. Shanygin

VOLUME 2

57 Accurate Stresses for Homogeneous and Composite Beams 917
J. Aalto, R. Syrjä and C.A. Ribas

58 Sequentially Linear Analysis applied to a FETI-Based Model of Quasi-Brittle Interfaces 940
P. Gruber and J. Zeman

Derivative-Free Methods for Engineering Optimization
Special session organised by J.F. Aguilar Madeira and H. Pina

59 Handling Linear Constraints in Genetic Algorithms 955
H.L. Pina and J.F.A. Madeira

60 Optimization of Tendon Geometry of Post-Tensioned Concrete Bridges using Genetic Algorithms 967
L. Dlouhý and M. Lepš

61 Application of Genetic Algorithms for Approximation with Energy-Based Models 979
W.B. Bończyk

62 Deterministic Global Optimization Methods for Solving Engineering Problems 987
D.E. Kvasov and Y.D. Sergeyev

63 Searching for Multiple Minima of Bound Constrained Optimization Problems using Derivative Free Optimization Techniques 1006
U.M. García Palomares

64 Damping Optimization of Viscoelastic Laminated Sandwich Structures using the Direct Multisearch Method 1014
J.F. Aguilar Madeira, A.L. Araújo, C.M. Mota Soares and C.A. Mota Soares

65 Optimization of Materials Selection in a Multi-Part Environment with Direct Multi-Search 1026
M. Leite, J.F.A. Madeira, A. Silva, E. Henriques and R. Roth

66 Multi-Objective Ant Colony Approaches for Structural Optimization Problems 1037
J.S. Angelo, H.S. Bernardino and H.J.C. Barbosa

67 Particle Swarm Optimization for Non-Convex Problems of Size and Shape Optimization of Trusses 1057
Y.J. Xu, M. Domaszewski, D. Chamoret, W.H. Zhang and J.G. Korvink

68 A Comparison of Genetic Algorithm and Particle Swarm Optimisation for Theoretical and Structural Applications 1074
Z. Wang, T.J. McCarthy and M.N. Sheikh

69 Structural Optimization of Tall Buildings using NSGA-II and Resizing Techniques 1092
E.-M. Kwon, S.-W. Choi and H.-S. Park

70 An Evolutionary Structural Optimization applied to Fluid-Structure Problems 1101
W.M. Vicente, R. Picelli and R. Pavanello

71 Design Optimization of Moment Resisting Steel Frames using a Cuckoo Search Algorithm 1121
M.P. Saka and E. Doğan

72 Optimum Detailing Design of Reinforced Concrete Plane Frames to ACI 318-05 using the Harmony Search Algorithm 1144
A. Akin and M.P. Saka

73 Discrete Design Optimization of Space Steel Frames using the Adaptive Firefly Algorithm 1168
İ. Aydoğdu, A. Akın and M.P. Saka

Damage Identification Methods
Special session organised by J.V. Araujo dos Santos and H.M.R. Lopes

74 Improvement in Damage Localisation using Speckle Shearography 1185
H. Lopes, J.V. Araújo dos Santos, P. Moreno García and F. Ferreira

75 Damage Localisation in Composite Laminated Plates using Higher Order Spatial Derivatives 1201
P. Moreno-García, H. Lopes, J.V. Araújo dos Santos and N.M.M. Maia

76 Detection of Localized Damage for Beams using a Frequency Based Method 1217
F. El Khannoussi, A. Khamlichi, A. Hajraoui and A. Limam

77 A Method to Detect and Assess Damage in Beams based on Frequency Changes 1228
G.-R. Gillich, Z.-I. Praisach and D. Amariei

78 Detection of Multiple Cracks in Beams using the Superposition Property 1243
Z.-I. Praisach, G.-R. Gillich and D. Amariei

79 Damage Detection for Beams subject to Moving Loads based on Wavelet Transforms 1262
J.M. Machorro-López, A. Bellino, S. Marchesiello and L. Garibaldi

80 Structural System Identification in the Presence of Resonant Non-Structural Appendages 1282
E. Matta, R. Ceravolo, A. De Stefano, A. Quattrone and L. Zanotti Fragonara

81 A Subspace Fitting Method based on Finite Elements for Identification and Localisation of Damage in Mechanical Systems 1298
G. Gautier, R. Serra and J.-M. Mencik

82 Damage Detection of Truss Structures using an Improved Charged System Search Algorithm 1310
A. Kaveh and A. Zolghadr

83 Statistical Multi-Objective Structural Damage Identification based on Dynamic Parameters 1327
R. Perera, E. Sevillano and A. Ruiz

84 Damage Detection in Beam Structures using a Combined Genetic Algorithm and Nonlinear Optimisation System 1339
S. Aktasoglu and M. Sahin

85 Influence of Incomplete Modal Data on the Performance of a Vibration-Based Damage Detection Methodology 1355
J.E. Laier and J.D. Villalba

86 A Structural Health Monitoring System Based on an Analysis of Changes in the Static, Dynamic and Magnetic Properties of the Structure 1372
J. Maczak

87 Early Failure Detection in Large Scale Civil Engineering Structures 1387
S. Radkowski and J. Maczak

88 The Passive Electric Potential Computed Tomography Method for Identification of a Part-Through Three-Dimensional Crack 1398
S. Kubo, K. Nakamura and T. Sakagami

Eigenvalues of Continuous Systems
Special session organised by S. Ilanko and D. Kennedy

89 Higher Order Beam Equations 1408
H. Abadikhah and P.D. Folkow

90 Free Vibration of a U-Type Liquid-Contained Rectangular Container with Simply Supported Boundary Condition 1418
K.-H. Jeong

91 A Comprehensive Dynamic Model for Axial, Flexural and Torsional Vibration of a CANDU Fuel Element 1433
S.D. Yu and M. Fadaee

92 Dynamic Analysis of a Timoshenko Beam on a Semi-Infinite Elastic Subgrade using an Ordinary Differential Equation Method 1443
Y.Q. Gong and F.H. Xu

93 The Eigenpairs of a Coupled Rectangular Cavity 1451
N. Tanaka

94 An Equivalent Isotropic Model for Functionally Graded Plates 1464
D. Kennedy and R.K.H. Cheng

95 Exact Dynamic Stiffness Matrix for a Class of Elastically Supported Structures 1477
W.P. Howson, A. Watson and B. Rafezy

96 Computation of Eigenvalues for Thick and Thin Circular and Annular Plates using a Unified Ritz-Based Formulation 1493
L. Dozio

97 Sets of Admissible Functions for the Rayleigh-Ritz Method 1511
L.E. Monterrubio and S. Ilanko

98 Free Vibration Analysis of Shallow Shells using the Superposition-Galerkin Method 1527
Y. Mochida and S. Ilanko

99 Dynamic Stiffness Analysis of Graphene Sheets and Carbon Nanotubes 1537
D. Kennedy

100 Solving Homogeneous Trees of Sturm-Liouville Equations using an Infinite Order Determinant Method 1549
A. Watson, W.P. Howson, C. James and C. Williams

101 Free vibration Analysis of Laminated Plates using Wavelet Collocation and a Unified Formulation 1561
A.J.M. Ferreira, E. Carrera and L. Castro

102 Free Vibration of a Functionally Graded Timoshenko Beam using the Dynamic Stiffness Method 1577
H. Su and J.R. Banerjee

Fatigue Assessment and Damage Control of Railway Bridges
Special session organised by W. Salvatore and G. De Roeck

103 The Non-Linear Influence of Ballast on the Vibrations of Railway Bridges 1592
J.-M. Battini

104 Fatigue Assessment of a Riveted Plate Girder Railway Bridge: Numerical and Experimental Investigations 1606
V. Zabel, A. Schmidt and I. Reichert

105 Dealing with Uncertainty in Advanced Frequency-Domain Operational Modal Analysis 1626
B. Peeters, M. El-Kafafy and P. Guillaume

106 Fatigue Assessment of a Bowstring Railway Bridge 1638
C. Albuquerque, R. Calçada and P.M.S.T. de Castro

107 Experimental Analysis and Fatigue Assessment of a Railway Steel Viaduct 1656
L. Vincenzi, M. Savoia and W. Salvatore

108 Vehicle-Bridge Interactive Analyses on the Lagoscuro Viaduct 1674
L. Vincenzi, M. Savoia and F. Rossi

109 Assessment of Dynamic Loads on Railway Bridges 1688
H. Bigelow, B. Hoffmeister and M. Feldmann

110 Local Fatigue Analysis using a Long Term Monitoring System at the Trezói Railway Bridge 1707
F. Marques, C. Moutinho and Á. Cunha

111 Weigh in Motion Measurement and Experimental Fatigue Assessment of a Railway Bridge 1726
G. Chellini, M. Orlando, W. Salvatore, G. Sorrentino and M. Tisalvi

112 The Assessment of Riveted Railway Bridges in accordance with Swiss Codes SIA 269 1744
M.A. Tschumi

113 Stochastic Modelling of Fatigue Crack Progression using the DOProC Method 1761
M. Krejsa

114 Train-Bridge Interaction and Fatigue on Railway Bridges 1779
A. Bekö and L. Rossbacher

115 A Numerical Approach for Local Fatigue Analysis of Bridge Details: Analysis of Two Portuguese Case Studies 1793
A.L.L. Silva, A.M.P. Jesus and A.A. Fernandes

Masonry Models
Special session organised by L. Pallares and F.J. Pallares

116 A Study of the Out-of-Plane Behaviour of Unreinforced Masonry Walls using a "Unit and Interaction" Micro-Modelling Approach 1811
E. Bultot and L. Van Parys

VOLUME 3

117 A Rigid Block Model with Cracking Units for Limit Analysis of Masonry Walls subject to In-Plane Loads 1829
F. Portioli, L. Cascini, M. D'Aniello and R. Landolfo

118 Numerical Methods for Slender Masonry Structures: A Comparative Study 1839
M. Girardi, M. Lucchesi, C. Padovani, G. Pasquinelli, B. Pintucchi and N. Zani

119 Masonry Walls under Membrane or Bending Loading Cases: Experiments and Discrete Element Analysis 1855
T.T. Bui and A. Limam

120 Network Analysis of Masonry: Indicator Computations for Detecting Soil Defect Impact 1872
L. Van Parys, T. Descamps, J. Noël, E. Bultot and S. Datoussaïd

121 Numerical Modelling of Reinforced Masonry Arches 1883
J. Brozovsky, M. Jasek and D. Mikolasek

122 An Unabridged Push-Over Approach: Beyond POR Analyses for Three-Dimensional Masonry Buildings 1894
O. Corbi

123 Structural Safety Control of Masonry Buildings: Non-Linear Static Seismic Analysis with a Non-Linear Shear Strength Criterion 1904
D. Foti, M. Debernardis and V. Paparella

124 Coupled Limit Analysis and Topological Optimization for Masonry Wall Reinforcement 1918
A. Baratta and I. Corbi

125 Strengthening of Masonry Buildings by Post-Stressing: The Verticalisation Method 1927
A. Morais and S. Sazedj

126 A One-Dimensional Evolutionary Masonry Model with Low Tensile Strength 1938
A. Baratta and O. Corbi

127 Masonry Vaulted Staircases: Interpretation of Equilibrium Paths 1952
A. Baratta and I. Corbi

Railway Research: Vehicle Dynamics, Infrastructure Response and their Interaction
Special session organised by J. Pombo and V. Markine

128 Simulation of Fatigue Crack Growth of a Contact Wire in a Catenary System 1964
S.H. Mai and M.L. Nguyen

129 Development of a Computational Tool for the Dynamic Analysis of the Pantograph-Catenary Interaction for High-Speed Trains 1972
P. Antunes, A. Mósca, J. Ambrósio, J. Pombo and M. Pereira

130 Application of a Special Sensing Sleeper for Dynamic Interaction within the Boundary Layer between a Sleeper and Ballasts 1997
A. Aikawa

131 Experimental Analysis of the Dynamic Behaviour of Railway Turnouts 2008
V.L. Markine and I. Shevtsov

132 Railway Earthworks: Integrating Ground Investigation Data into Ground Models 2018
D.A. Gunn, H.J. Reeves, J.E. Chambers, P.B. Wilkinson, C.J. Munro, P.I. Meldrum, G.A. Williams, M.J. Raines, E. Haslam, S.J. Holyoake and J. Wragg

133 The Influence of Deck Flexibility on the Dynamic Response of Railway Bridges 2040
P.G.C. Amaral and C.E.N. Mazzilli

134 Modeling Shakedown Plastic Strains of Subballast and Subgrade Materials in the Concrete Slab Track System of High-Speed Trains 2055
Y.H. Jung, C.Y. Choi and E. Nsabimana

135 Multi-Objective Design Optimization of the Nose of a High-Speed Train 2069
M. Suzuki and K. Nakade

136 Dynamic Optimization of Ladder Track Components to Minimize the Subway Vibration 2082
Z.Q. Yan, V.L. Markine, A.J. Gu and Q.H. Liang

137 Assessment of the Dynamic Characteristics of a Ballasted Railway Track subject to Impact Excitation using Three-Dimensional Composite Finite Element - Discrete Element Modelling 2099
A. Aikawa

138 A Three-Dimensional Calculation for Dynamic Pantograph-Catenary Interaction 2111
N. Cuartero, E. Arias, T. Rojo, F. Cuartero and P. Tendero

139 A Study on Multiple Pantograph Operations for High-Speed Catenary Contact 2131
J. Pombo, P. Antunes and J. Ambrósio

Computational Aspects in Contact and Interface Modeling
Special session organised by S. Dumont and F. Lebon

140 The Influence of the Geometry of Coaxial Adhesively-Bonded Joints on the Transmitted Load 2150
J.Y. Cognard, L. Sohier, R. Créac'hcadec, F. Lavelle and N. Lidon

141 Finite Fracture Mechanics for the Assessment of Failure Loads of Adhesive Joints 2165
P. Weißgraeber and W. Becker

142 Analysis of Stress Concentrations in Adhesively-Bonded Assemblies subject to Thermo-Mechanical Loads: Application to the Characterisation of the Adhesive Behaviour 2177
J.Y. Cognard, C. Badulescu, N. Carrère, R. Créac'hcadec and P. Védrine

143 On the Modelling of the Direct Bonding of Two Silicon Surfaces 2192
N. Cocheteau, F. Lebon, I. Rosu, A. Maurel, S. AitZaid and I. Savin DeLarclause

144 An Asymptotic Approach to Thin Film Adhesion 2209
F. Lebon and R. Rizzoni

145 The Influence on the Geometric Curvature of the Mechanical Behaviour of the Adhesive Joint 2223
F. Ascione and G. Mancusi

146 Numerical Analysis of Thermo-Mechanical Wear Problems for Reciprocal Punch Sliding 2235
I. Páczelt and Z. Mróz

147 Numerical Simulations and Experimental Investigations of Contact Phenomena in a Mechanical Friction Clutch 2255
J. Awrejcewicz and D. Grzelczyk

148 A Space-Time Finite Element Method for Elastodynamics Problems with a Moving Loading Zone 2265
S. Dumont and F. Jourdan

149 On Higher Order Approximation for Nonlinear Variational Problems in Nonsmooth Mechanics 2281
J. Gwinner

150 Three-Dimensional Cohesive Crack Propagation using Hybrid-Trefftz Finite Elements 2292
G. Edwards, C.J. Pearce and Ł. Kaczmarczyk

Composite and Hybrid Structures of Steel and Concrete
Special session organised by L. Pallares

151 Structural Response of a Composite Beam subject to Cyclic Loading Conditions considering the Interfacial Slip Effect 2305
J.W. Hwang, H.G. Kwak and Y.H. Lee

152 Nonlinear Finite-Element Analysis of the Shear Behaviour of Stud Connectors 2318
Q. Wang, Y.Q. Liu and J.P. Lebet

153 Computational Modelling of Deconstructable Composite Steel-Concrete Beams 2332
M.A. Bradford and Y.-L. Pi

154 Creep and Shrinkage Analysis of Curved Composite Beams Including the Effects of Partial Interaction 2347
X. Liu, R.E. Erkmen and M.A. Bradford

155 Analysis of Steel-Concrete Beams: Influence of Time Dependent Effects, Cracking and Connection Flexibility 2367
R.F. Vieira and F. Virtuoso

156 A Study of Modelling Composite Connections in Two and Three Dimensions 2383
M.N. Kataoka and A.L.H.C. El Debs

157 A Parametric Study of the Development of Transverse Deck Cracking 2400
A. Abdel-Mohti and A. ElSafty

158 Rheological-Dynamical Limit Analysis of Reinforced Concrete Folded Plate Structures using the Harmonic Coupled Finite-Strip Method 2414
D.D. Milašinović, D. Goleš, A. Borković, D. Kukaras, A. Landović, Ž. Živanov and P. Rakić

159 Ductility Demand on Steel Reinforcing Bars in Concrete Buildings 2434
A. Braconi, F. Braga, S. Caprili, R. Gigliotti and W. Salvatore

160 Automatic Calculation of Optimum Reinforcement for Flexural and Axial Loading 2453
A. Tomás, G. Sánchez and A. Alarcón

161 Finite Element Modelling of Steel-Caged Reinforced Concrete Columns subjected to Combined Bending and Axial Loads 2472
J. Garzón-Roca, J.M. Adam, L. Pallarés and P.A. Calderón

Structural Stability: Modelling, Simulation and Experiments
Special session organised by J. Blachut and A. Limam

162 Stability, Breathing and Design of Steel Girders subjected to Repeated Loading 2487
M. Škaloud, M. Zörnerová and Sh. Urushadze

163 Elastic Buckling of Conical Shells under the Combined Loading of Axial Compression and External Pressure 2502
J. Błachut and D. Stanier

164 Non-Linear Buckling of Conical Shells under External Hydrostatic Pressure 2520
C.T.F. Ross, T. Eeeles, C. Fraser, J. Burt, M. Fitzgerald, C. Knipe and A.P.F. Little

165 The Effect of a Thermal Barrier on the Buckling and Post-Buckling Behavior of Pressurized Aluminum Cylindrical Shells subjected to Shear 2536
A. Limam, J. Didier, A. Da-Silva, F. Marteau and F. Lorioux

166 Assessing the Effect of Two Entering Triangular Initial Geometric Imperfections on the Buckling Strength of an Axisymmetric Shell subjected to Uniform Axial Compression 2547
A. Khamlichi and A. Limam

167 Effects of Approximations on the Lateral-Torsional Buckling and Postbuckling Analysis 2558
Y.-L. Pi and M.A. Bradford

168 Analytical and Experimental Investigations of Crippling in Multiplate Rods and Panels 2573
G. Zamula and I. Kondakov

169 Dynamic Instability of Circular Cylindrical Shells subject to Base Excitation 2587
F. Pellicano

170 Buckling of Structures with Interacting Propagating Cracks 2605
D.C. Tran and A. Limam

171 Tripping Instability of Ring Stiffened Cylinders induced by Underwater Explosions 2625
Y.O. Shin and Y.S. Shin

Vibration Effects on Structures and Environments
Special session organised by J. Bencat and K. Stypula

172 Measurements and Prediction of Pedestrian Walking Loads on an Aluminium Catwalk 2644
J. Fernández, A. Fraile, E. Alarcón and L. Hermanns

173 Measurement and Prediction of the Dynamic Behaviour of Laminated Glass 2658
L. Hermanns, J. Fernández, A. Fraile and M.S. Gómez

174 Train Induced Free Field Vibrations Experimental and Numerical Analysis 2670
J. Benčat and M. Škarupa

175 Numerical Analysis of Railway Track Vibrations 2680
J. Benčat and J. Koňar

176 The Design of Rail Tracks including the Influence of Vibration on People in Buildings 2694
J. Kawecki, K. Koziol and K. Stypula

177 Methods of Assessment for Vibration Impact on People in Buildings 2704
J. Kawecki and K. Stypula

178 Paraseismic Loading of Bridge Structures 2713
D. Papán

179 Dynamic Stability of a Non-linear Continuous System Subjected to Vertical Seismic Excitation 2722
J. Náprstek and C. Fischer

VOLUME 4

180 Dynamic Identification of a Pedestrian Bridge using Operational Modal Analysis 2736
D. Foti, S. Ivorra, D. Bru and G. Dimaggio

Novel Numerical Methods in Solid Mechanics
Special session organised by L. Godinho and D. Dias da Costa

181 A Quadratic Ten Node Tetrahedral Cosserat Point Element for Nonlinear Elasticity 2754
M. Jabareen, E. Hanukah and M.B. Rubin

182 Axisymmetric Large Deflection Analysis of an Annular Circular Plate subject to Rotational Symmetric Loading 2771
M. Altekin and R.F. Yükseler

183 Bipenalty Methods for Single-Point and Multi-Point Constraints in Computational Dynamics 2784
J. Hetherington, A. Rodriguez-Ferran and H. Askes

184 A New Method for Solving Random Vibration Problems 2798
M. Grigoriu

185 A Hybrid Approach for Modelling Wave Propagation near Hollow Elastic Pipelines 2810
P. Amado-Mendes, L. Godinho and A. Pereira

186 Simulation of a Crack Detection Method for Concrete Structures using SH Waves 2824
L. Godinho, D. Dias-da-Costa, E. Júlio and P. Areias

187 Efficient Linear and Non-Linear Finite Element Formulation using a New Local Enhancement of Displacement Fields for Triangular Elements 2839
L. Damkilde and R.R. Pedersen

188 Biomechanics of the Willis Circle Arteries 2851
D.V. Ivanov, L.Yu. Kossovich, Y.E. Salkovsky and N.G. Chernyshevsky

Numerical Analysis of Low-Frequency Vibrations in Lightweight Buildings
Special session organised by L. Andersen and P.H. Kirkegaard

189 A Modular Finite Element Model for Analysis of Vibration Transmission in Multi-Storey Lightweight Buildings 2866
L.V. Andersen, P.H. Kirkegaard, K. Persson, N. Kiel and B. Niu

190 Different Modelling Approaches to Coupling Wall and Floor Panels within a Dynamic Finite Element Model of a Lightweight Building 2886
N. Kiel, L.V. Andersen, B. Niu and K. Persson

191 Model Reduction in Dynamic Finite Element Analysis of Lightweight Structures 2900
O. Flodén, K. Persson, A. Sjöström and N. Olhoff

192 Accurate Finite Element Modelling of Chipboard Single-Stud Floor Panels subjected to Dynamic Loads 2916
A. Sjöström, O. Flodén, K. Persson, P.H. Kirkegaard, D. Bard and J. Negreira

193 Evaluation of Various Joints between Studs and Plates on Flanking Noise Transmission within Lightweight Periodic Structures 2931
P.G. Domadiya, K.A. Dickow, L.V. Andersen and S.V. Sorokin

194 Vibration Transmission in a Multi-Storey Lightweight Building: A Parametric Study 2941
B. Niu, L.V. Andersen, N. Kiel, O. Flodén and G. Sandberg

195 Accuracy of Dynamic and Acoustic Analysis of Lightweight Panel Structures: A Comparison of ABAQUS and ANSYS 2959
P.H. Kirkegaard, K.A. Dickow, L. Andersen and A. Sjöström

Seismic Vulnerability Assessment
Special session organised by G. De Roeck and H. Friedl

196 On the Contribution of Experimental Data to the Reduction of the Uncertainty of Fragility Curves 2968
M. Perrault and P. Gueguen

197 Vulnerability Assessment of Structures in a Low-To-Moderate Seismic Region based on Ambient Vibration Test Modal Data 2985
T.T. Bui and G. De Roeck

198 Seismic Reliability of Eccentrically Braced Frames 2996
I. Mansouri, N.M. Mirzai and H. Saffari

199 Seismic Behaviour and Retrofitting of the Poggio Picenze Historical Centre Damaged by the L'Aquila Earthquake 3009
A. Formisano

200 Seismic Performance Assessment of a Reinforced Concrete Building designed using the Albanian Seismic Code 3028
E. Zhulegu and H. Bilgin

201 Evaluation of Seismic Energy Demand of Reinforced Concrete Moment Reistant Frames Considering Soil-Structure Interaction Effects 3036
S. Gharehbaghi, E. Salajegheh and M. Khatibinia

202 Dynamic In-Situ Assessment for Seismic Analysis 3056
H. Friedl, K. Alten and A. Lechner

Reliability Based Optimization: Stationary and Dynamic Problems
Special session organised by K. Marti, G.I. Schuëller and H.A. Jensen

203 An Open Computational Framework for Reliability Based Optimization 3069
E. Patelli and M. de Angelis

204 Reliability Assessment and Reliability-Based Design of Plastic Shallow Curved Plates 3086
L.M.C. Simões

205 Deterministic and Reliability-Based Optimization of a Belt-Conveyor Bridge 3096
L.M.C. Simões, J. Farkas and K. Jármai

206 The Coupling of Robust Metamodel and Heuristic Methods in Reliability Based Design Optimization 3109
N. Rabhi, M. Guedri and N. Bouhaddi

207 Topology Optimization for the Case of Probabilistic Loading 3121
J. Lógó, E. Pintér and D.B. Merczel

Recent Advances in Structural Analysis and Optimization for Acoustics and Vibrations
Special session organised by M. Matos Neves

208 A Finite Element-Boundary Element Approach for Sound and Vibration Reduction using Piezoelectric Shunt Damping 3132
W. Larbi, J.-F. Deü and R. Ohayon

209 Two Scale Modelling of Acoustic Waves in Phononic Plates using Homogenization of High-Contrast Media 3144
E. Rohan, R. Cimrman and B. Miara

210 A Time-Domain Methodology for Rotordynamics: Analysis and Force Identification 3163
P.V. Paulo, Y.E. Lage, M.M. Neves, N.M.M. Maia and F.J.P. Lau

211 Transient Fluid-Structure Interaction Analysis of Exhaust Gas Recirculation Cooler Pipes 3175
T. Grätsch

212 Efficient Calculation of the Added Mass Matrix for Vibration Analysis of Submerged Structures 3188
L.E. Monterrubio and P. Krysl

Probabilistic Approaches to Structural Mechanics
Special session organised by A. El-Hami

213 A Variability Study on the Response of Composite Structures based on Sensitivity Indices 3199
C.A.C. António and L.N. Hoffbauer

214 Firefly Metaheuristics for the Size, Shape and Topology Optimization of Truss Structures 3218
L.F. Fadel Miguel, R.H. Lopez, A. El-Hami and L.F.F. Miguel

215 Reliability-Based Design Optimization for the Analysis of Vibro-Acoustic Problems 3227
M. Mansouri, B. Radi and A. El Hami

216 Derivation of Deterministic Design Data from Stochastic Analysis in the Aircraft Design Process 3238
U. Armani, S. Coggon and V.V. Toropov

Structural Waveguide Modelling Methods
Special session organised by J.R.F. Arruda and J.-M. Mencik

217 Wave Spectral Finite Element Analysis of Two-Dimensional Waveguides 3254
P.B. Silva and J.R.F. Arruda

218 Wave Finite Element based Strategies for Computing the Acoustic Radiation of Stiffened or Non-Stiffened Rectangular Plates subject to Arbitrary Boundary Conditions 3272
J.-M. Mencik and M.-L. Gobert

219 A Study of Waveguides with Sections of Proportional Sizes: Application to Wave Radiation 3292
D. Duhamel

New Applications of Isogeometric Methods to Structural Analysis
Special session organised by M. Cuomo, L. Greco and A. Reali

220 Shape Optimization using Isogeometric Analysis and Particle Swarm Optimization 3310
A. Pospíšilová, M. Lepš, D. Rypl and B. Patzák

221 Isogeometric Shell Formulation based on a Classical Shell Model 3325
A.H. Niemi, N. Collier, L. Dalcin, M. Ghommem and V.M. Calo

222 Multi-Patch Isogeometric Analysis of Space Rods 3337
L. Greco and M. Cuomo

Buckling and Postbuckling of Laminated Structures
Special session organised by A.J.M. Ferreira

223 Buckling of Laminated and Functionally Graded Plates using Radial Basis Functions 3357
A.M.A. Neves, A.J.M. Ferreira, E. Carrera, M. Cinefra, C.M.C. Roque, C.M. Mota Soares and R.M.N. Jorge

224 Stability Analysis of Laminated Composite Thin-Walled Beam Structures 3374
D. Lanc, I. Pešić and G. Turkalj

Plate Analysis

225 The Spectral Method for Moving Load Analysis of Thin Plates 3382
I. Kožar and N. Torić Malić

226 On the Convergence of a Refined Nonconforming Thin Plate Bending Finite Element 3391
R. Flajs and M. Saje

227 Formulation of Thin Plate Finite Elements using the Galerkin Boundary Integral Approach 3410
M. Mazza and F. Mazza

Shell Structures

228 Dynamic Equations for a Spherical Shell 3422
R. Okhovat and A. Boström

Design of Experiments

229 Estimation of Critical Flutter Load of a Non-Uniform L-Shaped Beam subjected to a Follower Force 3430
I. Takahashi

Multi-Level Optimisation

230 Gradient-Enhanced Metamodels and Multiparametric Strategies for Designing Structural Assemblies 3445
L. Laurent, P.A. Boucard and B. Soulier

Shape and Topology Optimisation

231 On the Design of a Compliant Mechanism with Non-Uniform Thermal Effects using Evolutionary Structural Optimization 3465
E. Vegueria, R. Ansola, J. Canales and A. Maturana

232 Generating Structural Configurations Having a Number of Specified Eigenfrequencies using a Level Set-Based Topology Optimization Method 3483
T. Yamada, T. Matsumoto and S. Nishiwaki

233 Shape and Topology Optimization of Elastic Contact Problems using the Piecewise Constant zzLevel Set Method 3494
A. Myśliński

234 From Optimal Structural Configuration to Truss Optimization 3506
C.Y. Lin, J.F. Chang and J.Y. Juang

235 Optimal Fibre Reinforcement for Masonry Structures using Topology Optimization 3523
M. Bruggi, G. Milani and A. Taliercio

236 Symmetry of Solutions in Discrete and Continuous Structural Topology Optimization 3536
J.N. Richardson, S. Adriaenssens, Ph. Bouillard and R. Filomeno Coelho

237 Topology Optimisation of Bodies in Unilateral Contact by Maximizing the Potential Energy 3555
N. Strömberg

238 Shape Optimization of Membrane Structures based on Finite Element Simulation 3563
C.W. Lim, V.V. Toropov and J. Ye

Space, Cable, Membrane and Shell Structures

239 Theoretical and Experimental Analysis of Tensegrity Structures 3581
S. Kmet and P. Platko

240 Numerical Analysis of Cable Structures 3602
M. Hüttner, J. Máca and P. Fajman

241 Optimization of Arch Supported Tensile Roofs 3615
K. Hincz

242 A New Approach for Shell Form Finding combining Numerical and Physical Design Tools 3629
D. Weiss and S. Adriaenssens

VOLUME 5

Progressive Collapse

243 The Behaviour of an Old Representative Reinforced Concrete Building subjected to Abnormal Loads 3640
A.G. Marchis, T.S. Moldovan and A.M. Ioani

244 Progressive Collapse Risk and Robustness of Low-Rise Reinforced Concrete Buildings 3660
L. Bredean, M. Botez and A. Ioani

245 Progressive Collapse Mitigation in Flat-Slab Buildings 3680
O.A. Mohamed

Thermal Problems

246 An Exact Elastic Plastic Solution for a Thin Disc subject to Thermal Loading 3690
O. Chesnikova, A. Pirumov and S. Alexandrov

Thermo-Mechanical Analysis

247 Thermo-Mechanical Analysis of Isotropic and Orthotropic Beams using a Unified Formulation 3702
D. Crisafulli, G. Giunta, E. Carrera and S. Belouettar

Multi-Scale Modelling

248 Multiscale Hydro-Thermo-Mechanical Analysis of Hydrating Concrete Structures 3722
L. Jendele, V. Šmilauer, M. Hlobil and J. Červenka

249 Resolution of Different Length Scales by an Efficient Combination of the Finite Element Method and the Discrete Element Method 3738
M. Michael, B. Peters and F. Vogel

250 Hierarchical Numerical Modelling of Nested Poroelastic Media 3755
E. Rohan and R. Cimrman

251 A Variational Multiscale Approach to Recover Perfect Bond in the Finite Element Analysis of Composite Beams 3769
R.E. Erkmen

252 Representation of Localized Phenomena in Dynamics using Multi-Scale Coupling 3789
J. Marchais, C. Rey and L. Chamoin

253 Optimal Prediction of Lyapunov Exponents for a Duffing Oscillator 3801
A. LaBryer, P.J. Attar and P. Vedula

254 Analytical and Computational Perspectives of Multi-Scale Theory for Homogeneous, Laminated Composite, and Sandwich Beams and Plates 3821
A. Tessler, M. Gherlone, D. Versino and M. Di Sciuva

Multi-Physics Simulations

255 Object Oriented Design of a Coupled, Multi-Physics Finite Element Kernel 3842
M. Horák and B. Patzák

Finite Element Technology

256 On the Convergence of a Nonconforming Plane Quadrilateral Finite Element 3854
M. Saje and R. Flajs

Crack Modelling

257 A Two-Node Multi-Cracked Beam Element for Static and Dynamic Analysis of Planar Frames 3873
M. Donà, A. Palmeri, A. Cicirello and M. Lombardo

258 Limit Analysis of Highly-Undermatched Welded Joints with Cracks 3893
S. Alexandrov

Material Modelling and Identification

259 A Two-Scale Micromechanical Model for Closed-Cell Aluminium Foams 3906
J. Němeček and V. Králík

260 Spline-Based Hyperelasticity for Transversely Isotropic Incompressible Materials 3918
M. Latorre and F.J. Montáns

261 Strain Behaviour of Concrete subjected to Combined Mechanical and Thermal Loading: From Micromechanical Modelling to Simulation of Real-Scale Fire Tests 3929
T. Ring, M. Zeiml and R. Lackner

262 The Elastic-Viscoelastic Correspondence Principle and Parameter Identification 3939
T. Ohkami, S. Matsuura and S. Koyama

263 Obtaining Material Properties from Indentation Loading-Unloading Curves using Simplified Equations 3948
J.J. Kang, M. Boris, A.A. Becker and W. Sun

264 Calibration of a Distortional Hardening Model of Plasticity 3965
J. Plešek, Z. Hrubý, S. Parma, H.P. Feigenbaum and Y.F. Dafalias

265 Numerical Analysis of Concrete at an Early Age 3976
A. Ilc, G. Turk and I. Planinc

Structural Mechanics

266 Hypergraph Products for Structural Mechanics 3992
A. Kaveh and B. Alinejad

Aluminium Structures

267 A Commentary on Improving the Design Rules for Thin Aluminium Shell Structures 4009
J.W. Bull

Shakedown

268 Eurocode Stability Requirements in Optimal Shakedown Truss Design 4017
J. Atkočiūnas and G. Blaževičius

269 Shakedown Analysis in n-dimensional Loading Spaces with Kinematical Hardening 4028
J.-W. Simon

Finite Element Studies

270 A Study of the Structural Design of a Bottle with Vacuum Insulation 4048
K. Utsumi, T. Kobayashi, T. Horiuchi, T. Tanaka and Y. Arao

271 Development and Implementation of Numerical Strategies for Nonlinear Dynamic Analysis of Risers using the Finite Element Method 4061
J.A.G. Sánchez and H.B. Coda

272 Development of a Vehicle Suspension Finite Element Model for Kerb Impact Simulations 4076
W.Z. Golinski

Impact Studies

273 Validation of Numerical Simulation Models for Transport and Storage Casks using Drop Test Results 4085
L. Qiao, U. Zencker, H. Völzke, F. Wille and A. Musolff

Structures subject to Blast Loading

274 The Collapse of a Skylight Shell Structure caused by a Blast 4097
A. Angotzi, A. Mussi, E. Trolese, M. Zanchin, R. Gori and A. Mastropasqua

Control of Structures

275 The Continuation Method for Dynamic Problems of Frames with Viscoelastic Dampers 4108
R. Lewandowski

276 The Influence of Various Fractional Models of Viscoelastic Dampers on the Dynamic Behaviour of Structures 4118
Z. Pawlak and R. Lewandowski

277 A Differential Evolution Algorithm for Fuzzy Control of Smart Structures 4136
M. Marinaki, Y. Marinakis and G.E. Stavroulakis

278 Vibration Control of Civil Engineering Structures using Magneto-Rheological Dampers 4156
M.B. Cesar and R.C. Barros

Retrofitting and Repair

279 The Reinforcement of Multiple-Leaves Masonry Walls using Carbon Fibre Reinforced Polymer: A Theoretical Approach 4178
L. Anania, C. Giaquinta and G. D'Agata

280 Placement of Fibre Reinforced Polymer Provision in No-Tension Vaults using the Vault Inequality System 4195
A. Baratta and O. Corbi

281 A Simple Homogenized Model for the Non-Linear Analysis of FRP Strengthened Masonry Structures 4206
G. Milani and P.B. Lourenço

282 Finite Element Analyses of Reinforced Concrete Beams Strengthened using CFRP 4222
A.E. Demirer and G. Arslan

283 Retrofitting a Truss-Z Modular Pedestrian Ramp with Fully Automated Generation of the Spatial Configuration of the Modules 4232
M. Zawidzki and K. Nishinari

Seismic Engineering

284 Seismic Wave Motion over a Geographical Area by a Random Field Model 4243
I. Corbi

285 Spectrum-Compliant Accelerograms through Harmonic Wavelet Transform 4258
D. Cecini and A. Palmeri

286 Building Pounding Forces for Different Link Element Models 4278
R.C. Barros and S.M. Khatami

287 Tuned Mass Dampers for the Mitigation of Impulsive Ground Motions 4292
E. Matta, R. Ceravolo, A. De Stefano, A. Quattrone and L. Zanotti Fragonara

288 Structural Integrity Evaluation of Reactor Pool Working Platform: Guide Tubes and Refuelling Cover in a Research Reactor 4310
S. Kwag, J.-M. Lee, J.-S. Ryu and Y.-K. Kim

289 Accounting for Uncertainty in Bidirectional Ground Motion 4323
C.S. Belsham

290 Seismic Retrofitting Strategy for Improved Strength and Ductility of a Plan-Wise Irregular Reinforced Concrete Building 4337
M. Valente

291 The Performance Assessment of a Multi-Span, Box Girder Reinforced Concrete Bridge with and without Seismic Isolation 4348
M. Borekci, M. Altun and G. Arslan

292 A Displacement-Based Design Procedure for Seismic Retrofitting of Reinforced Concrete Frames using Braced Ductile Shear Panels 4358
M. Valente

293 Soil-Pile Interaction in Deep Layered Marine Sediment subject to Seismic Excitation 4368
T.P. Peiris, D. Thambiratnam, N. Perera and C. Gallage

294 Reproducing Ground Motions with Shaking Tables with Limited Stroke 4380
Y. Ribakov and G. Agranovich

295 Simulating Responses of Objects to Seismic Input Motion using Multibody Dynamics 4390
C.S. Belsham

Boundary Element Method

296 Nonlinear Inelastic Nonuniform Torsion of Bars including the Secondary Torsional Moment Deformation Effect 4403
V.J. Tsipiras and E.J. Sapountzakis

Error Estimation

297 A Practical Tool for Estimating Errors of Stresses in Assemblies 4423
S. Pavot, E. Florentin, P. Pasquet and S. Guinard

Risk Assessment

298 Numerical and Statistical Methods in Quantitative Risk Analysis of Road Tunnels 4432
C. Forster, M. Drakulić and B. Kohl

Author Index (LISTED BY PAPER NUMBER)
