Contents

Preface

High Performance Computing for Engineering
Special session organised by P. Iványi

1 Future High Performance Computing Strategies 1
M.M. Resch

2 Addressing the Problem of Data Mobility for Data-Intensive Science 13
W.E. Johnston, E. Dart and B. Tierney

3 On the Design of a Parallel, Distributed Multi-Physics Integration Tool 34
B. Patzák, D. Rypl and J. Kruis

4 Load Balancing for Mesh Based Multi-Physics Simulations in the Arcane Framework 47
C. Chevalier, G. Grospellier, F. Ledoux and J.C. Weill

5 A Parallelization Algorithm for Non-Smooth Multibody Dynamics 63
J. Clauberg and H. Ulbrich

6 Application of GPU-Based Computing to Large Scale Finite Element Analysis of Three-Dimensional Structures 77
A. Akbariyeh, T.J. Carrigan, B.H. Dennis, W.S. Chan, B.P. Wang and K.L. Lawrence

7 Adjoining Hybrid Parallel Code 89
M. Schanen, M. Foerster, J. Lotz, K. Leppkes and U. Naumann

8 Memory-Region Thread Level Speculative Execution 107
D. Rubio Bonilla and L. Schubert

9 A Parallel Meshless Numerical Approach for the Solution of Transport Phenomena 125
G. Kosec and R. Trobec

10 The Analysis of Particle Flow using the Parallelised Smoothed Particle Hydrodynamics Method 137
M. Lee, M. Tak and T. Park

11 The Analysis of Porous Media using the Mixed Finite Element Method and the FETI Method 150
K. Lee, M. Tak and T. Park

12 Platform as a Service Computing Environment for Earthquake Engineering 161
M. Dolenc and R. Klinc

Coupled and Multi-Scale Methods
Special session organised by J. Kruis

13 Modelling of Moisture Transfer in Soils 168
T. Krejci and T. Koudelka

14 Adaptive Modification of the Künzel Model for Coupled Heat and Moisture Transfer 188
J. Kruis, J. Maděra and P. Šolín

15 Processor Farming in Homogenization of Coupled Heat and Moisture Transfer 204
J. Kruis, T. Krejčí, J. Sýkora and M. Šejnoha

16 The Local Discontinuous Galerkin Method for Coupled Unsaturated Flow and Chemical Transport in Porous Media 217
A. Ghavam-Nasiri and A. El-Zein

17 A Coupled Chemical and Mass Transport Model for Concrete Durability 230
M.M. Jensen, B. Johannesson and M. Geiker

18 A Finite Strain Thermo-Chemo-Mechanical Coupled Model for Filled Rubber 248
T.A. Nguyen Van, S. Lejeunes, D. Eyheramendy and A. Boukamel

19 The Three Dimensional Extended Bridging Domain Method for Brittle Fracture 268
H. Talebi, M. Silani and T. Rabczuk

20 Experimental and Numerical Analysis of the Long Term Behaviour of Glued Laminated Timber 287
R. Pecenko, T. Hozjan, T. Pazlar and G. Turk

21 Application of Micromechanics in Engineering Practice 301
M. Šejnoha, V. Šmilauer, J. Němeček and L. Kopecký

22 Single Electron Spin Control in Semiconductor Nanowires 318
S. Prabhakar and R. Melnik

Analytical and Experimental Performance of Hybrid, Composite, Concrete Structural Systems and Tower Cranes
Special session organised by H.C. Kim, W.K. Hong and Y.S. Shin

23 Progressive Collapse Resisting Capacity of Moment Frames with Infill Steel Panels 326
M.H. Lee, H. Lee and J.K. Kim

24 The Design of Special Truss Moment Frames Against Progressive Collapse 334
H.K. Kang, J.Y. Park and J.K. Kim

25 The Effect of Cross Sectional Area on the Fire Performance of High Strength Concrete Columns 341
H.S. Kim, Y.H. Kim and Y.S. Shin

26 Management Processes for Tower Crane Selection and Support Design 352
C.Y. Lim, K.Y. Son, Y.J. Na and S.K. Kim

27 The Effect of Fibre Reinforced Polymer Sizes on Debonding when Retrofitting Reinforced Concrete Beams 362
Y.H. Kim, Y.S. Shin and H.S. Kim

28 A Study on the Shear Behaviour of Reinforced Concrete Beams Embedded with Glass Fibre Reinforced Polymer Plates 373
J.H. Choi, M.S. Kim, Y.H. Lee, D.J. Kim and H.C. Kim

29 The Experimental and Analytical Investigation of the Flexural Capacity of Pre-Cast Composite Beams 383
H.J. Ko, W.K. Hong, S.C. Park, G.T. Lim and J.H. Kim

Mesh Generation and Adaption
Special session organised by J. Sarrate and F. Ledoux

30 An Analysis of the Transformation Requirements for Digital Mock-Ups of Structural Assembly Simulations 396
F. Boussuge, J.-C. Léon, S. Hahmann and L. Fine

31 Automatic Generation of the Structural Layout of Aircraft Rear Fuselage and Tail Surfaces including Global Finite Elements and CAD Model 418
N. Bailey-Noval, R. Llamas-Sandin and A. Moreno-Herranz

32 An Independent Mesh Model Process to Write Meshing Algorithms 438
C. de Bellabre, F. Ledoux and J.-Ch. Weill

33 Surface Meshing with Metric Gradation Control 458
P. Laug and H. Borouchaki

34 Evaluation of Radial Basis Functions for the Deformation of Unstructured Meshes 478
P.E. Kouskouris and I.K. Nikolos

35 Three-Dimensional Finite Element Modelling of Stack Pollutant Emissions 497
R. Montenegro, A. Oliver, E. Rodríguez, J.M. Escobar, G. Montero and A. Pérez-Foguet

36 Untangling and Smoothing of Quadrilateral and Hexahedral Meshes 515
T.J. Wilson, J. Sarrate, X. Roca, R. Montenegro and J.M. Escobar

Numerical Methods for Solving Nonlinear Problems
Special session organised by J.R. Torregrosa and A. Cordero

37 Numerical Behaviour of Support Splitting and Merging in Nonlinear Diffusion Equations 531
K. Tomoeda

38 Using a Model of Hysteresis for Linearization of Piezo Bender Distortion 543
M. Pelic and R. Staniek

39 Using Optical Flow for Analyzing the Dynamics of the Bouncing Ball System 557
D. Ginestar, J.L. Hueso, E. Martínez and J. Riera

40 A Family of Optimal Methods for Solving Nonlinear Equations 572
A. Cordero, J.L. Hueso, E. Martínez and J.R. Torregrosa

41 Dynamic Aspects of Damped Newton's Method 582
J.M. Gutiérrez, A.A. Magreñán and N. Romero

42 Dynamic Behaviour of Steffensen-Type Methods 598
F. Chicharro, A. Cordero and J.R. Torregrosa

Isogeometric Analysis
Special session organised by T. Rabczuk

43 Transient Analysis of Laminated Composite Plates using Isogeometric Analysis 614
N. Valizadeh, S.Sh. Ghorashi, H. Yousefi, T.Q. Bui and T. Rabczuk

44 An Isogeometric Approach for Free Vibration and Buckling Analysis of Laminated Composite Plates 631
N. Valizadeh, S. Shojaee, E. Izadpanah, T.Q. Bui and V.T. Vu

45 Singularities in Isogeometric Analysis 647
T. Takacs

46 Orthotropic Enriched Extended Isogeometric Analysis for Fracture Analysis of Composites 662
S.Sh. Ghorashi, N. Valizadeh and S. Mohammadi

47 Extended Isogeometric Analysis of Plates with Curved Cracks 675
S.Sh. Ghorashi, N. Valizadeh, S. Mohammadi and T. Rabczuk

Engineering Design Optimization using Recent Metaheuristic Techniques
Special session organised by M.P. Saka

48 Application of Grammatical Evolution to the Determination of Constitutive Equations 686
E. Kita, T. Kuroda, H. Sugiura, Y. Zuo and Y. Wakita

49 Differential Evolution Assisted by Surrogate Models for Structural Optimization Problems 696
E. Krempser, H.S. Bernardino, H.J.C. Barbosa and A.C.C. Lemonge

50 An Improved Hybrid Method for the Multi-Mode Resource-Constrained Project Scheduling Problem 715
A. Csébfalvi and E. Szendrői

51 Phenotype Building Blocks and Geometric Crossover in Structural Optimisation 728
A. Maheri, T. Macquart, D. Safari and M.R. Maheri

52 Improving the Big Bang-Big Crunch Algorithm for Optimum Design of Steel Frames 742
O. Hasançebi and S. Kazemzadeh Azad

Network Analysis for Engineering Applications
Special session organised by S.V. Poroseva

53 Optimization of Survivability Analysis for Large-Scale Engineering Networks 759
S.V. Poroseva and P.A. Rikvold

54 Estimation of Real-Time Demands on the Basis of Pressure Measurements 769
A. Vassiljev and T. Koppel

Imaging and Digital Representation

55 Three-Dimensional Scans of the Taipei Commercial District 778
N.J. Shih, C.Y. Lee, S.W. Jhan, G.S. Wang and Y.F. Jhao

56 Calibration of the Sensor Direction in the Simplified Three-Dimensional Digital Image Correlation Method 787
S.-H. Tung, M.-H. Shih and W.-P. Sung

57 Block Matching Algorithms for Load Test Evaluation 798
G. Almeida, F. Melicio and J. Fonseca

58 A Method for the Evaluation of the Casting Accuracy of a Cast Iron Body 814
A. Gessner and R. Staniek

59 Simulation of Machining Allowance Mass Minimization of Iron Castings 824
K. Mrozek and A. Gessner

60 Numerical Methods for Digitally Synthetic Holograms 832
A. Lotfi

Mathematical Visualisation

61 Visualizing Nonlinear Implicit Functions 845
I. Kožar

Computer Aided Design

62 A Three-Dimensional CAD Engine: Implementing Parametric Modelling 856
S. Kubota, E. Kitagawa, K. Monobe, K. Nakamura and S. Tanaka

63 Fundamental Research concerning a Three-Dimensional CAD Engine 865
K. Monobe, S. Kubota, E. Kitagawa, K. Nakamura and S. Tanaka

Expert Systems

64 An Expert System for Pavement Management in Urban Road Networks 873
P.A. Lemis-Petropoulos, A.P. Chassiakos and D.D. Theodorakopoulos

Optimisation for Engineering Practice

65 A Hybrid Metaheuristic for Project Scheduling Problems with Fuzzy Activity Durations to support the Ős-Dráva Water Management Programme 885
S. Danka and A. Csébfalvi

66 Optimization of Pipeline Routes using an AIS/Adaptive Penalty Method 905
R.R. de Lucena, B.S.L.P. de Lima, B.P. Jacob and D.M. Rocha

67 Which is the Best? A Statistically Correct Comparison of Heuristic Results in Structural Optimization 922
A. Csébfalvi

Artificial Neural Networks and Support Vector Machines

68 The Application of Neural Networks to Predict Wind Waves 938
C.P. Tsai, C.C. Teng and C.H. Tsai

69 Optimization of Bracing Systems using Neural Networks 946
E.M. Elkassas and S.M. Swelem

70 A Hybrid Meta-Heuristic Method and Weighted Least Squares Support Vector Machine Method for the Optimal Shape Design of Gravity Dams 961
J. Salajegheh, E. Salajegheh, M. Khatibinia and Sh. Khosravi

71 Support Vector Machine Modelling for the Compressive Strength of Concrete 981
A. Sriraam, S.K. Sekar and P. Samui

72 Pedotransfer Functions Development by means of the Ensemble Data-Driven Methodology 996
M. Cisty, J. Bezak and J. Skalova

Object-Oriented Methods

73 Using WCF and TPL in Distributed and Parallel Finite Element Analysis 1007
R.I. Mackie

74 Efficient Parallelization of Java Applications for Semantic Web by means of the Message-Passing Interface 1021
A. Cheptsov

75 An Advanced Java Approach for the Development of Finite Element Codes 1032
R. Saad and D. Eyheramendy

Design of Experiments

76 A Method for Maximin Constrained Design of Experiments 1045
E. Myšáková, M. Lepš and A. Kučerová

Engineering Analysis and Simulation

77 Modelling and Simulation Tests of an Electrohydraulic Servo-Drive with a Stepping Motor 1061
A. Myszkowski

78 A Numerical Approach to the Effect of Surface Texturing on Parallel Thrust Bearings 1077
F. Abate, V. D'Agostino and R. Di Giuda

79 Investigation and Rationalization of Assembly System Productivity using the "Mean Time Between Failures" Parameter 1091
O. Ciszak

Numerical Techniques in Engineering

80 Approximate Solutions of Two-Dimensional Caputo Fractional Diffusion Equations 1098
D.P. Zielinski and V.R. Voller

81 Quadrature-Free Characteristic Methods for Convection-Diffusion Problems 1114
M. Tabata

Multi-Body Systems

82 Flexible Multibody Systems with Active Vibration Control 1126
M.A. Neto, J.A.C. Ambrósio, L.M. Roseiro, A. Amaro and C.M.A. Vasques

83 Simulation and Validation of Valve Springs in Valve Train Simulations 1138
J. Clauberg, B. Huber and H. Ulbrich

84 Modal-Space Based Solutions including Geometric Nonlinearities for Flexible Multi-Body Systems 1158
D. Marinković, M. Zehn and Z. Marinković

Multi-Physics Problems

85 Magnetohydrodynamic Flow of a Liquid Metal in a Curved Circular Duct subject to the Effect of an External Magnetic Field 1170
P.A. Bakalis, P.M. Hatzikonstantinou and P. Vafeas

86 Mechano-Chemo-Electrical Finite Element Modelling of the Sensing Behaviour of Ionic Polymer Metal Composites 1184
B. Akle, W. Habchi and T. Wallmersperger

87 Adaptive Model Reduction for Thermoelastic Problems 1198
M.G. Larson and H. Jakobsson

Multi-Level Techniques

88 A Multilevel Technique based on Nested Local Meshes for Nonlinear Mechanics 1209
L. Barbié, I. Ramière and F. Lebon

Multi-Grid Method

89 A Multigrid Method using Explicit Approximate Inverses for the Numerical Solution of Two-Dimensional Time-Dependent Problems 1229
C.K. Filelis-Papadopoulos and G.A. Gravvanis

Contact Problems

90 Domain-Decomposition based $H^{1/2}$ Seminorm Preconditioners for Frictional Contact Problems 1247
A. Lotfi

Crack Modelling

91 Numerical Crack Growth Analysis in AA2024-T3 Friction Stir Welded Butt Joints 1259
P. Carlone, R. Citarella, M. Lepore and G.S. Palazzo

92 The Influence of Eccentricity on the Crack Breathing in a Rotating Shaft 1275
L. Rubio, B. Muñoz-Abella, P. Rubio and L. Montero

Materials Modelling

93 Dynamics and Quasicontinuum Analogues of a Lattice with Simple Microstructures 1285
M. Charlotte

94 Application of Artificial Neural Networks in Identification of Affinity Hydration Model Parameters 1304
T. Mareš, E. Janouchová and A. Kučerová

95 Indirect Determination of Material Properties of Closed-Cell Metal Foam: Comparison of Voxel and Tetrahedral Finite Element Models 1318
O. Jiroušek, P. Koudelka and P. Zlámal

Computational Methods for Wave Propagation

96 Dynamic Analysis of a Porous Layered Medium under a Load Moving along a Railway Track 1329
K. Chahour, G. Lefeuve-Mesgouez, A. Mesgouez, A. Bouheraoua and A. Laribi

97 Transient Wave Analysis for an Inhomogeneous Elastic Thick Plate subjected to Inplane Impact Loading 1344
K. Miura

98 A Stochastic Thin-Layer Method for an Inhomogeneous Half-space in Antiplane Shear 1363
J.H. Lee, J.K. Kim and J.L. Tassoulas

Heat Dissipation and Transfer Problems

99 A Model of Heat Dissipation for the Interface of Braking Systems using the Discrete Element Method 1374
P. Coorevits, V.D. Nguyen, V. Magnier, J.-F. Brunel and P. Dufrénoy

100 Adjoint-Based Sensitivity Analysis for Buoyancy-Driven Incompressible Navier-Stokes Equations with Heat Transfer 1385
A. Lincke and T. Rung

101 Transient Thermal Analysis of a Nano-Satellite in Low Earth Orbit 1396
V. Chandrasekaran and Subramanian E.R.

102 A Frequency Domain Formulation of Kansa's Method to Simulate Transient Heat Conduction 1414
L. Godinho and F.G. Branco

Finite Element Techniques

103 Modelling of Multi-Material Assemblies using an Equivalent Finite Element 1426
O. Omram, V.D. Nguyen, H. Jaffal, P. Marchand and P. Coorevits

Finite Element Studies

104 Simulation of Mechanical and Thermal Properties for Sandwich Panels with Cellular Wood Cores 1435
E. Labans, K. Kalnins and A. Bikovs

105 The Prototype Repository Test: Thermal Model Verification 1444
J. Novak

Inverse Problems

106 A Multi-Parameter Perturbation Solution for the Inverse Eigenproblem of Nearly-Resonant N-Dimensional Hamiltonian Systems 1453
M. Lepidi

Geotechnical Engineering

107 Influence of Microscopic Factors on Lateral Earth Pressure using the Discrete Element Approach 1469
M.-C. Weng and C.-C. Cheng

108 Assessment of the Stress-Strain State of Earth Dams 1482
M.M. Mirsaidov, T.Z. Sultanov and D.A. Khodzhaev

109 Seismic Stability of Reinforced Soil Slopes 1500
I. Tzavara, V. Zania, Y. Tsompanakis and P.N. Psarropoulos

Rock Mechanics

110 Simulation of the Long-Term Behaviour of an Underground Structure in Rock Salt 1513
A. Pudewills

111 Linearization of the Hoek-Brown Failure Criterion for Non-Hydrostatic Stress Fields 1526
S.K. Sharan and R. Naznin

Foundation Engineering

112 Studying the Behaviour of a Proposed Strip Foundation for Structural Retrofitting 1539
M. Foroughi and M.A. Barkhordari

113 Modal Harmonic Three-Dimensional Finite Element Analysis of an Unusual Vibrating Machinery Pile Foundation 1550
D.K.H. Ho, C.R. Grant and P.G. Dominish

Soil-Structure Interaction

114 A Subsoil Model based on Numerical Integration of a Nonlinear Halfspace 1564
R. Cajka

115 Numerical Modelling of Engineering Structures subjected to Dynamic Seismic Loading 1579
S.N. Polukoshko, V.F. Gonca and E.V. Uspenska

Fluid-Structure Interaction

116 Effect of Structural Deformation on Underwater Implosions 1596
J.S. Briscoe and S.W. Lee

CFD and Modelling of Flow

117 Multi-Physics Computational Fluid Dynamics Modelling of Three-Phase Flow in a Nano-Particle Separator using the Particle-Based Method 1610
R. Takahashi, M. Suzuki, M. Yamamoto and H. Kitada

118 Comparison of the Continuity Vorticity Pressure, Auxiliary Potential and Implicit Potential Methodologies for Incompressible Flow in Straight Ducts 1623
M. Georgiou, P.K. Papadopoulos and P.M. Hatzikonstantinou

119 A Dynamic Wall-Model for Large-Eddy Simulation of High Reynolds Number Shock-Induced Separated Flows 1635
S. Kawai and J. Larsson

120 Modelling Fluidized Beds using Coupled Discrete Element Modelling with Computational Fluid Dynamics 1654
C. Marie, S. Al Arkawazi, K. Benhabib and P. Coorevits

121 A Boundary Element Method for the Computation of Unsteady Sheet Cavitation Effects in Marine Propeller Flows 1667
M. Bauer and M. Abdel-Maksoud

122 An Analysis of Intersecting Adiabatic Flows using the Semi-Lagragian Galerkin Method 1684
R. Omata

123 Numerical Analysis of Density Changing Flows using the Semi-Lagrange Galerkin Method 1696
K. Fukuyama

124 Turbulence in the Artificial Boundary Layer of Photovoltaic Power Plants 1710
A. Tesar

Elasto-Hydrodynamic Lubrication

125 Fast and Reduced Full-System Finite Element Solution of Line Contact Elastohydrodynamic Lubrication Problems 1718
W. Habchi and J. Issa

126 The Influence of Surface Roughness and Piezo-Viscous Lubricant Properties on the Elastohydrodynamic Line Contact Lubrication 1738
V. D'Agostino, V. Petrone and A. Senatore

Chemical Engineering

127 Simulation of the Sorption-Enhanced Steam Methane Reforming Process Operated in Fluidized Bed Reactors: A Dynamic One-Dimensional Two-Fluid Model 1756
J. Solsvik, R.A. Sànchez, Z. Chao and H.A. Jakobsen

128 Evaluation of Weighted Residual Methods for the Solution of the Chemical Reactor Pellet Model Equations 1770
J. Solsvik, S. Tangen and H.A. Jakobsen

Aeronautical Engineering

129 Parametric Geometry Generation and Automatic Aerodynamic Analysis of Aircraft Rear Fuselage and Tail Surfaces 1785
R. Llamas-Sandin, A. Moreno-Herranz and N. Bailey-Noval

130 Multi-Disciplinary Design and Analysis of Aircraft Rear Fuselage and Tail Surfaces 1803
R. Llamas-Sandin, A. Moreno-Herranz and N. Bailey-Noval

131 A Numerical Study of the Effects of Aerofoil Shape on Low Reynolds Number Aerodynamics 1819
H. Aono, T. Nonomura, M. Anyoji, A. Oyama and K. Fujii

132 Structural Wingbox Optimization for the Coupled Fluid Structure Interaction Problem of a Flexible Wing: Finite Element Analysis sol200 versus Surrogate Models 1834
J. Morlier, M. Charlotte, F. Habbib and E. Lima

133 Shape Optimisation and Performance Analysis of Flapping Wings 1850
M. Ghommem, N. Collier, A.H. Niemi and V.M. Calo

Biomedical Engineering

134 The Design of Artificial Grafts using Multi-Objective Genetic Algorithms 1864
C.F. Castro, C.C. António and L.C. Sousa

135 Mesh Generation and Blood Flow Simulation in Human Carotid Bifurcation 1874
C.F. Castro, L.C. Sousa, R. Chaves, C.C. António, R. Santos, P. Castro and E. Azevedo

136 Mechanically-Motivated Selection of Patching Material for the Patient-Specific Carotid Artery 1884
A.V. Kamenskiy, I.V. Kirillova, L.Y. Kossovich, Y.E. Salkovskiy and Y.A. Dzenis

137 Finite Element Comparison of Dental Implants: Static and Dynamic Analysis 1898
M.A. Neto, P. Nicolau, S. Rocha and R.P. Leal

Transport Engineering

138 Vehicle Platoon Control Based on a Multi-Leader Vehicle Following Model 1910
E. Kita, H. Shimizu, S. Nishiyama and Y. Wakita

139 GPS Vehicle Tracking in Urban Areas 1920
M.T. Obaidat and A.A. Mohammad
