Session IA – Ultrasonics, pushing the boundaries -

Chair – Dr I Baillie - CATS Room

10.45 Fabrication of flexible and portable thin-film ultrasonic transducers for NDT applications 1

Authors - R Hou, K J Kirk, D Hutson, R Fu and F Placido

11.15 Manual ultrasonic inspection of thin metal welds 2

Authors - C Carpentier and J Rudlin

11.40 Calibration-less thickness measurements of sub-millimetre thickness samples using electromagnetic acoustic transducers 18

Authors - K L McAughey, R S Edwards, M D G Potter and S Dixon

12.05 Shear-horizontal guided wave non-destructive evaluation using EMATs – defect detection and thickness measurement 19

Authors - P A Petcher and S Dixon

Session IB – Inspection Qualification and validation

Chairman – Prof A Dunhill - Charles Room

10.45 The HOIS recommended practice for the inspection of weld corrosion 20

Author - S F Burch

11.15 Development on the laser-based weld flaw identification system 21

Authors - Z Qu, A Bennecer, C Selcuk and T-H Gan

11.40 Applications of a 3D modelling and visualisation software tool for complex geometries 30

Authors - G Guse, L Bucklisch and F Mohr

12.05 A phased array inspection solution for the assessment of thin stainless welds 31

Authors - D P J Bell, I G Pettigrew and C R Bird

Session 1C – NDT in the rail industry

Chairman – Mr J Harris

- 10.45 Inspection of the exposed areas of rail axles using alternating currents and thermography 64**
Authors - D Panggabean and J Rudlin
- 11.15 UT inspections of train wheels and axles – latest developments 72**
Authors - P Marty, G Engl and S Krafft
- 11.40 The structural health condition monitoring of rail steel using acoustic emission techniques 73**
Authors - P Yilmazer, A Amini and M Papaelias
- 12.05 Assessment of corrosion on rail axles 85**
Authors - A Raude, A Loconte and D Panggabean

Session 2A – Phased Array

Chairman – Prof B Drinkwater - CATS Room

- 14.00 Array inspection of intermediate level waste containers N/A**
Author - A Croxford
- 14.30 Development of an automated scanner and phased array ultrasonic testing technique for the inspection of nozzle welds in the nuclear industry 92**
Authors - D Liaptsis, D Yan and I Cooper, V Papadimitriou, I Roditis and P Chatzakos
- 14.55 Detection capabilities of a phased array ultrasonic inspection system for plastic pipe butt fusion joints :4**
Authors - F Hagglund, M Spicer and M Troughton
- 16.15 Characterisation of inhomogeneous and anisotropic steel welds by ultrasonic array measurements ;4**
Authors - Z Fan and M Lowe
- 16.40 An advanced imaging method based on phased array in NDT ;5**
Authors - J X Qiao and M Jobst

Session 2A – Phased Array

Chairman – **Prof B Drinkwater - CATS Room**

14.00 Array inspection of intermediate level waste containers N/A
Author - A Croxford

14.30 Development of an automated scanner and phased array ultrasonic testing technique for the inspection of nozzle welds in the nuclear industry N/A
Authors - D Liaptsis, D Yan and I Cooper, V Papadimitriou, I Roditis and P Chatzakos

14.55 Detection capabilities of a phased array ultrasonic inspection system for plastic pipe butt fusion joints N/A
Authors - F Hagglund, M Spicer and M Troughton

16.15 Characterisation of inhomogeneous and anisotropic steel welds by ultrasonic array measurements N/A
Authors - Z Fan and M Lowe

16.40 An advanced imaging method based on phased array in NDT N/A
Authors - J X Qiao and M Jobst

Session 2B – Technology advancement

Chairman – **Dr K Milne - Charles Room**

14.00 Advancement of NDT technologies through the European FP7 research for the benefit of SMEs funding scheme 322
Author - T-H Gan

14.30 An application-specific design approach for 2D ultrasonic arrays 133
Authors - J Dziewierz, A Gachagan, N Lord and A J Mullholland

14.55 Data processing to improve the reliability of automated non-destructive inspection 11;
Authors - N Brierley, T Tippetts and P Cawley

16.15 Ultrasonic imaging of electrofusion welded polyethylene pipes employed in the utilities industry 12;
Authors - A Prakash, R L O'Leary, K Ross, E Clutton and A Gachagan

16.40 A calibration method based on the reconstruction for automatic ultrasonic flaw detection of the upset region of the drill pipe 13;
Authors - Tu Jun, KYi-hua Wu Jian-bo and SYan-hua

Session 2C – NDT in the rail industry Continued

Chairman – **Prof K Newton**

14.00 A low-cost laser rail profile measurement system 368

Authors - G Bolu, A Gachagan, G Pierce, and T Barden

14.30 Rapid non-contact rail inspection using Rayleigh-like guided waves 369

Authors - M Potter, P Petcher and S Dixon

14.55 The future of rail inspection technology and the INTERAIL FP7 project 16:

Authors - M Papaelias, S Kerkyras, F Papaelias, and K Graham

16.15 Analysis of alternating current field measurement rail inspection signals 179

Author - J Al-Dalabeeh, C Roberts and M Papaelias

16.40 Long-range inspection and condition monitoring of rails using guided waves 187

Author - A Wilkinson

09.00 BINDT strategy and the NDT/CM community, or the way to safety, reliability and growth 398

Author - Mr. Cameron Sinclair, CEO of BINDT

Session 3A – Ultrasonics Applications

Chairman – **Prof C B Scruby - CATS Room**

09.50 Real-time full matrix capture with focusing of known geometry through dual-layered media 197

Authors - M Sutcliffe, M Weston, B Dutton, P Charlton, K Donne and I Cooper

10.15 Characterisation of different surface-breaking defect geometries using Rayleigh waves 3: 7

Authors - F Hernández-Valle, A R Clough and R S Edwards

11.15 The use of surface wave enhancements in a fully optical system for the detection and characterisation of stress corrosion cracking in pipework 3: 8

Authors - A R Clough, F Hernández-Valle and R S Edwards

11.40 The ultrasonic NDE of titanium diffusion bonds using signal phase 1: 9

Author - E Escobar-Ruiz

12.05 A plate waveguide design for ultrasonic flow measurement in hostile environments 3; 8

Author - M Laws, S M Dixon and S N Ramadas

Session 3B – Aerospace

Chairman – **A Birt - Charles Room**

09.50 Eddy-current arrays 3;9

Author - R Hughes

10.15 Quantitative non-destructive evaluation of thermal barrier coating erosion using photoluminescent layers 1; :

Authors - C Pilgrim, S Berthier, A Heyes and J Feist

11.15 Comparative evaluation of NDT techniques for high-quality bonded composite repairs guided waves 432

Authors - B Dutton, S Aranda, R Chemama and G Kanderakis

11.40 Using UT to characterise defects in composites detected with digital shearography 23;

Authors - J Gryzagoridis

12.05 THz instrumentation for NDT of aerospace composites 44;

Author - A Belitskaya

Session 3C – Applications

Chairman – **Dr R Edwards - Priestley Room**

09.50 Development of an advanced medium-range ultrasonic technique for mooring chains inspection in water 252

Author - G Edwards

10.15 Permanently-installed guided wave pipeline monitoring 463

Authors - A Galvagni and P Cawley

11.15 Inspection of pipe networks containing bends using long-range 264

Author - O Brunke, F Hansen, I Stuke, F Butz and Frank Jeltsch

11.40 A new concept for high-speed atline and inlineCT for up to 100% mass production process control 273

Author - A Egbert, O Brunke and I Stuke, F Hansen and F Friedrich Butz

Session 4A – Ultrasonics at high temperatures

Chairman – Prof S Dixon - CATS Room

- 14.15 High-temperature ultrasonic transducers using lithium niobate piezocomposite 27;**
Author - K J Kirk, R Hou, N M Pragada, L Torbay, N Schmarje and D Hutson
- 14.45 High-temperature ultrasonic measurements using EMATs 493**
Authors - S Burrows, Y Fan and S Dixon
- 15.35 Guided wave inspection of high-temperature superheated steam pipes 294**
Authors - A Mohimi, G Edwards, T-H Gan and W Balachandran
- 16.00 Development of sputtered AlN thin-film ultrasonic transducers for durable high-temperature applications 29;**
Authors - R Hou, D Hutson and K J Kirk
- 16.25 Simulation-based comparative study of EMATs' coil structure for long-range ultrasonic testing 2; 5**
Authors - E C Ashigwuike, W Balachandran and S Thomas
- 16.45 President's Honour Lecture - Transition from NDT to structural health monitoring (SHM) – potential and challenges 527**
Author - Prof P Cawley, Imperial College - CATS room
-

Session 4B – Aerospace Cont'd

Chairman – Prof P Cawley - Charles Room

14.15 Defect detection for aircraft components: an approach using ultrasonic guided waves and neural networks 528

Authors - A Haig and P Stavrou

14.45 Acoustography NDE of aerospace composites 53:

Authors - J S Sandhu and C Pergantis

Session 4B – NDT in Industry

Chairman – Dr C Brett - Charles Room

15.35 Employing acoustic emission for monitoring oil film regime 33;

Authors - M Hamel, A Addali and D Mba

16.00 Determining slug velocity in two-phase flow with acoustic emission 349

Authors - M A Alsayh, A Addali and D Mba

16.25 Phased array inspection solution for HDPE butt welds '357

Authors - D MacLennan, J Allen, C R Bird and I G Pettigrew

Session 4C – Applications

Chairman – Mr T O' Hare - Priestley Room

14.15 Online corrosion/erosion monitoring using permanently-installed ultrasonic sensors – report on experience from the field 566

Authors - F Cegla, P Cawley, J Davies, P Collins and J Allin

14.45 Robotic non-destructive inspection '367

Authors - D Herbert, S G Pierce and M Morozov

15.35 Effect of age on concrete core strength results 575

Authors - S A Al-Mishhadani, H H Joni and M S Radhi

16.00 Construction of pattern recognition system optimised for X-ray inspection of plastic electronics and OLED displays 376

Authors - M G Ponomarev, C Selcuk and T-H Gan

16.25 Inspection of link two of a mooring chain 383

Authors - J Rudlin

09.15 Plenary Paper - The line of kings – examining history 58:

Author - C Smith, Conservator, Royal Armouries, Tower of London - CATS room

Session 5A – Electromagnetics

Chairman – Dr J Rudlin - CATS Room

09.45 There's something about eddy currents 58;

Authors - J Hansen

10.10 Novel ACFM probes for challenging applications 592

Author - B Blakeley

10.35 Eddy current inspection of AGR fuel channels: keyway cracks and density mapping 393

Author - T Bloodworth, M Anderson, Matthew Brown and John Williams & John Taggart

Session 5B – Novel Techniques

Chairman – Dr R Smith - Charles Room

09.45 Laser vibrometry to identify resonances of coated substrates 3; 5
Authors - I G de Carellan ,A Haig ,P Catton and T-H Gan

10.10 Advances in three-dimensional measurement in remote visual inspection 5; 3
Author - R Evans

10.35 Guided wave tomography and early-stage damage detection with limited-view sound speed imaging 5; 4
Authors - P Huthwaite, F Simonetti and M J S Lowe

Session 5C – Modelling

Chairman – Dr R Chapman - Priestley Room

09.45 Estimation of probability of detection curves based on theoretical simulation of the inspection process 3; 5
Authors - C R A Schneider, R M Sanderson, C Carpentier, L Zhao and C Nageswaran

10.10 Comparison and validation of modelling methods for the simulation of the ultrasonic response from complex real defects 627
Author - M Felice

10.35 A rough deal: efficient simulation of ultrasound scattering in 3D 628
Author - A Jarvis and F Cegla

Session 6A – Electromagnetics Continued

Chairman – Prof G Dobmann - CATS Room

11.15 Characterisation of electromagnetic acoustic transducer using finite element method 629

Author - S Thomas, E Ashigwuike and W Balachandran

11.40 Depth of penetration effects in eddy current testing and inspection of small sections 63;

Authors - S Majidnia, J Rudlin and A Raude

12.05 Development of a pulsed eddy current system to detect complex defects and corrosion in metallic structures at relatively large lift-offs 652

Authors - B Gibbon, C Davis, C Roberts, D Dulay and C Edwards

12.30 Ensuring reliability of measurement results of thickness of metal coatings with the magneto-inductive and eddy current methods in the conditions of the machine industry 653

Authors - V A Syasko and IV Pilatova

12.55 Modelling and evaluation of bobbin probe radial offset for eddy current non-destructive testing of metallic tubes 65;

Authors - V A Syasko and IV Pilatova

Session 6B – Novel Techniques Continued

Chairman – Prof S Pickering - Charles Room

11.15 Using a pulsed array to determine the position of a defect 672

Authors - S J Hill and S Dixon

11.40 Analysis of long-pulse thermographic NDE 673

Author - S Pickering

12.05 Inductively-coupled transducers for structural monitoring 674

Authors - C Zhong, A Croxford and P Wilcox

12.30 Development of an advanced inspection technique for embedded steel tendons and reinforcement in large civil engineering concrete structures 475

Authors - N Lee, K Tuncbilek and R Sanderson

12.55 Stress measurement using pulsed eddy current thermography 484

Authors - L Bail and GYTian

Session 6C – Modelling Continued

Chairman – Dr R Chapman - Priestley Room

11.15 Non-linear parameter measurement with the non-collinear technique PIC

Authors - A Croxford and J Potter

11.40 Numerical simulation of thermoelastic laser-generated surface waves on anisotropic materials 696

Author - J Coulson

12.05 Comparison of ultrasonic imaging algorithms for NDE N/A

Authors - J Zhang, B Drinkwater and P Wilcox

12.30 Modelling ultrasonic array imaging of composite materials with and without defects 697

Authors - Y Humeida, R E Challis & V J Pinfield

12.55 Quantitative evaluation of material properties with measurement grid and non-linear multivariate searching algorithm 498

Authors - D Chen, M Pan, GYTian, H He, R Xie and C Fan

Roy Sharpe Prize Lecture

09.20 ND-materials characterisation to monitor ageing phenomena as a part of lifetime management strategies – thermal ageing, fatigue and irradiation N/A

Author - Prof G Dobmann
