TABLE OF CONTENTS

VOLUME 1

BS1 AERODYNAMICS AND INNOVATION IN TURBINE DESIGN

Wind Turbine Aerodynamics Using an Incompressible Overset Grid Method	1
<i>Frederik Zahle, Jeppe Johansen, Niels N. Sorensen</i>	
Load Alleviation through Adaptive Trailing Edge Control Surfaces: ADAPWING Overview	22
<i>Thomas Buhl, Christian Bak, Mac Gaunaa, Peter B. Andersen</i>	

BS2 STRUCTURAL DESIGN AND MATERIALS

Increased Strength in Wind Turbine Blades through Innovative Structural Design	30
<i>J. A. Paquette, P. S. Veers</i>	
WT Load Measurements: A Comparison Between Load-Based And Analytical Calibration	40
<i>D. J. Lekou, F. Mouzakis</i>	

BS4 WIND TURBINE ELECTRICAL SYSTEMS AND COMPONENTS

Structural Mass In Direct-Drive Permanent Magnet Electrical Generators	48
<i>A. S. McDonald, M. A. Mueller, H. Polinder</i>	
Grid Integration of Large Offshore Wind Farms Using STATCOM-Controlled HVDC Power Transmission: Control and Engineering Issues	57
<i>Serhiy Bozhko, Greg Asher, Jon Clare, Liangzhong Yao, Masoud Bazargan</i>	
Hybrid System Performance: A Case Study	68
<i>Luis Arribas, Montserrat Mata, Luis Cano, Luis Hernandez, Ignacio Cruz, Ermen Llobet, Mireia Barenys</i>	

CS1 EXTREME WIND CONDITIONS AND FORECASTING TECHNIQUES

Intermittence and Scale Separation above the North Sea	78
<i>Stephan Barth, Joachim Peinke</i>	
Going To Extremes: A Parametric Study On Peak-Over-Threshold And Other Methods	81
<i>Wiebke Langreder, Jorgen Hojstrup</i>	

CS2 WIND AND TURBULENCE

Recommended Practices When Analyzing Wind Flow Near A Forest Edge With Wasp	88
<i>Benoit Dalpe, Christian Masson</i>	
Sensitivity Analysis on Turbulence Models for the ABL in Complex Terrain	98
<i>D. Cabezon, J. Sanz, J. Van Beeck</i>	
Atmospheric Flow over Terrain using Hybrid RANS/LES	107
<i>A. Bechmann, N. N. Sorensen, J. Johansen</i>	

CS3 AEROELASTICITY, LOADS AND CONTROL

Control Design Based On Aero-Hydro-Servo-Elastic Linear Models From TURBU (ECN)	114
<i>T. G. Van Engelen</i>	
Individual Blade Pitch Control Design for Load Reduction on Large Wind Turbines	141
<i>M. Geyler, P. Caselitz</i>	

CS4 WIND POWER PLANTS AND GRID INTEGRATION

Fluctuations Of Offshore Wind Generation - Statistical Modelling	151
<i>P. Pinson, L. E. A. Christensen, H. Madsen, P. E. Sorensen, M. H. Donovan, L. E. Jensen</i>	
Voltage Grid Support Of DFIG Wind Turbines During Grid Faults	162
<i>Anca D. Hansen, Gabriele Michalke</i>	

CW4 WAKES (SCIENTIFIC WORKSHOP)

ECN Test Farm Measurements For Validation Of Wake Models	172
<i>L. A. H. Machielse, P. J. Eecen, H. Korterink, S. P. Van Der Pijl, J. G. Schepers</i>	
Laser Measurements Of Wake Dynamics	182
<i>Ferhat Bingol, Jakob Mann, Gunner C. Larsen</i>	

Simulation and Modelling of Turbulence in Wind Farms	189
<i>Jens N. Sorensen, Robert Mikkelsen, Niels Trolborg</i>	

DS1 CONDITION MONITORING, OPERATION AND MAINTENANCE

Towards Quantification of Condition Monitoring Benefit for Wind Turbine Generators	199
<i>David McMillan, Graham Ault</i>	
CONMOW: Condition Monitoring for Offshore Wind Farms	210
<i>Edwin Wiggelinkhuizen, Theo Verbruggen, Henk Braam, Luc Rademakers, Jianping Xiang, Simon Watson, Gregor Giebel, Ed Norton, Garrad Hassad, Miguel Catalin Tipluca, Andrew McLean, Axel Juhl Christensen, Edwin Becker, Dirk Scheffler</i>	
How Has Reliability Of Technology Developed Through Time?	220
<i>E. Echavarria, T. Tomiyama, G. J. W. Van Bussel, B. Hahn</i>	

DS2 OFFSHORE TECHNOLOGY

Relevant Criteria For Testing The Quality Of Turbulence Models	229
<i>Sten Frandsen, Hans E. Jorgensen, John Dalsgaard Sorensen</i>	
Scour Protection around Offshore Wind Turbine Foundations, Full-Scale Measurements	238
<i>Erik Asp Hansen, Anders Wedel Nielsen, Michael Hogedal, Hans Jacob Simonsen, Jan Pedersen</i>	
Scour Holes or Scour Protection around Offshore Wind Turbine Foundations: Effect on Loads	251
<i>Erik Asp Hansen, Erik Damgaard Christensen</i>	

ADDITIONAL PAPERS

Trading Benefits for Wind Energy Through Forecasting	259
<i>Jeremy Parkes</i>	
Rapid Integration of Wind Energy in Ireland - Group Processing of Wind Farm Applications in Ireland	260
<i>Ailis Martin, Simon Grimes, Tony Hearne</i>	
Integrating Large Scale Wind Power Into the Electrical Grid Using Thermal Energy Storage Through Heat Pumps	264
<i>Bungo Ezawa</i>	
Grid Infrastructure Regulation Incentivising Large Scale Wind Power Integration	265
<i>Lukas Weissensteiner, Carlo Obersteiner, Wolfgang Pruggler, Hans Auer</i>	
Current Grid Integration Challenges in Germany – Barriers and Solutions	274
<i>Ralf Bischof</i>	
Tradewind - Further Developing Europe's Power Market for Large Scale Integration of Wind Power	N/A
<i>Frans Van Hulle</i>	
Methods and Processes for Data Extraction for the Data Management in Energy Supply Systems	275
<i>Florian Schloegl</i>	
Selling Wind Farms to Financial Investors - a Challenge?	276
<i>Jochen Terpitz</i>	
Investment Drivers and Inhibitors in Emerging Wind Markets	277
<i>Christian Grütte, Leonardo Venablers</i>	
Assessing the Financial Viability of Offshore Wind Farms	278
<i>Peter Stratford</i>	
Releasing Wind Farm Equity Via Post-construction Yield Analysis	285
<i>Graeme Hawker, Stuart Hall, Neil Douglas</i>	
Uncertainties, Risks and Probabilities	289
<i>Jørgen Højstrup</i>	
Long Term Wind Expectations in Northern Europe	290
<i>Per Nielsen, Thomas Sorensen, Per Nielsen</i>	
The Global Market for Wind Projects	298
<i>Christian Grütte, Leonardo Venablers</i>	
IEC WT 01 – Development of the Second Edition and Innovations in Certification of Wind Turbines	299
<i>Mike Woebbeking</i>	
Wind Farms Project Financing	313
<i>Armando Tarquini</i>	
Wind Power Financing, a Developer's Perspective	314
<i>Hansruedi Schenk, Falck Renewables Italia, Italy</i>	
The Wind Mills Farms Bullit Financing with Pension Funds	N/A
<i>German Ortega Rübke</i>	
Wind and Power Derivatives in Project Financing	321
<i>Jan Coelingh, G. Timmers, L. D. Botzen</i>	
Portfolio Effect of Diversified Renewable Energy Sources - Gaining Benefits from the Portfolio Effect of Diversified Renewable Energy Sources Through a Detailed Uncertainty Analysis	327
<i>Patric Kleineidam, Matthias Henke, Matthias Hermann</i>	
The Influence of Wind Power on the Market Price for Electricity in Denmark	N/A
<i>Svend Enevoldsen</i>	

Wind Energy's Contribution to the Total Energetic Production in Kosova	335
<i>Isak Idrizi</i>	
Industry Evolution in the Wind Turbine Market: How Will the Development of a Dominant Design Shape Tomorrow's Competition Among Wind Turbine Manufacturers?	336
<i>Poul Houman Andersen</i>	
Meeting the Global Challenge with Focus on North American Market	337
<i>Keith Hays</i>	
A Wind Energy Policy Design: Lessons from the Galician Case.	338
<i>Eduardo L. Gimenez, Maria Montero, Xavier Simon</i>	
Cener Wind Turbine Test Laboratory – a Cutting-edge Centre for the Development of Wind Turbine Technology	348
<i>Mikel Lasa</i>	
Welcome "German Wind Monitor" - Good Bye "250 MW Wind Programme"	349
<i>Michael Durstewitz</i>	
Introducing Wind Energy Educational and Training Program at Egyptian Universities.	351
<i>Abdel-Wahab Kassem</i>	
The German Renewable Energy Export Initiative	352
<i>Dorit Roessler</i>	
Vindkraftnet: a Danish High Tech Network	356
<i>Lars Landberg</i>	
Renknow.net (Renewable Energies Knowledge – Transfer Network)	357
<i>Cornel Ensslin</i>	
Current Policies and Activities to Improve the Integration of Wind Energy Into the German Interconnected System	358
<i>Philipp Siemes, H. J. Haubrich, Hendrik Vennegeerts, Simon Ohrem</i>	
Offshore Windfarms and Decommissioning: a Proposal for EU-wide Guidelines	362
<i>Cassia Januario, Stella Semino, Maite Bell</i>	
Mobilizing Resources and Generating Competences in the Danish Wind Energy Cluster: the Case of Offshore Wind Farms.	372
<i>Poul Houman Andersen</i>	
Offshore Wind – Knowledge and Experience from the Biggest Region in the UK	373
<i>Steve Clarke</i>	
Agent-based Modelling for Scenario Development of Offshore Wind Energy	374
<i>Eeke Mast, G. A. M. Van Kuik, G. J. W. Van Bussel</i>	
The Energy Island – an Inverse Pump Accumulation Station	378
<i>Frits Verheij, W. W. De Boer, D. Zwemmer, R. Das</i>	
Pushing Offshore Wind Energy Regions (Power) - Creating a North Sea Competence Network for Offshore Wind Energy	383
<i>Mathias Grabs</i>	
Managing Offshore Wind Farm Planning: Offshore Decision Support Systems	387
<i>Thomas Pahlke, Hans-Peter Walddl, Dietmar Kraft, Susanne Adam</i>	
Solving the Puzzle: Meeting the Challenge of Large-scale Offshore Wind Development in the UK	396
<i>Gordon Edge</i>	
Offshore Wind Energy Policies and Their Effects: Prospects for the Future	397
<i>Eeke Mast, G. A. M. Van Kuik, M. B. Zaaier</i>	
Future for Offshore Wind Energy in Spain	407
<i>Félix Avia Aranda</i>	
Managing Global Expansion of Knowledge-based Suppliers in the Wind Turbine Industry	413
<i>Poul Houman Andersen</i>	
Building UK Involvement in the European Supply Chain	414
<i>Bob Turner</i>	
Setting Up a Wind Technology Network in Asia	415
<i>Ian Chatting</i>	
Toward a 20% Wind Electricity Supply in the United States	416
<i>Phil Dougherty, Larry Flowers</i>	
Windfarm Tendering in a Modern Market	425
<i>Peter Armstrong</i>	
X-port Guide: Interactive Database for the Analysis of Markets for the Export of Wind Energy Technology	426
<i>David Fernando Mora Alvarez</i>	
Cold Climate Wind Energy Outlook	427
<i>Timo Laakso</i>	
Public Involvement in the Planning Process for Offshore Wind Farms: a Case Study Review of North Hoyle and Scarweather Sands.	428
<i>Jason Birakos, Mott Macdonald</i>	
A Protocol for Monitoring Birds and Bats and the Analysis of Wind Farm Yard Phase Impact Data	429
<i>Giulia Canavero</i>	
The Effects of Wind Turbines on Radar Systems and Technical Mitigation Developments	430
<i>Michael Watson</i>	
High Wind Turbines and the Need for a National Siting Policy: a Special Design Project	431
<i>Albert Jansen</i>	

Bird Collision Risk Modelling for Offshore Wind Farms	432
<i>Luuk Folkerts</i>	
WT-bird: Bird Collision Monitoring System for Multi-megawatt Wind Turbines	433
<i>Edwin Wiggelinkhuizen, S. A. M. Barhorst, L. W. M. M. Rademakers, H. J. Den Boon, S. Dirksen</i>	
Wind Power: Sustaining Sympathy, Avoiding Apathy and Negotiating Negativity	437
<i>Trevor Price</i>	
The Hellenic Paradox for Wind Utilization	450
<i>Dimitrios Kanellopoulos</i>	
Learning from Nuclear Power? Better Strategies for Wind Power!	460
<i>Bernhard Stoevesandt</i>	
Wilder Wind – Wild Wind - A Very Special Image and Educational Campaign of the Austrian Wind Energy Association	466
<i>Martin Fliegenschnee-Jaksch</i>	
Community Engagement in Wind Energy Projects in the Fenlands of the UK	468
<i>Richard Barker</i>	
Winning Hearts and Minds: Learning from Others' Experience?	469
<i>Jean-Pol Poncelet</i>	
Opportunities and Problems for the Italian Companies Related to the Improvement of the Wind Sector Abroad	478
<i>Guy Teuwissen</i>	
A Federalised Structure for Building a Successful Global Wind Energy Business	479
<i>Gaby Amiel</i>	
A New Approach for Wind Energy Development in Developing Countries of the Red Sea Region Implementation of First Wind Energy Project in Development Countries Covering the Expectations of Banks and Turbine Manufacturer for Entering New Markets	480
<i>Matthias Drosch</i>	
Experience in the Implementation and Operation of 3 MW Turbines in Estonian Wind Farm	481
<i>Erkki Kunnari, Johannes Rauboti</i>	
Harmonising Incentive Schemes?	485
<i>Luciano Cavalli</i>	
State-of-the-art of Design and Operation of Power Systems with Large Amounts of Wind Power, Summary of Iea Wind Collaboration	489
<i>Hannele Holttinen, Peter Meibom, Cornel Ensslin, Lutz Hofmann, Aidan Tuohy, John Olav Tande, Ana Estanqueiro, Emilio Gomez, Lennar Soder, Anser Shakoob, J. Charles Smith, Brian Parsons, Frans Van Hulle</i>	
Best Practices in Grid Integration of Variable Wind Power: Summary of Recent US Case Study Results and Mitigation Measures	500
<i>J. Charles Smith, Brian Parsons, Thomas Acker, Michael Milligan, Robert Zavadil, Matthew Schuerger, Edgar DeMeo</i>	
Imbalance Costs of Wind Power for a Hydro Power Producer in Finland	510
<i>Hannele Holttinen, Goran Koreneff</i>	
Integrated Wind Energy Into Electricity Market	517
<i>Ignacio Lainez</i>	
Presentation Of A 700 MW Utility Grade Project Off French Coast And General Survey Of Offshore Wind Energy Development In France	523
<i>Pierre Lagandre</i>	
Conference Summary EWEC 2007	526
<i>Jos Beurskens</i>	
Analysis of 3D Rotational Effects on the NREL UAE Phase VI Data	529
<i>A. Gonzalez, X. Munduate</i>	
Winning Hearts and Minds: Learning from Other's Experience?	530
<i>Jean-Pol Poncelet</i>	
Improvement And Automation Of Tools For Short Term Wind Power Forecasting	539
<i>Henrik Aalborg Nielsen, Pierre Pinson, Lasse Engbo Christiansen, Torben Skov Nielsen, Henrik Madsen, Jake Badger, Gregor Giebel, Hans F. Ravn</i>	
Reduction Of Teeter Angle Excursions For A Two-Bladed Downwind Rotor Using Cyclic Pitch Control	549
<i>Torben Juul Larsen, Helge Aagard Madsen, Kenneth Thomsen, Flemming Rasmussen</i>	
Rotor Blade Sectional Performance Under Yawed Inflow Conditions	558
<i>Takao Maeda, Yasunari Kamada, Hideyasu Fujioka, Jun Suzuki</i>	
Control Of A Multi-Terminal VSC Transmission Scheme For Connecting Offshore Wind Farms	565
<i>R. L. Hendriks, G. C. Paap, W. L. Kling</i>	
Offshore Wind Resource Assessment In European Seas, State-Of- The –Art. A Survey Within The FP6 "POW'WOW" Coordination Action Project	573
<i>Anna M. Sempreviva, Rebecca Barthelmie, Gregor Giebel, Bernhard Lange, Abha Sood</i>	
Observations Of Extreme Speed And Directional Wind Shear In The US Great Plains	584
<i>Kevin Walter, Christopher C. Weiss, Andrew H. P. Swift, Jamie Chapman, Neil D. Kelley</i>	
Wind Resource And Site Assessment In The German Bight: Extreme Winds At Meso- To Microscale	591
<i>Abha Sood, Kay Suselj, Detlev Heinemann</i>	
Wind Energy In Morocco, Potential & Projects	598
<i>Mustapha Enzili</i>	
Wind Resource Assessment In Complex Coastal Terrain	603
<i>Elly Karlsen, Erik Berge, Lars Tallhaug, Ove Undheim, Peter Rotmund, Astrid Holstad, Ivar Lie</i>	

The Territory Of Kosova Has A Specific Geographic Topography Which Affects Positively The Windspeed Parameters Of The Terrain	612
<i>Isak Idrizi</i>	
Wind Energy Activities in Sudan	613
<i>A. M. Omer</i>	
High-Resolution Coastal Wind Assessment From Sar Satellite Imagery And MC2 Weather Prediction Model: A Detailed Comparison	621
<i>Phillipe Beauceage, Anna Glazer, Julien Choisnard, Wei Yu, Monique Bernier, Robert Benoit, Gaetan Lafrance</i>	
In This Research We Study 10 Year Wind Data In Iranian Synoptic Stations	626
<i>Amir Gandomkar</i>	
On The Study Of Wind Energy At Great Heights Using Remote Sensing Techniques	627
<i>Alfredo Pena, Charlotte Bay Hasager, Sven-Erik Gryning, Michael Courtney, Ioannis Antoniou, Torben Mikkelsen, Paul Sorensen</i>	
Offshore Wind Resources From Satellite SAR	634
<i>Charlotte Bay Hasager, Merete Bruun Christiansen, Morten Nielsen</i>	
J-Class Wind Characteristics - A Study On Extreme Wind Speed In Tropical Region -	637
<i>Hikaru Matsumiya, Kichiji Takada, Daisuke Matsushita, Hiroshi Imamura</i>	
A Toolbox Of Techniques Was Developed To Map The Turbulence And Shear Effects Caused By Complex Terrain And Forestry	646
<i>Neil Douglas</i>	
The New WASP Flow Model: A Fast, Linearized Mixed Spectral-Integration Model Applicable To Complex Terrain	647
<i>J. F. Corbett, S. Ott, L. Landberg</i>	
Re-Analysis Is A State-Of-The-Art Approach To Establish Climatologies Of The Past	654
<i>Johannes Sander</i>	
Validation Of SODAR Measurements On A Complex, Forested Site	655
<i>Olivia Tomkins, Peter Raftery</i>	
The Unique Helsinki Testbed Mesoscale Dataset Is Used For Verification Of Different Wind Energy Assessment Methods In Coastal Complex Terrain	662
<i>Bengt Tammelin, Erik Gregow, Reijo Hyvoenen</i>	

VOLUME 2

The Italian Wind Atlas – Status And Progress	663
<i>G. Botta, C. Casale, E. Lembo, S. Maran, L. Serri, G. Stella, S. Viani, M. Burlando, F. Cassola, L. Villa, C. F. Ratto</i>	
Wind Atlas Of Vojvodina, Serbia	670
<i>Zeljko Durisic, Momcilo Bubnjevic, Dusan Mikicic, Nikola Rajakovic</i>	
Climate Change Impact On Inter-Annual And Inter-Decadal Variability Of Wind Farm Production Over France	678
<i>Paul-Antoine Michelangeli, Harilaos Loukos</i>	
Calculation Of The Extreme Load On A Wind Turbine Is An Essential, Yet Not Extensively Studied Component Of A Wind Site Feasibility In A Highly Complex Terrain Area, Frequently Affected By Downslope Windstorms	684
<i>Alica Baji</i>	
Wind Resource Evaluation And Forecasting In Coastal Areas Of Iberian Peninsula	685
<i>M. Santa Maria, R. Zubiaur, E. Rasines, J. A. Rodriguez, J. Granda, N. Miranda</i>	
Global Climate Change Impacts The Wind Energy Industry By Changing The Availability Of The Wind Resource, Shifting Energy Requirements, And Increasing The Demand For Renewable Energy Sources	695
<i>Scott Eichelberger</i>	
Action Plan For Removing Barriers to the Implementation of Wind Power	696
<i>Marco Borja</i>	
Wind Statistics Mapping Using a Higher-order Closure Meso-scale Model	697
<i>Hans Bergstrom</i>	
Wind Energy in North-Western Europe in a Changing Climate	707
<i>Alexander Bakker, Henk Van Den Brink, Jan Coelingh, Janette Bessembinder</i>	
Comparison Of Sodars With Ultrasonic And Cup Anemometers For Wind Energy Applications	712
<i>E. Dupont, J. P. Flori</i>	
The First Numerical Wind Energy Atlas Of Canada Was Created In 2004	722
<i>Anna Glazer</i>	
Influences Of The Estimating Methods On Weibull Parameter For Wind Speed Distribution In Japan	723
<i>Takeshi Kamio, Makoto Hda, Chuichi Arakawa</i>	
Up To Now Testing Of The Coupled Meso/Micro Scale Numerical Models (ALADIN/Wasp Method) Has Not Yielded With Reliable Wind Resource Assessment Approach In Complex Orography Dominated By High Presence Of Local Gusty, Downslope Wind Called Bura	732
<i>Laszlo Horvath</i>	
Wind Farm Production Assessment In Complex Terrain: New Validations Of Meteodyn WT	733
<i>Tristan Clarenc, Nicolas Girard, Didier Delaunay, Aurelien Chantelot</i>	
Combining WASP With The WRF Meso-Scale Model. Evaluation Of Wind Resource Assessment For Three Norwegian Wind Farm Areas.	736
<i>Erik Berge, Rolv E. Bredeesen, Knut Mollestad</i>	
Application Of Search Area Analysis For Wind Energy Projects (Wind Farm Development Pre-Check, WDP)	742
<i>Ronald Bach</i>	

Evaluation of Offshore Wind Simulations with MM5 in the Japanese and Danish Coastal Waters	746
<i>Teruo Ohsawa, Atsushi Hashimoto, Susumu Shimada, Jun Yoshino, Tom De Paus, Detlev Heinemann, Bernhard Lange</i>	
Long-Term Correlation Of Wind Measurements Using Neural Networks - A New Method For Post-Processing Short-Time Measurement Data	755
<i>Carsten Albrecht, Maïke Klesitz</i>	
Validation of Micrositing Wind Assessment using Mesoscale Modelling	763
<i>Miguel Mansilla</i>	
Use Of CFD Results For Power Performance Investigations In Complex Terrain: Numerical Tuning Through On-Field Measurements	764
<i>Francesco Castellani, Giovanni Nicoletti, Jose Leopoldo Maza, Andrea Vignaroli</i>	
This Study Uses 3 Sources of Near Surface Offshore Wind for Resource Assessment: Meteorological Reanalysis Data, Mesoscale Simulations and Remote Sensing Data	769
<i>Joao Martins</i>	
Wind Resource Mapping Needs Accurate High Spatial and Temporal Resolutions Wind Measurements	770
<i>Mohamed Bassam</i>	
Uncertainty Analysis In Energy Yield Assessment	771
<i>Agnes Fontaine, Peter Armstrong</i>	
Energy Yield Assessment – Are You Doing it Right?	781
<i>Camille Bastide, Justin Harding</i>	
Access-based Correlation Tool Alkinoos	791
<i>Jurgen-Jacob Reich</i>	
Improving the Correlation of SODAR to Anemometry using New Post-Processing Filtering Techniques	792
<i>Elizabeth Walls, Anthony L. Rogers, Jon G. McGowan, James F. Manwell</i>	
An Hybrid Approach For Downscaling Rams Data For Wind Resource Assessment In Complex Terrains	803
<i>Francesco Castellani, Caterina Busillo, Francesca Calastrini, Giovanni Gualtieri, Giulio Molina, Ludovico Terzi</i>	
A Terrain Modification Method For WASP Wind Speed Prediction Over Terrain Featuring Flow Separation	807
<i>Joel Manning, Philip Hancock, Richard Whiting</i>	
Accurate Assessment Of The Spatial Wind Variability Across A Proposed Wind Power Site Is Crucial In Determining Optimal Wind Farm Configuration	817
<i>Scott Haynes</i>	
Recent Improvements to the Boundary Layer Parameterization in the MM5 Mesoscale Model	818
<i>Robert J. Conzemius</i>	
Roughness Length Classification Of Corine Land Cover Classes	828
<i>Julieta Silva, Carla Ribeiro, Ricardo Guedes</i>	
Ensemble Predictions: Understanding Uncertainties	838
<i>Gregor Giebel, Jake Badger, Lars Landberg, Henrik Aalborg Nielsen, Torben Skov Nielsen, Henrik Madsen, Pierre Pinson, Kai Sattler, Henrik Feddersen, Henrik Vedel</i>	
Best Practice in Short-Term Forecasting. A Users Guide	850
<i>Gregor Giebel, George Kariniotakis</i>	
ANEMOS Advanced Wind Power Forecasting. Operational Challenges and On-line Performance	855
<i>Vincent Guenard, George Kariniotakis, Ignacio Marti</i>	
High-Risk Scenarios for Wind Power Forecasting in Australia	863
<i>Nicholas Cutler, Merlinda Kay, Hugh Outhred, Iain Macgill</i>	
In This Work A Mesoscale Model Has Been Coupled To A CFD Code Converting Mesoscale NWP At High Atmospheric Levels To Forecasts At The Wind Farm Location, Resulting In A Reduction Of Prediction Errors	875
<i>Sergio Lozano</i>	
Here We Show, That A Distinct Combination Of An Appropriate Weather Model And A Robust Statistical Prediction Tool Achieves Excellence Forecasts Not Only For Single Wind Parks, But Also For Large Nets Of Wind Turbines.	876
<i>Johannes Sander</i>	
Estimation of Long-term Wind Energy Output at Offshore Wind Farm Locations	877
<i>Michael Splett, Camille Bastide, Jorg Bendfeld, Jurgen Voss</i>	
Management For Effective Long Term Wind Energy Estimation At Offshore Wind Plant Locations	885
<i>Jorg Bendfeld, Michael Splett, Jurgen Voss</i>	
Numerical Weather Prediction Model PROMES	891
<i>Rodríguez Juan Antonio</i>	
Results Of The Operational Use Of An Integrated Wind Power Forecasting System Developed From The Atmospheric Modeling Group Of The University Of Athens, Greece And Centro Nacional De Energias Renovables, Spain (CENER)	892
<i>George Galanis</i>	
High Resolution NWP North Sea Wind Forecasts in the Marine Atmospheric Boundary Layer	893
<i>Abha Sood, Kay Suselj, Detlev Heinemann</i>	
Application of Non-linear Modeling Methods to Wind Power Estimation	898
<i>Yohei Watanabe, Shinji Wakao, Tsutomu Takinami, Kohei Oishi</i>	
Development Of CFD-Based Wind Power Prediction System For Wind Farms (Interim Report)	904
<i>Ritsuko Kanohgi, Yasushi Suzuki, Hironori Hayashi, Takayuki Otsu, Yukio Kuroda</i>	
Effects Of Numerical Models On Local-Wind Forecasts Over A Complex Terrain with Wind Farm Prediction Model	913
<i>Atsushi Hashimoto, Yasuo Hattori, Shinji Kadokura, Koji Wada, Soichiro Sugimoto, Hiromaru Hirakuchi, Nobukazu Tanaka</i>	

The Purpose Of This Research Is To Estimate Accurately The Output Of Power Of Wind Turbines	921
<i>Junho Kuroda</i>	
A New Wind Power Forecasting Model With Confidence Interval Approach Based On Artificial Intelligence Techniques Using Multiple Numerical Weather Prediction Models And Ensemble Prediction System	922
<i>Ümit Cali</i>	
Probabilistic Short-Term Wind Power Forecasting Based On Kernel Density Estimators	923
<i>Jeremie Juban, Lionel Fugon, George Kariniotakis</i>	
A Concept Developed For Wind Power Forecasting In China, Which Takes Into Account The Specific Needs And Conditions Of The Chinese Electricity System	934
<i>Wang Weisheng</i>	
A Comparison Of Wind Field Simulations Through A Coupling Of MM5/CALMET In A Complex Terrain	935
<i>Manuel Prieto, Jorge Navarro, Jeffrey Copeland</i>	
A Wind Downscaling To The Local Scale Has Been Carried Out In The Comunidad Foral De Navarra, A Region Of Complex Orography In The North Of Spain	943
<i>Elena Garcia Bustamante</i>	
A Physical-Statistical Approach for the Regional Wind Power Forecasting	944
<i>Atsushi Yamaguchi, Takeshi Ishihara, Kazuya Sakai, Takeshi Ogawa, Yozo Fujino</i>	
An Upscaling Approach For The Regional Wind Power Forecasting	948
<i>Takeshi Ishihara, Atsushi Yamaguchi, Takeshi Ogawa, Kazuya Sakai, Yozo Fujino</i>	
EPREV - A Wind Power Forecasting Tool For Portugal	952
<i>A. Rodrigues, J. A. Lopes, P. Miranda, J. Palma, C. Monteiro, J. N. Sousa, R. J. Bessa, C. Rodrigues, J. Matos</i>	
The Predictability Of 25 GW Offshore Wind Power Will Determine Grid Integration And Bid Strategies Of All Stakeholders On The Future Electricity Market	962
<i>Lueder Von Bremen</i>	
POW'WOW Virtual Laboratory for Wind Power Forecasting – ViLab	963
