KEYNOTE PAPERS

Keynote

Session KEY

- A journey through 30 years of vibration analysis on large turbines: a history of progress in technology and experience 1
G. Boon, GDF SUEZ, Belgium
K. De Bauw, Laborelec, Belgium
- Unique symmetry phenomena in the vibration of planetary gears 17
R.G. Parker, University of Michigan - Shanghai Jiao Tong University / Ohio State University, China
X. Wu, Ohio State University, United States

ISMA2012 PAPERS

Acoustic testing

Session AT

Numerical investigation of the repeatability and reproducibility in building acoustical measurements A. Dijkmans, G. Vermeir, KU Leuven, Belgium	33
Acoustic testing in a micro-space based on a point source generated by laser-induced breakdown N. Hosoya, M. Nagata, Shibaura Institute of Technology, Japan I. Kajiwara, Hokkaido University, Japan	49
Determining acoustic properties of new multilayer panels made from ground tire rubbers (GTR) E. Juliá Sanchis, J. Segura Alcaraz, J.E. Crespo Amorós, J.M. Gadea Borrell, A. Nadal Gisbert, Universitat Politècnica de València, Spain	59
A simple test procedure to determine the sound transmission loss of precast panels E.A. Piana, A. Marchesini, The University of Brescia, Italy	71
An alternative coefficient for sound absorption Y.H. Wijnant, E.R. Kuipers, A. de Boer, University of Twente, Netherlands	85
Inverse identification and microscopic estimation of parameters for models of sound absorption in porous ceramics T.G. Zieliński, Polish Academy of Sciences, Poland	95

Active noise and vibration control

Session ANVC

Self-tuning semi-active tuned-mass damper for machine tool chatter suppression G. Aguirre, M. Gorostiaga, IK4-IDEKO, Spain T. Porchez, CEDRAT TECHNOLOGIES, France J. Muñoa, IK4-IDEKO, Spain	109
Auto-adaptive velocity feedback for active isolation of random vibrations in subcritical 2 dof systems N. Alujevic, University of Split, Croatia H. Wolf, University of Zagreb, Croatia Z. Domazet, University of Split, Croatia	125
On line identification of unbalance parameters and active control in a rotor bearing system M. Arias-Montiel, Universidad Tecnológica de la Mixteca, Mexico F. Beltrán-Carbajal, Universidad Autónoma Metropolitana, Mexico G. Silva-Navarro, Centro de Investigación y de Estudios Avanzados del I.P.N., Mexico	139

Simulation, development, and testing of a triaxial vibration isolation platform T. Bartel, M. Koch, M. Matthias, P. Tarle, Fraunhofer Institute for Structural Durability and System Reliability LBF, Germany	151
Active control of extremely large telescopes: Is there a limit? R. Bastaits, B. Mokrani, A. Preumont, Université Libre de Bruxelles, Belgium	163
Passive and active vibration absorption in Duffing mechanical systems excited by multi-frequency harmonic forces F. Beltrán-Carbajal, Universidad Autónoma Metropolitana, Mexico G. Silva-Navarro, Centro de Investigación y de Estudios Avanzados del I.P.N., Mexico B. Vázquez-González, Universidad Autónoma Metropolitana, Mexico	179
D-decomposition synthesis of PD controllers applied to a rotating system T.M. Buttini, R. N. Nicoletti, University of São Paulo, Brazil	193
Semiactive vibration absorption in a rotor-bearing system using a PPF control scheme A. Cabrera-Amado, Universidad del Papaloapan, Mexico G. Silva-Navarro, Centro de Investigación y de Estudios Avanzados del I.P.N., Mexico	209
A semiactive control scheme for a rotor-bearing system using a squeeze film damper with MR fluid L.A. Dominguez-Nuñez, G. Silva-Navarro, O.A. Garcia-Perez, Centro de Investigación y de Estudios Avanzados del I.P.N., Mexico	223
A tensioned cable as an adaptive tuned vibration absorber for response suppression in rotorcraft J.L. du Bois, N. Lieven, University of Bristol, United Kingdom S. Adhikari, Swansea University, United Kingdom	237
Active vibration control using an adaptronic smart platform for high precision cutting machines M. El-said, KU Leuven, Belgium	251
Active vibration damping with electro-active polymers using state feedback control A. Fortino, J.-W. Biermann, RWTH Aachen University, Germany U. Bakirdögen, M. Reke, VEMAC GmbH & Co. KG, Germany	253
Active vibration reduction of stiffened plates with optimally placed sensors and actuators J.M. Hale, A.H. Daraji, Newcastle University, United Kingdom	265
Wave propagation control in smart structures with shunted piezoelectric patches T.L. Huang, M. Ichchou, Ecole Centrale de Lyon, France M. Collet, FEMTO-ST Institute, France O. Bareille, Ecole Centrale de Lyon, France M. Ouisse, FEMTO-ST Institute, France	279
Stabilization and nano-positioning of the CLIC Main-Beam Quadrupoles S. Janssens, Université Libre de Bruxelles / CERN, Switzerland K. Artoos, CERN, Switzerland C. Collette, Université Libre de Bruxelles, Switzerland M. Esposito, P. Fernandez-Carmona, M. Guinchard, R. Leuxe, CERN, Switzerland	295
Active vibration isolation of rear-view mirrors based on piezoceramic “double spiral” actuators B.T. Kletz, TU Braunschweig / Deutsches Zentrum für Luft- und Raumfahrt (DLR), Germany J. Melcher, Deutsches Zentrum für Luft- und Raumfahrt (DLR), Germany M. Sinapius, TU Braunschweig, Germany	305

Reducing the clipping effect of semi-active clipped optimal control of a two storey building I.F. Lazar, D.J. Wagg, S.A. Neild, University of Bristol, United Kingdom	321
Design, system integration and control concepts of an adaptive active vibration absorber for a convertible J. Millitzer, Fraunhofer Institute for Structural Durability and System Reliability LBF, Germany T. Ehart, Vibracoustic GmbH & Co. KG, Germany A. Plückerhahn, P. Knauer, Audi AG, Germany	331
Vibration damping of turbomachinery components with piezoelectric transducers: Theory and Experiment B. Mokrani, R. Bastaits, Université Libre de Bruxelles, Belgium R. V. Vigiúé, SAFRAN Techspace Aero S.A., Belgium A. Preumont, Université Libre de Bruxelles, Belgium	345
An adaptive controller for amplitude and relative phase control of periodic disturbance J.A. Mosquera Sánchez, L.P.R. de Oliveira, University of São Paulo, Brazil	357
Determining the optimal locations of piezoelectric transducers for vibroacoustic control of structures with general boundary conditions L. Nowak, T.G. Zieliński, Polish Academy of Sciences, Poland	369
Control of forced vibrations of mechanical structures by an electromagnetic controller with a permanent magnet G.J. Stein, Slovak Academy of Sciences, Slovakia R. Darula, S. Sorokin, Aalborg University, Denmark	385
Comparison and development of linear, active and semi-active suspension control (with modifications) using evolutionary algorithms I. Storey, A. Bourmistrova, A. Subic, RMIT University Melbourne, Australia	395
Experimental study of the performance of a H_∞ -AVC system with limited hardware resources and different control strategies O. Unruh, S. Algermissen, Deutsches Zentrum für Luft- und Raumfahrt (DLR), Germany	407
Real-time Kalman filter implementation for active feedforward control of time-varying broadband noise and vibrations S. van Ophem, University of Twente, Netherlands A.P. Berkhoff, TNO, Netherlands	419
Active vibration control of a Duffing oscillator using the receptance method L. Wilmschurst, M. Ghandchi Tehrani, S.J. Elliott, University of Southampton, United Kingdom	431
Application of Particle Swarm Optimization for improving seismic response of structures with MR dampers S.M. Zahrai, M.M. Akhlaghi, University of Tehran, Iran (Islamic Republic of) M. Rabipour, University of Science and Technology, Iran (Islamic Republic of)	441
A piezo-based rotational inertia shaker for the active control of rotating machinery G. Zhao, KU Leuven, Belgium G. Pinte, S. Devos, Flanders' Mechatronics Technology Center, Belgium J. Swevers, P. Sas, KU Leuven, Belgium	449

Adaptronics

Session ADAP

Scaling of electromagnetic transducers for shunt damping and power harvesting S.J. Elliott, University of Southampton, United Kingdom M. Zilletti, Università degli Studi di Udine / University of Southampton, United Kingdom	463
Semi-active multimodal vibration absorber P. Gardonio, Università degli Studi di Udine, Italy M. Zilletti, Università degli Studi di Udine / University of Southampton, Italy	475
Noise reduction of a sound field inside a cavity due to an adaptive Helmholtz resonator T.B. Klaus, S. Herold, O. Heuss, C.R. Sabirin, Fraunhofer Institute for Structural Durability and System Reliability LBF, Germany	489
Development and realization of distributed and adaptive vibration neutralizers D. Mayer, S. Herold, T. Pfeiffer, J. Pöllmann, T. Röglin, G. de Rue, Fraunhofer Institute for Structural Durability and System Reliability LBF, Germany	505
Combined active noise and vibration control for a ventilation duct J. Rohlfing, P. Gardonio, Università degli Studi di Udine, Italy	519

Aeroacoustics and flow noise

Session AA

Analysis of the acoustic damping of an annular tail-pipe R. Boonen, P. Sas, E. Van den Bulck, KU Leuven, Belgium	533
Numerical simulation of flow induced pulsation in a wet gas meter A. Gryzlov, R. Aure, M. Risdal, I. Breen, E. Steinsland, Emerson Process Management, Norway	545
Transmission loss simulation of treated HVAC ducts for railway applications J. Jacqmot, Free Field Technologies, Belgium F. Guerville, Alstom Transport, France D.R. Burd, Free Field Technologies, Belgium	559
Far field noise of a compressible cavity at low reynolds number and effect of spanwise boundary condition V. Jovanovic, J. Meyers, KU Leuven, Belgium	571
Acoustic field generated by a low-speed ducted fan: Experimental validation of the numerical model K. Kucukcoskun, LMS International, Belgium T. Deconick, NUMECA International, Belgium F. Presezniak, Vrije Universiteit Brussel, Belgium R. Hallez, LMS International, Belgium	573
Optimal design and acoustic assessment of swept-tip helicopter rotor blades E. Piccione, A. Anobile, G. Bernardini, M. Gennaretti, University "Roma Tre" of Rome, Italy	587

Influence of shock-boundary layer interactions on the dynamic response of a flexible panel S.M. Spottswood, T. Eason, T. Bebernis, United States Air Force Research Laboratory, United States	603
Computational aeroacoustic characterization of different orifice geometries under grazing flow conditions T. Toulorge, Université Catholique de Louvain, Belgium W. De Roeck, H. Denayer, W. Desmet, KU Leuven, Belgium	617
Wall-modeled large-eddy simulation of a square duct at high Reynolds number P. Wu, J. Meyers, KU Leuven, Belgium	633

Condition monitoring

Session CM

Precision of the IAS monitoring system based on the elapsed time method in the spectral domain H. André, MAIA EOLIS, France A. Bourdon, Université de Lyon, France J. Antoni, INSA Lyon, France D. Rémond, Université de Lyon, France	645
Development of an automated order tracking method J.R. Blough, J.P. DeClerck, Michigan Technological University, United States	661
Vibration-based monitoring of helicopter epicyclical gears V. Girondin, Eurocopter / Université Lille, France H. Morel, Eurocopter, France K.M. Pekpe, J.-P. Cassar, Université Lille, France	669
Vibrations of cracked gear-rotor system: tooth root crack versus shaft transverse crack Q. Han, F. Chu, Tsinghua University, China	685
Rolling element bearing condition monitoring using acoustic emission technique F. Hemmati, University of British Columbia, Canada W. Orfali, Taibah University, Saudi Arabia M.S. Gadala, University of British Columbia, Canada	699
Measuring the rigid body behaviour of a deep groove ball bearing setup W. Jacobs, R. Boonen, P. Sas, KU Leuven, Belgium D. Moens, Lessius Mechelen / KU Leuven, Belgium	715
Application of the artificial immune systems for bearings diagnostic in servomotors L. Montechiesi, M. Cocconcelli, R. Rubini, University of Modena and Reggio Emilia, Italy	727
Experimental characterization of the sliding friction of a degrading wet friction clutch A.P. Ompusunggu, Flanders' Mechatronics Technology Center / KU Leuven, Belgium T. Janssens, P. Sas, KU Leuven, Belgium	739

New cepstral methods of signal pre-processing for operational modal analysis	755
R.B. Randall, The University of New South Wales, Australia	
B. Peeters, LMS International, Belgium	
J. Antoni, INSA Lyon, France	
S. Manzato, LMS International, Belgium	

Delamination assessment in structures made of composites based on signal cross-correlation	765
I. Trendafilova, University of Strathclyde, United Kingdom	
R. Palazzetti, A. Zuchelli, University of Bologna, Italy	

Damage detection

Session DD

A combined wavelet-modal analysis for damage location in beams	777
M. Algaba, M. Solís, P. Galvín, Universidad de Sevilla, Spain	

Damage evaluation by means of cyclostationarity	791
D. Bounou, Ecole Nationale d'Ingénieurs de St-Etienne / Universit Jean-Monnet, France	
P. Lyonnet, Ecole Nationale d'Ingénieurs de St-Etienne, France	
F. Guillet, M. El-Badaoui, Universit Jean-Monnet, France	

Application of an updated notched beam model using an implicit gradient cracking approach for the purpose of damage detection based on dynamic strains	807
M. Brehm, T.J. Massart, A. Deraemaeker, Université Libre de Bruxelles, Belgium	

Damage detection and local resonances model in CFRP composite material by vibrothermography	823
P. Demy, J.-C. Golinval, University of Liège, Belgium	
D. Simon, V2i, Belgium	

Crack detection in an infinite beam based on the amplitudes of the wave reflection coefficients	835
Q. Fan, Shanghai Jiao Tong University, China	
Q. Gao, Shandong University, China	
Z. Huang, Shanghai Jiao Tong University, China	
L. Ji, Shandong University, China	

A subspace fitting method based on finite elements for fast identification of damages in vibrating mechanical systems	847
G. Gautier, R. Serra, J.-M. Mencik, Université François Rabelais de Tours, France	

Application of pattern recognition for damage classification in scarf repairs	857
S. Pavlopoulou, C. Soutis, K. Worden, University of Sheffield, United Kingdom	

Application of smoothing techniques to damage detection using Proper Orthogonal Decomposition	869
M. Thiene, M. Zaccariotto, U. Galvanetto, University of Padua, Italy	
M. Gherlone, Polytechnic of Turin, Italy	

Multi-scale modal filters for early damage localization	881
G. Tondreau, A. Deraemaeker, Université Libre de Bruxelles, Belgium	

A parametric analysis of the breathing phenomenon for different shapes of shaft cracks	893
A. Vania, P. Pennacchi, S. Chatterton, Politecnico di Milano, Italy	

Damping

Session D

Wave generation and propagation at frictional bimaterial sliding interfaces	907
M. Di Bartolomeo, University of Rome “La Sapienza”, Italy	
F. Massi, INSA Lyon, France	
L. Baillet, Joseph Fourier University, France	
A. Culla, A. Fregolent, University of Rome “La Sapienza”, Italy	
Structure-borne energy transmission analysis including aircraft fuselage dampers	921
I.L. Hidalgo, A. Nabarrete, Instituto Tecnológico de Aeronáutica, Brazil	
Acoustic black holes and their applications for vibration damping and sound absorption	933
V.V. Krylov, Loughborough University, United Kingdom	
On using composition cork damping layer for surface damping treatments	945
H. Policarpo, IDMEC-IST, Portugal	
M.M. Neves, N.M.M. Maia, Technical University of Lisbon, Portugal	
Friction-induced vibrations of squeal type in flexible disks sliding in contact with rigid surfaces	957
B. Ryzhik, LuK GmbH & Co. oHG, Germany	
Definition of a linear equivalent model for a non-linear system with impacts	971
T. Thénint, LAMSID, France	
E. Balmes, Arts et Metiers ParisTech / SDTools, France	
M. Corus, EDF R&D, France	
Geometric nonlinear equivalence of frictional systems for compensation	985
T. Tjahjowidodo, Nanyang Technological University, Singapore	
Benchmarking Signorini and exponential contact laws for an industrial train brake squeal application	1001
G. Vermot des Roches, Arts et Metiers ParisTech / SDTools, France	
O. Chiello, IFSTTAR-LTE / Centre Lyonnais d’Acoustique (CeLyA), France	
E. Balmes, Arts et Metiers ParisTech / SDTools, France	
X. Lorang, SNCF, France	
Nonlinear dynamics of mechanical systems with friction contacts: Harmonic Balance Method and multiple solutions	1017
S. Zucca, C.M. Firrone, Politecnico di Torino, Italy	

Dynamics of bridges

Session BRID

Modal identification of stays and deck of a cable-stayed bridge	1031
T. Argentini, M. Belloli, L. Rosa, E. Sabbioni, M. Villani, Politecnico di Milano, Italy	
Human response to traffic-induced vibration of horizontally curved twin I-girder bridges	1045
M.R. Awall, T. Hayashikawa, T. Matsumoto, X. He, Hokkaido University, Japan	

Behavior of simply supported high-speed railway bridges at resonance: analysis of the influence of the vehicle model and simplified methods for dynamic analyses	1057
A. Doménech, Universitat Jaume I, Spain	
P. Museros, Universitat Politècnica de València, Spain	
J. Nasarre, Fundación Caminos de Hierro, Spain	
A. Castillo-Linares, ACL Diseño y Cálculo de Estructuras / Universidad de Granada, Spain	
Operational modal analysis of a high-speed railway bridge: the Jalón viaduct	1073
L. He, KU Leuven, Belgium	
S. Qin, KU Leuven / Southwest Jiaotong University, Belgium	
T.-T. Bui, E. Reynders, KU Leuven, Belgium	
M. Cuadrado, Fundación Caminos de Hierro, Spain	
P. Museros, Universitat Politècnica de València, Spain	
G. De Roeck, KU Leuven, Belgium	
Multiple localized force identification and response prediction on a footbridge	1089
E.-M. Lourens, K. Maes, KU Leuven, Belgium	
K. Van Nimmen, KU Leuven / KAHO Sint-Lieven, Belgium	
P. Van den Broeck, KAHO Sint-Lieven, Belgium	
P. Guillaume, Vrije Universiteit Brussel, Belgium	
G. De Roeck, G. Lombaert, KU Leuven, Belgium	
Damage identification and localisation using changes in modal parameters for civil engineering structures	1103
J. Mahowald, S. Maas, D. Waldmann, University of Luxembourg, Luxembourg	
A. Zuerbes, Fachhochschule Bingen, Germany	
F. Scherbaum, University of Luxembourg, Luxembourg	
Control of human induced vibrations in stadia using a hybrid tuned mass damper	1119
N. Noormohammadi, University of Sheffield, United Kingdom	
P. Reynolds, University of Sheffield, United Kingdom	
The role of walking parameter variability in serviceability assessment of footbridges	1133
F. Tubino, G. Piccardo, University of Genoa, Italy	
Experimental validation of the vibration serviceability assessment of a lightweight steel footbridge with tuned mass damper	1145
K. Van Nimmen, KU Leuven / KAHO Sint-Lieven, Belgium	
P. Van den Broeck, B. Gezels, KAHO Sint-Lieven, Belgium	
G. Lombaert, G. De Roeck, KU Leuven, Belgium	
Random vibration analysis of coupled vehicle-bridge systems	1159
Y. Zhang, D. Zhu, Dalian University of Technology, China	

Dynamics of civil structures

Session CIV

One year of continuous dynamic monitoring of a football stadium suspension roof: analysis of data provided by an autonomous monitoring application	1171
S. Amador, N. Martins, F. Magalhães, E. Caetano, A. Cunha, University of Porto, Portugal	

Dynamic characterization of timber beams reinforced with GFRP D. Bru, F.J. Baeza, S. Ivorra, J. García-Barba, Universidad de Alicante, Spain	1187
The application of POD curves to damage detection in civil engineering structures - a numerical and experimental study M. Deeb, V. Zabel, Bauhaus-Universität Weimar, Germany	1199
Steel lattice sightseeing tower's horizontal vibrations induced by human movement L. Gaile, I. Radinsh, Riga Technical University, Latvia	1211
Vibration radiation from buried plastic water pipes: an experimental investigation at the ground surface J.M. Muggleton, University of Southampton, United Kingdom M.J. Brennan, UNESP, Brazil Y. Gao, University of Southampton, United Kingdom	1223
Prevalent pulse influence of near-fault ground motions on base-isolated steel structures H. Naderpour, S.R. Hoseini Vaez, Semnan University, Iran (Islamic Republic of) G. Ghodrati Amiri, Iran University of Science and Technology, Iran (Islamic Republic of)	1239
Evaluation of acoustic quality in university facilities E. Tristán, I. Pavón, J.M. López, Universidad Politécnica de Madrid, Spain	1249
Scaled test bench for the assessment of wave impeding barriers B. Zuada Coelho, A. Koopman, TNO, Netherlands	1263
Techniques for the reduction of low frequency noise in buildings B. Zuada Coelho, A. Koopman, TNO, Netherlands	1277

Dynamics of energy harvesters

Session HARV

The modelling of friction in a randomly excited energy harvester P.L. Green, K. Worden, K. Atallah, N.D. Sims, University of Sheffield, United Kingdom	1289
The dynamics of large arrays of flexible structures in fluid flow with applications to energy harvesting J.D. Hobeck, D.J. Inman, University of Michigan, United States	1301
On the influence of nonlinearities on the dynamics of piezoelectric energy harvesters: numerical results A.T. Mineto, P.S. Varoto, University of São Paulo, Brazil	1311

Dynamics of rotating machinery

Session RMD

Nonlinear frequency response analysis of rotor supported on air foil journal bearings with frequency and amplitude dependent excitations S.P. Bhore, Indian Institute of Technology Dehli, India A.K. Darpe, Indian Institute of Technology Delhi, India	1323
--	------

Modelling of industrial blade integrated disks (blisks) with regard to mistuning P. Hönisch, BTU Cottbus, Germany U. Strehlau, Vattenfall Europe PowerConsult GmbH, Germany A. Kühhorn, BTU Cottbus, Germany	1337
A method for determining the frequency grinding requirements of turbine blades S.Y. Jazayeri-M, A. Poursamad, F. Firouzi, MAPNA Turbine Engineering and Manufacturing Co. (TUGA), Iran (Islamic Republic of)	1351
Effects of the magneto-mechanical interaction in electrical machines on the dynamic behavior of the rotor M. Kirschneck, Delft University of Technology, Netherlands	1359
Gear web and rim thickness optimization to improve vibration and fatigue reliability of a rotary UAV gearbox E.E. Taskinoglu, V.Y. Öztürk, Y. Paça, TAI - Turkish Aerospace Industries, Turkey	1361
Separation of lateral and torsional shaft vibration via a multiple sensor Time Interval Measurement System M.W. Trethewey, M.S. Lebold, Penn State University, United States	1373
Sensitivity of the stability threshold in linearized rotordynamics B. Vervisch, K. Stockman, Technical University of West-Flanders / University of Ghent, Belgium M. Loccufier, University of Ghent, Belgium	1387

Dynamic testing: methods and instrumentation

Session I

High-speed 3D digital image correlation measurement of long-duration random vibration; recent advancements and noted limitations T. Bebernis, T. Eason, S.M. Spottswood, United States Air Force Research Laboratory, United States	1403
Design of PVDF sensors for shear force measurement in beams S. Chesné, Université de Lyon, France C. Pezerat, Acoustics Laboratory of University of Maine, France	1417
Comparison of new absolute displacement sensors C. Collette, Université Libre de Bruxelles / CERN, Belgium S. Janssens, Université Libre de Bruxelles / CERN, Switzerland B. Mokrani, D. Fueyo-Roza, Université Libre de Bruxelles, Belgium K. Artoos, M. Esposito, P. Fernandez-Carmona, M. Guinchard, R. Leuxe, CERN, Switzerland	1427
Digital holographic vibrometry using stroboscopic illumination for full field, time resolved 4D imaging of nanometer vibrations D. De Greef, J.J.J. Dirckx, University of Antwerp, Belgium	1435
Design of a resonant fatigue test bench for crankshafts J.I. Huertas, N. Navarrete, Tecnológico de Monterrey - Campus Toluca, Mexico	1445
Comparison of torsional vibration measurement techniques K. Janssens, L. Britte, LMS International, Belgium	1447

Sensing capabilities of the elastic interdigital transducer M. Manka, A. Martowicz, M. Rosiek, T. Uhl, T. Stepinski, AGH University of Science and Technology, Poland	1463
Effects of shaker, stinger and transducer mounting on measured frequency response functions M.A. Peres, R.W. Bono, The Modal Shop, United States P. Avitabile, University of Massachusetts Lowell, United States	1475
An approach for assessing the accuracy of accelerometer responses during axial impact tests G. Ranadive, A. Deb, Indian Institute of Science, India	1491
Frequency-domain methods for a vibration-fatigue-life estimation - application to real data J. Slavič, M. Mršnik, M. Boltežar, University of Ljubljana, Slovenia	1505
Accelerated multi-axial fatigue experiments: test rig design and first results B. Van Hooreweder, KU Leuven, Belgium D. Moens, Lessius Mechelen / KU Leuven, Belgium R. Boonen, P. Sas, KU Leuven, Belgium	1519

FP7 IAPP TIRE-DYN Tyre/road noise and experimental validation

Session TYR

Tire-alone criterion for structure borne road noise performance J.F. Beniguel, D. Le Pen, M.F.P.Michelin, France	1527
Numerical prediction of the dynamic behavior of rolling tires C. González Díaz, S. Vercammen, J. Middelberg, P. Kindt, C. Thiry, J. Leyssens, Goodyear Innovation Center, Luxembourg	1541
Modelling tyre sidewall dynamics W.R. Graham, University of Cambridge, United Kingdom	1553
Pass-by noise TPA K. Janssens, L. Britte, LMS International, Belgium	1567
Methods for road texture estimation using vehicle measurements R. Johnsson, J. Odelius, Luleå University of Technology, Sweden	1573
An auralization model for structure borne tyre noise based on operational data M. Löfdahl, R. Johnsson, A. Nykänen, Luleå University of Technology, Sweden	1583
The effect of contact patch restriction for tire vibration characteristics M. Matsubara, T. Koizumi, N. Tsujiuchi, Y. Hirano, F. Nakamura, Doshisha University, Japan	1595
Operational Modal Analysis of tyre road interaction using Abaqus Explicit and Operational Modal Analysis S. Palanivelu, Indian Institute of Technology Madras, India K.V. Narasimha Rao, JK Tyres and Industries Ltd., India R. Krishna Kumar, Indian Institute of Technology Madras, India	1603
Experimental characterization of the dynamic behaviour of rolling tires S. Vercammen, C. González Díaz, P. Kindt, J. Middelberg, C. Thiry, J. Leyssens, Goodyear Innovation Center, Luxembourg	1617

Dynamic analysis of a tire using a nonlinear Timoshenko ring model	1629
T.D. Vu, Université Paris-Est / PSA Peugeot Citroën, France	
D. Duhamel, Université Paris-Est, France	
Z. Abbadì, PSA Peugeot Citroën, France	
H.P. Yin, Université Paris-Est, France	
A. Gaudin, PSA Peugeot Citroën, France	

FP7 ITN MID-FREQUENCY - CAE methodologies for mid-frequency analysis

Session MHFITN

A hybrid Boundary Element - Wave Based Method for 3D acoustic multiple scattering problems	1641
O. Atak, D. Huybrechs, B. Pluymers, W. Desmet, KU Leuven, Belgium	
A model order reduction technique to consider uncertainties over mid and high broad frequency bands	1651
A. Barbarulo, P. Ladèveze, H. Riou, M. Gravelleau, LMT-Cachan, France	
Forced response for uncertain waveguide through the wave finite element technique	1665
M.A. Ben Souf, Ecole Centrale de Lyon / Ecole Nationale d'Ingénieurs de Sfax, France	
M. Ichchou, O. Bareille, Ecole Centrale de Lyon, France	
M. Haddar, Ecole Nationale d'Ingénieurs de Sfax, Tunisia	
Advances in Complex Envelope Vectorization: industrial applications and transient dynamics	1679
A. Carcaterra, O. Giannini, A. Sestieri, University of Rome "La Sapienza", Italy	
T. Svatoň, University of Rome "La Sapienza" / University of West Bohemia, Italy	
On the vibroacoustic response of aerospace sandwich structures: Bridging the gap between experimental and numerical results	1693
D. Chronopoulos, EADS Astrium ST / Ecole Centrale de Lyon, France	
B. Troclet, EADS Astrium ST / Ecole Normale Supérieure Cachan, France	
M. Ichchou, O. Bareille, Ecole Centrale de Lyon, France	
Reliability analysis of vibro-acoustic systems with combined parametric and non-parametric probabilistic uncertainty models	1705
A. Cicirello, University of Cambridge, United Kingdom	
Uncertainty propagation in locally damped dynamic systems	1721
L. Cortes, N.S. Ferguson, A. Bhaskar, University of Southampton, United Kingdom	
Computing the response of an assembly of uncertain beams using an image source approach	1735
J. Cuenca, University of Southampton, United Kingdom	
B.R. Mace, University of Auckland, New Zealand	
N.S. Ferguson, University of Southampton, United Kingdom	
On the use of the Lorentzian function for the evaluation of the frequency averaged input power into plates	1747
R. D'Amico, KU Leuven / Università degli Studi di Firenze, Belgium	
K. Vergote, W. Desmet, KU Leuven, Belgium	
R.S. Langley, University of Cambridge, United Kingdom	

Natural frequency statistics of waveguides with slowly changing spatially correlated material variability	1761
A.T. Fabro, N.S. Ferguson, University of Southampton, United Kingdom	
B.R. Mace, University of Auckland, New Zealand	
SEA coupling loss factor evaluation from system Green's function	1777
L. Kovalevsky, R.S. Langley, University of Cambridge, United Kingdom	
Fast frequency sweep method for indirect boundary element models arising in acoustics	1789
S. Lefteriu, M. Souza Lenzi, LMS International / KU Leuven, Belgium	
H. Beriot, LMS International, Belgium	
M. Tournour, LMS international, Belgium	
W. Desmet, KU Leuven, Belgium	
Wave motion and sound transmission loss of double walls filled with porous materials	1803
H. Liu, M. Barbagallo, S. Finnveden, KTH Royal Institute of Technology, Sweden	
Finite element formulation and implementation of poro-elastic materials in an unbonded case	1815
R.V. Nadampalli, Daimler AG, Germany	
P. Göransson, KTH Royal Institute of Technology, Sweden	
Ch. Glandier, Daimler AG, Germany	
Application of the Wave Based Technique for the exterior acoustic field of a simplified car mock-up	1827
G. Parise, P. Silar, H.-H. Priebsch, Virtual Vehicle Competence Center (ViF), Austria	
G. Miccoli, IMAMOTER Institute, Italy	
C. Bertolini, Autoneum Management AG, Switzerland	
T. Nizzoli, IMAMOTER Institute, Italy	

Lightweight panels and structures

Session LW

Experimental tests and numerical modeling of a sandwich panel	1841
L. Andena, Politecnico di Milano, Italy	
E. Manconi, Università degli Studi di Parma, Italy	
S. Manzoni, S. Moschini, Politecnico di Milano, Italy	
M. Vanali, Università degli Studi di Parma, Italy	
Global plate vibration reduction using a periodic grid of vibration absorbers	1853
C.C. Claeys, K. Vergote, P. Sas, W. Desmet, KU Leuven, Belgium	
Probabilistic optimization of the transmission loss of a composite ribbed panel	1869
R. d'Ippolito, Noesis Solutions, Italy	
K. Ito, B. van der Heggen, Noesis Solutions, Belgium	
N. Tzannetakis, LMS International, Belgium	
Wave based method for inducing delamination at the interface of a layered structure - feasibility study	1881
M.K. Kalkowski, E. Rustighi, T.P. Waters, University of Southampton, United Kingdom	

Numerical and experimental assessment of hybrid active-passive damping treatments	1897
B. Koh, E. Rustighi, University of Southampton, United Kingdom	
B.R. Mace, University of Auckland, New Zealand	
M. Amabili, McGill University, Canada	
Vibration characteristics of fiber reinforced honeycomb panels: experimental study	1911
G. Petrone, University of Naples "Federico II", Italy	
S. Rao, University of Auckland, New Zealand	
S. De Rosa, University of Naples "Federico II", Italy	
B.R. Mace, D. Bhattacharyya, University of Auckland, New Zealand	
Study of the vibro-acoustic behaviour of composite sandwich structures by means of a novel test setup	1921
M. Vivolo, B. Pluymers, KU Leuven, Belgium	
B. Van Genechten, LMS international, Belgium	
D. Vandepitte, W. Desmet, KU Leuven, Belgium	
Sound transmission through laminated composite double-wall panel lined with poroelastic material	1933
J. Zhou, A. Bhaskar, X. Zhang, University of Southampton, United Kingdom	

Medium and high frequency techniques

Session MHF

Recent advances in the simulation of exterior noise field propagation and its frequency extension	1943
M. Danti, R. Raniolo, Centro Ricerche Fiat, Italy	
B. Van Genechten, M. Tournour, LMS international, Belgium	
J. Rejlek, Virtual Vehicle Research and Test Center, Austria	
A. Galezia, Warsaw University of Technology, Poland	
S. Ruschmeyer, RWTH Aachen University, Germany	
Acoustic impedance sensitivity analysis and design optimization using the wave based method	1957
K. Koo, B. Pluymers, KU Leuven, Belgium	
S. Wang, GIST, Korea (Republic of)	
W. Desmet, KU Leuven, Belgium	
A DEA approach for solving multi-mode large scale vibro-acoustic wave problems in the mid-to-high frequency regime	1973
G. Tanner, D.J. Chappell, University of Nottingham, United Kingdom	
D. Löchel, N. Søndergaard, inuTech GmbH, Germany	
On the potential of the wave based method for the efficient optimisation of local vibration control treatments for structural components	1985
K. Vergote, KU Leuven, Belgium	
J.S. Lee, KTH Royal Institute of Technology, Sweden	
C.C. Claeys, D. Vandepitte, W. Desmet, KU Leuven, Belgium	
Prediction of the structural responses of a coupled cylinder/plate structure using deterministic and statistical approaches	2003
H. Wu, The University of New South Wales, Australia	
N. Kessissoglou, M. Caresta, The University of New South Wales, Australia	
B.R. Mace, University of Auckland, New Zealand	

Methods for improvement of structural dynamics FEM using in-flight test data

Session SDIFTD

Analysis of ambient helicopter response data J.E. Cooper, University of Bristol, United Kingdom	2015
Dynamic identification of helicopter structures using operational modal analysis methods in presence of harmonic loading C. Grappasonni, University of Rome “La Sapienza”, Italy N. Ameri, University of Bristol, United Kingdom G. Coppotelli, University of Rome “La Sapienza”, Italy D.J. Ewins, University of Bristol, United Kingdom A. Colombo, E. Bianchi, V. Barraco, AgustaWestland, Italy	2017
Model updating of a helicopter stub wing C. Mares, Brunel University, United Kingdom M. Esperon Miguez, Cranfield University, United Kingdom	2039
Helicopter in-flight modal analysis: solutions for dealing with harmonics and noise B. Peeters, LMS International, Belgium R.B. Randall, The University of New South Wales, Australia S. Manzato, LMS International, Belgium F. Marra, G. Coppotelli, University of Rome “La Sapienza”, Italy	2045
Introduction to the GARTEUR action group HC/AG-19 on methods for improvement of structural dynamic finite element models using in-flight test data J.H. van Tongeren, National Aerospace Laboratory, Netherlands	2047

Modal testing: methods and case studies

Session MTC

Theoretical and practical implementation of sensor optimization for ground vibration testing M. Böswald, B. Will, Deutsches Zentrum für Luft- und Raumfahrt (DLR), Germany B. Schulze, Airbus Deutschland GmbH, Germany	2055
Inertial property estimation by the modal model method J. Chen, The University of New South Wales / LMS International, Australia R.B. Randall, The University of New South Wales, Australia B. Peeters, H. Van der Auweraer, LMS International, Belgium W. Desmet, KU Leuven, Belgium	2071
Torsional modal analysis of single shaft systems containing permanent magnet synchronous motors using novel broadband torque excitation T. Kimpián, ThyssenKrupp Presta Steering AG, Liechtenstein F. Augusztinovicz, Budapest University of Technology and Economics, Hungary	2081
Analysis of shock response for satellite separation T. Kitamura, K. Yoshida, H. Seko, Mitsubishi Electric Corporation, Japan Q. Shi, Japan Aerospace Exploration Agency, Japan	2091

Overview of a pilot program for a PhD level system dynamics analysis internet course S. Leuridan, C.C. Claeys, KU Leuven, Belgium D. Brown, University of Cincinnati, United States	2103
Finite Element model validation of a large spinning facility C. Schedlinski, ICS Engineering GmbH, Germany	2119
Full-field modal identification using image moment descriptors W. Wang, Manchester Metropolitan University, United Kingdom J.E. Mottershead, University of Liverpool, United Kingdom T. Siebert, Dantec Dynamics GmbH, Germany A. Pipino, Centro Ricerche Fiat, Italy	2133
Application of an automated modal analysis based on frequency response function estimates V. Yaghoubi, M. Khorsand Vakilzadeh, T. Abrahamsson, Chalmers University of Technology, Sweden	2145

Model updating and correlation

Session MU

Model updating using antiresonant frequencies identified from transmissibility functions V. Meruane, Universidad de Chile, Chile	2157
Mass and stiffness matrix updating of damped & coupled structure using normal response function method S. Pradhan, S.V. Modak, Indian Institute of Technology, India	2171
Impact of plastic mechanical properties on modal prediction of optical module Ch. Roucoules, Valeo Lighting Systems, France K. Hummel, Valeo Lighting systems, France N. Pluy, Valeo Lighting Systems, France A. Sanon, Valeo Wiper Systems, France	2187
Model updating of the non-linear vibrating structures through Volterra series and proper orthogonal decomposition S.B. Shiki, V. Lopes Junior, S. da Silva, UNESP, Brazil	2199
A model updating technique based on FRFs for damped structures T.A.N. Silva, Polytechnic Institute of Lisbon (GI MOSM) / Technical University of Lisbon, Portugal N.M.M. Maia, Technical University of Lisbon, Portugal J.I. Barbosa, Polytechnic Institute of Lisbon (GI MOSM) / Technical University of Lisbon, Portugal	2213
Structural model updating with an improved updating parameter selection method C. Zang, S.C. Ma, Nanjing University of Aeronautics and Astronautics, China M.I. Friswell, Swansea University, United Kingdom	2227

Multi-body dynamics and control

Session MB

Non-smooth dynamics in gear drives M. Byrtus, University of West Bohemia, Czech Republic	2237
---	------

A combined 1D-3D simulation approach for the energy analysis of a high speed weaving machine	2253
J. Croes, KU Leuven, Belgium	
A. Reveillere, LMS Imagine, France	
S. Iqbal, KU Leuven, Belgium	
D. Coemelck, Picanol NV, Belgium	
B. Pluymers, W. Desmet, KU Leuven, Belgium	
Multibody simulation with a virtual dummy for motorcycle vibration comfort assessment	2269
H. Erdelyi, LMS International, Belgium	
M. Kirchner, LMS International, Italy	
S. Manzato, S. Donders, LMS International, Belgium	
Modeling, analysis and application of lunar gravity simulation system in lunar rover test	2283
S. Fan, B. Jiang, M. Liu, Beijing Institute of Spacecraft Environment Engineering, China	
Frequency analysis of a motorbike under motion conditions	2291
A. Zanarini, E. Brugnoni, University of Bologna, Italy	

Noise and vibration control

Session NVC

The modelling and experimental testing of the vertical dynamic response of an elevator system with a 2:1 roping configuration	2307
X. Arrasate, Mondragon Unibertsitatea, Spain	
S. Kaczmarczyk, University of Northampton, United Kingdom	
G. Almandoz, J.M. Abete, Mondragon Unibertsitatea, Spain	
I. Isasa, Orona EIC S. Coop. Elevator Innovation Center, Spain	
Shock Response Spectrum analysis approach for optimal design of electronic devices	2323
P. Bhat, A.J. Chandrasekhar, Axiom Consulting Pvt. Ltd., India	
Vibration isolation using nonlinear springs	2333
M.I. Friswell, Swansea University, United Kingdom	
E.I. Saavedra Flores, Swansea University / Universidad de Santiago de Chile, United Kingdom	
Y. Xia, Swansea University, United Kingdom	
Exploiting nonlinearity to improve the effectiveness of a vibration neutralizer	2343
G. Gatti, University of Calabria, Italy	
M.J. Brennan, UNESP, Brazil	
Pseudo dampers for squeal mitigation	2355
O. Giannini, A. Sestieri, University of Rome "La Sapienza", Italy	
An experimental approach to improve controllability in test rigs using passive components	2367
A.T. Johansson, T. Abrahamsson, Chalmers University of Technology, Sweden	
Effect of multi-axis versus single-axis vibration test on the dynamic responses of typical spacecraft structure	2383
H. Ling, F. Shichao, F. Yaoqi, Beijing Institute of Spacecraft Environment Engineering, China	

Targeted energy pumping using a linear complex attachment N. Roveri, A. Carcaterra, University of Rome “La Sapienza”, Italy A. Akay, Bilkent University / Carnegie Mellon University, Turkey	2393
Noise control of the common base frame of a genset K. Saarinen, L. Lamula, VTT Technical Research Centre of Finland, Finland M. Aura, Z. Gao, Wärtsilä Finland Oy, Finland	2409
A numerical approach towards best tuning of Tuned Mass Dampers J. Salvi, E. Rizzi, Università di Bergamo, Italy	2419
A comparison of foundation identification using dynamic stiffness parameters versus modal parameters M. Yu, The University of New South Wales, Australia N. Feng, E.J. Hahn, The University of New South Wales, Australia	2435

Non-linearities: identification and modelling

Session NL

Model calibration of locally nonlinear structures using information from sub and super harmonic responses Y. Chen, Linnaeus University, Sweden V. Yaghoubi, Chalmers University of Technology, Sweden A. Linderholt, Linnaeus University, Sweden T. Abrahamsson, Chalmers University of Technology, Sweden	2451
Nonparametric identification of asymmetric nonlinear vibration systems with the Hilbert transform M. Feldman, Technion, Israel	2465
Vibration testing for validation of aeroelastic structures containing geometric stiffness nonlinearities Y. Harmin, University of Liverpool, United Kingdom J.E. Cooper, University of Bristol, United Kingdom	2475
Effects of nonlinear preloading conditions on engine component and system responses B. Heers, C. Chin, Dassault Systèmes, United States	2477
Identification of hysteretic systems using self-adaptive optimisation A. Mohd Mustafah, University of Sheffield / Universiti Putra Malaysia, United Kingdom G. Manson, K. Worden, University of Sheffield, United Kingdom	2491
Time- and frequency-domain subspace identification of a nonlinear spacecraft J.P. Noël, University of Liège, Belgium S. Marchesiello, Politecnico di Torino, Italy G. Kerschen, University of Liège, Belgium	2503
Finite element computation of nonlinear normal modes of nonconservative systems L. Renson, G. Deliège, G. Kerschen, University of Liège, Belgium	2519
Experimental investigation into dynamics of flat and bistable plates A. Shaw, S.A. Neild, D.J. Wagg, P.M. Weaver, University of Bristol, United Kingdom	2535

Nonlinear normal modes of axial-torsional vibrations of rotating thin walled composite beam S. Sina, Sharif University of Technology, Iran (Islamic Republic of) G. Kerschen, University of Liège, Belgium H. Haddadpour, Sharif University of Technology, Iran (Islamic Republic of)	2547
Non linear vibration of irregular structures G.M. Spelman, J. Woodhouse, University of Cambridge, United Kingdom	2563
Higher-order frequency response functions from Gaussian Process NARX models K. Worden, G. Manson, E.J. Cross, University of Sheffield, United Kingdom	2575
The polynomial nonlinearities analysis based on the second-order normal form method Z. Xin, Z. Zuo, H. Feng, Beijing Institute of Technology, China	2591
Power flow behaviour of the Duffing oscillator J. Yang, Y.P. Xiong, J.T. Xing, University of Southampton, United Kingdom	2601
Identification and verification of structural nonlinearities based on vibration tests G.B. Zhang, C. Zang, Nanjing University of Aeronautics and Astronautics, China	2611

Operational modal analysis

Session OMA

A periodogram-based method for removing harmonics in operational modal analysis A. Brandt, University of Southern Denmark, Sweden A. Linderholt, Linnaeus University, Sweden	2625
Comparative study of operational modal analysis techniques using ambient vibration measurements of a concrete dam P. Bukenya, University of Cape Town, South Africa P. Moyo, Univerisity of Cape Town, South Africa C. Oosthuizen, Department of Water Affairs, South Africa	2635
Damping estimation of offshore wind turbines using state-of-the art operational modal analysis techniques M. El-Kafafy, C. Devriendt, G. De Sitter, Vrije Universiteit Brussel, Belgium T. De Troyer, Vrije Universiteit Brussel / Erasmushogeschool Brussel, Belgium P. Guillaume, Vrije Universiteit Brussel, Belgium	2647
Estimation of modal parameters in structures using multiple time history records F. Javier Cara, J. Juan, E. Alarcón, Universidad Politécnica de Madrid, Spain	2663
A review of harmonic removal methods for improved Operational Modal Analysis of wind turbines S. Manzato, D. Moccia, B. Peeters, K. Janssens, LMS International, Belgium J.R. White, Sandia National Laboratories, United States	2675
A hybrid automated modal identification algorithm for Structural Health Monitoring: a comparative assessment C. Rainieri, G. Fabbrocino, University of Molise, Italy	2691

A combined Kalman-fractional calculus method for the parameter identification of structures under arbitrarily correlated ambient noise	2705
K. Runtemund, G. Cottone, Technische Universität München, Germany G. Müller, Technische Universität München, Germany	
Transmissibility based operational modal analysis: on the use of the pseudo inverse approach	2721
W. Weijtjens, C. Devriendt, G. De Sitter, P. Guillaume, Vrije Universiteit Brussel, Belgium	
Output-only time-frequency-domain modal identification of time-varying structures using a recursive two-stage least square method	2731
S.-D. Zhou, Beijing Institute of Technology / KU Leuven, China W. Heylen, P. Sas, KU Leuven, Belgium L. Liu, Beijing Institute of Technology, China	

Parameter estimation and identification

Session PE

Damping identification of linear dynamic systems using Common-base Proper Orthogonal Decomposition	2745
T. Andrianne, G. Dimitriadis, University of Liège, Belgium	
Getting a symmetric residue matrix from the poly-reference least square complex frequency domain technique	2755
A. Culla, W. D'Ambrogio, A. Fregolent, University of Rome "La Sapienza", Italy	
Input-output time-frequency analysis of time-variant systems	2765
K. Dziejciech, W.J. Staszewski, T. Uhl, AGH University of Science and Technology, Poland	
Modal parameter estimation from inconsistent data	2775
N.-J. Jacobsen, Brüel & Kjaer Sound & Vibration Measurement A/S, Denmark	
Frequency domain, parametric estimation of the evolution of the time-varying dynamics of periodically time-varying systems from noisy input-output observations	2785
E. Louarroudi, J. Lataire, R. Pintelon, Vrije Universiteit Brussel, Belgium P. Janssens, J. Swevers, KU Leuven, Belgium	
The new PolyMAX Plus method: confident modal parameter estimation even in very noisy cases	2801
B. Peeters, LMS International, Belgium M. El-Kafafy, P. Guillaume, Vrije Universiteit Brussel, Belgium	
Comparison of three parameters identification methods for linear time-varying structures	2815
X. Xu, Z.Y. Shi, S.L. Long, S.W. Ning, Nanjing University of Aeronautics and Astronautics, China	

Railway dynamics and ground vibrations

Session RAIL

Mitigation of railway induced vibrations by means of subgrade stiffening	2837
P. Coulier, S. François, G. Degrande, G. Lombaert, KU Leuven, Belgium	

Dynamic performance of existing simply supported highspeed railway bridges: influence of elastomeric bearings and transverse vibrations in the prediction of vertical acceleration levels E. Moliner, M.D. Martínez-Rodrigo, Universitat Jaume I, Spain J. Lavado, Universidad de Granada, Spain A. Castillo-Linares, ACL Diseño y Cálculo de Estructuras / Universidad de Granada, Spain	2853
Experimental and numerical investigations on innovative floating-slab track including recycled rubber elements G. Montella, University of Naples “Federico II”, Italy G. Mastroianni, ISOLGOMMA srl, Italy G. Serino, University of Naples “Federico II”, Italy	2869
Evaluation of impact coefficients for the design of transverse reinforcement in the upper slab of twin-box girder bridges under railway traffic P. Museros, Universitat Politècnica de València, Spain J. Lavado, Universidad de Granada, Spain E. Moliner, Universitat Jaume I, Spain A. Castillo-Linares, ACL Diseño y Cálculo de Estructuras / Universidad de Granada, Spain	2881
Dynamic train wheel forces: numerical parameter study M. Ralbovsky, Austrian Institute of Technology, Austria M. Morga, Austrian Institute of Technology, Austria	2897
Non-linear simplified approach for the prediction of ground-borne induced vibration by railway traffic A. Romero, J. Maestre, C. Pérez-Alors, M. Solís, P. Galvín, Universidad de Sevilla, Spain	2913
Measurement of ground-to-building frequency response functions for assessment of human exposure to vibration from railway vibration G. Sica, A.T. Moorhouse, J. Woodcock, E. Peris, C. Sharp, D.C. Waddington, University of Salford, United Kingdom	2929
A non-destructive high-frequency technique for internal structural integrity assessment of embedded girder rails B. Stallaert, A. Van Leuven, P. Vanhonacker, D2S International, Belgium	2945
How to measure and transfer efficiencies of vibration mitigation measures: results of the European project RIVAS D. Stiebel, DB Systemtechnik GmbH, Germany B. Nelain, N. Vincent, VIBRATEC, France	2959
Experimental and numerical determination of transfer functions along railway tracks H. Verbraeken, G. Degrande, G. Lombaert, KU Leuven, Belgium	2973

Self-excited vibrations

Session SEV

Piezo-fiber composite sensor design for flutter prediction A.S. Almeida, University of São Paulo, Brazil L.P.R. Oliveira, F.D. Marques, University of São Paulo, Brazil	2989
---	------

Stability analysis of an aerodynamically shaped high-altitude-balloon tether H.M. Costello, K.A. Kuo, H.E.M. Hunt, University of Cambridge, United Kingdom	3003
Flutter speed prediction based on frequency-domain identification of a time-varying system J. Ertveldt, J. Lataire, R. Pintelon, S. Vanlanduit, Vrije Universiteit Brussel, Belgium	3013
Identification of unsteady aerodynamic loads using aeroelastic response and orthogonal functions C.R. Marqui, D.D. Bueno, L.C.S. Goes, Technological Institute of Aeronautics, Brazil P.J.P. Gonçalves, UNESP, Brazil	3025
Numerical study for rifling mark generating phenomena on BTA deep hole drilling process K. Matsuzaki, Kyushu University, Japan T. Ryu, Oita University, Japan A. Sueoka, Kyushu Polytechnic College, Japan K. Tsukamoto, Ayabo Corporation, Japan T. Honda, Oita University, Japan	3033
Flutter control using vibration test data: theory, rig design and preliminary results E. Papatheou, X. Wei, S. Jiffri, M. Prandina, University of Liverpool, United Kingdom M. Ghandchi Tehrani, University of Southampton, United Kingdom S. Bode, University of Liverpool, United Kingdom K. Vikram Singh, Miami University, United States J.E. Mottershead, University of Liverpool, United Kingdom J.E. Cooper, University of Bristol, United Kingdom	3047
Fluttering skid phenomena in high speed marine vehicles G. Pepe, A. Carcaterra, University of Rome "La Sapienza", Italy	3061
Experimental study for a countermeasure against rifling mark generating phenomena on BTA deep hole drilling process T. Ryu, Oita University, Japan K. Matsuzaki, Kyushu University, Japan K. Tsukamoto, K. Fujii, Ayabo Corporation, Japan Y. Yuge, Union Sekkei Co., LTD, Japan S. Nakao, T. Honda, Oita University, Japan A. Sueoka, Kyushu Polytechnic College, Japan	3071
Self-excitation of electro-mechanical resonators: nano-mechanical transistor A. Scorrano, A. Carcaterra, University of Rome "La Sapienza", Italy	3083

Sound quality

Session SQ

Perceptual test of a new method to synthesize aircraft flyover sounds R. Bisping, SASS GmbH, Germany P. Dubail, C. Thirard, ACOEM, France K. Janssens, LMS International, Belgium	3099
Noise source separation in diesel engines: application to acoustic listening tests J. Drouet, Q. Leclère, K. Ege, E. Parizet, INSA Lyon, France	3109

Prefiltering the wave field synthesis operators - anti-aliasing and source directivity 3121
G. Firtha, P. Fiala, Budapest University of Technology and Economics, Hungary

A psychoacoustic approach for sound quality assessment of automotive power windows 3137
G. Vollandri, F. Di Puccio, P. Forte, C. Carmignani, University of Pisa, Italy
F. Becattini, Magna Closures S.p.A, Italy

Structural dynamics: methods and case studies

Session SD

Achieving large amplitude vibrations and travelling waves via parametric excitation 3153
I. Bucher, H. Plat, Technion, Israel

A handbook for spacecraft structural dynamics and loads analysis 3165
A. Calvi, European Space Agency, Netherlands

Dynamic instability of orthotropic cylindrical shells with internal flowing fluid and combined loads 3173
Z.J.G.N. del Prado, F.M.A. da Silva, A.L.D.P. Argenta, Federal University of Goiás, Brazil
P.B. Gonçalves, Pontifical Catholic University of Rio de Janeiro, Brazil

Dynamic response of a delaminated beam due to a moving force 3189
R.A. Jafari-Talookolaei, M.H. Kargarnovin, M.T. Ahmadian, M. Abedi, Sharif University of Technology, Iran (Islamic Republic of)

Adaptive measurement solution for the dynamic flexibility of machine tools 3201
T. Kosub, S. Hannig, planlauf GmbH, Germany
C. Brecher, S. Bäumlner, M. Daniels, RWTH Aachen University, Germany

Mode veering in weakly coupled systems 3211
B.R. Mace, University of Auckland, New Zealand
E. Manconi, Università degli Studi di Parma, Italy

Numerical modeling of ship's vibrations and model validation by full-scale dynamic test 3223
Ch. Pirovsky, S. Stefanov, H. Draganchev, S. Valchev, TU-Varna, Bulgaria

Vibrational characterization of high-Q silicon resonators for investigating thermal noise statistical properties 3239
E. Serra, FBK-University of Trento / INFN, Italy
A. Borrielli, M. Bonaldi, INFN / Institute of Materials for Electronics and Magnetism, Italy
L. Conti, INFN, Italy

Travelling and standing waves in structures with damped boundaries 3247
L. Sirota, Y. Halevi, Technion, Israel

An experimental and numerical identification of laminated structure dynamics 3259
G. Čepon, University of Ljubljana, Slovenia
M. Pirnat, KOLEKTOR ETRA d.o.o, Slovenia
M. Boltežar, University of Ljubljana, Slovenia

Structural health monitoring

Session SHM

Structural health monitoring with a wireless vibration sensor network T.G.H. Basten, TNO, Netherlands F.B.A. Schiphorst, TNO / University of Twente, Netherlands	3273
Numerical and experimental analyses about SHM metrics using piezoelectric materials R. de Medeiros, M. Sartorato, M.L. Ribeiro, University of São Paulo, Brazil D. Vandepitte, KU Leuven, Belgium V. Tita, University of São Paulo, Brazil	3285
Structural health monitoring of steel trusses using acoustic emission technique M.I. Elmasry, M.F. Shehadeh, M.S. Attia, AASTMT, Egypt	3301
Damage detection and probability of detection for a SHM system based on optical fibres applied to a stiffened composite panel F.P. Grooteman, National Aerospace Laboratory, Netherlands	3317
A combined experimental and theoretical approach to the SHM of structures subjected to seismic loading D. Isidori, Università Politecnica delle Marche, Italy E. Concettoni, C. Cristalli, Loccioni Group, Italy S. Lenci, Università Politecnica delle Marche, Italy L. Soria, Politecnico di Bari, Italy	3331
SHM feature selection using damage metaphors G. Manson, M. Matzakou, University of Sheffield, United Kingdom	3345
Non-contact systems for monitoring blade vibrations of steam turbines P. Procházka, F. Vaněk, Institute of Thermomechanics AS CR, Czech Republic	3359
Structural health monitoring of time-varying systems by output-only identification N. Roveri, A. Carcaterra, University of Rome "La Sapienza", Italy	3373
Use of Mahalanobis Taguchi system as data fusion approach for monitoring health of rolling element bearing P. Shakya, A.K. Darpe, M.S. Kulkarni, Indian Institute of Technology Delhi, India	3389

Substructuring and coupling

Session SC

An iterative uncoupling technique for the identification of the dynamic properties of joints F.C. Batista, Polytechnic Institute of Leiria, Portugal N.M.M. Maia, Technical University of Lisbon, Portugal	3403
Reduced-order model for nonlinear dynamical structures having numerous local elasticmodes in the low-frequency range A. Batou, C. Soize, Université Paris-Est, France N. Brie, EDF R&D, France	3417

Advanced linear dynamics and substructuring capabilities in Abaqus with applications in noise and vibration analysis	3427
M. Belyi, Dassault Systèmes SIMULIA Corp., United States V. Belsky, A. Bajer, M. Kim, C. Ianculescu, Dassault Systems SIMULIA Corp., United States	
Substructure decoupling on an experimental test bed	3439
W. D'Ambrogio, A. Fregolent, University of Rome "La Sapienza", Italy	
An improved modal approach for model reduction based on input-output relation	3451
M. Khorsand Vakilzadeh, S. Rahrovani, T. Abrahamsson, Chalmers University of Technology, Sweden	
Dynamic parameter estimation of bolted assemblies	3461
I. Piscan, University Politehnica of Bucharest, Romania T. Janssens, KU Leuven, Belgium C. Pupaza, University Politehnica of Bucharest, Romania	
A domain decomposition method for vibration analysis of submarine hulls	3475
Y. Qu, H Hua, Y. Chen, X. Long, G. Meng, Shanghai Jiao Tong University, China	
Efficient impulse based substructuring using truncated impulse response functions and mode superposition	3487
M.V. van der Seijs, D.J. Rixen, Delft University of Technology, Netherlands	
Analysis of ground vibration transmission in high precision equipment by Frequency Based Substructuring	3501
G. van Schothorst, Philips Innovation Services, Netherlands M.A. Boogaard, Delft University of Technology, Netherlands G.W. van der Poel, Philips Innovation Services, Netherlands D.J. Rixen, Delft University of Technology, Netherlands	
A prediction method for the dynamic environment of spacecraft based on the component mode synthesis	3515
W. Yang, L. Liu, W.L. Dong, Beijing Institute of Technology, China	

Transfer path analysis and inverse methods

Session TPA

Synthetic aperture acoustical holography	3525
J. Antoni, INSA Lyon, France	
A new energetic acoustic probe and its association with an acoustic energetic identification method	3539
F. Ayme, Ecole Centrale de Lyon / AIRBUS, France M. Ichchou, Ecole Centrale de Lyon, France C. Cariou, AIRBUS, France D. Juvé, Ecole Centrale de Lyon, France	
Development of a test bench for vibroacoustic studies: TPA study case	3551
F.X. de Melo, L.P.R. de Oliveira, University of São Paulo, Brazil	

Experimental estimation of transmissibility matrices Q. Leclère, INSA Lyon, France N.B. Roozen, Delft University of Technology / KU Leuven, Netherlands C. Sandier, INSA Lyon, France	3563
Detection of plate vibration modes by means of Near-field Acoustic Holography in the presence of reflective surfaces E.M.T. Moers, University of Technology Eindhoven, Netherlands I. Lopez Arteaga, University of Technology Eindhoven / KTH Royal Institute of Technology, Netherlands P.L. van Dalen, University of Technology Eindhoven, Netherlands R. Scholte, Sorama bv, Netherlands H. Nijmeijer, University of Technology Eindhoven, Netherlands	3571
Noise reduction method in enclosed space due to multiple input by use of anti-resonance sensitivities N. Okubo, S. Enomoto, K. Furuya, T. Toi, Chuo University, Japan	3585
Cavitation monitoring in piping systems G. Pavić, INSA Lyon, France F. Chevillotte, MATELYS, France	3597
Noise source identification in a vehicle cabin using an iterative weighted approach to the ESM method A.A. Pereira, Q. Leclère, INSA Lyon, France L. Lamotte, S. Paillasseur, MicrodB, France L. Bleanodonu, IVECO France Irisbus, France	3607
Force reconstruction using an adaptive algorithm in time M. Sturm, University of Salford / ZF Lenksysteme GmbH, Germany A.T. Moorhouse, University of Salford, United Kingdom T. Alber, ZF Lenksysteme GmbH, Germany F.F. Li, University of Salford, United Kingdom	3617
Experimental reconstruction of non-stationary sound and vibration sources by means of Transient Planar Near-field Acoustic Holography P.L. van Dalen, University of Technology Eindhoven, Netherlands R. Scholte, Sorama bv, Netherlands I. Lopez Arteaga, University of Technology Eindhoven / KTH Royal Institute of Technology, Netherlands E.M.T. Moers, H. Nijmeijer, University of Technology Eindhoven, Netherlands	3631
Source-Transfer-Receiver approaches: a review of methods P. Van de Ponsele, H. Van der Auweraer, K. Janssens, LMS International, Belgium	3645
Experimental evaluation of an optimum amount of probes used in PNCAR for airborne transfer path analysis B. Zajamšek, Microflown Technologies, Netherlands D. Fernandez Comesaña, Microflown Technologies / University of Southampton, Netherlands A. Grosso, Microflown Technologies, Netherlands	3659

Dipole source identification on subsonic airflow through structures	3667
P.A.G. Zavala, State University of Campinas, Brazil	
K. Janssens, LMS International, Belgium	
J.R.F. Arruda, State University of Campinas, Brazil	

Vehicle concept modelling

Session VCM

Handling of acoustic constraints in multidisciplinary optimization processes	3679
G. Bartolozzi, M. Pierini, Università degli Studi di Firenze, Italy	
U. Orrenius, Bombardier Transportation, Sweden	
Identification and assessment of a simplified model for vehicle ride simulation	3695
M. Carpinelli, G. Gatti, D. Mundo, University of Calabria, Italy	
M. Gubitosa, A. Toso, LMS International, Belgium	
Numerical assessment of the impact of vehicle body stiffness on handling performance	3711
L. Coox, M. Vivet, T. Tamarozzi, KU Leuven, Belgium	
T. Geluk, LMS International, Belgium	
L. Cremers, BMW AG, Germany	
W. Desmet, KU Leuven, Belgium	
Dynamic FE-based method for concept modelling of vehicle beam-like structures	3725
G. De Gaetano, University of Calabria, Italy	
F.I. Cosco, G&G Design and Engineering, Italy	
C. Maletta, D. Mundo, University of Calabria, Italy	
S. Donders, LMS International, Belgium	
Model-based vehicle brake control with inner- and outer feedback loop	3737
E.J.H. de Vries, D.J. Rixen, Delft University of Technology, Netherlands	
Automotive body-in-white concept modeling method for the NVH performance optimization	3753
M. Fard, RMIT University Melbourne, Australia	
N. Nasrollahzadeh, M. Tatari, M. Mahjoob, University of Tehran, Iran (Islamic Republic of)	
Energy flow analysis in car structure NVH problems	3765
J. Korta, AGH University of Science and Technology, Poland / Centro Ricerche Fiat, Italy	
R. Raniolo, M. Danti, Centro Ricerche Fiat, Italy	
T. Uhl, AGH University of Science and Technology, Poland	
Fully equipped city bus model for multi-domain optimization issues	3781
I. Kowarska, K. Kuczek, T. Uhl, AGH University of Science and Technology, Poland	
Considerations on 1D beam concept modelling for the vehicle structure	3793
P. Mihaylova, N. Baldanzini, M. Pierini, Università degli Studi di Firenze, Italy	
Car body concept modeling for NVH optimization in the early design phase at BMW: a critical review and new advanced solutions	3809
A. Moroncini, BMW AG / Università degli Studi di Firenze, Germany	
L. Cremers, BMW AG, Germany	
N. Baldanzini, Università degli Studi di Firenze, Italy	

- Experimental study on the aeroacoustic performance of an axial fan for HVAC 3825
 A. Zanon, M. De Gennaro, H. Kuehnelt, Austrian Institute of Technology, Austria
 P. Giannattasio, Università degli Studi di Udine, Italy

Vehicle noise and vibration (NVH)

Session NVH

- Driveline model calibration and validation in an automotive 4-cylinder Diesel application 3841
 N. Andersson, Volvo Car Corporation, Sweden
 T. Abrahamsson, Chalmers University of Technology, Sweden
- Nonlinear dynamic analysis of a shock absorber hydraulic spring valve 3857
 M. Benaziz, PSA Peugeot Citroën / Ecole Centrale de Lyon, France
 S. Nacivet, PSA Peugeot Citroën, France
 F. Thouverez, Ecole Centrale de Lyon, France
- Experimental investigation and transfer path analysis for reducing motorcycle tactile point vibrations 3871
 R.J. Bhaarith, P. Prasad, V. Thanigaivel, N. Gayathri, B. Krishna, TVS Motor Company, India
- Prediction of interior trim absorption using statistical energy analysis 3881
 L. Egab, X. Wang, M. Fard, R. Jazar, RMIT University Melbourne, Australia
- Qualitative study of automotive friction-induced noises 3891
 A. Elmaian, J.M. Duffal, Renault, France
 F. Gautier, C. Pezerat, J. Gilbert, Acoustics Laboratory of University of Maine, France
- The dynamic performance of air spring air damping systems by means of small excitations 3901
 W.A. Fongue, Daimler AG / Technische Universität Darmstadt, Germany
 P. Pelz, Technische Universität Darmstadt, Germany
 J. Kieserling, Daimler AG, Germany
- NVH performance optimization of full vehicles in automotive 3913
 J. Guan, Altair Engineering, United States
 H. Gruber, Altair Engineering, Germany
- Tuning spot weld models for vehicle body structural dynamics 3915
 B. Krank, KTH Royal Institute of Technology, Sweden
 U. Ohlsson, A. Hedlund, Volvo 3P, Sweden
 L. Nordström, T. Englund, Volvo Technology Corporation, Sweden
 P. Göransson, KTH Royal Institute of Technology, Sweden
- Characterization of the automotive seat/human structural dynamics 3927
 L. Lo, M. Fard, A. Subic, R. Jazar, RMIT University Melbourne, Australia
- Hybrid Finite Element – Wave Based techniques for interior vibro-acoustics. Application to a large-sized vehicle model 3937
 A. Maressa, KU Leuven, Netherlands
 S. Jonckheere, KU Leuven, Belgium
 B. Van Genechten, LMS international, Belgium
 B. Pluymers, W. Desmet, KU Leuven, Belgium

Numerical vibro-acoustic analysis of gear pumps for automotive applications E. Mucchi, G. Dalpiaz, University of Ferrara, Italy	3951
Comparative study of generation mechanism and countermeasure for in-plane and out-of-plane disc brake squeal T. Nakae, T. Ryu, Oita University, Japan A. Sueoka, Kyushu Polytechnic College, Japan Y. Ikebe, S. Rosbi, Oita University, Japan	3963
Development of an experimental approach to model exterior noise of an industrial excavator during ISO track loading Y. Nakamoto, Caterpillar Japan Ltd., Japan D. Nagahata, LMS Japan K.K. Engineering Services, Japan W. Hendrick, LMS International Engineering Services, Belgium	3973
Sound radiation simulation methods for gearboxes - with a special focus on ribs J. Neher, MAN Diesel & Turbo SE, Germany B. Graf, Voith Hydro Holding GmbH & Co. KG, Germany S. Falkenberger, B. Wender, University of Applied Sciences Ulm, Germany	3989
Multibody modelling of shuttling excitation in spur and helical geared transmissions A. Palermo, University of Calabria / KU Leuven, Italy D. Mundo, University of Calabria, Italy R. Hadjit, LMS International, United States P. Mas, LMS International, Belgium W. Desmet, KU Leuven, Belgium	4005
Reducing propagation of structure-borne noise in transmissions S. Sanzenbacher, M.W. Bourau, B. Bertsche, University of Stuttgart, Germany	4017
Indoor pass-by noise contribution analysis using source path contribution concept A. Schuhmacher, Brüel & Kjaer Sound & Vibration Measurement A/S, Denmark Y. Shirahashi, Nissan Motor Co., Japan M. Hirayama, Brüel & Kjaer Japan, Japan Y. Ryu, Brüel & Kjaer Sound & Vibration Measurement A/S, Denmark	4031
A mechatronic approach to reduce wiper system reversal noise: development of a multi-objective optimization tool A. Stenti, K. Vanderostyne, Robert Bosch Produktie N.V., Belgium F. Hauser, Robert Bosch GmbH, Germany	4043
Validation of a dedicated test set-up for boundary excitation of trim assemblies C. Van der Kelen, M. Vivolo, B. Van Genechten, B. Pluymers, W. Desmet, KU Leuven, Belgium A. Malkoun, B. Bergen, T. Keppens, Toyota Motor Europe, Belgium	4051
Modal analysis of automotive cabin by multiple acoustic excitation T. Yoshimura, M. Saito, Tokyo Metropolitan University, Japan S. Maruyama, S. Iba, Nissan Motor Co., Japan	4061

Vibro-acoustic modelling and prediction

Session VAM

Interaction between two nonlinear acoustic resonators M. Bednarik, M. Cervenka, R. Balek, Czech Technical University in Prague - FEE, Czech Republic	4071
Predicting underwater sound radiation and directivity pattern of vibrating structures in deep and shallow water D. Blanchet, A. Caillet, ESI Group, Germany	4083
Modeling interior noise due to fluctuating surface pressures from exterior flows V. Cotoni, ESI Group, United States D. Blanchet, ESI Group, Germany P.J. Shorter, ESI Group, United States	4093
An efficient Wave Based Method for axisymmetric acoustic-poroelastic problems E. Deckers, D. Vandepitte, W. Desmet, KU Leuven, Belgium	4101
Acoustic modification prediction using FRF: application of Helmholtz resonators on a rocket engine combustion chamber G.P. Guimarães, R. Pirk, C.D'A. Souto, Instituto de Aeronautica e Espaco (IAE), Brazil L.C.S. Goes, Technological Institute of Aeronautics, Brazil	4115
Modelling of sound damping multi-layers using a hybrid Finite Element - Wave Based Method S. Jonckheere, D. Vandepitte, W. Desmet, KU Leuven, Belgium	4129
A proposal on wave propagation analysis with non-reflection boundary for profound comprehension of vibration transmission I. Kido, Toyota Technical Development Corp., Japan Y. Matsumura, Y. Wakida, Gifu University, Japan	4143
BEM & FEM-IFEM modeling and analysis methods for high complexity vehicle models G. Miccoli, T. Nizzoli, IMAMOTER Institute, Italy C. Bertolini, Autoneum Management AG, Switzerland	4155
Response to acoustic excitation of a cavity-backed plate J. Michielsen, University of Technology Eindhoven, Netherlands I. Lopez Arteaga, University of Technology Eindhoven / KTH Royal Institute of Technology, Netherlands H. Nijmeijer, University of Technology Eindhoven, Netherlands	4169
Dynamics and waves in loudspeaker cones G. Ni, S.J. Elliott, University of Southampton, United Kingdom A. Langley, Newtonia Ltd. Poole, United Kingdom	4185
Waves in elastic and poro-elastic cylinders with spatially varying anisotropy M. Östberg, KTH Royal Institute of Technology, Sweden	4193
Sensitivity analysis for optimal design of perforated plates in vibro-acoustics: homogenization approach E. Rohan, V. Lukeš, University of West Bohemia, Czech Republic	4201

Numerical simulation and optimization algorithms for the sound design of organ pipes with tuning slots	4215
P. Rucz, BME / Fraunhofer Institute for Building Physics, Hungary	
J. Angster, Fraunhofer Institute for Building Physics, Germany	
P. Fiala, Budapest University of Technology and Economics, Hungary	
A. Miklós, Stenbeis Transfer Center, Germany	
B. Olteán, BME, Hungary	
T. Preukschat, Fraunhofer Institute for Building Physics, Germany	
Effects of the micro structure of poroelastic material on the sound absorption for normal incidence	4229
T. Yamamoto, Kogakuin University, Japan	
K. Izui, S. Nishiwaki, Kyoto University, Japan	
An analytical and computational study of the low frequency dynamic responses of a submerged hull	4243
C. Zhang, Huazhong University of Science and Technology / The University of New South Wales, China	
H. Peters, N. Kessissoglou, M. Caresta, The University of New South Wales, Australia	
M. Chen, Huazhong University of Science and Technology, China	
S. Marburg, Universität der Bundeswehr München, Germany	

Wind turbine vibrations

Session WTV

Use of the Teager-Kaiser energy operator for condition monitoring of a wind turbine gearbox	4255
I. Antoniadou, G. Manson, N. Dervilis, University of Sheffield, United Kingdom	
T. Barszcz, W.J. Staszewski, AGH University of Science and Technology, Poland	
K. Worden, University of Sheffield, United Kingdom	
In-operation output-only identification of wind turbine structural dynamics: comparison of stationary and non-stationary approaches	4269
L.D. Avendaño-Valencia, S.D. Fassois, University of Patras, Greece	
Modal identification of time-varying systems using simulated responses on wind turbines	4285
M. Berhta, J.P. Mayorga Rios, J.-C. Golinval, University of Liège, Belgium	
Low cost load monitoring for offshore wind farms	4297
H. Braam, T.S. Obdam, T.W. Verbruggen, Energy research Centre of the Netherlands (ECN), Netherlands	
Continuous dynamic monitoring of an offshore wind turbine on a monopile foundation	4313
C. Devriendt, M. El-Kafafy, G. De Sitter, Vrije Universiteit Brussel, Belgium	
P. Jan Jordaens, Sirris, Belgium	
P. Guillaume, Vrije Universiteit Brussel, Belgium	
Dynamic analysis of wind turbine planetary gears using an extended harmonic balance approach	4329
Y. Guo, J. Keller, National Renewable Energy Laboratory, United States	
R.G. Parker, University of Michigan - Shanghai Jiao Tong University / Ohio State University, United States	

Some trends and challenges in wind turbine upscaling J. Helsen, KU Leuven, Belgium F. Vanhollebeke, ZF Wind Power Antwerpen NV / KU Leuven, Belgium D. Vandepitte, W. Desmet, KU Leuven, Belgium	4345
Detection of planet bearing faults in wind turbine gearboxes S. Jain, P.E. Whiteley, H.E.M. Hunt, University of Cambridge, United Kingdom	4361
Generalized subspace identification for rotating systems: application to a wind turbine A. Jhinaoui, L. Mevel, Inria, France J. Morlier, ISAE, France W. Zhou, HIT, China	4373
Gearbox reliability collaborative phase 1 and 2: testing and modeling results J. Keller, Y. Guo, National Renewable Energy Laboratory, United States B. McNiff, McNiff Light Industry, United States W. LaCava, H. Link, National Renewable Energy Laboratory, United States	4381
Gearbox fatigue load estimation for condition monitoring of wind turbines N. Perišić, LAC engineering / Aalborg University, Denmark B.J. Pedersen, LAC engineering, Denmark P.H. Kirkegaard, Aalborg University, Denmark	4391
Possibilities of an automatised modelling process to generate and analyze reliable flexible multi-body system models of wind turbines B. Schlecht, Th. Schulze, Th. Rosenlöcher, Technische Universität Dresden, Germany	4403
Experimental and computational aeroelastic damping of an Offshore Wind Turbine on a monopile foundation R. Shirzadeh, C. Devriendt, M.A. Bidakhvidi, P. Guillaume, Vrije Universiteit Brussel, Belgium	4411
Wind turbine drive train vibration with focus on gear dynamics under nondeterministic loads S. Struggl, V. Berbyuk, H. Johansson, Chalmers University of Technology, Sweden	4421
Application of OMA to operational wind turbine: methods for cleaning up the Campbell diagram D. Tcherniak, Bruel and Kjaer Sound and Vibration Measurement A/S, Denmark C.E. Carcangiu, M. Rossetti, ALSTOM WIND S.L.U., Spain	4435
An overview of modeling approaches for complex offshore wind turbine support structures P.L.C. van der Valk, S.N. Voormeeren, Delft University of Technology / Siemens Wind Power, Netherlands	4447
Combining multibody and acoustic simulation models for wind turbine gearbox NVH optimisation F. Vanhollebeke, ZF Wind Power Antwerpen NV / KU Leuven, Belgium J. Helsen, KU Leuven, Belgium J. Peeters, ZF Wind Power Antwerpen NV, Belgium D. Vandepitte, W. Desmet, KU Leuven, Belgium	4463

USD2012 PAPERS

USD - Applications

Session USDA

Stochastic reduced-order model for an automotive vehicle in presence of numerous local elastic modes in the low-frequency range	4479
A. Arnoux, Université Paris-Est / PSA Peugeot Citroën, France	
A. Batou, C. Soize, Université Paris-Est, France	
L. Gagliardini, PSA Peugeot Citroën, France	
Vibro-acoustic variability of a body-in-white using Monte-Carlo simulation in a development process	4489
F. Barillon, Renault, France	
M.B. Boubaker, Université de Technologie de Compiègne, France	
Ph. Mordillat, Renault, France	
P. Lardeur, Université de Technologie de Compiègne, France	
Uncertain vibration analysis of an automotive car body modeled by finite elements with the Modal Stability Procedure	4499
M.B. Boubaker, F. Druesne, P. Lardeur, Université de Technologie de Compiègne, France	
F. Barillon, Ph. Mordillat, Renault, France	
Design, simulation and performance analysis of LQG controller for structures with parametric uncertainties using interval analysis	4513
S.B. Chennuri, Lingaya's University, India	
S.P. Singh, J.K. Dutt, Indian Institute of Technology, India	
Characterisation of the booming noise variability in a vehicle	4523
A. Cloix, H. Siwiak, P. Bouvet, VIBRATEC, France	
F. Barillon, Ph. Mordillat, Renault, France	
Effects of uncertainties on the dynamic response of a system with non-regular non-linearities	4535
J. Didier, J.-J. Sinou, Ecole Centrale de Lyon, France	
B. Faverjon, INSA Lyon, France	
Parameter uncertainty and stochastic optimization of cantilever piezoelectric energy harvesters	4547
V.R. Franco, P.S. Varoto, University of São Paulo, Brazil	
Uncertainty quantification of the aeroelastic behavior of a supersonic vehicle using an engineering cloud	4559
G. Georgiou, University of Liverpool, United Kingdom	
J.E. Cooper, University of Bristol, United Kingdom	
D. Hung, A. Mosquera, Applied Computing & Engineering Ltd, United Kingdom	
Uncertainty Quantification in nonlinear MEMS	4575
R. Goyal, A.K. Bajaj, Purdue University, United States	

PDF solution of stochastic oscillators with even nonlinearity under parametric excitation on velocity S.-S. Guo, G.-K. Er, V.P. Iu, University of Macau, Macao	4591
Uncertainty quantification for worst case gust loads prediction H. Haddad Khodaparast, University of Liverpool, United Kingdom J.E. Cooper, University of Bristol, United Kingdom	4601
Modelling of the variability aspect of linings and its impact on the squealing behaviour of an auto- motive brake system A. Heussaff, Daimler AG / Development Mercedes-Benz, Germany L. Dubar, University of Valenciennes, France T. Tison, Univ Lille Nord de France / UVHC / CNRS, France R. Nunes, Daimler AG / Development Mercedes-Benz, Germany	4617
Dynamic analysis of structures subjected to parametric and nonparametric uncertainties F.K. Klug, A. Nabarrete, Instituto Tecnológico de Aeronáutica, Brazil	4619
An integrated systems approach to probabilistic assessment of airfoil forced response G. Krishnamoorthy, R. Sampath, GE Global Research, United States	4631
Parametric uncertainties in dynamic models for aeronautical structures B. Petitjean, F. Feuillard, EADS Innovation Works, France J. Barron, AIRBUS Operations, France	4643
Uncertainties in multibody systems – potentials and challenges N.-P. Walz, M. Fischer, M. Hanss, P. Eberhard, University of Stuttgart, Germany	4653
Investigation on natural frequency and mode shape of structures with mixed aleatory and epistemic uncertainties C. Wang, W. Gao, C. Song, The University of New South Wales, Australia	4669

USD - DLR airmod structure

Session USDDL

Identifying structural variability using Bayesian inference R.P. Dwight, Delft University of Technology, Netherlands H. Haddad Khodaparast, J.E. Mottershead, University of Liverpool, United Kingdom	4681
Using stochastic experimental modal data for identifying stochastic finite element parameters of the AIRMODbenchmark structure Y. Govers, Deutsches Zentrum für Luft- und Raumfahrt (DLR), Germany M. Link, University of Kassel, Germany	4697
Interval model updating of the AIRMOD structure H. Haddad Khodaparast, J.E. Mottershead, University of Liverpool, United Kingdom Y. Govers, Deutsches Zentrum für Luft- und Raumfahrt (DLR), Germany M. Link, University of Kassel, Germany	4717
Computational model updating based on stochastic test data and modelling parameters – a tool for structural health monitoring M. Link, M. Weiland, University of Kassel, Germany	4733

USD - Methods
Session USDM

A spectral projection approach for fuzzy uncertainty propagation in structural dynamics S. Adhikari, Swansea University, United Kingdom	4745
Uncertainty and dissipation A. Carcaterra, University of Rome “La Sapienza”, Italy A. Akay, Bilkent University / Carnegie Mellon University, Turkey	4761
Coupling of fuzzy logic and fuzzy sets for managing uncertainty in non linear contact problem O. Cazier, F. Massa, T. Tison, B. Lallemand, Univ Lille Nord de France / UVHC / CNRS, France	4777
Efficient uncertainty computation for modal parameters in stochastic subspace identification M. Döhler, Inria , France L. Mevel, Inria, France P. Andersen, Structural Vibration Solutions A/S, Denmark	4793
Scientific computing and model validation at Los Alamos F. Hemez, Los Alamos National Laboratory, United States	4807
Interpolatory model reduction of uncertain dynamic and vibro-acoustic systems in the mid- and high-frequency ranges Ch. Lecomte, University of Southampton, United Kingdom	4809
Comparison of two nonparametric models of uncertainty in structural dynamics J. Legault, J. Woodhouse, R.S. Langley, University of Cambridge, United Kingdom	4819
Uncertainty treatment in numerical simulations utilised for design of MEMS devices A. Martowicz, T. Uhl, AGH University of Science and Technology, Poland	4827
Efficient analysis of uncertain vibro-acoustic FE-systems by using novel solving methods L. Mayer, S. Lippert, O. von Estorff, Hamburg University of Technology, Germany	4843
On the response distribution of nonparametric probabilistic models for mid- and high-frequency analysis E. Reynders, KU Leuven / University of Cambridge, Belgium J. Legault, R.S. Langley, University of Cambridge, United Kingdom	4855
Metamodeling of structural systems through polynomial chaos ARX models M. Spiridonakos, E. Chatzi, ETH Zürich, Switzerland	4871
Efficient solution of the fuzzy eigenvalue problem in structural dynamics Y. Xia, M.I. Friswell, Swansea University, United Kingdom	4885

USD - SBO technical

Session USDSBOT

- Coupling transient dynamic finite element analysis with the fuzzy non-deterministic approach 4897
 A.D.M. Sirbu, University Politehnica of Bucharest / LMS International, Romania
 L. Farkas, S. Donders, H. Van der Auweraer, LMS International, Belgium
 D. Moens, Lessius Mechelen / KU Leuven, Belgium
 E.M. Negrus, University Politehnica of Bucharest, Romania
- Interval fields on FE model input data and on displacement output patterns in static FE-analysis 4911
 W. Verhaeghe, W. Desmet, D. Vandepitte, KU Leuven, Belgium
 D. Moens, Lessius Mechelen / KU Leuven, Belgium

USD - Structural health monitoring

Session USDSHM

- A maintenance alarm for alternators based on eigensolutions 4923
 A. Kuczkowiak, FEMTO-ST Institute / EDF R&D, France
 S. Cogan, E. Foltête, M. Ouisse, FEMTO-ST Institute, France
 M. Corus, EDF R&D, France
- Stochastic model updating of a laboratory tower for structural health monitoring purposes 4933
 F. Martínez, G. Fernandez, O. Salgado, IK4-IKERLAN, Spain
- Modeling wave propagation in coupled waveguides with uncertain parameters 4945
 Ch. Schaal, M. Hanss, University of Stuttgart, Germany
- Uncertainty analysis of Bayesian FE model updating results, applied to the multi-stage damage assessment of a seven-story RC building slice 4959
 E. Simoen, KU Leuven, Belgium
 B. Moaveni, Tufts University, United States
 J.P. Conte, University of California at San Diego, United States
 G. Lombaert, KU Leuven, Belgium

USD - Uncertainty identification

Session USDUI

- Extension of the Background/biResonant decomposition to the estimation of the kurtosis coefficient of structural response 4973
 V. Denoël, University of Liège, Belgium
- An evaluation of test and physical uncertainty of measuring vibration in wooden junctions 4985
 K.A. Dickow, P.H. Kirkegaard, L.V. Andersen, Aalborg University, Denmark
- Pattern recognition based multiscalar random field modelling 4999
 S. Klostermann, EADS Innovation Works, Germany
 S. Lippert, O. von Estorff, Hamburg University of Technology, Germany

Bayesian identification of structural parameters of hybrid mid-frequency systems	5015
Ch. Lecomte, J. Forster, University of Southampton, United Kingdom	
B.R. Mace, University of Auckland, New Zealand	
N.S. Ferguson, University of Southampton, United Kingdom	
Uncertain structural dynamics identification via a random coefficient ARX model based method	5025
P.G. Michaelides, S.D. Fassois, University of Patras, Greece	
Fast Bayesian updating of large-scale finite element models using CMS technique and surrogate models	5039
C. Papadimitriou, D.-Ch. Papadioti, University of Thessaly, Greece	
Mechanical property evaluation of polymer textile composites by multi-scale modelling based on internal geometry variability	5053
A. Vanaerschot, KU Leuven, Belgium	
B.N. Cox, Teledyne Scientific Co. LCC, United States	
S.V. Lomov, D. Vandepitte, KU Leuven, Belgium
