Contents

Keynotes

- Water in mining challenges for the Australian and international mining industry 10 A
David Jones
- Maximising use of waters produced by mining 11
Martin Schultze

Protecting Water Values

Coal mines – managing groundwater and impacts for open pit underground mines

- Inrush and mine inundation - A real threat to Australian coal mines? 25
Detlef Bringemeier
- Overview of managing groundwater and impacts at Loy Yang open cut. 31
Genevieve Foley, Chris Nicol, Jon Missen
- Simulation of Water Balance in Dump Slopes of Open-Cast Mining Pits for Geo Mechanical Stability Prognosis 37
Peter-Wolfgang Graeber, Martin Meyer, Issa Hasan, Jana Sallwey, René Blankenburg
- Predicting the acid production potential of Mpumalanga coal mines 47
Gideon Steyl, Danie Vermeulen, Lore-Mari Cruywagen
- Experience-based approaches to coal mine groundwater evaluation in Kalimantan, Indonesia 55
John Waterhouse and Craig Wicenciak
- Uranium mining and water*
- Dewatering of an underground uranium mine in Saskatchewan, Canada 63
Rashid Bashir, James Hatley
- Conclusions from using an active production well for mine drawdown compliance 73
Gabor Bekesi, Murray Tyler, John Waterhouse
- Improved calculation of groundwater heads for environmental management in the Great Artesian Basin, Australia 79
Gabor Bekesi, Murray Tyler, John Waterhouse
- Remediation strategy for a waste rock dump at a former uranium leach operation 85
Marcus Frenzel, Andrea Schramm, Carsten Wedekind, Michael Paul, Ulf Jenk
- Review of solute selection for water quality and bioaccumulation monitoring at a northern Australian uranium mine 91
Alison Frostick, David Jones, Kate Turner

Characterisation of hydrogeological conditions and solute transport pathways in the region of the Ranger uranium mine tailings storage facility, Northern Territory, Australia	101
Alan Puhlovich, Andrew Thomas, Nathaniel Toll, Philippe Puig, Alana O'Neill	
One- and three-dimensional modelling of sub-surface solute transport processes in the region of Ranger uranium mine's tailings storage facility, Northern Territory, Australia	107
Alan Puhlovich, Keely Mundle, Russell Pol, Nathaniel Toll	
<i>Groundwater and coal seam gas developments</i>	
Development of a management tool to support optimization of the beneficial reuse of associated or produced water in eastern Australia	115
Ryan T. Jakubowski, Nathan W. Haws, David A. Ellerbroek, John Murtagh, and David Macfarlane	
Hydrochemical compatibility assessments of aquifer injection of treated coal seam gas water into Surat Basin aquifers.	131
Matt Landers, David Harris, Brent Usher, Ryan Morris and Andrew Moser	
Leading practices for assessing the integrity of confining strata: application to mining and coal-seam gas extraction	139
Wendy Timms, Ian Acworth, Adam Hartland, David Laurence	
A South African perspective on shale gas hydraulic fracturing	149
P.D. Vermeulen	
<i>Mine Water and Mine Closure</i>	
Deriving surface water quality closure criteria for natural waterbodies adjacent to an Australian uranium mine	159
Chris Humphrey, David Jones, Alison Frostick, Lisa Chandler	
Pit lakes as evaporative 'terminal' sinks: an approach to best available practice mine closure	167
Clint D. McCullough, Geneviève Marchant, Jörg Unseld, Michael Robinson, Ben O'Grady	
The importance of having an agreed plan	175
Jamie Robertson	
<i>Acid Mine Drainage – processes and treatment</i>	
Application of a jet loop reactor to enhance removal of sulphates from mine water using coal fly ash, lime and aluminium hydroxide	183
Godfrey Madzivire, Wilson M. Gitari, Viswanath, R.K, Vadapalli and Leslie F. Petrik	
Research on the applicability of anaerobic passive bioreactor for mine water treatment in Japan	200 A
Hisatoshi Furuya, Takuya Kodera, Kousuke Takamoto, Nobuyuki Masuda, Mikio Kobayashi, Atsushi Osame, Hideo Asano, Hajime Ikeda, Takeshi Sakata, Hidekatsu Nakamura, Masao Okumura, Tatsuru Takahashi, Kazuya Sunada and Manami Ikeda	
Treatment plant to allow mine water release from Morro Da Mina, Brazil	201
Sam Hawker, Jamie Robertson	

Combined numerical and analytical modelling as a means to assess closure options for open-pit mines, Pilbara region Niall Inverarity, Shawan Dogramaci, Iain Rea	206 A
Ettringite Precipitation vs. Nano-Filtration for Efficient Sulphate Removal from Mine Water Eberhard Janneck, Mitch Cook, Christian Kunze, Klaus Sommer, Laurentiu Dinu	206 I
Review of sulfate reduction based bioprocesses for acid mine drainage treatment and metals recovery Anna H Kaksonen, Erkan Sahinkaya	207
Acid metalliferous leaching of a mineral sands deposit: From field to laboratory. Matt Landers, Brent Usher	215
Mineralogical and geochemical studies on pyrite and chalcopyrite oxidations in the Sarcheshmeh copper mine tailings Sajjad Jannesar Malakooti, Mohammad Noaparast, Saied Ziaeddin Shafaei Tonkaboni, Faramarz Doulati Ardejani, Esmaeil Soleimani, Esmat Esmaeilzadeh	223
A novel approach to exploit indigenous mining algal-microbes in a photo-rotating biological contactor for heavy metal removal from acid mine drainage Sanaz Orandi, David M. Lewis, Afsar Eslami, Ali Mohebbi	231
Biological sulphate reduction of acid mine drainage using primary sewage sludge Johann Poinapen	237
Oxidation process and hydrology of tailings dams: Implication for acid mine drainage from TSFs management -The Witwatersrand experience, South Africa Bisrat Yibas, W Pulles, S Lorentz, B Maiyana, C Nengovhela	245
Stream sediment geochemistry of the Olifants catchment, South Africa: Implication for acid mine drainage Robert Netshitungulwana, B. Yibas	257
Approaches to predetermine the variables affecting the efficiency for the design of mining effluents and acidic drainage treatment systems Nora Paños, Luis Gutierrez, Ana Senese	265
Liming of acid surface waters: Effect of water constituents and material impurities on calcite dissolution kinetics Mandy Schipek and Broder J. Merkel	275
<i>Abandoned Mine Issues</i>	
The Collie Pit Lake District, Western Australia: An Overview Mark A. Lund, Clint D. McCullough, & R. Naresh Kumar	287
Role of private sector and national policy for rehabilitation of abandoned mines in Portugal Hossain M. Anawar	295
Is Water Conservation and Water Demand Management a real option? Fanie Botha, Karen Chetty	300 A
Antimony contamination of surface water at abandoned Sardinian mine sites Rosa Cidu, Riccardo Biddau, Elisabetta Dore	301

Numerical groundwater flow modelling at the historic Rum Jungle mine site, northern Australia Christoph Wels, Paul R. Ferguson, and Mike Fawcett	309
Revegetation of historic acidic mine waste with <i>Agrostis capillaris</i> – Remediation strategy Stefan Karlsson, Viktor Sjöberg, Anna Grandin and Bert Allard	317
The status and implications of the AMD legacy facing South Africa Mosidi Makgae	327
Dispersion of Metals at Louis Moore Gold Tailings Dam, Limpopo Province, South Africa 334 A Khodani Matshusa, Jason S. Ogola, Klaus Maas	
Keeping the lid on it Jamie Robertson, Samuel Hawker	335
Best left to leach? Geochemical understanding of waste tips at abandoned metal mines Alison J. M. Turner Charlotte Braungardt	343

Conserving Mine Water Resources

Site-wide mine water management

Exemplar mine-site water management - A necessity in an era of climatic variability Geoff Pettifer, David Brett, Sjors Hein, Stuart Gray, Andre Kemp, Wayne Schafer, Rob Virtue, and Brett Goebel	355
Advances in hydrogeologic testing of mineral exploration boreholes Joel Adams, Randall Roberts	357
Reducing capital expenditure using probabilistic simulation for water management Ari Craven	365
Hydraulic performance of liners in tailings management and heap leach facilities Gareth Digges La Touche, Hollie Garrick	371
Forensic analysis of mine water impacts – a mass balance approach Chris Gimber	379
Mt Leyshon Gold Mine Automated Monitoring Network: Meeting Environmental and Social Commitments R. Haymont, A.M. Vitale	385
What is a representative pan factor value for the eastern Pilbara? Aditya Jha	399
Management of mine and tailings seepage water discharge in an intensively used watershed Thomas Metschies and Michael Paul	409
Evaluation of the applicability of the passive treatment for the management of polluted mine water in the Witwatersrand Goldfields, South Africa. Ntshengedzeni Obed Novhe	417
The future of water in the mining industry Jerry Rowe	425

Water security and engineering innovation for the Southdown Project Daniel Visser, Ross Carpenter	431
<i>Mine water and climate change</i>	
Climate science in mine water system design Jennifer Ahern, Mark Gibbs	439
The Impact of Climate Change on a Mine Water Source Conor O'Hara, Jaco Grobler, Greg Hookey, Jan Vermaak	445
Modeling the impact of a possible climate change on the water balance in post-mining areas Rene Blankenburg, Dietrich Sames, Holger Mansel, Bernd Pfützner	451
Heat storage potential of a flooded mine in the Siegerland-Wied district, Germany Georg H. E. Wieber, Hagen Deckert, Frieder Enzmann, Michael Kersten	459
<i>Geochemistry of mine waters</i>	
Geochemical Assessment of Mineral Waste through the Mine Life Cycle Rosalind Green	467
Groundwater modelling meets geochemistry: Building the bridge between FEFLOW and PHREEQC with IFMPhreeqc Eduardo Reckziegel de Sousa	473
Zn-Al sulphate layered double hydroxide for Mo uptake Franco Frau, Carla Arda, Elisabetta Dore, Pierfranco Lattanzi	481
Revegetation of historic acidic mine waste with <i>Agrostis capillaris</i> – Impact on leachate composition in pot experiments Stefan Karlsson, Viktor Sjöberg, Anna Grandin and Bert Allard	489
A critical review of static geochemical test methods applied to mining wastes, including their applicability to field conditions Pierre D S Rousseau	499
Getting rid of chemical analysis – Mine water management with indicator parameters Christian Wolkersdorfer	505

Maximising use of waters produced by mining

Pit Lakes

Post-closure mining pit lake water quality modelling David Dettrick, Brian Barnett, Damon Grace, Hiro Toki	517
Upper and lower concentration thresholds for bioremediation of acid mine drainage using bulk organic substrates R. Naresh Kumar, Clint D. McCullough, Mark A. Lund	525
Riverine breach and subsequent decant of an acidic pit lake: evaluating the effects of riverine flow-through on lake stratification and chemistry Clint D. McCullough, R. Naresh Kumar, Mark A. Lund, Michelle Newport, Elmien Ballot, Digby Short	533

Pit lake modelling – The total system approach Dave Richers, C. (Doc) Richardson, Dwaine Edington, Guy Roemer, and Brad Bijold	541
The implications of redox conditions for the perpetual management of mine pit lakes Phillip Whittle, Amie Leggett	547
<i>Mine dewatering – maximising value and minimising costs</i>	
An alternative approach to managing dewatering in an open pit mine Keith Brown, Shane Trott and Aadil Nabi	557
Shallow anthropogenic aquifers may provide a solution to reduce nitrate in dirty mine water? Fanie Botha and Lebogang Maleka	568 A
Mine of the Future™: The automated mine dewatering design module of PBMO™ Eddy Lim, Larry M. Deschaine, and Peter S. Huyakorn	569
Dewatering of Opencast Mines using Horizontal Wells Holger Mansel, Carsten Drebenstedt, Peter Jolas, Rene Blankenburg	576 A
<i>Treatment and Disposal of mine waters</i>	
Zero Discharge Desalination Technology – Achieving Maximum Water Recovery Brad Biagini, Bernie Mack, Phil Pascal, Thomas A. Davis, Malynda Cappelle	577
Removal of zinc and lead from a neutral mine water using iron tailings and iron oxyhydroxide coated iron tailings Linnéa Fahlqvist, Lotta Sartz, Mattias Bäckström	584 A
Effective desorption of metals from loaded biomass using response surface methodology based on Box-Behnken design E Fosso-Kankeu, AF Mulaba-Bafubiandi, TG Barnard	585
The next step in the bioremediation of heavy metal polluted water: development of suitable microbial-sorbent E Fosso-Kankeu, AF Mulaba-Bafubiandi, G Tlou and L Piater	593
Concomitant removal of iron and NAPLs within a mine water treatment system Jennifer N. Geroni, Devin J. Sapsford	601
A case study of underground brine disposal Terry Harck, Jennifer Pretorius, and Peter Gunther	607
Ecotoxicology of actively treated mine waters Andrew J Harford, David R Jones, Rick A van Dam	615
Novel application of membrane distillation for acid and water recovery from mining waste waters Uchenna K. Kesiemea, Nicholas Milne, Hal Aral, Chu Yong Cheng, Mikel Duke	623
Membrane based water and wastewater treatment solutions Tim Lilley	631
Study on the mining influenced water and a possibility to extract copper metal from tailings deposition in Bor, Serbia Nobuyuki Masuda, Daizo Ishiyama, Atsusi Shibayama, Yasushi Takasaki, Hiroshi Kawaraya, Hinako Sato, Zoran O. Stevanovic, Ljubisa Obradovic	637

Treatment of acidic and neutral metal-laden mine waters with bone meal filters Lotta Sartz, Mattias Bäckström	643
Novel salt extractor system for salt removal from mine water and calcium sulfate removal on the International Space Station Benjamin Sparrow, Malcolm Man, and Joshua Zoshi	651
The impact of co-disposal of sulphate brines on a fly-ash dam, a study of the physical-chemical influence on drainage patterns Gideon Steyl, Francois Fourie, and Lukas Marais	661
Strategies to reduce AMD liability treatment costs at Stockton Coal Mine, New Zealand. Dave Thomas, Joe Wildy, Paul Weber, Phil Rossiter, Phil Lindsay, Mark Pizey	678 A

Posters

Former Pit Mine Dive Parks Peter Buzzacott, David Paine	679
Influence of acid mine drainage on river water quality in the vicinity of the Osamu Utsumi uranium mine, Caldas-Minas Gerais, Brazil Carlos Alberto de Carvalho Filho, Cristina Fonseca da Silva, Rubens Martins Moreira, Pedro Henrique Dutra, Vinícius Verna Magalhães Ferreira, Peter Marshall Fleming, Otávio Eurico de Aquino Branco	685
A vertical flow reactor for removal of iron from zinc-rich AMD K. Florence	687
Manganese and vanadium uptake by Cynodon Dactylon grass species: A case study in New Union gold mine tailings, Limpopo, South Africa N. Makuya, J.R. Gumbo, C. Muzerengi, F.A. Dacosta	689
Seawater desalination of the Chilean coast for water supply to the mining industry Frans Knops, Manuel Garcia de la Mata, Cristian Mendoza Fajardo, Estanislao Kahne	697
The influence of mine water on surface water in the Miłek catchment (Intrasudetic Basin, SW Poland). Chudy Krzysztof, Worsa-Kozak Magdalena	704 A
Investigation of the quality of water samples in the entrance and effluents from the Sarcheshmeh copper mine tailings dam Sajjad Jannesar Malakooti, Seyed Ziaedin Shafaei, Mohammad Noaparast, Faramarz Doulati Ardejani, Reza Naseh, Hosein Saadloo	705
Investigation of phosphatic-vermiculite-heavy metal interaction and the implication to pollution of Solati River in Limpopo Province, South Africa Haile Mengistu, Bisrat Yibas, Souleymane Diop, Tamiru Alemayehu and Molla Demile	713
Optimisation of a floating sulphur biofilm reactor in a passive acid mine drainage treatment system N. Mooruth and R.P. Van Hille	723
Treatment of acid mine drainage (AMD) using iron oxides James D. Navratil, Andrew C. Akin and Justin Feis	725

Removal of vanadium from neutralized acid mine drainage (AMD) by adsorption to saw dust	727
Viktor Sjöberg, Stefan Karlsson and Bert Allard	
An evaluation on coal mining safety above high pressure confined aquifers in a deep coalmine	735
Sui Wanghua, Gao Yue, Feng Fuyuan	
Tailing dam management practices - A review of 3 case studies	745
Gary Thorne, and Vanessa Personnaz	
Evaluating the environmental impacts after the closure of mining activities, using Remote Sensing methods-The case study of Aliveri mine area.	755
Vasileiou E., Stathopoulos N. , Stefouli M. , Charou E., Perrakis A.
