

# **2012 6th International Conference on Application of Information and Communication Technologies**

**(AICT 2012)**

**Tbilisi, Georgia**

**17 – 19 October 2012**

**IEEE Catalog Number:**  
**ISBN:**

**CFP1256H-PRT**  
**978-1-4673-1739-9**

# TABLE OF CONTENTS

|                                                                                                                                          |            |
|------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Ontology Creation for an Educational Center .....</b>                                                                                 | <b>1</b>   |
| <i>S. Dilek, H. Karacan, N. Jahangiri, S. Afzali</i>                                                                                     |            |
| <b>New Novel Idea For Cloud Computing: How Can We Use Kalman Filter In Security Of Cloud Computing.....</b>                              | <b>5</b>   |
| <i>M. Darbandi, P. Shahbazi, S. Setayesh, O. Granmo</i>                                                                                  |            |
| <b>Particle Swarm Intelligence as a New Heuristic for the Optimization of Distributed Database Queries.....</b>                          | <b>10</b>  |
| <i>T. Dokeroglu, U. Tosun, A. Cosar</i>                                                                                                  |            |
| <b>Realization of Direct Series of Discussions in the Face of Conflicting Set of Production Rules .....</b>                              | <b>17</b>  |
| <i>R. Samkharadze, D. Chikovani, L. Gachechiladze</i>                                                                                    |            |
| <b>Towards Remote Security Monitoring in Cloud Services Utilizing Security Metrics.....</b>                                              | <b>21</b>  |
| <i>R. Savola, J. Ahola</i>                                                                                                               |            |
| <b>Real Time Decision Support Systems for Mobile Users in Intelligent Cities .....</b>                                                   | <b>28</b>  |
| <i>A. Costanzo, A. Faro</i>                                                                                                              |            |
| <b>Lip Reading Using Fuzzy Logic Network With Memory .....</b>                                                                           | <b>33</b>  |
| <i>S. Badura, M. Klimo, O. Skvarek</i>                                                                                                   |            |
| <b>Analysis of a Novel Audio Hash Function Based upon Stationary Wavelet Transform .....</b>                                             | <b>37</b>  |
| <i>M. Nouri, Z. Zeinolabedini, N. Farhangian, N. Fekri</i>                                                                               |            |
| <b>Application Of Geometrical Algebra To Neural Computations .....</b>                                                                   | <b>43</b>  |
| <i>I. Rodonaia, V. Rodonaia</i>                                                                                                          |            |
| <b>The Adaptive Method Of Decision Making In Problems Of Motion Terminal Control.....</b>                                                | <b>47</b>  |
| <i>V. Rodonaia</i>                                                                                                                       |            |
| <b>BSS Parameters And Their Influences In GSM Mobile Networks.....</b>                                                                   | <b>51</b>  |
| <i>M. Salehifar, S. Soleimany, H. Karbalaee</i>                                                                                          |            |
| <b>Feature Based Iris Recognition System Functioning on Extraction of 2D Features .....</b>                                              | <b>55</b>  |
| <i>A Agrawal, G. Bindra, P. Sharma</i>                                                                                                   |            |
| <b>Labeled Protection of Project Tasks in Collaborative Designing of Software Intensive Systems.....</b>                                 | <b>60</b>  |
| <i>P. Sosnin, V. Maklaev, S. Zhukov</i>                                                                                                  |            |
| <b>Integrated Analytical Information Resource Management System .....</b>                                                                | <b>65</b>  |
| <i>G. Ghlonti</i>                                                                                                                        |            |
| <b>Rule Scheduling Methods in Active Database Systems: A Brief Survey .....</b>                                                          | <b>67</b>  |
| <i>H. Firoozy-Najafabadi, A. Navin</i>                                                                                                   |            |
| <b>Collision Avatar (CA): Adding Collision Objects For Human Body In Augmented Reality Using Kinect.....</b>                             | <b>72</b>  |
| <i>K. Aitpayev, J. Gaber</i>                                                                                                             |            |
| <b>A Comparative Study on Feature Selection in Chinese Spam Filtering.....</b>                                                           | <b>76</b>  |
| <i>Y. Xu</i>                                                                                                                             |            |
| <b>The Bus Arrival Time Service Based on Dynamic Traffic Information.....</b>                                                            | <b>82</b>  |
| <i>T. Zhu, J. Dong, J. Huang, S. Pang, B. Du</i>                                                                                         |            |
| <b>Application Test Process in Product Life Cycle .....</b>                                                                              | <b>88</b>  |
| <i>O. Tekin, G. Cetin</i>                                                                                                                |            |
| <b>Distributed File System as a basis of Data-Intensive Computing .....</b>                                                              | <b>94</b>  |
| <i>A. Adamov</i>                                                                                                                         |            |
| <b>Direct Robust Non-Negative Matrix Factorization And Its Application On Image Processing.....</b>                                      | <b>97</b>  |
| <i>B. Shen, Z. Datbayev, O. Makhambetov</i>                                                                                              |            |
| <b>Electronic Health Card: Opportunities and Challenges.....</b>                                                                         | <b>102</b> |
| <i>H. Firoozy-Najafabadi, A. Navin</i>                                                                                                   |            |
| <b>Application of Functional State Modelling Approach for Yeast <i>Sacharomyces cerevisiae</i> Fed-batch Fermentation Modelling.....</b> | <b>107</b> |
| <i>S. Vilums, E. Kozlinskis, V. Brusbardis</i>                                                                                           |            |
| <b>Fetal ECG Representation Using Recurrence Plot Analysis.....</b>                                                                      | <b>112</b> |
| <i>E. Celik, B. Hurezeanu, A. Digulescu, M. Mazilu</i>                                                                                   |            |
| <b>Data-Intensive Computing with Map-Reduce and Hadoop .....</b>                                                                         | <b>116</b> |
| <i>S. Humbetov</i>                                                                                                                       |            |
| <b>Web Based System For The Bee Colony Remote Monitoring.....</b>                                                                        | <b>121</b> |
| <i>A. Zacepins, T. Karasha</i>                                                                                                           |            |
| <b>Cloud Security Tactics: Virtualization and the VMM.....</b>                                                                           | <b>125</b> |
| <i>P. Kalagiakos, M. Bora</i>                                                                                                            |            |

|                                                                                                                         |            |
|-------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Designing An Active Band-Pass Filter With Tunable Transversal Element At 4-GHz using 0.2µm GaAs Technology .....</b> | <b>131</b> |
| <i>S. Soleimany, M. Salehifar, H. Karbalaee</i>                                                                         |            |
| <b>Determination of QoS Metrics in Wireless Sensor Networks by Using Queuing Theory .....</b>                           | <b>136</b> |
| <i>A. Rustamov</i>                                                                                                      |            |
| <b>Coded OFDM Wireless Systems with Generalized Prefix.....</b>                                                         | <b>141</b> |
| <i>H. Dogan, H. Yildiz, T. Cooklev, Y. Acar</i>                                                                         |            |
| <b>Evolution Mobile Wireless Communication And LTE Networks.....</b>                                                    | <b>145</b> |
| <i>T. Mshvidobadze</i>                                                                                                  |            |
| <b>Cloud Service for Comprehensive Project Management Software .....</b>                                                | <b>152</b> |
| <i>A. Khan, G. Bindra, R. Arora, N. Raj, D. Jain, D. Shrivastava</i>                                                    |            |
| <b>SoR based Request Routing for Future CDN .....</b>                                                                   | <b>157</b> |
| <i>J. Wijekoon, E. Harahap, H. Nishi</i>                                                                                |            |
| <b>SaPM: Switch-aware Process Mapping Model for Parallel Computing .....</b>                                            | <b>162</b> |
| <i>Y. Lin, Y. Tang, X. Xu</i>                                                                                           |            |
| <b>With Attackers Wearing Many Hats, Prevent Your "Identity Theft" .....</b>                                            | <b>166</b> |
| <i>G. Bindra, D. Shrivastava, R. Seth</i>                                                                               |            |
| <b>Cut-off Time Calculation for User Session Identification by Reference Length .....</b>                               | <b>171</b> |
| <i>J. Kapusta, M. Munk, M. Drlik</i>                                                                                    |            |
| <b>Secure Data Aggregation in Wireless Multimedia Sensor Networks via Watermarking .....</b>                            | <b>177</b> |
| <i>E. Elbasi, S. Ozdemir</i>                                                                                            |            |
| <b>Embedded Solution for Road Condition Monitoring Using Vehicular Sensor Networks.....</b>                             | <b>183</b> |
| <i>A. Mednis, A. Elsts, L. Selavo</i>                                                                                   |            |
