CONTENTS

Session 1 - Low Carbon						
Page 6	The Audi A1 - Aerodynamics and Aero-Acoustics	Dr. Michael Schrefl	Audi AG			
Page 21	The Aerodynamic Development of the Tata Vista EV X-Prize Competition Car	Dr. Jeff Howell	Tata Motors			
Page 33	Aerodynamic Development of the Range Rover Evoque	Michael Samples	Jaguar Land Rover			
Session 2a - Aero-Acoustics						
Page 54	Correlation of CFD Simulation for Front Side Glass Wall Pressure Fluctuations at Yaw	Claire Freeman	Jaguar Land Rover	Page 100	Optimisation of Flow Blowing Devices to Improve Rear Diffuser Performances	Prof. Giovanni Lombardi University of Pisa
Page 75	Aerodynamic Noise Source Identification in Wind Tunnels Using Acoustical Array Techniques	Bernard Ginn	Bruel & Kjaer Denmark	Page 110	Application of Multi-Objective Optimisation to the Aerodynamic Development of Passenger Cars at FIAT	Enrico Ribaldone Centro Ricerche FIAT
Page 84	Simulation of Wind Noise Panel Contributions by Experiment and CFD+SEA	Robert Powell	Exa Corporation	Page 120	Validation of Open Source CFD Methods Used for Race Cars	Dr. Ries Bouwman Icon
Session 2b - Optimisation I						
Session 3a - External Aerodynamics						
Page 132	An Aerodynamics Benchmarking Study for a Range of Niche Vehicles Using MIRA Wind Tunnel Facility	Mike Dickison	Coventry University / MIRA Ltd	Page 158	Vehicle Gearbox Convection Simulation	Ralf Haessler Porsche
Page 146	On the Simulation of Overtaking Manoeuvres in a Full-Scale Automotive Wind Tunnel	Eric Van Grevenynghe	GIE SZA	Page 171	A Coupled Approach to Brake Duty Cycle Simulation	Scott C Meyland Exa Corporation
Session 3b - Thermal Management						
Session 4a - Unsteady Aerodynamics						
Page 184	Unsteady Aerodynamic Phenomena Under Time-Dependant Flow Conditions for Different Vehicle Shapes	Pascal Theissen	BMW	Page 234	Efficient and Robust Method of Drag Optimization During Car Body Development Process	Krzysztof Przystawa Warsaw University
Page 196	Experimental Investigation of the Unsteady Wake of an Ahmed Body	Dr. Thorsten Möller	TU Braunschweig	Page 243	An Advanced RBF Morph Application Coupled CFD-CSM Aeroelastic Analysis of a Full Aircraft Model and Comparison to Experimental Data	Marco Evangelos Biancolini University of Rome
Page 204	MIRA's New Flow Visualisation Techniques	Angus Lock	MIRA Ltd			
Page 216	Numerical Study of Crosswind Stability of a Simplified Car at Steady and Gusty Winds	Siniša Krajčović	Chalmers University			
Session 4b - Mesh Morphing						
Session 5a - Soiling						
Page 260	Investigation of Braking Response Under Wet Condition	Iwo Spruss	FKFS Germany	Page 300	Numerical Study of Design Alterations Affecting the Crosswind Characteristics of a Generic Road Vehicle Model	Tristan Favre Royal Institute of Technology
Page 271	The Simulation of Brake Dust Deposition	Adrian Gaylard	Jaguar Land Rover	Page 311	Experimental Study of On-Road Aerodynamics During Crosswind Gusts	Johannes Wojciak Technische Universität München
Page 288	Equivalent Rain Intensities Due to Splash and Spray in the Back of a Vehicle Running on Wet Road	Jean-Paul Bouchet	CSTB Nantes France	Page 322	An Experimental Investigation into the Transient Aerodynamics of a Small Production Car	Joshua Baden-Fuller Loughborough University
Session 5b - Crosswind Stability						
Session 6a - Open Source CFD						
Page 336	Aerodynamic Study of a Dallara F3 Car Using an Open-Source CFD Methodology	Rob Lewis	TotalSim	Page 378	Improving Fuel Economy by Means of Aerodynamic Add-Ons for Trailers	Gandert Van Raemdonck TU Delft
Page 348	Unsteady Aerodynamic Simulator for Road Vehicles based on Large-Eddy Simulation	Dr. Makoto Tsubokura	Hokkaido University	Page 387	Flow Field Investigation of the Wheel Housing Opening Shape on a Heavy Truck Using CFD	David Söderblom Chalmers University
Page 365	OpenFOAM Development at MIRA	Angus Lock	MIRA Ltd	Page 401	A Review of the Modelling of the Forces and Moments Acting on Trains in Crosswinds Using CFD	Don Wu Mott MacDonald Ltd
Session 6b - Commercial Vehicles						
Session 7 - Wind Tunnels						
Page 416	The Characteristics of the Honda Full Scale Aero-acoustic Wind Tunnel Equipped with a Rolling Road System	Kensuke Koremoto	Honda R & D Japan			
Page 433	Tire Contact Patch Force Measurement at the Windshear Rolling Road Wind Tunnel	Joel Walter	Jacobs Technology Inc			
Session 8 - External Aerodynamics						
Page 446	Simulation of Unsteady Aerodynamics Using a Mesh-less Particle Approach	Peter Drage	Opunkt GmbH			
Page 457	Effects of Wheel Orientation on Predicted Flow Field and Forces When Modelling Rotating Wheels Using CFD	Christoffer Landström	Chalmers University			
Page 471	Aerodynamics of Modern Sport Utility Vehicles	Thomas Schütz	Audi AG
