Oxy-fuel Technology I

*Dr. Ligang Zheng, CanmetENERGY Canada, and
Prof. Yiannis Levendis, Northeastern University*

First Operational Experiences in the CIUDEN 30 MWth Oxy-CFB Facility

*Jesus Ramosa, Iñaki Alvareza, Abraham Fernandez, Manuel Gutierrez, and
Ruth Diego, Fundación Ciudad de la Energía, CIUDEN, SPAIN; Reijo
Kuivalainen, Jouni Lantto, and Arto Hotta, Foster Wheeler Energia Oy,
FINLAND; and Horst Hack, Foster Wheeler North America Corp.,
USA.....1*

Updated Overview of a Manufacturer's Efforts to Commercialize Oxy-Combustion for Steam Power Plants

*Armand Levasseur, James Kenney, and Paul Chapman, ALSTOM Power, Inc.,
USA; Thierry Pourchot and Benedicte Prodhomme ALSTOM Power Systems SA,
FRANCE; and Olaf Stallmann, Alstom Carbon Capture GmbH,
GERMANY.....*

FutureGen 2.0: Phase 2 and Beyond

*Dennis McDonald, P.E., Advanced Technologies, and Steve Moorman, The
Babcock & Wilcox Company, Kenneth Humphreys, CEO FutureGen Alliance,
USA.....*

ITM Oxygen Technology for Oxy-Combustion and IGCC-CCS

*VanEric E. Stein, John M. Repasky, Lori L. Anderson, Edward (Ted) P. Foster,
and Phillip A. Armstrong, Air Products and Chemicals, Inc., USA.....47*

Oxy-fuel Combustion in a Bench-scale Fluidized Bed Using Victorian Brown Coal

*Bithi Roy, and Sankar Bhattacharya, Department of Chemical Engineering,
Monash University, AUSTRALIA.....*

CFD Simulation on Impact of Oxygen Enrichment on Biomass Combustion

*Jiefu Ma and Yuan Xue, Air Liquide, Delaware Research and Technology Center;
and Joshua Thornock and Dale R. Tree, Brigham Young University,
USA.....*

Oxy-fuel Technology II

*Dr. Ligang Zheng, CanmetENERGY Canada, and
Klas Andersson, Chalmers University, Sweden*

Removal of NO_x from Oxyfuel-derived CO₂ by Reaction with Water Condensate Formed during Compression

*Timothy Ting, Rohan Stanger and Terry Wall, Chemical Engineering, University
of Newcastle, AUSTRALIA.....68*

Sulphation of Potassium Chloride in Air and Oxy-fuel Combustion

*Thomas Ekvall, Fredrik Normann, Klas Andersson, Filip Johnsson, Department
of Energy and Environment, Division of Energy Technology, Chalmers University
of Technology, SWEDEN.....7:*

Experiments in a Once-through Furnace Simulating Different Extents of Recycle Gas Cleaning in Coal-fired Oxy-fuel Combustion: Conversion of SO₂ to SO₃

Reinhold Spörl and Jörg Maier, University of Stuttgart, GERMANY; and Lawrence Belo, Kalpit Shah, Rohan Stanger, and Terry Wall, The University of Newcastle, AUSTRALIA.....

Carbon Monoxide Formation in Oxy-Fuel Combustion

Fredrik Normann, Daniel Kühnemuth, Klas Andersson, and Filip Johnsson, Department of Energy and Environment, Chalmers University of Technology, SWEDEN.....

Influence of Gas Composition on the Formation of SO₃ in the Post-Flame Zone

D. Fleig, K. Andersson, and F. Johnsson, Department of Energy and Environment, Division of Energy Technology, Chalmers University of Technology, SWEDEN; and M.U. Alzueta, Aragón Institute of Engineering Research, University of Zaragoza, SPAIN.....

Oxy-fuel Technology III

Dr. Ligang Zheng, CanmetENERGY Canada, and Horst Hack, Foster Wheeler Development Corp.

Comparative Radiative Transfer from Burning Single Particles of Coal and Biomass in Conventional and in Oxy-Combustion Conditions

Yiannis A. Levendis and Reza Khatami, Mechanical and Industrial Engineering, Northeastern University, USA.....

Modeling Radiative Heat Transfer and Carbon Burn-out in Oxy-Coal Combustion Scenarios

H. A. Sater and G. Krishnamoorthy, Department of Chemical Engineering, University of North Dakota; M. Sami and S. Orsino, ANSYS, Inc., USA; and P. Nakod, ANSYS, Inc., INDIA.....

Oxyfuel Combustion of Subbituminous Coal in a Two Burner Arrangement – Influence of Burner Distance

Andreas Baumgartner, Max Blume, Adrian Goanta, Pedro Dias and Hartmut Spliethoff (Bavarian Center for Applied Energy Research), Institute for Energy Systems, Technische Universität München, GERMANY.....

Experimental Investigation of Interaction between Coal Flames – Effects on Total and Radiation Heat Fluxes

Maximilian Blume, Andreas Baumgartner, Adrian Goanta, Pedro Dias and Hartmut Spliethoff, Institute for Energy Systems, Technische Universität München, GERMANY.....

Experimental and Numerical Investigations into Air and Oxy-fuel Combustion of Single Coal Particles

Robert Lewtak and Ewa Marek, Department of Thermal Processes, Institute of Power Engineering, POLAND.....

Advanced CO₂ Capture I

Dr. Ronald Breault,

National Energy Technology Laboratory, U.S. Department of Energy

Update on NETL's Industrial Carbon Management Initiative

Ronald W. Breault and George Richards, US DOE NETL, and Stephen Carpenter, URS Corp., USA.....

Evaluation of Efficiency Penalty of CCS in IGCC System

Hiroshi Sasatsu, Electric Power Development Co., Ltd. (J-POWER) Wakamatsu Research Institute, JAPAN..... " °

Post Combustion Flue Gas Test Results for ION's Non-Aqueous Organic Solvent

Nathan Brown, Greg Staab, Rene Kupfer, Michael C. Huffman, Jason E. Bara (Department of Chemical and Biological Engineering, The University of Alabama,) and Alfred E. Brown, ION Engineering; and Brandon Pavlish, The University of North Dakota Energy and Environmental Research Center, USA.....

Experimental Studies of A Carbonate-Based Absorption Process with High Pressure Stripping for Post-Combustion CO₂ Capture

Yongqi Lu, Manoranjan Sahu, Xinhuai Ye, Qing Ye, Nicholas Devries, Illinois State Geological Survey, University of Illinois at Urbana-Champaign; Joseph Hirschi, Illinois Clean Coal Institute; and Andrew Jones, U.S. Department of Energy, National Energy Technology Laboratory, USA.....

NeuStream®-C: Turning the Tables on CO₂ Economics

Dr. Andrew Awtry, and Dr. Eric Klein, Neumann Systems Group Inc., USA.....

CO₂ Capture Using Hybrid Sorption with Solid Sorbents

Steven A. Benson and Nicholas Lentz, University of North Dakota, Institute for Energy Studies, USA.....

Advanced CO₂ Capture II

Dr. Ronald Breault, National Energy Technology Laboratory, U.S. Department of Energy, and Lisa Rimpf, The Babcock & Wilcox Company

Computational Tools for Accelerating Carbon Capture Process Development

D.C. Miller, N.V. Sahinidis, H. Kim, J. Morinelly, National Energy Technology Laboratory, U.S. Department of Energy; and A. Cozad, Z. Yuan, Carnegie Mellon University, USA.....

Warm CO₂ Capture by MgO-Based Double Salts: Facilitation by Molten Alkali Nitrate Salts

Dr. David L. King, Xiaohong S. Li, and Aashish Rohatgi, Pacific Northwest National Laboratory, Keling Zhang, Center for Clean Energy Engineering and Department of Materials Science and Engineering, University of Connecticut, USA.....

Use of TiO₂ as a Catalyst for K₂CO₃/Al₂O₃ Based on CO₂ Capture Technology

Wei Dong, Xiaoping Chen and Ye Wu, Key Laboratory of Energy Thermal Conversion and Control, Ministry of Education, School of Energy and Environment, Southeast University, PEOPLE'S REPUBLIC OF CHINA..... 2

CO₂ Adsorption: Experimental Investigation with Kinetics Verification and CFD Reactor Model Validation

Ronald W. Breault, E. David Huckaby and Larry J. Shadle, National Energy Technology Laboratory, U.S. Department of Energy; and Esmail R. Monazam and James L. Spenik, REM Corporation, USA.....

Multi Emissions Control

Chris Smyrniotis, Fuel Tech, Inc.

Impact of Additives for Enhanced SO₂ Removal on Re-emissions of Mercury in Wet Flue Gas Desulfurization

Barna Heidel, and Günter Scheffknecht, University of Stuttgart, Institute of Combustion and Power Plant Technology; and Melanie Hilber, EnBW Kraftwerke AG, GERMANY.....

Technology to Minimize Hot Side Chloride Corrosion Attack In Utility Furnaces Burning High Chloride Fuels

Doug Gagnon, Kent Schulz and Jack Weber, Fuel Tech, Inc., USA.....

Application of Circulating Fluidized Bed Scrubbing Technology For Multi-Pollutant Removal

Horst Hack, and Robert Giglio, Foster Wheeler North America Corp., USA; Rolf Graf, Foster Wheeler Energie GmbH, GERMANY.....

Defluidization Caused by Potassium Salts in a Laboratory Bubbling Fluidized Bed

Christoffer Sevonius, Patrik Yrjas and Mikko Hupa, Abo Adademi University, FINLAND.....

Revisiting Selective Oil Agglomeration for Ecological Benefits

Olev Trass Department of Chemical Engineering, University of Toronto, and Mike McLaren, W2 Energy, Inc., CANADA.....

Biomass Co-Utilization I

*Les Marshall,
Ontario Power Generation, Canada*

Global Torrefaction Kinetics of Large Single Biomass Particles – Influence of Process Conditions

Anna Becker, Björn Brosch, Siegmund Wirtz, and Viktor Scherer, Department of Energy Plant Technology (LEAT), Ruhr-University Bochum, GERMANY.....

Characterisation of Self-heating and Explosive Properties of Torrefied Biomass

Mariusz K. Cieplik, PhD, F. Verhoeff, MSc, J.H.A. Kiel, PhD, S. Leiser, PhD, and M. Carbo, MSc, Energy Research Centre of the Netherlands (ECN), Biomass and Energy Efficiency, THE NETHERLANDS.....

Upgraded Biomass Quality from an End User Perspective

Results of Pure Wood Dust Firing in a Pilot-Scale and Large Scale Pulverized Fuel Power Plants

A. Fuller, J. Maier, E. Miller and G. Scheffknecht, Institute of Combustion and Power Plant Technology, Universität Stuttgart, GERMANY; and J. Kalivodova, The Energy Research Center of the Netherlands (ECN), Biomass, Coal and Environmental Research, Heat and Power Generation, THE NETHERLANDS.....

Impact of Oxygen Enrichment on Burnout and NO for Biomass with Different Particle Size

Joshua Thornock, Daniel Tovar, Dale R. Tree, and Zhijun Zhou, Mechanical Engineering, Brigham Young University; and Yuan Xue, Sadasivuni, and Scott Liedel, Air Liquide, Delaware Research and Technology Center, USA; and Remi Tsiava, Air Liquide, Centre de Recherche Claude Delorme, FRANCE.....

Evaluation of the ESP Performance in Relation to the Characterisation of Fly Ashes Collected in the Large Scale Pulverized Fuel Power Plants

J. Kalivodova, and M. Carbo, The Energy Research Center of the Netherlands (ECN), Biomass, Coal and Environmental Research, Heat and Power Generation, THE NETHERLANDS; A. Fuller and J. Maier, Institute of Combustion and Power Plant Technology, Universität Stuttgart, GERMANY; E. Karampinis, Institute for Solid Fuels Technology and Applications / Centre for Research & Technology Hellas, GREECE; and P. Savat, Laborelec Belgium, BELGIUM.....

Biomass Co-Utilization II

*Les Marshall,
Ontario Power Generation, Canada*

On the Combustion Behaviour of Pulverized Torrefied Biomass: Experiments on Pyrolysis and Char-burn Out

Sven Haarmann, Martin Schiemann, and Viktor Scherer, Department of Energy Plant Technology, Ruhr University, GERMANY.....

Scaling Laws Associated with Biomass Cofiring and Prediction of Particle Breakthrough of the Volatile Flame

Melissa L. Holtmeyer, Benjamin M. Kumfer, Richard L. Axelbaum, Department of Energy, Environmental & Chemical Engineering, and Consortium for Clean Coal Utilization, Washington University in St. Louis, USA; and Shuiqing Li, Department of Thermal Engineering, Tsinghua University, PEOPLE'S REPUBLIC OF CHINA.....

Impacts of Torrefaction on Biomass Utilization in a Transport Reactor Integrated Gasification System

Michael J. Holmes, Joshua J. Stanislawski, Michael L. Swanson, Christopher J. Zygarricke, Energy & Environmental Research Center, University of North Dakota; Wayne Sumple and Tom Maloney, Connecticut Center for Advanced Technologies; and Mark Barmasse and Andrew Danzig, Arcadis US, USA.....

Olive Kernel and RDF Co-firing with Greek Lignite in Drop Tube Pulverized Fuel Furnace

Panagiotis Vounatsos, Michalis Agraniotis, Panagiotis Grammelis, Manolis Karampinis and Emmanuel Kakaras, National Technical University of Athens, GREECE; and Aaron Fuller and Joerg Maier, Institute of Combustion and Power Plant Technology, University of Stuttgart, GERMANY.....

Biomass Cofiring in Utility Boilers: An Historical Perspective

David Tillman, Fuels & Combustion Specialist, USA.....

Characterization of Coke Deposition in the Catalytic Conversion of Biomass-Derivates Process

Shanshan Shao, Huiyan Zhang, and Rui Xiao, Key Laboratory of Energy Thermal Conversion and Control, Ministry of Education, School of Energy and Environment, Southeast University, PEOPLE'S REPUBLIC OF CHINA.....

Mercury Control

Bradley Adams, Reaction Engineering International

Reducing Mercury Emissions from Coal-Fired Power Plants Using Condensing Heat Exchangers

E.K. Levy, C. Romero, H. Bilirgen and J. Charles, Lehigh University, and M. Ness, Great River Energy, USA.....

Evaluation of Mercury Control Strategies in the Presence of SO₃ Using the MerSim™ Model

Brydger Van Otten and Bradley Adams, Reaction Engineering International, USA.....

Investigation of Mercury Measurement Bias in Oxy-combustion Environments

Brydger Van Otten, Reaction Engineering International; and Geoff Silcox, Ignacio Preciado, University of Utah, USA.....

Pilot-scale Testing of Mercury Control Technologies Under Oxy-fired Conditions

Brydger Van Otten and Bradley Adams, Reaction Engineering International; and Andrew Fry, University of Utah, USA.....

Gasification Technologies I

Massood Ramezan, Leonardo Technologies, Inc.

Improvement of CO₂ Chemical Absorption Process for IGCC System

Kyohei Nakamura, Electric Power Development Co., Ltd. (J-POWER) Wakamatsu Research Institute, JAPAN.....

Dual Fluidized Bed Steam Gasification of Coal and Biomass: Influence of the State of Pyrolysis on the Process Performance

Stefan Kern, Christoph Pfeifer and Hermann Hofbauer, Vienna University of Technology, Institute of Chemical Engineering, AUSTRIA.....674

Electrolyte Enhanced Electrochemical Gasification of Coal

Xiaoyong Xia and Gerardine G. Botte, Center for Electrochemical Engineering Research, Department of Chemical and Biomolecular Engineering, Russ College of Engineering and Technology, Ohio University, USA.....

Characterization of Fine Particulate Material from Syngas in a Pilot Scale Entrained Flow Coal Gasifier

Mustafa C. Celebi and Kevin J. Whitty, Institute for Clean and Secure Energy, University of Utah, USA.....

Application of Laboratory-scale Gasification Rate Data for Analysis of Performance of Practical Entrained Flow Gasifiers

San Shwe Hla, Daniel G. Roberts and David J. Harris, CSIRO Energy Technology, AUSTRALIA.....

Liquid CO₂ Slurry (LCO₂) for Feeding Low Rank Coal (LRC) Gasifiers-Technical and Economic Outlook

John Dooher, Adelphi University and Dooher Institute of Physics and Energy; Jose Marasigan, Electric Power Research Institute; and Harvey N. Goldstein, Worley Parsons, USA....." °

Gasification Technologies II

Massood Ramezan, Leonardo Technologies, Inc.

On the Thermal and Kinetic Performance of a Coal-CO₂ Slurry-fed Gasifier: Optimization of CO₂ and H₂O Flow Using CO₂ Skimming and Steam Injection

Cristina Botero, Randall P. Field, Howard J. Herzog and Ahmed F. Ghoniem, Massachusetts Institute of Technology, USA.....

Development and Validation of a Volatile Break-up Approach for Gasification Simulations

Pravin Nakod, and Ajey Walavalkar, ANSYS Inc., INDIA; and Stefano Orsino and Muhammad Sami, ANSYS, Inc., USA....." °

Evaluation of the Slagging Behaviour of Australian Coal Ashes

Alexander Ilyushechkin, San Shwe Hla, Daniel G. Roberts and David J. Harris, CSIRO Energy Technology, AUSTRALIA..... 5

Toward a Technology to Mitigate Syngas Cooler Plugging and Fouling

Michael S. Bockelie, Kevin Davis, Martin Denison, Randy Pummil, Huafeng "Dave" Wang, and Jost Wendt (Department of Chemical Engineering, University of Utah), Reaction Engineering International; Kevin Whitty, Mustafa Can Celebi, Cristina Jaramillo, and Travis Waind, Department of Chemical Engineering, and Andrew Fry, Industrial Combustion & Gasification Facility, University of Utah, USA.....5 7

Coal Combustion & Low NO_x Burners

Alan Paschedag, Siemens Energy, and J.J. Letcavits, American Electric Power

Influence of Aluminosilicate Additives on Deposition Behaviour and Deposit Characteristics During Pulverized Wood Combustion

Manoj Paneru, Selahattin Babat, Jörg Maier and Günter, Scheffknecht; Institute of Combustion and Power Plant Technology, GERMANY; and Chritian, Ravagnani, Murielle Perronnet, and Olivier Haerlingen, Imerys Ceramic Centre, FRANCE.....

Deposition Behavior of Three Bituminous Coals in a Large Pulverized Fuel Power Plant

S. Babat, J. Maier, and G. Scheffknecht, Institute of Combustion and Power Plant Technology, University of Stuttgart, GERMANY; and R.A. Creelman, Ultra-Systems Technology; and C. Ward, School of Biological, Earth and Environmental Sciences, University of New South Wales, AUSTRALIA.....5

Model Based Assessment of Boiler Ash Deposition Impacts on Gas Temperature, CO, NO_x and Heat Balance

Marc Cremer, Dave Wang and Kevin Davis, Reaction Engineering International, USA.....

Selective Catalytic Reduction

Asst. Prof. Bihter Padak, and Prof. Jochen Lauterbach, University of South Carolina

Controlling Acid Gases & Corrosion in Coal Fueled Boilers

Chris Smyrniotis, Fuel Tech, Inc., USA..... " °

Phosphorous-Resistant SCR Catalysts for Air Staged Combustion of PRB Coal

Dave VanderWiel and Ambareesh Murkute, Babcock & Wilcox Research Center, B&W Power Generation Group, USA.....

Aging Mechanism of the SCR Catalyst and Its Optimized Microstructure

Hiroyuki Kamata and Akinori Yukimura, IHI Corporation, JAPAN.....

Zeolite-based Catalysts for the NH₃-SCR in Coal-fired Power Plants

Erden Sasmaz, Aixa del Valle, Ben Galloway, Bihter Padak and Jochen Lauerbach, University of South Carolina, USA.....

Enhancing SCR Performance with Improved On-Line Catalyst Cleaning

Jake Shelton, CoaLogix/SCR Tech, USA.....

Chemical Looping I

Dr. Ronald Breault and Hanjing Tian, National Energy Technology Laboratory, U.S. Department of Energy

Iron-manganese Oxide Supported on MgAl₂O₄ and ZrO₂, as Oxygen Carriers for Chemical-looping with Oxygen Uncoupling

Golnar Azimi, and Dazheng Jing, Department of Environmental Inorganic Chemistry; and Henrik Leion and Tobias Mattisson, Department of Energy and Environment, Chalmers University of Technology, SWEDEN.....

Alstom's Chemical Looping Technology Program Update

Abdulally, Iqbal and Andrus, Herbert, Alstom Power, Inc., USA; and Corinne Beal, ALSTOM Boiler France, FRANCE.....

Combined Cu/Mn Oxides as Oxygen Carrier in Chemical-looping with Oxygen Uncoupling (CLOU)

Henrik Leion, and Nasim Mohammad Pour, Department of Chemical and Biological Engineering, Division of Environmental Inorganic Chemistry, and Tobias Mattisson and Magnus Rydén, Department of Energy and Environment, Division of Energy Technology, Chalmers University of Technology, SWEDEN.....

Small Compact Integrated Chemical Looping Concept Reactors and Applications

Ronald. W. Breault, George Richards, Stephen Carpenter, Mark Williams, National Energy Technology Laboratory, U.S. Department of Energy, USA.....

Degradation of Oxygen Carriers in Fixed Bed Chemical Looping Combustion

Erin Kimball-Schols, Rebecca Leenman, TNO, THE NETHERLANDS; Anita Fossdal, and Richard Blom, SINTEF, NORWAY; and Elodie Comte and Arnold Lambert, IFPEN, FRANCE.....7; ;

Chemical Looping II

Dr. Ronald Breault,

National Energy Technology Laboratory, U.S. Department of Energy

Computational Fluid Dynamic Simulation of a Circulating Dual Fluidized Bed Prototype for Chemical Looping Combustion

Ronald Breault, Yong Liu, N'dri Arthur Konan, Justin Weber, E. David Huckaby, and Mike Gallagher, National Energy Technology Laboratory, U.S. Department of Energy, USA.....

Comparative Process Modeling and Costs for CLC and CLOU

JoAnn Lighty, Asad Sahir, James Dansie, Department of Chemical Engineering, Institute of Clean and Secure Energy, University of Utah, USA.....

Studies on Redox Reaction Kinetics of Some Oxygen Carriers

Ewelina Ksepko, Ph.D, Prof. Marek Sciazko, and Piotr Babinski, M.Sc., Institute for Chemical Processing of Coal, POLAND.....

Interaction between Iron-based Oxygen Carrier and Four Coal Ashes during Chemical Looping Combustion

Jinhua Bao, Zhenshen Li, and Ningshen Cai, Key Laboratory for Thermal Science and Power Engineering of Ministry of Education, Beijing Municipal Key Laboratory for CO₂ Utilization & Reduction, Department of Thermal Engineering, Tsinghua University, PEOPLE'S REPUBLIC OF CHINA.....

Design, Construction and Continuous Operation of a 25 KWth CDCL Unit

Dawei Wang, Samuel C. Bayham, Hyung R. Kim, Andrew Tong, Liang Zeng, Liang-Shih Fan, Department of Chemical and Biomolecular Engineering, The Ohio State University, USA.....

Chemical Looping III

Dr. Ronald Breault,

National Energy Technology Laboratory, U.S. Department of Energy

Design Considerations for Natural Gas Chemical Looping Combustion

Ronald W. Breault, Steve Carpenter, Dale Keairns, Steve Ostheim, Richard Newby, and George Richards, National Energy Technology Laboratory, U.S. Department of Energy, USA.....844

Effect of Steam on Chemical Looping Combustion of Coal with Iron and Copper Oxygen Carriers

Dr. Hanjing Tian, and Thomas Simonyi (URS) and Dr. Ranjani V. Siriwardane, U.S. Department of Energy, National Energy Technology Laboratory, USA.....

Chemical Looping Air Separation (CLAS) Process for Oxygen Production in Oxy-fuel Power Plant: Research and Development Activities at the University of Newcastle

Kalpiti Shah, Behdad Moghtadeir. Hui Song, Jafar Doroodchi, and Terry Wall, Priority Research Centre for Energy, Chemical Engineering, School of Engineering, Faculty of Engineering and Built Environment, The University of Newcastle, AUSTRALIA.....

Chemical Looping Combustion of Methane Over Bimetallic Fe₂O₃ – CuO Oxides

Ewelina Ksepko, Ph.D, and Prof. Marek Sciazko, Institute for Chemical Processing of Coal, POLAND; and Ranjani V. Siriwardane, Ph.D., Hanjing Tian, Ph.D., (URS-Energy & Construction), and Thomas Simonyi (URS-Energy & Construction), National Energy Technology Laboratory U.S. Department of Energy, USA..... 7

Hydrodynamics of a Moving-Bed and Fluidized-Bed Based Solids Circulatory System

Dawei Wang and Liang-Shih Fan, Department of Chemical and Biomolecular Engineering, The Ohio State University, USA.....

Emissions Control of CO₂ Capture Technologies and CO₂ Product Quality

Dr. Merched Azzi, CSIRO, Australia

Amine Losses and Formation of Degradation Products in Post-Combustion CO₂ Capture

Robert S. Dahlin and E. Carl Landham, Southern Research Institute, National Carbon Capture Center; Mark L. Kelinske, Southern Research Institute, Environmental Sciences Laboratory; John M. Wheeldon, Electric Power Research Institute; and Debra H. Love, DHL Analytical Laboratories, USA.....873

Future Environmental Air Quality Regulations for Emissions from Amine-based Post-Combustion Carbon Capture Facilities

Merched Azzi, Brendan Halliburton, Anne Tibbett, Stuart Day, Erik Meuleman, Paul Feron, James Jansen, CSIRO, Energy Technology, AUSTRALIA.....

Accelerated MEA Aging in a CSIRO PCC Pilot Plant at Loy Yang

Erik Meuleman, CSIRO Energy Technology, AUSTRALIA.....

Improving Power Plant Efficiency

Dr. Nenad Sarunac, University of North Carolina

Auto-ignition Parameters of Bituminous Coal Dusts

Dejian Wu, Jan Berghmans, and Eric Van den Bulck, Katholieke Universiteit Leuven, Department of Mechanical Engineering; and Frederik Norman, and Filip Verplaetsen, Adinex NV, BELGIUM.....

Research on Heat Storage in Phase Changing Materials

Janusz Lichota, Mikhal Lepszy, and Kazimierz Wójs, Wroclaw University of Technology, POLAND.....89:

Applications of Phase Change Materials in Power Stations

Janusz Lichota, Mikhal Lepszy, and Kazimierz Wójs, Wroclaw University of Technology, POLAND.....

Pre-drying Technologies at Existing Lignite Power Plants: Thermodynamic Analysis and Comparison

Konstantinos Atsonios, Michalis Agraniotis, Ioannis Violidakis, Panagiotis Grammelis, Emmanuel Kakaras (Laboratory of Steam Boilers and Thermal Plants, National Technical University of Athens), and Antonios Koumanakos, (Laboratory of Steam Boilers and Thermal Plants, National Technical University of Athens), Chemical Process and Energy Resources Institute, Centre for Research and Technology Hellas, GREECE.....

The Cooling Water Loop: Biofilm Elimination and Impact on Production Output

Cem Candir, and Tom Muilenberg, MIOX Corporation, USA.....

Reduce Parasitic Load, Increase Available Power, Improve Total Combustion System through Holistic Fuel Preparation Improvements

D. Gary Madden, Bruce Alfee and Christopher Martin, Technomics, USA.....

Advanced Modeling

Dr. Edmundo Vasquez, Clyde Bergemann

Modeling Ash Deposition and Formation during Pulverized Fuel Combustion Using Computational Fluid Dynamics

Ulrich Kleinhans, Christoph Wieland, and Hartmut Spliethoff (Bavarian Center for Applied Energy Research (ZAE Bayern) Institute for Energy Systems, Technische Universität, GERMANY.....

Characterization of Combustion Processes and Products at Wyandotte Municipal Services #7 Boiler

Dao Duong, Michael Mazzolla, David Tillman, Retired, Foster Wheeler North America Power; and Kerry McLenon, Wyandotte Municipal Services, USA.....

Clean Coal Plant Design Optimization, Reliability Improvement and Emissions Reduction: Computer Simulation Cases Studies

Scott E. Thibault, M.S., CPFD Software, LLC, USA.....

Mathematical Modeling of Fluidized Bed Lignite Dryers

Janusz Lichota, and Halina Pawlak-Kruczek, Wroclaw University of Technology; Zbigniew Plutecki, Stanislaw Anweiler and Grzegorz Nowosielski, Opole University of Technology, POLAND.....

2D Pore-resolved Simulations of Heterogeneous and Homogenous Chemical Reactions Inside Porous Carbon

Matthias Kestel and Petr Nikrityuk, CIC Virtuhcon, TU Bergakademie Freiberg, GERMANY.....

CO₂ Utilization

Erin Kimball-Schols, TNO, The Netherlands

CyclicCO₂R: The Production of Cyclic Carbonates from CO₂ Using Renewable Feedstocks

E. Kimball-Schols, C. Schuurbijs, and J. Zevenbergen, TNO; G. Mul, University of Twente – MESA+Institute for Nanotechnology, and A. Metlen, and A-F. Ngomsik-Fanselow, FeyeCon Carbon Dioxide Technology, THE NETHERLANDS; S.F. Håkonsen, and R. Heyn, SINTEF, NORWAY; W. Offermans, W. Leitner, M. Picard, and T.E. Müller, RWTH Aachen University, Institute for Technical and Macromolecular Chemistry and CAT Catalytic Center; and B. Schöffner, Creavis Technologies & Innovation, Evonik Industries AG, GERMANY; M. North, Newcastle University, UNITED KINGDOM; and E. Sarron, and Ó. Sigurbjörnsson, Carbon Recycling International, ICELAND.....975

Electrochemical Conversion of CO₂

Edward Rode, Arun S. Agarwal, Narasi Sridhar Shan Guan, and Davion Hill, Det Norske Veritas (USA), Research and Innovation, USA.....

Electrocatalytic Reduction of Carbon Dioxide to Alcohols: From Chemical Concept to Real World Application

Andrew Bocarsly, Professor of Chemistry, Frick Laboratory, Department of Chemistry, Princeton University, USA.....

Different Aspects of CCU: Enabler of Variable Energy Sources and Feedstock for Industry

Wim Haije, Energy Research Centre of the Netherlands and Delft University of Technology; Stephane Walspurger, Energy Research Centre of the Netherlands; and Hans Geerlings, Delft University of Technology, THE NETHERLANDS.....

Post Combustion CO₂ Capture

Lisa M. Rimpf, The Babcock & Wilcox Company, and Erik Meuleman, CSIRO, Australia

Comparative Evaluation of Advanced Post Combustion CO₂ Capture Technologies

John P. Kay, and Nathan J. Fiala, Energy & Environmental Research Center, University of North Dakota, USA.....

Advances in Membrane Technology for Use in CO₂ Capture from Coal Combustion

Richard Baker, Haiqing Lin, Tim Merkel, Xiaotong Wei, and Meijuan Zhou,

Membrane Technology & Research, Inc., USA.....

Speeding Carbonate as a Capture Fluid – The Benefits of Polymer Encapsulated Solvent Media

Joshuah K Stolaroff, William L. Bourcier, Christopher M. Spadaccini, Eric B. Duoss, John J. Vericella, Sarah E. Baker, and Roger D. Aines, Lawrence Livermore National Laboratory; James Hardin IV, University of Illinois, Urbana Champaign; George Farthing, The Babcock and Wilcox Company; and Jennifer A. Lewis, Harvard University, USA.....

Recent Developments of Hitachi’s Advanced Solvent Technology for Post-combustion CO₂ Capture

Sandhya Eswaran and Song Wu, Hitachi Power Systems America, Ltd.; and Frank Morton, Southern Company Services, Inc., USA, and Hirofumi Kikkawa, and Eiji Miyamoto, Babcock-Hitachi K.K., JAPAN.....

Econamine FG PlusSM Demonstration Plant at E.ON Kraftwerke’s Wilhelmshaven Power Plant

Satish Reddy and Joseph Yonkoski, Fluor Enterprises, Inc., USA; and Peter Radgen and Helmut Rode, E.ON New Build & Technology GmbH, GERMANY.....

Low Rank Coal Utilization

Dr. Klaus R.H. Hein, Monash University, Australia

Ultra High Efficiency Power Generation from Victorian Coals

Louis Wibberley, Advanced Carbon Power CSIRO Energy Technology, AUSTRALIA.....

One Gasification Technology for Different Feedstock

B.J. Vreugdenhil MSc, A. van der Drift MSc, A.J. Grootjes BSc, Energy Research Centre of the Netherlands, THE NETHERLANDS.....9: 8

A Preliminary Investigation into the Entrained Flow Gasification of Victorian Brown Coal

Joanne Tanner, Klaus R.G. Hein, and Sankar Bhattacharya, Monash University, Department of Chemical Engineering, AUSTRALIA.....

Physical and Chemical Properties of Steam Fluidized Bed Dried Coal

David Stokie, Joanne Tanner, and Sankar Bhattacharya, Department of Chemical Engineering, Monash University, AUSTRALIA.....

Oxy-Fuel Combustion of Lignite of Different Moisture Content

Halina Pawlak-Kruczek, Michal Ostrycharczyk, Jakub Długosz, Jacek Zgóra, and Michał Czerep, Department of Mechanical and Power Engineering, Wrocław University of Technology, POLAND.....

Analyzing Performance Characteristics of Coal Blends with Low Rank Coals: Some Quantitative Issues

David A. Tillman, Fuels and Combustion Consultant, USA.....

Advanced Energy Conversion Systems

Massood Ramezan, Leonardo Technologies, Inc.

Advanced Ultra-Supercritical Steam Power Plants

John Marion, ALSTOM Power, Inc., USA; Christophe Frappart, ALSTOM Power Systems SA, France, FRANCE; Frank Kluger, ALSTOM Power Systems GmbH, GERMANY; Michael Sell and Adrian Skea, ALSTOM Power (Switzerland) Ltd., SWITZERLAND; and Rod Vanstone, ALSTOM Power (UK) Ltd., UNITED KINGDOM.....

Modeling Particle Transport Phenomena in Large Scale CFB Boiler

W.P. Adamczyk, R.A. Bialecki, A. Klimanek, P. Kozolub, and G. Węcel, Institute of Thermal Technology, Silesian University of Technology; and M. Klajny, Foster Wheeler Energia Polska Sp., POLAND.....: 69

Direct Liquefaction of Coal-Biomass to Produce a Fully Synthetic Jet Fuel

Ramesh K Sharma, Energy & Environmental Research Center (EERC), USA.....

Development of The Direct Injection Coal Engine Development (DICE)

Louis Wibberley, Advanced Carbon Power, CSIRO Energy Technology, AUSTRALIA.....

Lowering the Cost and Environmental Impact of Direct Coal Liquefaction through Wave Liquefaction™ Technology

James J. Strohm, Benjamin Q. Roberts, Mark D. Bearden, and Tricia D. Smurthwaite, Pacific Northwest National Laboratory, USA; and Alan A. Johnson, H Quest LLC, CANADA.....

The bioliq Entrained Flow Gasifier for Biomass Based Slurry – Design and Operation

Marco Mancini and Roman Weber, Institute of Energy Process Engineering, Clausthal University of Technology; and Peter Weigand, Lurgi; and Alexander Sanger and Thomas Kolb, Karlsruhe Institute of Technology, Institute for Technical Chemistry, GERMANY.....

OHD (Oxidative Hydrothermal Dissolution): A New Conversion Process for Coal and Biomass to Chemicals and Fuels

Francois Botha, Illinois Clean Coal Institute

The Influence of Maceral Composition and Coal Rank on Oxidative Hydrothermal Dissolution (OHD) Processing of Coal

Susan M. Rimmer, Ken B. Anderson, John C. Crelling, William W. Huggett, Mohammad W. Rahman, Vishnu Srinivasaraghavan, Amberly Tobin, and Samuel Howard, Department of Geology, Southern Illinois University, USA.....

Exploring Oxidative Hydrolysis Dissolution (OHD) Reaction Chemistry of Illinois No. 6 Coal with Molecular Modeling Approaches

Jonathan P. Mathews, Vignesh Ramchandran, and Fidel Castro-Marciano, Energy and Mineral Engineering, and the EMS Energy Institute, and Adri, C. T. van Duin, Department of Mechanical and Nuclear Engineering, The

Pennsylvania State University; and Ken Anderson, Department of Geology, Southern Illinois University Carbondale, USA.....

Recovery of Chemicals and Fuels from Coal-Derived Process Streams

Ramesh Sharma, University of North Dakota Energy & Environmental Research Center, USA.....

Oxidative Hydrothermal Dissolution (OHD) Process Engineering Design and Pilot Plant Construction

Derek M. Perry, Ken B. Anderson (Department of Geology, Southern Illinois University Carbondale), and John C. Crelling (Department of Geology, Southern Illinois University Carbondale), Thermaquatica, Inc.; and William W. Huggett, Department of Geology, Southern Illinois University Carbondale, USA.....

Published But Not Presented

Global Climate Change –The Power Generation Mitigation Challenge

Frank Princiotta, Director, Air Pollution and Prevention Division, and Dan Loughlin, Principal Investigator, Atmospheric Protection Branch, APPCD, National Risk Management Development Research Laboratory, ORD, USA.....
