

# **2012 International Conference on 3D Imaging**

**(IC3D 2012)**

**Liege, Belgium  
3 – 5 December 2012**

**IEEE Catalog Number: CFP12IC3-POD  
ISBN: 978-1-4799-1581-1**

# TABLE OF CONTENTS

|                                                                                                                                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Big S Small 3D: What Makes Stereoscopic Video So Compelling?</b> .....                                                                       | 1   |
| <i>Bruce Fitter</i>                                                                                                                             |     |
| <b>Edge-Preserving Depth-Image-Based Rendering Method</b> .....                                                                                 | 6   |
| <i>Suryanarayana M. Muddala, Märten Sjöström, Roger Olsson</i>                                                                                  |     |
| <b>Multiple-Focal-Planes 3D Displays: A Practical Solution to the Vergence-Accommodation Conflict?</b> .....                                    | 11  |
| <i>Louise Ryan, Kevin J. Mackenzie, Simon J. Watt</i>                                                                                           |     |
| <b>Multi-texturing 3D Models: How to Choose the Best Texture?</b> .....                                                                         | 17  |
| <i>Youssef Alj, Guillaume Boisson, Philippe Bordes, Muriel Pressigout, Luce Morin</i>                                                           |     |
| <b>A Bayesian Approach to the Aperture Problem of 3D Motion Perception</b> .....                                                                | 25  |
| <i>Hongfang Wang, Suzanne Heron, James Moreland, Martin Lages</i>                                                                               |     |
| <b>View Synthesis for Lightfield Displays Using Region Based Non-linear Image Warping</b> .....                                                 | 33  |
| <i>Vamsi Kiran Adhikarla, Péter Tamás Kovács, Attila Barsi, Tibor Balogh, Péter Szolgay</i>                                                     |     |
| <b>Human Cortical Responses to Variations of the Interocular Correlation of Binocular Signals</b> .....                                         | 39  |
| <i>Betina Ip, James Dow, Loredana Minini, Andrew Parker, Holly Bridge</i>                                                                       |     |
| <b>Autostereoscopic 3D Video Generation from Stereoscopic Videos Using FPGA and GPU</b> .....                                                   | 46  |
| <i>Hong-Chang Shin, Gi-Mun Um, Chan Kim, Won-Sik Cheong, Namho Hur</i>                                                                          |     |
| <b>Toward an Objective Stereo-Video Quality Metric: Depth Perception of Textured Areas</b> .....                                                | 51  |
| <i>Mikhail Erofeev, Dmitriy Vatolin, Alexander Voronov, Alexey Fedorov</i>                                                                      |     |
| <b>Towards Automatic Stereo-Video Quality Assessment and Detection of Color and Sharpness Mismatch</b> .....                                    | 57  |
| <i>Alexander Voronov, Dmitriy Vatolin, Denis Sumin, Vyacheslav Napadovskiy, Alexey Borisov</i>                                                  |     |
| <b>Preserving Dynamic Range by Advanced Color Histogram Matching in Stereo Vision</b> .....                                                     | 63  |
| <i>Jean-Claude Rosenthal, Frederik Zilly, Peter Kauff</i>                                                                                       |     |
| <b>Adaptation to Alterations of Apparent Distance in Stereoscopic Displays: From Lab to Hyperstereopsis</b> .....                               | 69  |
| <i>Anne-Emmanuelle Priot, Pascaline Neveu, Matthieu Philippe, Corinne Roumes</i>                                                                |     |
| <b>Asymmetric 3D Video Coding Using Regions of Perceptual Relevance</b> .....                                                                   | 76  |
| <i>Luis Pinto, Pedro Assuncao</i>                                                                                                               |     |
| <b>Integral Imaging Using Color Multiplexed Holographic Optical Element</b> .....                                                               | 82  |
| <i>Keehoon Hong, Jiwoon Yeom, ByoungHo Lee</i>                                                                                                  |     |
| <b>Automatic Left-Right Channel Swap Detection</b> .....                                                                                        | 86  |
| <i>Dmitry Akimov, Alexey Shestov, Alexander Voronov, Dmitriy Vatolin</i>                                                                        |     |
| <b>Occlusion Refinement for Stereo Video Using Optical Flow</b> .....                                                                           | 92  |
| <i>Dmitry Akimov, Alexey Shestov, Alexander Voronov, Dmitriy Vatolin</i>                                                                        |     |
| <b>Real Time Believable Stereo and Virtual View Synthesis Engine for Autostereoscopic Display</b> .....                                         | 100 |
| <i>Jiang Wang, Leif Arne Rønningen</i>                                                                                                          |     |
| <b>Depth Map Repairing Using Tensor Voting</b> .....                                                                                            | 106 |
| <i>Mandar Kulkarni</i>                                                                                                                          |     |
| <b>Phase Channel Multiplexing Pattern Strategy for Active Stereo Vision</b> .....                                                               | 112 |
| <i>Kai Liu, Yongchang Wang</i>                                                                                                                  |     |
| <b>A Stereoscopic Content Analysis System with Visual Discomfort-Aware</b> .....                                                                | 120 |
| <i>An-Chun Luo, Wei-Jia Huang, Wen-Chao Chen, Chung-Wei Lin, Sei-Wang Chen</i>                                                                  |     |
| <b>Development of Digital Uncompressed 3D Image Transfer Using DisplayPort™ 1.2 Video Standard for Volumetric 3D Imaging Applications</b> ..... | 128 |
| <i>K. Osmanis, G. Valters, I. Osmanis</i>                                                                                                       |     |
| <b>Real-time Relighting Previews with Virtual Light Fields</b> .....                                                                            | 133 |
| <i>Jeroen Put, Philippe Bekaert</i>                                                                                                             |     |
| <b>2-Manifold Reconstruction from Sparse Visual Features</b> .....                                                                              | 139 |
| <i>Vadim Litvinov, Shuda Yu, Maxime Lhuillier</i>                                                                                               |     |
| <b>Depth Perception and Spatial Presence Experience in Stereoscopic 3D Sports Broadcasts</b> .....                                              | 147 |
| <i>Kathrin Weigelt, Josef Wiemeyer</i>                                                                                                          |     |
| <b>An End-to-End System for Free Viewpoint Video for Smooth Camera Transitions</b> .....                                                        | 153 |
| <i>Patrik Goorts, Maarten Dumont, Sammy Rogmans, Philippe Bekaert</i>                                                                           |     |
| <b>Extraction of the Lateral Resolution in a Plenoptic Camera Using the SPC Model</b> .....                                                     | 160 |
| <i>Mitra Damghanian, Roger Olsson, Märten Sjöström</i>                                                                                          |     |
| <b>Perception of Stereo at Different Vergence Distances: Implications for Realism</b> .....                                                     | 165 |
| <i>Cyril Vienne, Pascal Mamassian, Didier Doyen, Laurent Blondé</i>                                                                             |     |

|                                                                                                                                                                                                      |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Feasibility Study for Visual Discomfort Assessment on Stereo Images Using EEG</b> .....                                                                                                           | 173 |
| <i>Hohyun Cho, Min-Koo Kang, Kuk-Jin Yoon, Sung Chan Jun</i>                                                                                                                                         |     |
| <b>I-See-3D! An Interactive and Immersive System That Dynamically Adapts 2D Projections to the Location of a User’s Eyes</b> .....                                                                   | 179 |
| <i>Sébastien Piérard, Vincent Pierlot, Antoine Lejeune, Marc Van Droogenbroeck</i>                                                                                                                   |     |
| <b>3D Displays and Tracking Devices for Your Browser: A Plugin-free Approach Relying on Web Standards</b> .....                                                                                      | 187 |
| <i>O. Nocent, S. Pötin, A. Benassarou, M. Jaisson, L. Lucas</i>                                                                                                                                      |     |
| <b>Simplified Depth Map Intra Coding with an Optional Depth Lookup Table</b> .....                                                                                                                   | 195 |
| <i>Fabian Jäger</i>                                                                                                                                                                                  |     |
| <b>Projector-Camera Calibration for 3D Reconstruction Using Vanishing Points</b> .....                                                                                                               | 199 |
| <i>Radu Orghidan, Mihaela Gordan, Aurel Vlaicu, Joaquim Salvi</i>                                                                                                                                    |     |
| <b>3-D Biquaternionic Analytic Signal and Application to Envelope Detection in 3-D Ultrasound Imaging</b> .....                                                                                      | 205 |
| <i>Liang Wang, Patrick R. Girard, Adeline Bernard, Zhengjun Liu, Patrick Clarysse, Philippe Delachartre</i>                                                                                          |     |
| <b>Visual Stress Symptoms from Stereoscopic Television</b> .....                                                                                                                                     | 213 |
| <i>Pancée Atallah, Adar Pelah, Arnold Wilkins</i>                                                                                                                                                    |     |
| <b>A Human Visual System-based 3D Video Quality Metric</b> .....                                                                                                                                     | 220 |
| <i>Amin Banitalebi-Dehkordi, Mahsa T. Pourazad, Panos Nasiopoulos</i>                                                                                                                                |     |
