

2013 7th International Workshop on Advanced Ground Penetrating Radar

(IWAGPR 2013)

**Nantes, France
2-5 July 2013**

**IEEE Catalog Number: CFP13538-POD
ISBN: 978-1-4799-0939-1**

**IWAGPR 2013, 7th International Workshop on Advanced Ground Penetrating Radar,
July 2-5, 2013, Nantes, France**

TABLE OF CONTENTS

Special papers	
Applications of Ground Penetrating Radar in Civil Engineering – COST Action TU1208 - <i>Lara Pajewski, Andrea Benedetto, Xavier Derobert, Antonis Giannopoulos, Andreas Loizos, Guido Manacorda, Marian Marciniak, Christina Plati, Giuseppe Schettini and Immo Trinks</i>	3
GPR case history and known physical principles - <i>D. J. Daniels, E. Utsi</i>	9
Modelling	
GPR wave field decomposition, synthesis and imaging for lossless layered vertically transverse isotropic media - <i>Evert Slob and Kees Wapenaar</i>	21
Towards physically-based filtering of the soil surface, antenna and coupling effects from near-field GPR data for improved subsurface imaging - <i>Laurence Mertens, Anh Phuonh Tran and Sébastien Lambot</i>	27
Cylindrical-Wave Approach for Line-Source Electromagnetic Scattering by Buried Dielectric Cylinders - <i>Fabrizio Frezza, Lara Pajewski, Cristina Ponti and Giuseppe Schettini</i>	33
Quantifying GPR transient waveforms in the intermediate zone - <i>Nectaria Diamanti, Peter Annan and David Redman</i>	39
Inversion & Imaging	
3D Characterization of an Aquifer Using Full-Waveform Inversion and Amplitude Analysis - <i>Anja Klotzsche, Jan van der Kruk, Harry Vereecken, Niklas Linde and Joseph Doetsch</i>	49
Full 3-D Electromagnetic Subsurface Imaging using Ground Penetrating Radar - <i>Ilaria Catapano, Antonio Affinito, Lorenzo Crocco, Gianluca Gennarelli and Francesco Soldovieri</i>	53
Topographic migration of GPR data with variable velocities - <i>Niklas Allroggen, Jens Tronicke, Marcel Delock and Urs Böniger</i>	59
Experimental results of a Microwave Tomography approach applied to a Differential Measurement Configuration - <i>Francesco Soldovieri, Raffaele Persico, Ilaria Catapano and Gennadiy Pochanin</i>	65
RASCAN holographic radar for detecting and characterizing dinosaur tracks - <i>Lorenzo Capineri, Timothy Bechtel, Sergey Ivashov, Colin Windsor, Masaharu Inagaki, Vladimir Razevig and Fabiana Zandonai</i>	71
2D full waveform inversion of GPR surface data: permittivity and conductivity imaging.- <i>François Lavoué, Romain Brossier, Ludovic Métivier, Stéphane Garambois and Jean Virieux</i>	77
A comparison of phase-shift and one-port coaxial cell permittivity measurements for GPR applications - <i>Wayne Muller and Xavier Derobert</i>	83
Road inspection using full-wave inversion of far-field ground-penetrating radar data - <i>Mohammad Reza Mahmoudzadeh Ardekani, Jean-Baptiste Got, Colette Grégoire and Sébastien Lambot</i>	89

Processings	
Steering kernel regression: an adaptive denoising tool to process GPR data - <i>Jens Tronicke and Urs Böniger</i>	97
Dual Frequency Data Blending in Real-Time - <i>David Cist and Michael Jeffords</i>	101
Near-subsurface imaging from a multistatic/single frequency scanner - <i>Soufiane Nounouh, Christelle Eyraud, Hervé Tortel and Amélie Litman</i>	107
Time delay and surface roughness estimation by subspace algorithms for pavement survey by radar - <i>Meng Sun, Nicolas Pinel, Cédric Le Bastard, Vincent Baltazart, Amine Ihamouten and Yide Wang</i>	113
GPR and ERT combined analysis on the basis of advanced wavelet methodology: The Montagnole testing area - <i>Leonid Alperovich, Lev Eppelbaum, Valery Zheludev, Jean Dumoulin, Francesco Soldovieri, Monica Proto, Massimo Bavusi and Antonio Loperte</i>	119
A Subspace Leakage Suppression Technique for High Resolution Processing of Dispersive GPR Signals - <i>Khaled Chahine, Vincent Baltazart and Yide Wang</i>	125
Analysis of Time Interpolation for Enhanced Resolution GPR Data - <i>Andrew Strange</i>	131
An Evaluation of the Early-Time GPR Amplitude Technique for Electrical Conductivity Monitoring- <i>Carlotta Ferrara, Davide Comite, Pier Matteo Barone, Sebastian Emanuel Lauro, Elisabetta Mattei, Giuliano Vannaroni, Alessandro Galli and Elena Pettinelli</i>	137
Antennas	
Use End Reflections to Improve the Radiation Efficiency of Bow-Tie Antenna - <i>Jian Wang, Shiping Zhu and Yi Su</i>	143
Design of Receiver with Wide Dynamic Range for Deep Ground Penetrating Radar - <i>Xu Wei, Lu Min and Huang Chunlin</i>	147
Evaluation of an UWB Ground-Coupled Radar in the Detection of Discontinuities Using Polarization Diversity: FDTD Modeling and Experiments - <i>Florence Sagnard, Elias Tebchrany and Vincent Baltazart</i>	153
Intrinsic modeling of radar antennas: from far-field to near-field conditions - <i>Sébastien Lambot, Anh Phuonh Tran and Frédéric André</i>	159
Ultra Wide Band TEM Horn and Reflector Antenna Designs for Down and Forward Looking Ground Penetrating Radars - <i>Ahmet Serdar Turk, Ahmet Kenan Keskin, Mustafa Dagcan Senturk, Abdullah Magat, Mehmet Burak Ozakin and Serkan Aksoy</i>	165
A reconfigurable stepped frequency GPR (GPR-R): the antenna subsystem - <i>Filippo Parrini, Massimiliano Pieraccini, Daniele Mecatti, Devis Dei, Giovanni Macaluso, Alessandro Spinetti, Raffaele Persico and Giovanni Leucci</i>	171
The effect of the height of the GPR antennas on the diffraction curve - <i>Raffaele Persico, Giovanni Leucci and Francesco Soldovieri</i>	177
Sub-millimeter resolution GPR - <i>Vincent Utsi</i>	183

Borehole Antennas	
Singlehole Borehole Radar Measurement with a Thin Directional Borehole Radar Sonde - <i>Satoshi Ebihara, Yuta Kimura, Takaaki Shimomura and Ryota Uchimura</i>	189
A Directional Monostatic Borehole Radar System - <i>Matthias Böger and Albrecht Glasmachers</i>	195
A Robust Phase Unwrapping Method for 3D Borehole Radar Interferometric imaging - <i>Hou Qiang and Pan He Ping</i>	201
Geology	
Analysis of tectonic and karst formations as geological hazard for exploitation of flyschoid rocks by Ground Penetrating Radar, the case of Anhovo-Rodež quarry (W Slovenia) - <i>Marjana Zajc, Željko Pogačnik and Andrej Gosar</i>	207
The Mt. Pollino Fault (southern Apennines, Italy): GPR signature of Holocene earthquakes in a “silent” area - <i>Maurizio Ercoli, Cristina Pauselli, Emanuele Forte, Alessandro Frigeri and Costanzo Federico</i>	213
Ground-penetrating Radar technique to investigate historic eruptions on the Mt. Etna volcano (Sicily, Italy) - <i>Pier Matteo Barone, Carlotta Ferrara, Elisabetta Mattei, Sebastian Emanuel Lauro, Cristina Proietti, Marco Viccaro and Elena Pettinelli</i>	219
Temporal monitoring of the soil freeze-thaw cycles over snow-cover land by using off-ground GPR - <i>Khan Zaib Jadoon, Sebastien Lambot, Marin Dimitrov, Lutz Weihermueller, Davood Moghadas and Harr Vereecken</i>	225

Structures & Pavements	
GPR characterization of water transfers in Tuffeau walls - <i>Amine Ihamouten, Cédric Le Bastard, Nathalie Boutet, Géraldine Villain and Xavier Derobert</i>	231
Effect of penetration of water under pressure in hardened concrete on GPR signals - <i>Rosa Martínez-Sala, Isabel Rodriguez Abad and Isabel Del Val Muedra</i>	237
Soil Moisture Mapping using GPR for Pavement Applications - <i>Andrea Benedetto, Fabio Tosti, Bianca Ortuani, Mauro Giudici and Mauro Mele</i>	243
Non destructive Assessment of Hot Mix Asphalt compaction with a Step Frequency Radar: Case study - <i>Cyrille Fauchard, Bruno Beaucamp and Laurent Laguerre</i>	249
Use of electromagnetic non-destructive techniques for monitoring the chloride ingress into concrete - <i>Géraldine Villain, Raelize Du Plooy, Amine Ihamouten, Sergio Palma-Lopes, Benoit Thauvin and Xavier Dérobert</i>	255
Correlation of internal salt structures with GPR amplitudes - <i>Volker Gundelach, Norbert Blindow, Ulrich Buschmann and Christina Salat</i>	261
Detecting Subsurface Contamination Using Ground Penetrating Radar and Amplitude Variation with Offset Analysis - <i>Esther Babcock and John Bradford</i>	265
Use of radar in road investigation - BRRC experience - <i>Colette Gregoire and Carl Van Geem</i>	271
Applications of a reconfigurable stepped frequency GPR in the Chapel of the Holy Spirit, Lecce (Italy) - <i>Raffaele Persico, Giovanni Leucci, Loredana Matera, Marcello Ciminale, Devis Dei, Filippo Parrini and Massimiliano Pieraccini</i>	277
The discovery of a forgotten vault in the church of Sainte-Mesme (Les Yvelines) - <i>Nerouz Boubaki, Emmanuel Léger and Albane Saintenoy</i>	283
Buried objects	
Holographic Subsurface Radar RASCAN-5 - <i>Andrey Zhuravlev, Sergey Ivashov, Vladimir Razevig, Igor Vasiliev and Alexander Bugaev</i>	289
Radar for vital signs characterization: a comparison between two different frequency band systems - <i>Lesya Anishchenko, Sergey Ivashov, Ilaria Catapano, Lorenzo Crocco, Gianluca Gennarelli and Francesco Soldovieri</i>	295
Advanced Background Subtraction Techniques for the Detection of Buried Landmines - <i>Gebremichael T. Tesfamariam and Abdelhak M. Zoubir</i>	301
A circular survey for 3D Ground Penetrating Radar to map hidden cylinders - <i>Shiping Zhu, Jian Wang, Yi Su and Motoyuki Sato</i>	305
