11th International Conference on
PRESSURE SURGES
Lisbon, Portugal: October 24 – 26 2012

CONTENTS

PROFESSOR VICTOR L STREETER	1
FOREWORD & CONFERENCE DEDICATION	5
JOHN FOX – A TRIBUTE	7
VICTOR L STREETER – THIS IS YOUR LIFE	9
SESSION 1: INDUSTRIAL CASE STUDIES	
Issues related to fluid transients in refurbished and upgraded hydropower schemes	15
<i>A Bergant, J Mazij, Litostraj Power d.o.o., Slovenia; A Anderson, Newcastle University, UK; C Nicolet, Power Vision Engineering Sàrl, Switzerland; U Karadžić, University of Montenegro, Montenegro</i>	
Transient analysis of Cleuson-Dixence power plant and injector closure in the reflection time	27
<i>C Nicolet, Power Vision Engineering Sàrl, Switzerland; G Vullioud, E Weiss, E Bocherens, ANDRITZ Hydro AG, Switzerland; J-D Dayer, O Chène, ALPIQ Suisse SA, Switzerland</i>	
Noise generation and remedies in an emergency makeup water system in a steel plant – a case study	43
<i>P K De, Jadavpur University, India; H M Ramos, Instituto Superior Engenharia, Technical University of Lisbon, Portugal</i>	
SESSION 2: OBSTRUCTIONS, LEAKS AND CONDITION MONITORING	
Use of pressure surge for pipeline condition monitoring	57
<i>A E Vardy, University of Dundee; H Mackenzie, Paradigm Flow Services, Scotland</i>	
Use of pressure surge for unblocking hydrocarbon pipelines	69
<i>H Mackenzie, Paradigm Flow Services; A E Vardy, University of Dundee, Scotland</i>	

Modified inverse transient analysis for leak detection of pressurized pipes	87
<i>A Haghighi, Shahid Chamran University, Iran; D I C Covas, H M Ramos, Instituto Superior Técnico, Technical University of Lisbon, Portugal</i>	
Transient analysis of extended blockages in pipeline systems	101
<i>J Tuck, P J Lee, A Kashima, M Davidson, University of Canterbury, New Zealand; M S Ghidaoui, Hong Kong University of Science and Technology, Hong Kong</i>	
Time dependent area of leaks in MDPE pipes during transient events	113
<i>S Fox, J Boxall, R Collins, University of Sheffield, UK</i>	
Distributed deterioration detection in single pipelines using transient measurements from pressure transducer pairs	127
<i>J Gong, M F Lambert, A R Simpson, A C Zecchin, University of Adelaide, Australia</i>	
 SESSION 3: FUNDAMENTAL APPROACHES	
Keynote Paper:	143
Unsteady gas dynamic engine simulation	
<i>D Thornhill, Queen's University Belfast, Northern Ireland</i>	
Exact computation of waterhammer in a three-reservoir system	161
<i>A S Tijsseling, Eindhoven University of Technology, The Netherlands; A Bergant, Litostroj Power d.o.o., Slovenia</i>	
Simulating water hammer with corrective smoothed particle method	171
<i>Q Hou, A S Tijsseling, Eindhoven University of Technology, The Netherlands; A C H Kruisbrink, The University of Nottingham, UK; A Keramat, Jundi Shapur University of Technology, Iran</i>	
Influence of discretization errors on predicted resonance responses of pipe networks	189
<i>M Shimada, University of Tsukuba, Japan; A Vardy, University of Dundee, Scotland</i>	
Flow assurance study of pressure surge in high-pressure gas-filled pipeline	209
<i>S Vahedi, B Pierre, INTECSEA UK</i>	

SESSION 4: WAVE PROPAGATION

- Keynote Paper:** 227
A. Isebre Moens and D.J. Korteweg: on the speed of propagation of waves in elastic tubes
A S Tijsseling, Eindhoven University of Technology, The Netherlands;
A Anderson, University of Newcastle upon Tyne, UK
- On asymptotic wavefronts in compressible flows** 247
A Vardy, University of Dundee, Scotland
- Acoustic velocity in natural gas-filled systems** 261
B Pierre, INTECSEA, UK; J S Gudmundsson, Norwegian University of Science and Technology, Norway
- Water hammer in multi-liquid pipelines – a numerical model** 277
A G T J Heinsbroek, S van der Zwan, M Tukker, Deltares, The Netherlands;
M Fehrsen, Paterson & Cooke, South Africa

SESSION 5: INDUSTRIAL CASE STUDIES – DISTRIBUTION AND TRANSMISSION

- Field-test validation of a pressure transient model for a water supply pipeline** 291
B Madin, GHD; R Austin, Innovyze, Australia
- Validation of the surge model and lessons learnt from commissioning of the Shuweihat Water Transmission Scheme, UAE** 301
P H Leruth, F Naja, TRANSCO, UAE; I Pothof, Deltares, The Netherlands

SESSION 6: TRANSIENTS IN SYSTEM DESIGN

- Keynote Paper:** 323
The practical aspects of a Hydraulic Transient Analysis: What impact does it really have on engineering design of a system?
F A Locher, L Ireland, Bechtel Systems and Infrastructure Inc.;
J D O'Sullivan, P Cakir Kavcar, Bechtel Oil, Gas, and Chemicals Inc., USA
- Optimization of surge protection for a large water transmission scheme in Abu Dhabi** 335
S van der Zwan, D Rudolph, S H Balkema, Deltares; I W M Pothof, Deltares and University of Technology Delft, The Netherlands; P H Leruth, TRANSCO, UAE
- Advanced surge mitigation design in pipeline systems by integrating the hydraulic transient analysis with a state-of-the-art multi-objective genetic algorithm** 349
Y Tang, M Samad, Bechtel Corporation, USA

The influence of elastic pipe supports and structural damping on water hammer with fluid-structure interaction 365
S Henclik, The Szewalski Institute of Fluid-Flow Machinery of the Polish Academy of Sciences, Poland

Dynamic simulation of swing check valve 381
F Selimovic, M Polster, M Stähle, TUV NORD Sweden AB

SESSION 7 – DAMPING IN UNSTEADY PIPE FLOW

Keynote Paper: 401
Arterial pulse wave haemodynamics
J Alastruey, King's College London; K H Parker, S J Sherwin, Imperial College London, UK

Waterhammer with column separation, fluid-structure interaction and unsteady friction in a viscoelastic pipe 443
*A Keramat, Jundi Shapur University of Technology, Iran;
A S Tijsseling, Eindhoven University of Technology, The Netherlands*

Evaluation of flow resistance in unsteady pipe flow: numerical developments and first experimental results 461
P Leite, D I C Covas, H M Ramos, Instituto Superior Técnico, Universidade Técnica de Lisboa; J Tentúgal Valente, M M Pacheco Figueiredo, Faculdade de Engenharia da Universidade do Porto, Portugal

New approximation of unsteady friction weighting functions 477
K Urbanowicz, West Pomeranian University of Technology, Poland

SESSION 8 – MULTI-PHASE TRANSIENTS

Numerical simulation of condensation induced water hammer (CIWH) with 1D thermalhydraulic codes 495
H Swidersky, S Schiefer, TÜV SÜD Industrie Service GmbH, Germany

Liquid flow and entrapped air behaviours in an experimental set-up using CFD analysis 505
S C Martins, Instituto Superior de Engenharia de Lisboa; N M Martins, H M Ramos, A B Almeida, Instituto Superior Técnico, Technical University of Lisbon, Portugal

The UniBw water hammer test facility 517
S Dirndorfer, H Kulisch, A Malcherek, University of the German Armed Forces (UniBw) Munich, Germany

Measurement and rigid column analysis of expulsion of entrapped air from a horizontal pipe with an exit orifice 527
C S Martin, Georgia Institute of Technology; N Lee, Santa Clara Valley Water District, USA

Rapid filling in pipe systems with column separation 543
A Malekpour, B Karney, University of Toronto, Canada

SESSION 9: SURGE PROTECTION

Surge protection using dipping tube surge vessels and verifying surge components with a transient monitoring system 559
F K Smith, Pipe Tech, Inc.; P R Hollis, Owen and White, Inc.; W Worthington, Pipe Tech International; G Phalempin, Charlotte US; D J Wood, University of Kentucky, USA

Rediscovering the advantages of flywheel protection systems 575
L Hobart, Parsons Brinckerhoff Australia

Investigations on air chambers with vortex throttles 585
F Haakh, M Veit, Zweckverband Landeswasserversorgung; H-B Horlacher, TU Dresden, Germany

Analyzing tube-rupture surge pressures and the effectiveness of mitigation solutions 601
P Cakir Kavcar, J D O'Sullivan, Bechtel Oil, Gas, and Chemicals Inc.; F A Locher, Bechtel Systems and Infrastructure Inc., USA

Venda Nova III surge tanks: physical model studies 617
V Ribeiro, P Pinto, EDP Produção, Portugal; L Bazerque, O Cazaillet, Artelia / Sogreah, France

Innovative air vessel design for long distance water transmission pipelines 639
P H Leruth, TRANSCO, UAE; I Pothof, Deltares, The Netherlands

Air vessel instability 657
P Glover, Peter Glover Consulting Ltd, UK

SESSION 10: MEASURING TRANSIENTS

Modelling errors in flow measurements using the KDP method 667
A Kashima, P J Lee, M Davidson, University of Canterbury, New Zealand; M S Ghidaoui, Hong Kong University of Science and Technology, Hong Kong

Measurement of hydraulic transients in a metal pipe rig: effects of free-air, cavitation and pipe axial-deformation	679
<i>D I C Covas, J Libraga, R Ribeiro, N J G Carriço, H M Ramos, A Betâmio de Almeida, Instituto Superior Técnico, Universidade Técnica de Lisboa, Portugal</i>	
Stress-strain curve of PVC pipe by impact fracture of waterhammer	691
<i>K Ishikawa, Y Kono, K Sugawara, A Haga, K Kato, Y Imaizumi, Tohoku Gakuin University, Japan</i>	
Onset detection of transient waves using a novel experimental data set	707
<i>W J Hampson, R Collins, J B Boxall, S B M Beck, University of Sheffield and Pennine Water Group, UK</i>	
Trapping pressure surges using two valves and feedforward control	721
<i>S Beck, M Lloyd, J Boxall, University of Sheffield, UK</i>	
A selective literature review of methods for measuring the flow rate in pipe transient flows	733
<i>A Kashima, P J Lee, University of Canterbury, New Zealand; M S Ghidaoui, Hong Kong University of Science and Technology, Hong Kong</i>
