

**International Exhibition &  
Conference for Power Electronics,  
Intelligent Motion, Renewable  
Energy and Energy Management  
(PCIM Europe 2013)**

**Nuremburg, Germany  
14 - 16 May 2013**

**Volume 1 of 2**

**ISBN: 978-1-62993-308-5**

## Table of Content PCIM Europe 2013

### Keynotes

|                                                                               |           |
|-------------------------------------------------------------------------------|-----------|
| <b>HVDC – State of the Art and Future Trends .....</b>                        | <b>19</b> |
| Jörg Dorn, Siemens, D                                                         |           |
| <b>Traction Drives, from IGBT Modules to Silicon Carbide Components .....</b> | <b>28</b> |
| Michel Mermet-Guyennet, ALSTOM, F                                             |           |
| <b>High-density Fast-transient Voltage Regulator Module .....</b>             | <b>29</b> |
| Qiang Li, Virginia Polytechnic Institute and State University, USA            |           |

### Wide Band Gap Devices I

|                                                                                                                                                                                                                       |           |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Lateral GaN Transistors – High Density Layout Techniques .....</b>                                                                                                                                                 | <b>30</b> |
| Geoff Haynes, John Roberts, Ahmad Mizan, GaN Systems, Ottawa, CA                                                                                                                                                      |           |
|  <b>Increase Efficiency and Lower System Cost with 100 KHz, 10 kW Silicon Carbide (SiC) Interleaved Boost Circuit Design .....</b> | <b>36</b> |
| Jimmy Liu, Kin Lap Wong, Paul Kierstead, Cree, USA                                                                                                                                                                    |           |
| <b>Breakthrough SiC GTO's Enable Efficient &amp; Compact Next Generation High Voltage Grid Conversion .....</b>                                                                                                       | <b>43</b> |
| Anup Bhalla, Leonid Fursin, John Hostetler, Xueqing Li, Matthew Fox, United Silicon Carbide, USA;<br>Frank Hoffmann, Princeton Power Systems, USA                                                                     |           |
|  <b>Half Bridge Inverter with 600 V GaN Power Switches .....</b>                                                                   | <b>49</b> |
| Radoslava Mitova, Alain Dentella, Miao-Xin Wang, Schneider Electric, F; Rajesh Ghosh,<br>Uday Mhaskar, Schneider Electric, IND; Damir Klikic, Schneider Electric, USA                                                 |           |

### Advanced Power Substrate Materials

|                                                                                                                                                                                                                                   |           |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Comparison of Silicon Nitride DBC and AMB Substrates for Different Applications in Power Electronics .....</b>                                                                                                                 | <b>57</b> |
| Manfred Goetz, Nico Kuhn, Bernd Lehmeier, Andreas Meyer, Ulrich Völler, curamik electronics, D                                                                                                                                    |           |
| <b>Partial Discharge and Dielectric Breakdown Behavior of NiAu-Coated Substrates for Power Semiconductor Modules .....</b>                                                                                                        | <b>66</b> |
| Harald Beyer, Samuel Hartmann, Hamit Duran, ABB Switzerland, CH                                                                                                                                                                   |           |
| <b>Comparison of the Thermal Cycling Capability between Power Modules with DAB and DCB Substrates with Al<sub>2</sub>O<sub>3</sub> Ceramic .....</b>                                                                              | <b>74</b> |
| Tilo Poller, Marco Bohländer, Josef Lutz, Chemnitz University of Technology, D; Bianca Boettge,<br>Fraunhofer IWM, D; Folkhart Grieger, Andreas Lindemann, Otto-von-Guericke-University, D;<br>Heiko Knoll, IXYS Semiconductor, D |           |

|                                                                                                                               |           |
|-------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Improved Thermal Cycling Reliability of Direct Copper Bonded Substrates by Manipulating Metallization Properties .....</b> | <b>81</b> |
| Alexander Roth, KCC Europe, D; JunHee Park, Kyoung-Hun Kang, Eunbok Lee, In-Sig Seog, KCC Corporation, ROK                    |           |

## Motors and Actuators

|                                                                                                                             |            |
|-----------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Design of High-Speed Motors with a High Power Range for use in Future Aircrafts.....</b>                                 | <b>89</b>  |
| Michael Doerbaum, Cornelia Stübig, Peter Juris, Bernd Ponick, University of Hannover, D                                     |            |
| <b>Sensorless Direct Torque Control of Transverse Flux Machines with Hybrid Flux Conduction .....</b>                       | <b>97</b>  |
| Amir Ebrahimi, Florian Dreher, Nejila Parspour, University of Stuttgart, D                                                  |            |
| <b>Balancing Torque Loss and Cogging Reduction at PM Transverse Flux Machines with Segmented Stator Phases .....</b>        | <b>105</b> |
| Florian Dreher, Amir Ebrahimi, Nejila Parspour, University of Stuttgart, D                                                  |            |
| <b>Control Methods with Exactly Linearization for Magnetic Bearing with Multiple Inputs as Example for Grind Ball .....</b> | <b>112</b> |
| Alexander Norbach, University of Bremen, D                                                                                  |            |

## Special Session “Solar Power I”

|                                                                                                                                                    |            |
|----------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Optimization and Comparative Evaluation of Two-Level and Three-Level Voltage-Source Topologies for Three-Phase Photovoltaic Inverters .....</b> | <b>121</b> |
| Julia Pinne, Artjom Gruber, Klaus Rigbers, SMA Solar Technology, D                                                                                 |            |
| <b>SiC-based High Efficiency Bidirectional Battery Converter for Smart PV Residential Systems .....</b>                                            | <b>129</b> |
| Cam Pham, Valeriu-Ciprian Biris, Remus Teodorescu, Tamas Kerekes, Laszlo Mathe, Aalborg University, DK                                             |            |
| <b>A New Topology for Solar Central Inverters with 99.2 % Efficiency .....</b>                                                                     | <b>137</b> |
| Heiko Preckwinkel, Lti Drives, D; Krishna DVMM, Norbert Fröhleke, Joachim Böcker, University of Paderborn, D                                       |            |
| <b>High Efficiency Photovoltaic Power Conditioning System .....</b>                                                                                | <b>145</b> |
| Hosam Sharabash, Krishna DVMM, Norbert Fröhleke, Joachim Böcker, University of Paderborn, D                                                        |            |

## Thermal Management – Heat Sink

|                                                                                                                                               |            |
|-----------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Investigation of an Aluminium-copper Clad Metal Baseplate for Liquid Cooling: Experimental Characterization and Thermal Modeling .....</b> | <b>156</b> |
| Matt Reeves, Jesus Moreno, Peter Beucher, Sy-Jenq Loong and David Bono, Wolverine Tube, USA                                                   |            |
| <b>Aluminum Heat Sink Having an Integrated Copper Heat Spreading Structure for IGBT Attachment .....</b>                                      | <b>162</b> |
| Ralph Remsburg, Amulair Thermal Technology, USA                                                                                               |            |
| <b>Two-Phase Roll-Bond Heat Sink for Power Electronics Cooling .....</b>                                                                      | <b>171</b> |
| Francesco Agostini, Thomas Gradinger, ABB Switzerland, CH                                                                                     |            |
| <b>Geometry, Shape and Accelerated Aging Impact on Heat Sinks Made out of Metal-diamond Composite .....</b>                                   | <b>179</b> |
| Michael Kitzmantel, Erich Neubauer, RHP-Technology, A                                                                                         |            |

## Power Module Design I

|                                                                                                                                                                    |            |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Implementation of Low Inductive Strip Line Concept for Symmetric Switching in a New High Power Module .....</b>                                                 | <b>185</b> |
| Georg Borghoff, Infineon Technologies, D                                                                                                                           |            |
| <b>Fast Switching Behavior of IGBTs with High Inductance and Capacitive Loads .....</b>                                                                            | <b>192</b> |
| Christian Müller, Nils Kerstin, Infineon Technologies, D; Benno Weis, Hubert Schierling, Siemens, D                                                                |            |
|  <b>Ultra-Low-Inductance Power Module for Fast Switching Semiconductors .....</b> | <b>198</b> |
| Eckart Hoene, Andreas Ostmann, Binh The Lai, Christoph Marczok, Fraunhofer IZM, D;<br>Andreas Müsing, Johann Walter Kolar, ETH Zürich, CH                          |            |

## Passive Components and New Materials

|                                                                                                                         |            |
|-------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Increasing the Life of Electrolytic Capacitor Banks Using Integrated High Performance Film Capacitors .....</b>      | <b>206</b> |
| Edward Sawyer, Michael Brubaker, Dayana El Hage, Terry Hosking, H. Kirbie, SBE, USA                                     |            |
| <b>Glasses and Glass Ceramics as Dielectrics for High Power Capacitors.....</b>                                         | <b>214</b> |
| Martin Letz, Schott, D                                                                                                  |            |
| <b>Design of a Transformer with Integrated Current Doubler for an Automotive On-Board Power Supply .....</b>            | <b>215</b> |
| Thiemo Kleeb, Daniel Gottschalk, Florian Fenske, Peter Zacharias, University of Kassel, D                               |            |
| <b>Design of Thermally Integrated Planar Inductors Utilising Aluminium Oxide as a Winding Insulation Material .....</b> | <b>223</b> |
| David Hewitt, David Stone, Martin Foster, University of Sheffield, UK                                                   |            |

## Control Techniques in Intelligent Motion Systems

|                                                                                                                                                                                                                                                     |            |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
|  <b>Simple Strategy of Overmodulation in Control of Interior Permanent Magnet Synchronous Machines for Improving Efficiency in Automotive Applications .....</b> | <b>231</b> |

## Power Quality Solutions

**Power Infrastructure for High-Efficiency IT Installations** ..... 279  
Lorenzo Giuntini, General Electric Consumer & Industrial, CH; Enrico Blondel, Swisscom, CH

**Novel Active Damping Scheme for LCL Filters of Grid Converters with Optimal Pole Placement by Proportional Capacitor Current Feedback** ..... 287  
Martin Wagner, Tobias Barth, Rodrigo Alvarez, Steffen Bernet, Technical University of Dresden, D

**Novel Inductive Current Splitter/Merger for Low Harmonics Three-Phase Rectifiers**..... 295  
Andrzej Pietkiewicz, Schaffner Group, CH; Kurt Schenk, Tobias Gnos, Martin Bünner, Interstate UAS of Technology Buchs, CH

## Wide Band Gap Devices II

**Influence of Parasitic Inductances on the Switching Behavior of SiC JFET** ..... 303  
Tobias Appel, Hans-Günter Eckel, University of Rostock, D

**Gate-Drive Considerations for Silicon Carbide FET-Based Half-Bridge Circuits** ..... 311  
Andrew Lemmon, Michael Mazzola, James Gafford, Christopher Parker, Mississippi State University, USA

**Switching Characteristics of 200 V Normally-off GaN HEMTs** ..... 319  
Sibylle Dieckerhoff, Nasser Badawi, Berlin University of Technology, D; Oliver Hilt, Eldad Bahat-Treidel, Hans-Joachim Würfl, Ferdinand-Braun-Institute of Berlin, D

**Low Loss, High Current SiC MOSFET Module** ..... 325  
Masashi Hayashiguchi, Mineo Miura, Kenji Hayashi, Nobuhiro Hase, Kazuhide Ino, ROHM, J

**Diode-Free Synchronous Rectification Using a SiC Trench JFET** ..... 333  
Michael Mazzola, Robin Schrader, James Gafford, Mississippi State University, USA

## Power Semiconductors Switches I

**The Next Generation 6500 V BIGT HiPak Modules** ..... 337  
Liutauras Storasta, Arnost Kopta, Munaf Rahimo, Charalampos Papadopoulos, Silvan Geissmann, Raffael Schnell, ABB Switzerland, CH

**New 3.3 kV IGBT Module with Low Power Loss and High Current Ratings** ..... 345  
Katsunori Azuma, Akitoyo Konno, Isamu Yoshida, Yasushi Toyoda, Katsuaki Saito, Hitachi, J

**Optimized Buffer Layer for the High Performance and Enhanced Short Circuit Immunity of Trench IGBT** ..... 351  
Kyu-Hyun Lee, Young Chul Kim, Kyung Suk Park, Bong Yong Lee, Young Chul Choi, Fairchild Semiconductor, ROK

**Next Step Towards Higher Power Density with New IGBT and Diode Generation and Influence on Inverter Design** ..... 357  
Alexander Ciliox, Klaus Vogel, Franz-Josef Niedernostheide, Andreas Haertl, Infineon Technologies, D

## Special Session “E-Mobility Charging Systems”

|                                                                                                                                         |            |

**Novel Approach to Describe the Material Functions of the Hodgdon Model to Match the Hysteresis Behavior of Silicon Iron 6.5 % ..... 1217**  
Anne-Christine Leicht, Janina Fischer, Manfred Albach, University of Erlangen-Nuremberg, D

**Novel Low-Cost Closed-Loop Compensated Current Transducer with Enhanced Performance .... 1224**  
Diego Gutierrez, Cyprien Brun, LEM Switzerland SA, CH

**Waveforms, Current Sensors and their Bandwidth in Power Electronics ..... 1231**  
Nicolas Karrer, ETH, CH; Boris Hudoffsky, University of Stuttgart, D

**Algorithm for Indirect Load Recognition in Domestic Power Consumption ..... 1241**  
Nikolai Nikolaev, Angel Marinov, Yulian Rangelov, Technical University of Varna, BG

**Automated EMI Measurement Set-up Comprising CM and DM Measurements with a Modified LISN ..... 1247**  
Juergen Stahl, Erika Stenglein, Manfred Albach, University of Erlangen-Nuremburg, D

## Drive and Protection

**New System Partitioning for Safe Automotive Inverters ..... 1253**  
Laurent Beurenaut, Klaus Scheibert, Infineon Technologies, D

**Active Gate Driver for New Generation of High Power IGBTs: Nice to have or a Must? ..... 1259**  
Veljko Palija, Petar Grbovic, Huawei Technologies, D

**A New High Voltage Half Bridge Driver IC Concept for Consumer Electronics and Home Appliances ..... 1268**  
Wolfgang Frank, Viktor Boguszewicz, Rolf Buckhorst, Infineon Technologies, D

**On Designing Robust and High Bandwidth Digital Current Controllers for SiC and GaN Inverters ..... 1274**  
Jens Krah, Heiko Schmirgel, Cologne University of Applied Science, D

**Digital Multiphase Constant-on Time Regulator Based on Voltage Controlled Oscillator ..... 1284**  
Osvaldo Zambetti, Daniele Giorgetti, Alessandro Zafarana, STMicroelectronics, I

## Converters I

**A Review of the Series Resonant Converter Operating in the Capacitive Side of the Resonant Curve in Domestic Induction Heating Application ..... 1292**  
Cesare Bocchiola, Jorge Cerezo, International Rectifier, I

**Increasing of the Utilization of the DC-Voltage of the Three Phase Four Leg Inverter ..... 1300**  
Ismael Shakra, Thomas Ellinger, Ilmenau University of Technology, D

**Optimal Control Tuning of Grid Connected Voltage Source Converters using a Multi-Objective Genetic Algorithm ..... 1308**  
Rodrigo Teixeira Pinto, Sílvia Fragoso Rodrigues, Pavol Bauer, Delft University of Technology, NL;  
Jan Pierik, ECN, NL

**Design of Interleaved Power Converters under Volume, Efficiency and Thermal Constraints ..... 1316**  
Mahraz Bendali, Cherif Larouci, Toufik Azib, ESTACA Engineer School, F; Claude Marchand, University of Paris, F; Gerard Coquery, The French Institute of Science and Technology for Transport, Development and Networks, F

**A Novel Digital Control System for Direct Paralleling Power Supplies ..... 1324**  
Qingyi Huang, Renjian Xie, Yingyang Ou, Analog Devices, CN

**PFC Topology Selection and Design for Professional Applications ..... 1332**  
Stefan Schmitt, Jens Marten, BLOCK Transformatoren-Elektronik, D
