

2013 World Congress on Computer and Information Technology

(WCCIT 2013)

**Sousse, Tunisia
22-24 June 2013**

**IEEE Catalog Number: CFP13WTC-POD
ISBN: 978-1-4799-0461-7**

S/N	Paper Title
1	"Novel Intelligent Teaching and Learning Systems for supporting collaborative instructional provision across multiple dispersed sites"
2	A Distributed Localization Protocol for Wireless Sensor Networks
3	A fast and accurate eyelids and eyelashes detection approach for iris segmentation
4	A Framework for Integration of Knowledge and Innovation Processes
5	A Hybrid MLPNN/HMM Recognition System for Online Arabic Handwritten Script
6	A Managerial Issues-aware Cost Estimation of Enterprise Security Projects
7	A New Analytical Model of Variable Reluctance Machine Coupled to GA for an Optimal Design
8	A Novel Method for Minimizing Data Overheads in Store and Forward Networks
9	A Novel Scheme for On-demand Distribution of Secure Element Keys
10	A NOVEL SIGNATURE VERIFICATION AND AUTHENTICATION SYSTEM USING IMAGE TRANSFORMATIONS AND ARTIFICIAL NEURAL NETWORK
11	A Priori methods for Fault Tolerance in Wireless Sensor Networks
12	A Review of Concepts and Methods for Wind Turbines Condition Monitoring
13	A survey on some measurement methods for subjective video quality assessment
14	About Multicopters and Other Smart Devices for Environmental Monitoring
15	About the Development of Scenarios for Mobile Web Service Provisioning
16	Adaptive Authentication: Issues and Challenges
17	Adaptive cross-device videoconferencing solution for wireless networks based on QoS monitoring
18	Adaptive Replica-Management and Concurrency- Control Protocols for Indexes in Page-Server DBMS
19	Agent technology based resources management in Cloud Computing
20	An Agent-Based Personal Assistant for Exam Scheduling
21	An Efficient Digital Video Recording Scheme for Intelligent Transportation Systems
22	An extension of PROMETHEE with Evidential Evaluations
23	An integrated development environment to establish web services in grid computing Using .NET Framework 4.5 and Visual Basic 2012
24	An Intrusion Detection Approach by Behavior Specification
25	An intrusion tolerant transaction management model for Wireless Storage Area Networks
26	Analysis of Parallel Redundant WLAN with Timing Diversity
27	Approach for Capitalization knowledge in the context of S-maintenance platform
28	Arabic Script Based Character Segmentation: A review
29	Arabic Script Based Language Character Recognition: Nasta'liq vs Naskh Analysis
30	Arabic Text Categorization Using SVM Active Learning Technique : An Overview

S/N	Paper Title
31	Arabic text to speech synthesis based on neural networks for MFCC estimation
32	Automatic Speechreading Using Genetic Hybridization of Hidden Markov Models
33	Basic Structural change in Vehicular Adhoc Networks
34	Bayesian information extraction network for Medline abstract
35	Billing Model with Discount Incentive in a P2P-Cloud Multimedia Streaming System
36	Biometric Secret Path for Mobile User Authentication: A Preliminary Study
37	Bridge Implementation Between IP Network And GSM Network
38	Case of study: Identity Theft in a University WLAN Evil Twin and cloned authentication web interface
39	Color Satellite Image Compression Using The Evidence Theory And Huffman Coding
40	Comparative Study of Game Theoretic Approaches in Distributed System
41	Comparative Study of Spectrum Sensing Techniques in Cognitive Radio Networks
42	Concurrent Multidimensional Index Algorithms in Page-Server DBMS
43	Cone of influence and constants propagation reduction techniques for MDG model checker
44	Content extraction of Quran Interpretation (Tafseer) Books for Digital Content Creation and Distribution
45	Context-Aware Handover for Voice and Video Applications in WiMax/WiFi
46	Contribution to enhance IPSec security by a safe and efficient internet key exchange protocol
47	Control of an industrial robot using Ethernet Application to a V+ running controller
48	Control Platform for radiotherapy Services
49	Convergence of hybrid algorithm with adaptive learning parameter for multilayer neural network
50	Conversational QoS Comparison Between WiMAX and UMTS
51	Creating An Innovative Generic Virtual Learning Lab
52	Design and Application of Academic Frontier-based Approach in Engineering Courses
53	Design of NoC router with flow control mechanism for congestion avoidance
54	Design of Sliding Mode Control of Nonlinear System Based on Takagi-Sugeno Fuzzy Model
55	Design principles for a Dedicated Web-based Collaboration Infrastructure for Research Publications and Resources
56	Development of the New Neuroglial Approach: Application on Singularly Perturbed Systems
57	Diagnosis of masses in mammographic images based on Zernike moments and Local Binary attributes
58	Dramaturgical perspective of online personal branding
59	Dynamic Context-aware Adaptation of Mobile Phone incoming Call Indication Using Context Similarity
60	Efficiently Mining Community Structures in Oriented Social networks

S/N	Paper Title
61	Enhancement and Simulation of the IEEE 802.11 RTS/CTS Scheme under Noisy Channel
62	Exact and Like String Matching Algorithm for Web and Network Security
63	Explanation Language Syntax for Multi-Agent Systems
64	Exploiting Asynchronous Invariance For Resistant Encrypted Watermark Embedded In Radon Field
65	Exploring the Adoption of Online Discussion Forums for knowledge Sharing and Social Relations among Virtual Communities
66	Extraction of Drug-disease relations from MEDLINE Abstracts
67	Fuzzy expert system for decision making in PCMA
68	Gossiping with Probabilistic Selection for routing in wireless sensor networks
69	Hardware/Software Prototyping of Dependable Real-Time System for Elderly Health Monitoring
70	Hierarchical Energy Efficient Intrusion Detection System for Black Hole Attacks in WSNs
71	How to Build Your Own Digital Signature in Your Web Site
72	Implementation of a Pulse Mode RBFNN with On-chip Learning Based Edge Detection System
73	Improve the Performance of LTE System Using HARQ with MISO Technique
74	Improve the Plastic Market Efficiency by Using Consortium and Negotiation Agents for Small and Medium Enterprises
75	Incorporating Lab Experience Into Computer Security Courses
76	Incorporating Proactivity to Context-Aware Recommender Systems for E-Learning
77	Increasing RAID-5 performance improving the scaling approaches
78	Incremental general regression with expectation maximization for learning finite mixtures using data with missing values
79	Infinity Printer
80	Initial trust toward an unknown website
81	iSCAPS – Innovative Smart Car Park System integrated with NFC technology and e-Valet function
82	IT as a Service Broker for E-Learning Systems
83	Leading Automation Instructor Systems
84	Management of uncertainty in videosurveillance using fuzzy expert system
85	Mapping Quality of Service Classes between UMTS, WiMAX and DiffServ/MPLS Networks
86	Mobile and Wi-Fi Geo location Using Google Latitude
87	Multi-hop Routing Protocol for Mobile Wireless Sensor Networks
88	Multilingual Learning Objects Indexing and Retrieving Based on Ontologies
89	Multi-view Image Compression for Visual Sensor Networks (VSNs)
90	New parallel algorithms for finding determinants of NxN matrices

S/N	Paper Title
91	Novel scheme for labeling XML trees based on bits-masking and logical matching
92	Object detection based on HOG features: Faces and dual-eyes augmented reality
93	ON-BOARD SATELLITE IMAGE COMPRESSION USING THE FOURIER TRANSFORM AND HUFFMAN CODING
94	Online K-means based Heuristic for the Dynamic Pickup and Delivery Problem solving
95	Online user's registration respecting privacy
96	Overcoming ICT Project Failures – a Practical Perspective
97	Parallelization of KMP String Matching Algorithm
98	Performance Evaluation of QoE in VoIP Traffic under Fading Channels
99	Performance study of quantization methods (k-means, GMM) for isolated arabic word based on DHMM
100	Performances improvement of back propagation algorithm applied to a lane following system
101	PID Control based on Modified Particle Swarm Optimization for Nonlinear Process
102	Preference-Based Semantic Matching of Web Service Security Policies
103	Proposing a Hybrid Protocol for Secure Wireless Networks based on Signcryption scheme
104	QoS Management Method for W-LAN Network Considering Hidden Node Issue
105	QoS Testing and Symbolic Techniques for Composite Web Service
106	Quadrotor Helicopter with Tilting Rotors: Modeling and Simulation
107	Quantum Observable
108	RAMOLI: a generic knowledge-based systems shell for symbolic data
109	Remote and Deep Attestations To Mitigate Threats in Cloud Mash-up Services
110	Research Line on Improving Energy Efficiency in Web Servers
111	Scalability on routing data in wireless sensor network: using mobile node
112	Security and Performance Evaluation Platform of Biometric Match On Card
113	Security Protocol Architecture for Website authentications and Content Integrity
114	Semi-Supervised clustering and Local Scale Learning algorithm
115	Semi-Supervised Relational Fuzzy clustering with Local Distance Measure Learning
116	Silicon Eyes: GPS-GSM based Navigation Assistant for Visually Impaired using Capacitive Touch Braille Keypad and Smart SMS Facility
117	Similarity Analysis of Histopathology Cell Structures using Fuzzy Rough Sets
118	Sliding Mode Control of a Field Oriented Induction Motor Using Xilinx System Generator
119	Smart mobile system for health parameters follow ship Based on WSN and Android
120	Spectral Efficiency of Linear Multiuser Receiver over UWB High Data Rate Channel based on Channel Division Multiple Access

S/N	Paper Title
121	Speech separation using DUET and binary masking with temporal smoothing in cepstral domain
122	Speed Control of Linear Switched Reluctance Motor
123	SVC Video Streaming over Cooperative LTE/802.11p Vehicle-to-Infrastructure Communications
124	System-Level Design Space Exploration for Heterogeneous Parallel Dedicated Systems
125	Test and diagnosis of wireless sensor networks applications
126	Text categorization using Copula Function: An Overview
127	Text Clustering Using Statistical and Semantic Data
128	The Effect of Malaysian Customer Characteristics on Intention to Adopt Edutainment Services in Digital Home
129	Towards a novel graphical editor for modeling Learning scenarios
130	Use of NLPCA for Sensors Fault Detection and Localization Applied at WTP
131	Using a Mapping Knowledge Base in a System for (semi-)automatic Loading of XML Data into Relational Databases
132	Using Network calculus for analysing wired-wireless Network on chip
133	Using Transitive Construction for developing Arabic Text Summarization System
134	Watermarking and Encryption Scheme to Secure Multimedia Information
