# INDEX

<u>Category</u>	<u>Pages</u>
Preface	1
Guest Speaker - David Brice	3
Commercialisation of Geopolymer Concrete in Australia	5 – 12
Cellulose Fibres in Fibre Cement	13
Pre-Treatment Effects on Hydration Behaviour of Cement Bonded Boards Made from Eremospatha Macrocarpa and Laccosperma Secundiflorum Canes By Olufemi Adefisan	15 – 24
Mechanical Performance of Cement Mortar Composites Reinforced with Nano and Micro-Scale Cellulose Fibers By Monica Adanuy	25 – 31
Mechanical and Thermal Properties of Hemp Concretes By Laurent Arnaud	33 – 40
The Impact of Hemp Shiv on Cement Setting and Hardening: The Influence of Extracts and Study of the Interface By Youen Diquelou	41 – 50
Nature and Performance of Tropical Wood Natural Fibre Cementitious Composites By Mizi Fan	51 – 63
Performance of Cotton Rag Pulp in Fiber Cement Sheets By Jagadesh Sunku	65 – 69
Cement	71
Portland Cement Modifications and their Impacts on the Fibre Cement Industry By Christoph Haering	73 – 79
The Feasibility Study of Using Alternative or Partial Alternative of Ordinary Portland Cement (OPC) in Autoclaved Fiber Cement Board Manufacturing as a Green Approach By Kok Peng Yam	81 – 92
Cement Bonded Particle Board	93
Physico-Mechanical Properties of Cement Bonded Board from Mixture of Agro-waste By Ajayi Babatunde	95 – 101
Beetlecrete – An Attractive Solution to Mountain Pine Beetle Epidemic By Sorin Pasca	103 – 110

<b>Curing</b>	111
The Hydration of Cement in the Presence of Wood and Various Additives By Daisy Biswas	113 – 121
Influence of Al Compound and Gypsum Addition on Tobermorite Formation in Hydrothermally Treated Cement-Based Materials Studied by Insitu X-Ray Diffraction By Kunio Matsui	123 – 129
Effect of Supercritical Carbonation Curing on Extruded Vegetable Fibre – Cement By Sérgio Francisco Santos	131 – 140
<b>Market</b>	141
Overview of Lignocellulosic Cement Composites in Turkey By Eyyüp Karaogul	143 - 151
<b>New Materials</b>	153
Potential Use of Polyethylene Terephthalate (PET) Fibres in Fibre Cement Composite Materials By Stephen Akers	155 – 164
Study of the Properties and Application of PVA Fibre Modified Crack-Resistant Cement By Kangning Hu	165 – 169
Application of Microsilica in Autoclaved Products By Lin Zhen	171 - 178
<b>Performance</b>	179
Development of Hybrid Fibre – Cement Corrugated Sheets: A Case study of Edge Cracks By Juliano Fiorelli	181 – 187
Durability Evaluation of Cementitious Boards with Peanut Husks By Mariana Gatani	189 – 198
Use of Silicone Resin as Integral Water Repellent for Mortar and Fibre Reinforced Cement Boards (FRC) By Jean-Paul Lecomte	199 – 210
Fibre Cement: A Perfectly Recyclable Building Material By Luc Van Der Hayden	211 – 225
<b>Process</b>	227
Comparison of Hatschek and Flow-On Board Machines By Thomas Blau	229 – 236
Permeability Measurements – New Contribution to Flocculants Selection in Non-Asbestos Fibre Cement Hatschek Process By Sergio Ikai	237 – 243
The Study of PVA Reinforced Extrusion Products By Shinya Inada	245 – 253
Dual Flocculant Selection in the Fiber Cement Process By Robert Winter	255 - 263
