SMTA/ iNEMI Medical Electronics Symposium
November 12 – 13, 2013
Milpitas, California

Day 1 – November 12

Session 1: Reliability Manufacturing

Addressing the More Than Moore Reliability Challenges From Within The OEM Community For Medical Implants 1

Erik Jung, Fraunhofer IZM

Establishing Effective Accelerated Testing Conditions and Criteria for Confirming Medical Electronics Reliability for High Density Interconnect Circuits 15

Don Banks, St. Jude Medical

Co-authors: Rema Nair, St. Jude Medical and Bill Birch, PWB

Designing More Reliable Medical Products 25

Mike Silverman, Ops A LA Carte

Session 2: Miniaturization

Flex-Based Embedded Die Packaging: 3D System in Packages for Medical Electronics Miniaturization 44

Ted Tessier, FlipChip International

How Small Can It Be? 59

Markus Wille, Schoeller Electronics

Electronic Modules for Medical Applications – Miniaturization and Functionalization of a Printed Circuit Board 67

Alexander Kasper, AT&S AG

Wireless Communication & Charging Platform for Solid State Batteries in Miniature Implantable Medical Devices 87

Andrew Kelly, Cactus Semiconductor Inc.

Session 3: Cleaning

How Component Cleanliness is Affecting Field Performance of No-Clean High Reliability Products 102

Terry Munson, Foresite

Design Rules for Cleaning Medical Electronics Circuitry 118

Dale Lee, Plexus Corporation

Reliability Requirements for Class 3 Medical Assemblies 162

Ravi Parthasarathy, M.S.Chem.Eng., ZESTRON America

Session 4: Reliability Design

Simplify Selection and Improve Reliability Of Small Form Factor Resistors, Capacitors And Magnetics Used In Medical Devices 196

Pat Gormally, Vishay

Co-authors: Jared Adsero- Vishay Inductors, Jason Petheram- Vishay Inductors and Molly Olver, Vishay Thin Film Resistors

Medical Device Substrate Reliability 218
Hans-Peter Klein, Dyconex AG

Shock Resistant and Thermally Reliable Low Ag SAC Solder Doped With Mn for Portable Medical Devices 226
Ning-Cheng Lee, Indium Corporation

Day 2 – November 13

Session 5: Emerging Technologies

Using Nanocoatings: Opportunities & Challenges for Medical Devices 235
Cheryl Tulkoff, DfR Solutions

Winning with Emerging Medical Technologies 253
Bruce Kline, Mayo Clinic Ventures

Exploration of Additive Manufacturing to Medical Device Electronics 264
Steve Crynock, GE Research

Statistical Process Control (SPC) and Predictive Analytics 265
Celeste Fralick, Intel Corporation

Session 6: Trends 1

Tin Whiskers: Causes, Risks and Mitigation 266
Ron Lasky, Ph.D., Indium Corporation

RoHS2 Data: A Much Needed Solution for the Medical Industry Going Forward 280
Tierney Powers, SiliconExpert

Qualification Methods for Portable Medical Devices 289
Grady White, NIST

Session 7: Trends 2

Key Strategies for Medical Microelectronics 305
Fred Sporon-Fielder, Micro Systems Engineering, an MST Company

Engineering Development Solutions Using a Global Engineering Team 314
Scott Gleason, Plexus Engineering Solutions

Outsourcing Trends for Medical Products 328
Gelston Howell, Sanmina Corporation

Evolving Role of EMS Providers in the Medical Industry 329
Kiran Unni, Frost & Sullivan
