

# **Selected Papers from the Deep Sea Offshore Wind R&D Conference (DeepWind'2013)**

**Energy Procedia Volume 35**

**Trondheim, Norway  
24-25 January 2013**

**Editors:**

**John Olav Giæver Tande  
Trond Kvamsdal  
Michael Muskulus**

**ISBN: 978-1-62993-569-0**

**Printed from e-media with permission by:**

# TABLE OF CONTENTS

|                                                                                                                                     |            |
|-------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Editorial.....</b>                                                                                                               | <b>1</b>   |
| <b>Geometric Scaling Effects of Bend-twist Coupling in Rotor Blades.....</b>                                                        | <b>2</b>   |
| <i>Kevin Cox, Andreas Echtermeyer</i>                                                                                               |            |
| <b>Laboratory Verification of the Modular Converter for a 100kV DC Transformerless Offshore Wind Turbine Solution.....</b>          | <b>12</b>  |
| <i>Sverre Skalleberg Gjerde, Kjell Ljøkelsøy, Tore M. Undeland</i>                                                                  |            |
| <b>Design Optimization of a 5 MW Floating Offshore Vertical-Axis Wind Turbine.....</b>                                              | <b>22</b>  |
| <i>Uwe Schmidt Paulsen, Helge Aagård Madsen, Jesper Henri Hattel, Ismet Baran, Per Hørlyck Nielsen</i>                              |            |
| <b>Control System for Start-up and Shut-down of a Floating Vertical Axis Wind Turbine.....</b>                                      | <b>33</b>  |
| <i>Harald G. Svendsen, Karl O. Merz</i>                                                                                             |            |
| <b>Towards the Fully-coupled Numerical Modelling of Floating Wind Turbines.....</b>                                                 | <b>43</b>  |
| <i>Axelle Viré, Jiansheng Xiang, Matthew Piggott, Colin Cotter, Christopher Pain</i>                                                |            |
| <b>High-power Generators for Offshore Wind Turbines.....</b>                                                                        | <b>52</b>  |
| <i>Z. Zhang, A. Chen, A. Matveev, R. Nilssen, A. Nysveen</i>                                                                        |            |
| <b>Frequency Quality in the Nordic Power System: Wind Variability, Hydro Power Pump Storage and Usage of HVDC Links.....</b>        | <b>62</b>  |
| <i>A. G. Endegnanew, H. Farahmand, D. Huertas-Hernando</i>                                                                          |            |
| <b>Coordinated Control for Wind Turbine and VSC-HVDC Transmission to Enhance FRT Capability.....</b>                                | <b>69</b>  |
| <i>Antonio Luque, Olimpo Anaya-Lara, William Leithead, Grain P. Adam</i>                                                            |            |
| <b>Analysis of Grid Faults in Offshore Wind Farm with HVDC Connection.....</b>                                                      | <b>81</b>  |
| <i>Jorun I. Marvik, Harald G. Svendsen</i>                                                                                          |            |
| <b>North Sea Offshore Modelling Schemes with VSC-HVDC Technology: Control and Dynamic Performance Assessment.....</b>               | <b>91</b>  |
| <i>K. Nieradzinska, J. C. Nambo, G. P. Adam, G. Kalcon, R. Peña-Gallardo, O. Anaya-Lara, W. Leithead</i>                            |            |
| <b>Wave-induced Characteristics of Atmospheric Turbulence Flux Measurements.....</b>                                                | <b>102</b> |
| <i>Mostafa Bakhoday Paskyabi, Martin Flügge, James B. Edson, Joachim Reuder</i>                                                     |            |
| <b>Perturbation in the Atmospheric Acoustic Field from a Large Offshore Wind Farm in the Presence of Surface Gravity Waves.....</b> | <b>113</b> |
| <i>Mostafa Bakhoday Paskyabi</i>                                                                                                    |            |
| <b>Experimental Characterization of the Marine Atmospheric Boundary Layer in the Havsul Area, Norway.....</b>                       | <b>121</b> |
| <i>Konstantinos Christakos, Joachim Reuder, Birgitte R. Furevik</i>                                                                 |            |
| <b>Preliminary Results of the NORCOWE Direct Covariance Flux System for Ship based Measurements.....</b>                            | <b>128</b> |
| <i>Martin Flügge, Joachim Reuder</i>                                                                                                |            |
| <b>A Multivariate Markov Weather Model for O&amp;M Simulation of Offshore Wind Parks.....</b>                                       | <b>137</b> |
| <i>Brede Hagen, Ingve Simonsen, Matthias Hofmann, Michael Muskulus</i>                                                              |            |
| <b>A Method for Wave Driven Wind Simulations with CFD.....</b>                                                                      | <b>148</b> |
| <i>Siri M. Kalvig, Eirik Manger, Richard Kverneland</i>                                                                             |            |
| <b>Development of a Combined Operational and Strategic Decision Support Model for Offshore Wind.....</b>                            | <b>157</b> |
| <i>Iain Dinwoodie, David McMillan, Matthew Revie, Iraklis Lazakis, Yalcin Dalgic</i>                                                |            |
| <b>Vessel Fleet Analysis for Maintenance Operations at Offshore Wind Farms.....</b>                                                 | <b>167</b> |
| <i>Elin E. Halvorsen-Weare, Christian Gundegjerde, Ina B. Halvorsen, Lars Magnus Hvattum, Lars Magne Nonås</i>                      |            |
| <b>NOWIcob – A Tool for Reducing the Maintenance Costs of Offshore Wind Farms.....</b>                                              | <b>177</b> |
| <i>Matthias Hofmann, Iver Bakken Sperstad</i>                                                                                       |            |
| <b>Long-term Analysis of Gear Loads in Fixed Offshore Wind Turbines Considering Ultimate Operational Loadings.....</b>              | <b>187</b> |
| <i>Amir R. Nejad, Zhen Gao, Torgeir Moan</i>                                                                                        |            |
| <b>Deep Offshore and New Foundation Concepts.....</b>                                                                               | <b>198</b> |
| <i>Arapogianni Athanasia, Anne Benedicte Genachte</i>                                                                               |            |
| <b>Dynamic Analysis of Floating Wind Turbines During Pitch Actuator Fault, Grid Loss, and Shutdown.....</b>                         | <b>210</b> |
| <i>Erin E. Bachynski, Mahmoud Etemaddar, Marit I. Kvittem, Chenyu Luan, Torgeir Moan</i>                                            |            |
| <b>Use of a Wave Energy Converter as a Motion Suppression Device for Floating Wind Turbines.....</b>                                | <b>223</b> |
| <i>Michael Borg, Maurizio Collu, Feargal P. Brennan</i>                                                                             |            |
| <b>Advanced Representation of Tubular Joints in Jacket Models for Offshore Wind Turbine Simulation.....</b>                         | <b>234</b> |
| <i>Jan Dubois, Michael Muskulus, Peter Schaumann</i>                                                                                |            |

|                                                                                                                              |            |
|------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Comparison of Coupled and Uncoupled Load Simulations on a Jacket Support Structure .....</b>                              | <b>244</b> |
| <i>Philipp Haselbach, Anand Natarajan, Randi G. Jiwinangun, Kim Branner</i>                                                  |            |
| <b>The Effect of Second-order Hydrodynamics on Floating Offshore Wind Turbines .....</b>                                     | <b>253</b> |
| <i>Line Roald, Jason Jonkman, Amy Robertson, Ndaona Chokani</i>                                                              |            |
| <b>Multi-objective Design of a Modular Power Converter based on Medium Frequency AC-link for Offshore DC Wind Park .....</b> | <b>265</b> |
| <i>Rene Barrera-Cardenas, Marta Molinas</i>                                                                                  |            |
| <b>A Practical Approach in the CFD Simulation of Off-shore Wind Farms through the Actuator Disc Technique .....</b>          | <b>274</b> |
| <i>Francesco Castellani, Arne Gravdahl, Giorgio Crasto, Emanuele Piccioni, Andrea Vignaroli</i>                              |            |
| <b>Experimental Investigation of Wind Turbine Wakes in the Wind Tunnel .....</b>                                             | <b>285</b> |
| <i>Heiner Schümann, Fabio Pierella, Lars Sætran</i>                                                                          |            |
| <b>Planning Tool for Clustering and Optimised Grid Connection of Offshore Wind Farms .....</b>                               | <b>297</b> |
| <i>Harald G. Svendsen</i>                                                                                                    |            |
| <b>Turbulence Measurements in Shallow Water from a Subsurface Moored Moving Platform.....</b>                                | <b>307</b> |
| <i>Mostafa Bakhoday Paskyabi, Ilker Fer</i>                                                                                  |            |
| <b>TOPFARM – A Tool for Wind Farm Optimization .....</b>                                                                     | <b>317</b> |
| <i>Gunner Chr. Larsen, Pierre-Elouan Réthoré</i>                                                                             |            |
| <b>Author Index</b>                                                                                                          |            |
