

# INTERNATIONAL CONFERENCE OF COMPUTATIONAL METHODS IN SCIENCES AND ENGINEERING 2009

(ICCMSE 2009)

*Rhodes, Greece 29 September – 04 October 2009*

## **EDITORS**

Theodore E. Simos  
*European Society of Computational Methods in Sciences  
Engineering and Technology (ESCMSET)  
European Academy of Sciences and Arts  
King Saud University, Saudi Arabia  
University of Peloponnese, Greece*

George Maroulis  
*University of Patras, Patras, Greece*

**All papers have been peer reviewed.**

## **SPONSORING ORGANIZATION**

European Society of Computational Methods in Sciences, Engineering and Technology (ESCMSET)

**Melville, New York, 2012**

**AIP | CONFERENCE PROCEEDINGS ■ 1504**

## Editors

**Table of Contents**

<b>Preface: Lectures Presented at the International Conference on Computational Methods in Science and Engineering (Rhodes, Greece, 29 September - 4 October, 2009)</b> George Maroulis and Theodore Simos	1
<b>European Society of Computational Methods in Sciences, Engineering and Technology (ESCMSET)</b>	3
<b>PLENARY AND INVITED SPEAKERS</b>	
<b>Variational definitions of orbital energies</b> Ernest R. Davidson	5
<b>Rate of convergence of basis expansions in quantum chemistry</b> Werner Kutzelnigg	15
<b>Nanoparticles and theory</b> Nadine Harris, Shuzhou Li, and George C. Schatz	31
<b>Molecular modeling and the violation of linear scaling principles</b> Paul G. Mezey	43
<b>Calculation of the vibrational contribution to electronic properties</b> Bernard Kirtman	50
<b>Theory of chemical bonds in metalloenzymes - Manganese oxides clusters in the oxygen evolution center -</b> K. Yamaguchi, M. Shoji, T. Saito, H. Isobe, S. Yamada, S. Nishihara, T. Kawakami, Y. Kitagawa, S. Yamanaka, and M. Okumura	63
<b>Efficient quantum chemical valence-only treatments of lanthanide and actinide systems</b> Michael Dolg	80
<b>Range-dependent adiabatic connections</b> A. M. Teale, S. Coriani, and T. Helgaker	92
<b>Collision-induced dipoles and polarizabilities of pairs of hydrogen molecules: <i>Ab initio</i> calculations and results from spherical tensor analysis</b> Xiaoping Li, James F. Harrison, Magnus Gustafsson, Fei Wang, Martin Abel, Lothar Frommhold, and Katharine L. C. Hunt	100

<b>One- and two-photon absorptions in open-shell singlet systems</b> Masayoshi Nakano, Kyohei Yoneda, Ryohei Kishi, Hideaki Takahashi, Takashi Kubo, Kenji Kamada, Koji Ohta, Benoît Champagne, and Edith Botek	136
<b>Hartree-Fock via variational coupled cluster theory: An alternative way to diagonalization free algorithm</b> Ján Šimunek and Jozef Noga	143
<b>Vibrational treatment from a variation-perturbation scheme: The VCI-P method. Application to the glycolaldehyde</b> Philippe Carbonniere and Claude Pouchan	152
<b>Analysis of the structure, bonding, aromaticity and existence of possible bond-stretch isomerism in trigonal anionic metal clusters, <math>X_3^-</math> (<math>X = Be, Mg, Ca</math>)</b> Santanab Giri, Arindam Chakraborty, Soma Duley, Gabriel Merino, Venkatesan Subramanian, and Pratim Kumar Chattaraj	160
<b>Elongation method for linear scaling</b> Feng Long Gu and Yuriko Aoki	167
<b>Can long-range collision-induced properties be modeled semi-classically?</b> Tadeusz Bancewicz	176
<b>On the chemical enhancement in SERS</b> Lasse Jensen	182
<b>Overview of finite difference Hartree-Fock method algorithm, implementation and application</b> J. Kobus	189
<b>Atomic calculations for future technology and study of fundamental problems</b> M. S. Safronova	209
<b>Relativistic Hamiltonians for chemistry</b> Trond Saue	219
<b>Properties of halogen atoms related to the electrostatic origin of halogen bonding: Basic aspects and some applications</b> Hajime Torii	228
<b>A quantum chemistry approach to energies, structures, and spectroscopy of doped helium clusters</b> R. Pérez de Tudela, D. López-Durán, M. P. de Lara-Castells, R. Prosimiti, O. Roncero, G. Delgado-Barrio, F. A. Gianturco, J. Jellinek, and P. Villarreal	240
<b>Vibrational multipolar analyses in isotropic media: Combining IR, Raman and hyper-Raman spectroscopies</b> Vincent Rodriguez	254
<b>Performance assessment of density functional methods with Gaussian and Slater basis sets using <math>7\sigma</math> orbital momentum distributions of <math>N_2O</math></b> Feng Wang, Wenning Pang, and Patrick Duffy	266

<b>Electronic structure and optical properties of conjugated molecules: SAC-CI study</b> Masahiro Ehara, Biswajit Saha, Potjaman Poolmee, Malinee Promkatkaew, Supa Hannongbua, Yun-peng Lu, and Hiroshi Nakatsuji	279
<b>Giant diamagnetism in graphenes</b> Mikito Koshino, Yasunori Arimura, and Tsuneya Ando	291
<b>The Renner effect in triatomic molecules</b> P. R. Bunker, W. P. Kraemer, Tsuneo Hirano, and Per Jensen	302
<b>Detecting small effects in molecules by high-resolution spectroscopy: From nuclear hexadecapole coupling to parity violation and the change of fundamental constants in space-time</b> Peter Schwerdtfeger	315
<b>L'Oeuvre of Bernie Kirtman</b> Benoît Champagne, Feng Long Gu, Josep M. Luis, and Michael Springborg	320
<b>On the additive version of the connectivity index</b> Sonja Nikolić, Nenad Trinajstić, and Sanja Ivaniš Turk	342
<b>Phase field theory modeling of methane fluxes from exposed natural gas hydrate reservoirs</b> Pilvi-Helinä Kivelä, Khuram Baig, Muhammad Qasim, and Bjørn Kvamme	351
<b>Various parallel and diversive aspects of the mathematical fluctuations theory with the related standing issues</b> Metin Demiralp	364
<b>A force-based large increment method for 2D continuum solids and the mesh convergence study</b> Danbing Long, Zaoyang Guo, Xila Liu, Sundararajan Natarajan, and Stéphane Bordas	377
<b>Edge states in stacked nanographene</b> Kikuo Harigaya	388
<b>Spin polarization and third-order nonlinear optical properties of open-shell singlet graphene nanoflakes</b> Masayoshi Nakano, Kyohei Yoneda, Hiroshi Nagai, Takashi Kubo, Kenji Kamada, Koji Ohta, Benoît Champagne, and Edith Botek	392
<b>Theoretical consideration of singlet open-shell character of polyperiacenes using Clar's aromatic sextet valence bond model and quantum chemical calculations</b> Akihiro Shimizu, Yasukazu Hirao, Takashi Kubo, Masayoshi Nakano, Edith Botek, and Benoît Champagne	399
<b>Electronic contributions to linear and nonlinear electric properties in fullerene-based molecular systems</b> B. Skwara, O. Loboda, A. Avramopoulos, J.-M. Luis, H. Reis, and M. G. Papadopoulos	406
<b>The effect of the vibrational contributions to the non-linear optical properties of small and medium size molecules</b> Aggelos Avramopoulos, Heribert Reis, and Manthos G. Papadopoulos	414

<b>Pressure-induced critical influences on workpiece-tool thermal interaction in high speed dry machining of titanium</b>	
H. A. Abdel-Aal and M. El Mansori	424
<b>The boron connection: Roots (routes), grounds, horizons</b>	
Aristides D. Zdetsis	441
<b>SESSION 1</b>	
<b>Highlighted symposium in computational spectroscopy high precision calculations of molecular energy levels and spectra</b>	
Philip Bunker and Peter Schwerdtfeger	453
<b>Testing the time-invariance of fundamental constants using cold and not-so-cold molecules</b>	
Hendrick L. Bethlem, Paul Jansen, and Wim Ubachs	454
<b>High-level ab initio calculations for (potential) interstellar anions: Structures, spectroscopic properties and energetics</b>	
Peter Botschwina and Rainer Oswald	458
<b>Parity violating effects in diatomic molecules and some group-theoretical considerations on chirality in polyatomic molecules</b>	
Timur A. Isaev, Sophie Nahrwold, Yunlong Xiao, and Robert Berger	461
<b>The 'MULTIMODE' approach to ro-vibrational spectroscopy</b>	
Stuart Carter, Joel M. Bowman, and Amit R. Sharma	465
<b>The Renner effect in triatomic molecules</b>	
P. R. Bunker, W. P. Kraemer, Tsuneo Hirano, and Per Jensen	467
<b>Rovibrational spectra of molecules in small helium clusters</b>	
Xiao-Gang Wang and Tucker Carrington Jr.	480
<b>The Jahn-Teller effect and spin-orbit coupling in alkali trimers: Spectroscopic experiments and ab initio calculations</b>	
Andreas Hauser, Carlo Callegari, and Wolfgang E. Ernst	483
<b>Infrared spectroscopic and ab-initio studies of the benzene dimer</b>	
Undine Erlekam, Gerard Meijer, and Gert von Helden	487
<b>Rotation-vibration energy level cluster formation in three- and four-atomic molecules</b>	
Sergei N. Yurchenko, Walter Thiel, and Per Jensen	491
<b>Determination of the ionization and dissociation energies of H<sub>2</sub> and He<sub>2</sub></b>	
Jinjun Liu, Daniel Sprecher, Frédéric Merkt, Edcel J. Salumbides, and Wim Ubachs	495

<b>Fully relativistic calculations of NMR and EPR parameters in the framework of the matrix Dirac-Kohn-Sham equation</b>	
Michal Repiský, Stanislav Komorovský, Vladimir G. Malkin, and Olga L. Malkina	499
<b>Detecting small effects in molecules by high-resolution spectroscopy: From nuclear hexadecapole coupling to parity violation and the change of fundamental constants in space-time</b>	
Peter Schwerdtfeger	503
<b>Theory and spectroscopy for ultracold KRb molecules</b>	
William C. Stwalley	509
<b>Rovibrational and tunneling states of the benzene dimer; an ab initio study</b>	
Ad van der Avoird, Rob van Harrevelt, Claude Leforestier, Rafał Podeszwa, Krzysztof Szalewicz, P. R. Bunker, Gert von Helden, Melanie Schnell, and Gerard Meijer	512
<b>Simulating ionization spectra for small biomolecules in inner and valence shells</b>	
Feng Wang	516
<b>SESSION 2</b>	
<b>L'Oeuvre of Bernie Kirtman</b>	
Benoît Champagne, Feng Long Gu, Josep M. Luis, and Michael Springborg	522
<b>Efficient algorithm for computing orbital energies within elongation method</b>	
Oleksandr Loboda, Feng Long Gu, Anna V. Pomogaeva, Marcin Makowski, and Yuriko Aoki	544
<b>Theoretical model for infrared spectra of hydrogen-bonded 2,4-dithiouracil crystal</b>	
Marek J. Wójcik, Jacek Kwiendacz, and Marek Boczar	548
<b>Experimental and theoretical investigations of reference molecules for nonlinear optics: The example of acetonitrile</b>	
Elena Bogdan, Vincent Rodriguez, Frédéric Castet, Laurent Ducasse, Aurélie Plaquet, and Benoît Champagne	555
<b>Second-order nonlinear optical responses of flexible pyridine-pyrimidine foldamers</b>	
Frédéric Castet, Raphaël Méreau, Edith Botek, and Benoît Champagne	559
<b>Band structure of polymer extracted from oligomer calculations by elongation method and its applications to nanosystems</b>	
Anna Pomogaeva, Michael Springborg, Bernard Kirtman, Feng Long Gu, and Yuriko Aoki	563
<b>On the dependence of bulk properties on surfaces</b>	
Michael Springborg, Bernard Kirtman, and Violina Tevekeliyska	567
<b>Determining the size dependence of structural properties of clusters</b>	
Yi Dong and Michael Springborg	573
<b>On the reliability of the maximum hardness and minimum polarizability principles in nontotally symmetric vibrations</b>	
M. Solà, J. M. Luis, and M. Torrent-Sucarrat	578

<b>Generalized Van Vleck perturbation theory study of chlorine monoxide</b> Timothy J. Dudley, Jesse J. Howard, and Mark R. Hoffmann	582
<b>A hierarchy for additive models of polarizability</b> Ajit J. Thakkar	586
<b>A quantum chemical approach to the molecular conductance problem</b> Augusto César L. Moreira and Celso P. de Melo	590
<b>Coupled perturbed HF/KS calculation of the dielectric constant of crystalline systems. The case of six members of the garnet family</b> A. Meyer, M. Ferrero, L. Valenzano, C. M. Zicovich-Wilson, R. Orlando, and R. Dovesi	593
<b>Exciton effects in boron-nitride (BN) nanotubes</b> Kikuo Harigaya	597
<b>The applicability of the HSAB principle</b> Miquel Torrent-Sucarrat	601
<b>Insight and progress in density functional theory</b> Weitao Yang, Paula Mori-Sanchez, and Aron J. Cohen	605
<b>Nonlinear optical properties and large amplitude anharmonic vibrational motions</b> Josep M. Luis, Heribert Reis, Manthos Papadopoulos, and Bernard Kirtman	607
<b>Anharmonic vibrational analysis of water at CCSD(T) level: Comparison of traditional and explicitly correlated methods</b> Kalju Kahn, Bernard Kirtman, Jozef Noga, and Seiichiro Ten-no	611
<b>The effect of the vibrational contributions to the non-linear optical properties of small and medium size molecules</b> Aggelos Avramopoulos, Heribert Reis, and Manthos G. Papadopoulos	616
<b>Implementation of a vector potential method in an <i>ab initio</i> Hartree-Fock code</b> Violina Tevekeliyska, Michael Springborg, Benoît Champagne, and Bernard Kirtman	627
<b>Linear and nonlinear second order susceptibilities of molecular crystals</b> Edith Botek, Benoît Champagne, Małgorzata Olejniczak, and Magdalena Pecul	631
<b>Polarizability and charge density distribution in crystalline urea</b> Mauro Ferrero, Bartolomeo Civalleri, and Michel Rérat	635
<b>A general toolbox for the calculation of higher-order molecular properties using SCF wave functions at the one-, two- and four-component levels of theory</b> Kenneth Ruud, Radovan Bast, Bin Gao, Andreas J. Thorvaldsen, Ulf Ekström, and Lucas Visscher	639

<b>Prediction of the linear and nonlinear electric susceptibilities of 3-methyl-4-nitropyridine-N-oxide (POM) and meta-nitroaniline (mNA) crystals with account of electronic and molecular vibrational contributions</b>	643
Heribert Reis and Josep M. Luis	
<b>Generalized elongation method: From one-dimension to three-dimension</b>	647
Yuriko Aoki and Feng Long Gu	
<b>Long-range-corrected UDFT study on second hyperpolarizabilities of open-shell singlet systems</b>	651
Ryohei Kishi, Sean Bonness, Kyohei Yoneda, Takashi Kubo, Kenji Kamada, Koji Ohta, Benoît Champagne, Edith Botek, Takao Tsuneda, and Masayoshi Nakano	
<b>Critical assessment of density functional theory for computing vibrational (hyper)polarizabilities</b>	655
R. Zaleśny, I. W. Bulik, M. Mikołajczyk, W. Bartkowiak, J. M. Luis, B. Kirtman, A. Avramopoulos, and M. G. Papadopoulos	
<b>SESSION 3</b>	
<b>Computational quantum chemistry</b>	659
George Maroulis	
<b>Global search algorithm of minima exploration to find low lying isomers of clusters in which spheroidal generation and raking optimization appear as an original process</b>	660
Rémi Marchal, Philippe Carbonnière, and Claude Pouchan	
<b>One-electron pseudopotential investigation of the RbAr and FrAr van der Waals systems</b>	664
J. Dhiflaoui and H. Berriche	
<b>A theoretical investigation of the low-lying <math>^1\Sigma^+</math> states of the beryllium hydride ion BeH<sup>+</sup></b>	670
M. Farjallah, C. Ghanmi, and H. Berriche	
<b>Theoretical study and formation prediction of the ultra-cold molecule RbLi</b>	675
I. Jendoubi, H. Berriche, and H. Ben Ouada	
<b>Is there any connection between the (Hyper) polarizabilities of the ground state structures of clusters and those of their low lying isomers? A case study of aluminum doped silicon clusters</b>	679
P. Karamanis, R. Marchal, P. Carbonnierre, and C. Pouchan	
<b>Theoretical study of Si<sub>20</sub>Li<sub>20</sub> cage cluster</b>	683
Aristides D. Zdetsis and Emmanuel N. Koukaras	
<b>Oxidation reactions of H<sub>2</sub>O and N<sub>2</sub>O with Si clusters: A first-principles study</b>	687
Bao-Xing Li, Xiao-Jun Ren, and Yi-Feng Xu	
<b>Oscillatory and rotatory exciton recurrence motions in double-ring molecular aggregates controlled by two-mode circular-polarized laser field</b>	691
Takuya Minami, Kyohei Yoneda, Ryohei Kishi, and Masayoshi Nakano	

<b>A comparison of density functional theory and coupled cluster methods for the calculation of electric dipole polarizability gradients of methane</b> Ivana Paidarová and Stephan P. A. Sauer	695
<b>Unraveling interactions in large complex systems using quantum chemistry interpretative techniques and new generation polarizable force fields</b> R. Chaudret, B. de Courcy, A. Marjolin, M.-C. van Severen, P. Y. Ren, J. C. Wu, O. Parisel, and J.-P. Piquemal	699
<b>A new DFT functional based on spin-states and <math>S_N2</math> barriers</b> M. Swart, M. Solà, and F. M. Bickelhaupt	703
<b>SESSION 4</b>	
<b>Prefaces of the symposia on mathematical chemistry</b> Sonja Nikolić	707
<b>A new approach to a century-old problem: Henri-Michaelis-Menten enzyme kinetics</b> Mário N. Berberan-Santos	711
<b>Density gradient quantum similarity</b> Ramon Carbó-Dorca and Luz Dary Mercado	716
<b>Adaptive modelling of structured molecular representations for toxicity prediction</b> Carlo Bertinetto, Celia Duce, Alessio Micheli, Roberto Solaro, and Maria Rosaria Tiné	721
<b>Discrete skeletons of continua in the universal molecule model</b> Paul G. Mezey	725
<b>Fold and sequence independent protein binding sites prediction algorithm</b> Dušanka Janežič, Janez Konc, Joanna Trykowska Konc, Matej Penca, and Matej Janežič	729
<b>Comparative numerical study on the optimal vulcanization of rubber compounds through traditional curing and microwaves</b> Gabriele Milani and Federico Milani	733
<b>Analysis of randomly shaped puzzle-fragment-particles via their chord length distribution</b> Wilfried Gille	737
<b>Quantum chemical studies on binding energy in some positronic complexes</b> H. Chojnacki	742
<b>A metalanguage for thermodynamics</b> Lionello Pogliani	746
<b>Chemistry as mathematical system - Involutory forms of molecules and their genetic codes</b> Lech P. Schulz	750

## SESSION 5

<b>Symposium on natural gas hydrates: A future climate bomb or a valuable source of energy? Opportunities and challenges for the computational physics community</b> Bjorn Kvamme	754
<b>Modeling trapping mechanism for PCB adsorption on activated carbon</b> Bjørnar Jensen, Bjørn Kvamme, Tatyana Kuznetsova, and Åge Oterhals	755
<b>Properties of aging FeCl<sub>2</sub> clusters grown in supercritical water investigated by molecular dynamics simulations</b> Norbert Lümmen and Bjørn Kvamme	759
<b>An alternative for carbon dioxide emission mitigation: <i>In situ</i> methane hydrate conversion</b> Tatiana Kuznetsova, Bjørn Kvamme, and Kathryn Morrissey	772
<b>Molecular dynamics simulations of methane hydrate pre-nucleation phenomena and the effect of PVCap kinetic inhibitor</b> Tatiana Kuznetsova, Bjørn Kvamme, and Archana Parmar	776
<b>Molecular dynamics studies of water deposition on hematite surfaces</b> Bjørn Kvamme, Tatiana Kuznetsova, and Martin Haynes	780

## SESSION 6

<b>Symposium: Recent developments in numerical schemes for Hilbert space related issues in science and engineering</b> Metin Demiralp	784
<b>Representing potential energy surfaces with neural networks and high dimensional model representations</b> Sergei Manzhos and Tucker Carrington	785
<b>Self-consistent fluctuation expansion and its application to numerical integration</b> Coşar Gözükmizi and Metin Demiralp	788
<b>Fluctuation free matrix representation based random data partitioning through HDMR</b> M. Alper Tunga and Metin Demiralp	792
<b>Support function influences on the univariance of the enhanced multivariance product representation</b> Burcu Tunga and Metin Demiralp	796
<b>Taylor series based integration with the fluctuation freely approximated remainder over gauss wave type basis functions</b> Süha Tuna, N. A. Baykara, and Metin Demiralp	800
<b>Optimal control equations for the one dimensional quantum harmonic oscillator under the influence of external dipole effects</b> Muzaffer Ayvaz and Metin Demiralp	804

<b>Fluctuation studies in the infinite interval matrix representations of operator products and their decompositions</b>	
N. A. Baykara, Ercan Gürvit, and Metin Demiralp	808
<b>Fluctuation studies on the finite interval matrix representations of operator products and their decompositions</b>	
Ercan Gürvit, N. A. Baykara, and Metin Demiralp	812
<b>Taylor series expansion with the fluctuation freely approximated remainder over gauss wave type basis functions</b>	
Caner Gülpinar, Meseret Tuba Gülpinar, and Metin Demiralp	816
<b>Exponentially supported polynomial basis set using fluctuation free integration in the Taylor expansion remainder term evaluation</b>	
Meseret Tuba Gülpinar, Caner Gülpinar, and Metin Demiralp	820
<b>Basic components in fluctuation free integration of highly oscillatory functions</b>	
Sevda Üsküplü and Metin Demiralp	824
<b>Data completion via combined and optimized small scale high dimensional model representation</b>	
Evrin Korkmaz and Metin Demiralp	828
<b>Adaptive wavelet methods - Matrix-vector multiplication</b>	
Dana Černá and Václav Finěk	832
<b>Dimensionality reduction and approximation via space extension and multilinear array decomposition</b>	
Metin Demiralp and Emre Demiralp	837
<b>SESSION 7</b>	
<b>Electron spin resonance spectra of nitroxyl radicals</b>	
Edith Botek, Natalia Zarycz, Benoît Champagne, Valérie Sciannaméa, and Christophe Detrembleur	841
<b>Theoretical aspects on the evaluation and interpretation of the third-order nonlinear optical properties of diradical compounds</b>	
Benoît Champagne, Edith Botek, Akihiro Shimizu, Takashi Kubo, Kenji Kamada, Koji Ohta, Ryohei Kishi, Hitoshi Fukui, Hideaki Takahashi, and Masayoshi Nakano	844
<b>Electronic structure and optical properties of conjugated molecules: SAC-CI study</b>	
Masahiro Ehara, Lu Yun-peng, Malinee Promkatkaew, and Supa Hannongbua	848
<b>Second hyperpolarizabilities of singlet diradical compounds and their radical ions</b>	
Hitoshi Fukui, Kyohei Yoneda, Edith Botek, Benoît Champagne, and Masayoshi Nakano	852
<b>Magnetic shielding in carbon nanotube</b>	
Nobuhisa Miyake, Daisuke Yamaki, and Masahiko Hada	856

<b>Edge states in stacked nanographene</b> Kikuo Harigaya	860
<b>Synthesis and electronic structure of bisanthene: A small molecular-sized graphene with zigzag edges</b> Yasukazu Hirao, Akihito Konishi, Kouzou Matsumoto, Hiroyuki Kurata, and Takashi Kubo	863
<b>Spin-orbit effects in graphene <math>p - n</math> junction</b> A. Yamakage, K.-I. Imura, J. Cayssol, and Y. Kuramoto	867
<b><math>Z_2</math>-classification of localization properties in graphene</b> Ken-Ichiro Imura, Yoshio Kuramoto, and Kentaro Nomura	871
<b>Broken-symmetry MO-CI quantum master equation approach to exciton dynamics in open-shell singlet systems</b> Ryohei Kishi, Takuya Minami, Kyohei Yoneda, and Masayoshi Nakano	875
<b>Vibrational frequency without spin contamination error - Approximately spin projected force constant -</b> Y. Kitagawa, T. Saito, Y. Kataoka, Y. Nakanishi, T. Matsui, T. Kawakami, M. Okumura, and K. Yamaguchi	879
<b>Singlet open-shell character of conjugated Kekulé molecules</b> Takashi Kubo, Mitsuya Aoba, Akihiro Shimizu, Yasukazu Hirao, Kozo Matsumoto, Hiroyuki Kurata, and Masayoshi Nakano	883
<b>Coronene-transition metal complex: View from quantum chemistry and statistical mechanics</b> Hirofumi Sato, Chisa Kikumori, and Shigeyoshi Sakaki	887
<b>I-V characteristics of several modified DNA bases</b> Y. Shigeta, T. Matsui, Y. Nakanishi, Y. Kitagawa, and M. Okumura	891
<b>Multi-paradigm simulation at nanoscale: Methodology and application to functional carbon material</b> Haibin Su	895
<b>Electron donor solvent effects on the (Hyper) polarizabilities of a solute presenting singlet diradical character</b> Hideaki Takahashi, Kazuki Kubota, Hitoshi Fukui, Sean Bonness, Kyohei Yoneda, Ryohei Kishi, Takashi Kubo, Kenji Kamada, Koji Ohta, Benoît Champagne, Edith Botek, and Masayoshi Nakano	899
<b>A multiconfigurational density functional theory</b> Takao Tsuneda	903
<b>Electronic transport of graphene nanoribbons: Effect of edges and geometry</b> Katsunori Wakabayashi	907
<b>Quantum-chemical analysis of paramagnetic <math>^{13}\text{C}</math> NMR shifts of iron-bound cyanide ions in heme-protein environments</b> Daisuke Yamaki and Masahiko Hada	912

<b>Locality and nonlocality of electronic structures of molecular systems: Toward QM/MM and QM/QM approaches</b>	
Shusuke Yamanaka, Yasushige Yonezawa, Kazuto Nakata, Satomichi Nishihara, Mitsutaka Okumura, Toshikazu Takada, Kizashi Yamaguchi, and Haruki Nakamura	916
<b>SESSION 8</b>	
<b>Computational aspects of the modelling of vibrational properties of gases, liquids and solids</b>	
Philippe Carbonniere and Claude Pouchan	920
<b>Quantum dynamics study of resonance states of vinylidene using normal mode Hamiltonian</b>	
Yinghui Ren, Bin Li, and Wensheng Bian	921
<b>Using pruned basis sets to compute vibrational spectra</b>	
Gustavo Avila, Jason Cooper, and Tucker Carrington	925
<b>Simulating and interpreting vibrational spectra of molecules: The resonant Raman spectra of rhodamine 6G</b>	
Benoît Champagne and Julien Guthmuller	928
<b>Density functional perturbation theory within the projector augmented-waves method: A few benchmarks for molecules and solids</b>	
Andrea Dal Corso and Lorenzo Paulatto	932
<b>Recent algorithmic development of parallel force decomposition and Hamiltonian splitting methods for macromolecular simulation</b>	
Dusanka Janezic, Urban Borstnik, Matej Praprotnik, Matej Penca, Matej Janezic, and Ksenija Poljanec	936
<b>Computational experiment in non-crystalline materials from first-principles: A case study of vibrations in hydrogenated amorphous silicon</b>	
Franco Gaspari, Anatoli I. Shkrebtii, Ihor M. Kupchak, Tim Teatro, and Laura Henderson	939
<b>Implementation of density-functional perturbation theory within ABINIT: Projector augmented-waves and spin-orbit</b>	
X. Gonze, M. Verstraete, C. Audouze, M. Torrent, and F. Jollet	944
<b>Quantum dynamics of floppy molecular systems with ELVIBROT and TNUM</b>	
André Nauts and David Lauvergnat	948
<b>Medium range structure of tetrahedrally-bonded glasses through the first principles investigation of Raman spectra</b>	
Luigi Giacomazzi and Alfredo Pasquarello	953
<b>Determination of conformational preferences in biomolecule mimics with localized orbital coupled cluster methods</b>	
Daniel P. Schofield and Kenneth D. Jordan	957

<b>Time-domain calculations of the 1D and 2D spectra of resonantly-coupled vibrations in liquids and proteins</b> Hajime Torii	961
<b>SESSION 9</b>	
<b>Symposium on computing in experimental high energy physics</b> Tulika Bose	965
<b>Web application for detailed real-time database transaction monitoring for CMS condition data</b> Michele de Gruttola, Salvatore Di Guida, Vincenzo Innocente, and Antonio Pierro	966
<b>CMS alignment and calibration framework</b> Matthias Edelhoff and CMS Collaboration	971
<b>The ATLAS computing model &amp; distributed computing evolution</b> Roger W. L. Jones and ATLAS Collaboration	975
<b>CMS dashboard for monitoring of the user analysis activities</b> Edward Karavakis, Julia Andreeva, Gerhild Maier, and Akram Khan	983
<b>The physics analysis tools project for the ATLAS experiment</b> Bruno Lenzi and ATLAS collaboration	987
<b>Distributed data analysis in ATLAS</b> Paul Nilsson and ATLAS Collaboration	991
<b>ATLAS trigger: Design and commissioning</b> F. Pastore and ATLAS Collaboration	995
<b>Probing methods for automatic error resolution in a heterogeneous software environment</b> Antonio Pierro, Salvatore Di Guida, Vincenzo Innocente, and Ilja Kuzborskij	999
<b>Data quality monitoring of the CMS tracker</b> Karolos Potamianos and CMS Collaboration	1003
<b>The CMS ECAL non-event data handling</b> Thomas Punz and CMS Collaboration	1005
<b>CRAB: Distributed analysis tool for CMS</b> Leonardo Sala and CMS Collaboration	1009
<b>TMVA - Toolkit for multivariate data analysis</b> Jan Therhaag and TMVA Core Developer Team	1013
<b>The CMS muon reconstruction software</b> Daniele Trocino and CMS Collaboration	1017

<b>A tour through the CMS data model</b> Roger Wolf and CMS Collaboration	1021
--	------

## SESSION 10

<b>Preface: 6th symposium on industrial and environmental case studies</b> Fragiskos Batzias	1025
<b>Technology transfer by means of fault tree synthesis</b> Dimitris F. Batzias	1027
<b>Technology transfer through a network of standard methods and recommended practices - The case of petrochemicals</b> Dimitris F. Batzias and Sotirios Karvounis	1031
<b>Transforming incomplete fault tree to Ishikawa diagram as an alternative method for technology transfer</b> Dimitris F. Batzias	1035
<b>Analytic estimation of recycled products added value as a means for effective environmental management</b> Dimitris F. Batzias	1039
<b>Numerical simulation of the neutrally stratified ABL flow over complex geometry</b> L. Beneš, T. Bodnár, and K. Kozel	1043
<b>A generalized model for simulating adsorption on porous media and checking for reversibility by desorption</b> Fragiskos Batzias, Athanasia Bountri, and Dimitris Sidiras	1047
<b>Searching for correspondence between mechanistic/deductive and empirical/inductive models at industrial level by means of dimensional analysis</b> Fragiskos Batzias, Athanasia Bountri, and Dimitris Sidiras	1051
<b>Introducing economic parameters in industrial flotation dimensionless models used for intra-factory technology transfer</b> Dimitris Batzias and Konstantina Ifanti	1055
<b>Industrial wastewater treatment in fixed-bed systems</b> Dimitris Tsatiris and Dimitris Sidiras	1059
<b>Parameter identification of process simulation models as a means for knowledge acquisition and technology transfer</b> Dimitris F. Batzias and Konstantina Ifanti	1063
<b>Endogenous estimation of safety coefficient for optimal design of biochemical reactors at industrial level</b> Christina G. Siontorou and Angeliki Karydi	1067

<b>Introducing a conditional 'Willingness to Pay' index as a quantifier for environmental impact assessment</b>	
Fragiskos Batzias and Odysseas Kopsidas	1071
<b>Evaluating environmental impact caused by industrial activities - Implementation of the WTP-WTA approach</b>	
Odysseas Kopsidas and Fragiskos Batzias	1075
<b>Chromium (VI) purification using pine sawdust in batch systems</b>	
Dorothea Politi and Dimitris Sidiras	1079
<b>Determination of optimal environmental policy for reclamation of land unearthed in lignite mines - Strategy and tactics</b>	
Dimitris F. Batzias and Yannis A. Pollalis	1083
<b>Tracing the transition path between optimal strategies combinations within a competitive market of innovative industrial products</b>	
Dimitris F. Batzias and Yannis A. Pollalis	1087
<b>Simulation of acid hydrolysis of lignocellulosic residues to fermentable sugars for bioethanol production</b>	
Dimitris Sidiras	1091
<b>Computer aided design of medicinal products based on interactive chemical/herbal ingredients – An R&amp;D approach</b>	
Christina G. Siontorou	1095
<b>On the optimal design of molecular sensing interfaces with lipid bilayer assemblies – A knowledge based approach</b>	
Christina G. Siontorou	1099
<b>Industrial production index forecast: Methods comparison</b>	
M. Filomena Teodoro	1103
<b>SESSION 11</b>	
<b>Preface: Numerical methods for eigenvalue problems</b>	
Paolo Bientinesi	1108
<b>Level-3 BLAS on a GPU: Picking the low hanging fruit</b>	
Francisco D. Igual, Gregorio Quintana-Ortí, and Robert A. van de Geijn	1109
<b>FLECS, a flexible coupling shell - Parallel application to fluid-structure interaction</b>	
Margreet Nool, Erik Jan Lingen, Sander van Zuijlen, Martijn Stroeven, and Hester Bijl	1113
<b>Robust computation of determinant</b>	
Takeshi Ogita	1119
<b>Pseudoinverse preconditioner for saddle point problem</b>	
Felicja Okulicka-Dłuzewska	1124

<b>Matrix multiplication with guaranteed accuracy by level 3 BLAS</b> Katsuhisa Ozaki, Takeshi Ogita, and Shin'ichi Oishi	1128
<b>An example of symmetry exploitation for energy-related eigencomputations</b> M. Petschow, E. Di Napoli, and P. Bientinesi	1134
<b>SESSION 12</b>	
<b>Heterogeneous domain decomposition of surface and porous media flow</b> Heiko Berninger, Ralf Kornhuber, and Oliver Sander	1138
<b>Molecular dynamics simulation of polymerization of p-xylylene</b> Cezary Czaplowski, Artur Gieldon, Krzysztof Smalara, and Maciej Bobrowski	1142
<b>Modeling of delamination propagation in composite laminated beam structures</b> C. Harvey and S. Wang	1146
<b>Vibrational spectra and anharmonic effects in crystals studied by molecular dynamics simulation</b> E. B. Dolgusheva and V. Yu. Trubitsin	1150
<b>A multi-threaded and distributed framework for pedestrian simulation analysis</b> Edward Karavakis and Akram Khan	1154
<b>Sheaf construction</b> Elena Şendroi	1158
<b>Relative production yields in homologous metallofullerene series: Computations for <math>X@C_{74}</math> and <math>Z@C_{82}</math> endohedrals</b> Filip Uhlík, Zdeněk Slanina, Takeshi Akasaka, and Shigeru Nagase	1162
<b>Quantum mechanical study on the fragmentation of the POPOP molecule</b> Jelena Tamuliene	1166
<b>Slate characterization using 3D laser scanning</b> M. López, J. Taboada, J. Martínez, J. M. Matías, and J. A. Vilán	1170
<b>Stratified atmospheric flow modeling</b> Aleš Jirk and Josef Brechler	1174
<b>Non-linear thermal analysis of the efficiency of light concrete big-holed bricks by FEM</b> J. J. del Coz Díaz, P. J. García Nieto, A. Lozano Martínez-Luengas, and J. Domínguez Hernández	1178
<b>Construction of an optimized explicit Runge-Kutta method with increased phase-lag order for the numerical solution of the Schrödinger equation</b> A. A. Kosti, Z. A. Anastassi, and T. E. Simos	1182

<b>Construction of an explicit Runge-Kutta-Nyström method with constant coefficients and of a phase-fitted and amplification-fitted explicit Runge-Kutta-Nyström method for the numerical solution of the Schrödinger equation</b>	1185
A. A. Kosti, Z. A. Anastassi, and T. E. Simos	
<b>The analytic solution of the firm's cost-minimization problem with box constraints and the Cobb-Douglas model</b>	1188
L. Bayón, J. M. Grau, M. M. Ruiz, and P. M. Suárez	
<b>Detection of broken rotor bars in induction machines: An approach using wavelet packets in MCSA</b>	1192
León Escobar-Moreira, José Antonino-Daviu, and Martin Riera-Guasp	
<b>Application in DSP/FPGA design of Matlab/Simulink</b>	1196
Yong-mei Liu, Yong Guan, Jie Zhang, Min-hua Wu, and Lin-wei Wu	
<b>A neural network approach for detection of damage in a vibrating beam</b>	1200
L. Dihoru, N. Alexander, C. A. Taylor, H. Grumbar, and E. Newton	
<b>Analysis of three dimensional textures through use of photometric stereo, co-occurrence matrices and neural networks</b>	1205
Lyndon N. Smith and Melvyn L. Smith	
<b>Numerical modeling of transport barrier formation</b>	1210
M. Z. Tokar	
<b>High performance implementations for computing the maximal Lyapunov exponent on distributed memory architectures</b>	1214
I. Marín Carrión, E. Arias Antúnez, M. M. Artigao Castillo, and J. J. Miralles Canals	
<b>Characterization of forest fires in the Mediterranean area</b>	1218
M. Mari-Benlloch, M. Martínez-Gómez, C. Maroto, J. Suárez, and F. Crespo	
<b>Aromaticity variation in BN substituted triphenylene: A theoretical study</b>	1223
A. G. Papadopoulos, N. D. Charistos, and M. P. Sigalas	
<b>Computational aspects of crack growth in sandwich plates from reinforced concrete and foam</b>	1227
G. Papakaliatakis, V. P. Panoskaltsis, and A. Liontas	
<b>Non-linear analysis and calculation of the performance of a shelving protection system by FEM</b>	1231
P. J. García Nieto, J. J. del Coz Díaz, J. A. Vilán Vilán, and J. L. Suárez Sierra	
<b>Monte Carlo simulation studies of neurofilament brushes</b>	1235
Yongkyu Kwak, Rakwoo Chang, and Yeshitila Gebremichael	
<b>Grand-canonical Monte Carlo simulation study of polyelectrolyte diode</b>	1239
Eonji Lee, Ji-hyung Han, Rakwoo Chang, and Taek Dong Chung	
<b>Analysis of errors in MLPG methods</b>	1243
Roman Trobec	

<b>Mobile agent location in distributed environments</b> S. G. Fountoukis and I. P. Argyropoulos	1247
<b>Pattern oriented design of cluster running object medical information systems</b> S. G. Fountoukis and D. T. Chatzistavrou	1248
<b>Reactions of parylenes with double bonds: An ab initio study</b> Sylwia Smuczyńska, Piotr Skurski, and Maciej Bobrowski	1249
<b>Calculations of <math>\mu^-</math> wave functions in muonic atoms using a genetic algorithm</b> I. S. Kardaras, V. N. Stavrou, I. G. Tsoulos, and T. S. Kosmas	1253
<b>Density functional theory orbital energies for predicting ionization energies</b> Ulrike Salzner and Roi Baer	1257
<b>A neural network model for olfactory glomerular activity prediction</b> Zu Soh, Toshio Tsuji, Noboru Takiguchi, and Hisao Ohtake	1261
<b>Parabolic problems with parameters arising in evolution model for phytromediation</b> Aida Sakhmurova and Veli Shakhmurov	1265
<b>Optimal regular differential operators with VMO coefficients</b> Veli Shakhmurov	1269
<b>Simultaneous phase, amplitude, and polarization control of femtosecond laser pulses</b> A. Lindinger, S. M. Weber, M. Plewicky, and F. Weise	1275
<b>A new approach of watermarking technique by means multichannel wavelet functions</b> Santa Agreste and Luigia Puccio	1279
<b>Finite element solutions of nanophotonics devices</b> B. M. A. Rahman, D. M. H. Leung, N. Kejalakshmy, A. Agrawal, and K. T. V. Grattan	1283
<b>Alignment, segmentation and 3-D reconstruction of serial sections based on automated algorithm</b> Weiguo Bian, Shaojie Tang, Qiong Xu, Qin Lian, Jin Wang, and Dichen Li	1287
<b>The application of RESCUER software to PDAEs translation into VHDL-AMS models</b> Mariusz Zubert and Andrzej Napieralski	1293
<b>Optimization of the place of the plastic hinges by steel braces at RC buildings</b> Farzad Hatami, Mohammad Ragheb, and Meysam Namazi	1297
<b>Presenting numerical mathematical formulas to design composite steel shear walls</b> Farzad Hatami, Mahdi Ragheb, and Ali Ghamari	1301
<b>Revealing effects of dynamic characteristics in process monitoring and their influences on quality prediction</b> Melanie Senn and Norbert Link	1306

<b>Central schemes on unstructured grids</b> R. Touma and G. Jannoun	1310
<b>A new method for DtN maps of a differential equation with constant coefficients</b> Sasamoto Akira	1314
<b>On spectral approximation of laguerre type</b> S. Shindin and N. Parumasur	1318
<b>Mixture density estimation in aggregated random fields</b> Nikolai Leonenko and Emanuele Taufer	1322
<b>Fractional calculus and morphogen gradient formation</b> Santos Bravo Yuste, Enrique Abad, and Katja Lindenberg	1323
<b>MAST solution of irrotational flow problems in 2D domains with strongly unstructured triangular meshes</b> T. Tucciarelli	1327
<b>Modelling the permeability of textiles using mesh adaptatino</b> A. Giavaras, A. C. Long, and M. J. Clifford	1333
<b>Hyperbolic diffusion equation</b> Leopold Herrmann	1337
<b>A note on local superderivations and 2-local superderivations on <math>M_n(\mathbb{C})</math></b> Ajda Fořner and Maja Fořner	1341
<b>Optimized explicit symmetric linear multistep methods for the numerical solution of the Schrödinger equation and related orbital problems</b> G. A. Panopoulos, Z. A. Anastassi, and T. E. Simos	1344
<b>Symmetries of the CR sublaplacian</b> Zuzana Vlasáková	1348
<b>Existence results for nonlinear variational inequalities via topological methods</b> Irene Benedetti, Francesco Mugelli, and Pietro Zecca	1352
<b>Author Index</b>
