Evaluation**

Table of Contents

Preface Donald O. Thompson and Dale E. Chimenti	1
---	---

PART A

SCOPE OF NDE MEASUREMENTS

NDE measurements for understanding of performance: A few case studies on engineering components, human health and cultural heritage Baldev Raj and B. Venkatraman	7
---	---

ADVANCES IN NDE MEASUREMENT TECHNOLOGY

Advances in digital industrial radiology - New application areas beyond film radiography Uwe Ewert	18
Ultrasonic arrays in NDE: Beyond the B-scan Paul D. Wilcox	33

CHAPTER 1

ELASTIC AND INELASTIC WAVES

Section A. Ultrasonic Modeling

Guided wave-based J-integral estimation for dynamic stress intensity factors using 3D scanning laser Doppler vibrometry J. Ayers, C. T. Owens, K. C. Liu, E. Swenson, A. Ghoshal, and V. Weiss	51
---	----

Using singularities to detect and describe a notch in a pipe D. K. Stoyko, N. Popplewell, and A. H. Shah	59
A study of helical Lamb wave propagation on two hollow cylinders with imperfect contact conditions A. Balvantin, A. Baltazar, and J.-Y. Kim	67
A parallel mixed 3D grid/explicit FEM scheme for computing elastic wave propagation on a GPU using an irregular mesh Matthew R. Cherry, John C. Aldrin, Thomas Boehnlein, and James L. Blackshire	75
Unit cell finite element modelling for ultrasonic scattering from periodic surfaces W. Choi, E. Skelton, M. J. S. Lowe, and R. Craster	83
Forward and backscatter energy field patterns from localized damage sites James L. Blackshire	91
Nonlinear interaction of ultrasonic waves with a crack of different orientations P. Blanloeuil, A. Meziane, and C. Bacon	99
Section B. Guided Waves— Mostly Fundamentals	
A novel approach of using the elastodynamic reciprocity for guided wave problems Haidang Phan, Younho Cho, Taeho Ju, Jan D. Achenbach, Sridhar Krishnaswamy, and Brandon Strom	107
A boundary element formulation for the computation of damped guided waves M. Mazzotti, I. Bartoli, A. Marzani, and E. Viola	113
Guided wave signal transport in curved and tapered plates R. A. Roberts	121
Scattering of guided waves from complex defects in plates in pipes A. Velichko and P. D. Wilcox	129
Anomalous dispersion of cylindrical longitudinal guided modes H. Cui, B. Zhang, J. Trevelyan, S. Johnstone, and S. Millman	137

Higher harmonic guided waves in isotropic weakly non-linear elastic plates	
Vamshi Krishna Chillara and Cliff J. Lissenden	145
Strongly cumulative second harmonic generation in a plate with quadratic nonlinearity: Finite element simulation	
Yang Liu, Cliff J. Lissenden, and J. L. Rose	151
Permanently installed guided wave pipeline monitoring	
A. Galvagni and P. Cawley	159
Ultrasonic waves guided by transverse bends in plates subjected to symmetric axial excitation	
Abilasha Ramadhas, P. Sreedhar, Roson Kumar Pattanayak, Krishnan Balasubramaniam, and Prabhu Rajagopal	167
Studies on the influence of axial bends on ultrasonic guided waves in hollow cylinders (pipes)	
Bhupesh Verma, Krishnan Balasubramaniam, and Prabhu Rajagopal	175
Energy and power modeling of multi mode Lamb waves propagating in structure bonded with piezoelectric wafer active sensors	
Ayman Kamal, Bin Lin, and Victor Giurgiutiu	183
Hybrid modal/FE simulation of guided waves inspections	
V. Baronian, K. Jezzine, and F. Le Bourdais	191
Section C. Guided Waves— Applications	
Guided wave mode pairs for transmissibility in adhesively bonded metal plates	
P. Puthillath, B. Ren, C. J. Lissenden, and J. L. Rose	199
Ultrasonic guided wave inspection of an interface between an anisotropic layer and a metallic half space	
M. D. Gardner, J. L. Rose, and C. A. Moose	207
Amplitude controlled array transducers for mode selection and beam steering of guided waves in plates	
H. Kannajosyula, C. J. Lissenden, and J. L. Rose	215

Planar shear horizontal guided wave inspection of a plate using piezoelectric fiber transducers	223
M. H. Soorgee, C. J. Lissenden, J. L. Rose, and A. Yousefi-Koma	
Field measurement of guided wave modes in rail track	230
P. W. Loveday and C. S. Long	
Analysis of guided wave scattering due to defects in rails using a hybrid FE-safe method	238
C. S. Long and P. W. Loveday	
Section D. Guided Waves—Structural Health Monitoring	
Impact source location of composites using a single sensor and time reversal technique	246
Hyunjo Jeong and Sungjong Cho	
Planar guided waves for SHM of plate structures using piezoelectric fiber transducers	254
M. H. Soorgee, C. J. Lissenden, J. L. Rose, and A. Yousefi-Koma	
Efficient baseline gathering and damage detection in guided wave structural health monitoring	262
A. J. Croxford, O. Putkis, and P. D. Wilcox	
Long term stability and expected performance of a guided wave SHM system	270
V. Attarian, F. Cegla, and P. Cawley	
Ultrasonic vibration for structural health monitoring	278
Y. Liang, F. Yan, C. Borigo, and J. L. Rose	
Crack detection on wind turbine blades in an operating environment using vibro-acoustic modulation technique	286
S. Kim, D. E. Adams, and H. Sohn	
Delay-and-sum technique for localization of active sources in cylindrical objects	294
Joel B. Harley, Nattamon Thavornpitak, and José M. F. Moura	
Lamb wave structural health monitoring using frequency-wavenumber analysis	302
Zhenhua Tian and Lingyu Yu	

Investigation of waviness in wind turbine blades: Structural health monitoring	310
Sunil Kishore Chakrapani, Vinay Dayal, and Daniel J. Barnard	
Section E. Laser/Optical Based Ultrasonics	
Measurement of depth of surface cracks in concrete by laser ultrasonic technique with multichannel detector	317
S. Kurahashi, Y. Shimada, O. Kotyaev, T. Norimatsu, Y. Kono, S. Nakata, and M. Ishii	
Laser generation and detection for surface wave interaction with different defect geometries	324
F. Hernández-Valle, R. S. Edwards, A. R. Clough, M. H. Rosli, and B. Dutton	
Developments in signal processing and interpretation in laser tapping	330
M. Perton, C. Neron, A. Blouin, and J.-P. Monchalin	
Optical generation of high amplitude laser generated surface acoustic waves	337
Bradley Sherman and Oluwaseyi Balogun	
Laser shockwave technique for characterization of nuclear fuel plate interfaces	345
M. Perton, D. Lévesque, J.-P. Monchalin, M. Lord, J. A. Smith, and B. H. Rabin	
Robotic laser-ultrasonic inspection of composites	353
C. Néron, C. Padioleau, A. Blouin, and J.-P. Monchalin	
Optical detection of ultrasound using an apertureless near-field scanning optical microscopy system	360
Phillip Ahn, Zhen Zhang, Cheng Sun, and Oluwaseyi Balogun	
Detection of open and partially closed surface defects in plates using ultrasonic enhancement	367
A. R. Clough and R. S. Edwards	
Optical excitation of narrowband Rayleigh surface waves for second harmonic generation	375
C. B. Swacek, J.-Y. Kim, and L. J. Jacobs	

Section F. Coda Waves

Stress- and damage-induced changes in coda wave velocities in concrete P. Shokouhi	382
Influence of small temperature variations on the ultrasonic velocity in concrete E. Niederleithinger and C. Wunderlich	390
Study of concrete's behavior under 4-point bending load using Coda Wave Interferometry (CWI) analysis Y. Zhang, O. Abraham, X. Chapeleau, L.-M. Cottineau, V. Tournat, A. Le Duff, B. Lascoup, and O. Durand	398
LOCADIFF: Locating a weak change with diffuse ultrasound Thomas Planès, Eric Larose, Vincent Rossetto, and Ludovic Margerin	405
Physical relation between coda wave analysis and fabric change in multiphase, granular material Frank Wuttke	412
Numerical simulation and analytical solution for plane waves focused by a parabolic reflector Y. T. Tsai, M. R. Haberman, and J. Zhu	421

CHAPTER 2

ELECTROMAGNETICS, THERMOGRAPHICS, AND THERMOSONICS

Section A. Eddy Current—Mostly Modeling

Eddy current mapping inside a plane conductor with flaws A. Lopes Ribeiro, H. Geirinhas Ramos, D. J. Pasadas, and T. J. Rocha	428
Modeling and simulation of crack detection for underwater structures using an ACFM method Wei Li, Guoming Chen, Xiaokang Yin, Chuanrong Zhang, and Tao Liu	436
BEM modeling for ECT simulation of complex narrow cracks in multilayered structures R. Miorelli, C. Reboud, T. Theodoulidis, and D. Lesselier	441

Investigation of acoustic fields generated by eddy currents using an atomic force microscope	449
V. Nalladega, S. Sathish, and M. Blodgett	
Role of varying interface conditions on the eddy current response from cracks in multilayer structures	456
Aaron Cherry, Jeremy Knopp, John C. Aldrin, Harold A. Sabbagh, Thomas Boehnlein, and Ryan Mooers	
Section B. Eddy Current—Techniques and Probes	
Eddy current NDE performance demonstrations using simulation tools	464
L. Maurice, V. Costan, E. Guillot, and P. Thomas	
Saturated low frequency eddy current technique applied to phases characterization in duplex stainless steel	472
J. M. A. Rebello, C. G. Camerini, M. C. Areiza, R. O. Carneval, and R. W. F. Santos	
Low frequency EC-GMR detection of cracks at ferromagnetic fastener sites in thick layered structure	480
G. Yang, A. Tamburrino, Z. Zeng, Y. Deng, X. Liu, L. Udpa, and S. S. Udpa	
Development of flexible array eddy current probes for complex geometries and inspection of magnetic parts using magnetic sensors	488
B. Marchand, J.-M. Decitre, N. Sergeeva-Chollet, and A. Skarlatos	
Finite element modeling of magnetic bias eddy current probe interaction with ferromagnetic materials	494
J. Lei	
Eddy current imager based on bobbin-type Hall sensor arrays for nondestructive evaluation in small-bore piping system	502
Jongwoo Jun, Jinyi Lee, Jungmin Kim, Minhuy Le, and Sehoon Lee	
Section C. Thermographics and Thermosonics	
The application of finite element analysis to investigate the vibrational response of a turbine blade under thermosonic excitation	510
Gabriel Bolu, Anthony Gachagan, Gareth Pierce, and Tim Barden	

Improvements on FEA with a two-step simulation of experimental procedures in turbine blade crack detection in sonic IR NDE Ding Zhang, Xiaoyan Han, Golam Newaz, Lawrence D. Favro, and Robert L. Thomas	518
Damage threshold study of sonic IR imaging on carbon-fiber reinforced laminated composite materials Xiaoyan Han, Qi He, Ding Zhang, Mike Ashbaugh, Lawrence D. Favro, Golam Newaz, and Robert L. Thomas	525
Study the effect of engagement force of ultrasound transducer on crack detectability in sonic IR imaging Xiaoyan Han and Yuyang Song	532
Simulations and measurements of artificial cracks and pits in flat stainless steel plates using tone burst eddy-current thermography (TBET) M. N. Libin, Krishnan Balasubramaniam, B. W. Maxfield, and C. V. Krishnamurthy	539
Prospects of pulse phase thermography for finding disbonds in CFRP-sandwich parts with aluminum honeycomb cores compared to ultrasonic J. Gruber, B. Stotter, G. Mayr, and G. Hendorfer	547
Passive and active thermography for in situ damage monitoring in woven composites during mechanical testing J.-M. Roche, D. Balageas, B. Lamboul, G. Bai, F. Passilly, A. Mavel, and G. Grail	555
A fast lock-in infrared thermography implementation to detect defects in composite structures like wind turbine blades Arun Manohar and Francesco Lanza di Scalea	563
Transient thermography testing of unpainted thermal barrier coating surfaces Grzegorz Ptaszek, Peter Cawley, Darryl Almond, and Simon Pickering	571
Induction thermography for non-destructive evaluation of adhesive bonds L. Balaji, Krishnan Balasubramaniam, and C. V. Krishnamurthy	579
Real view thermography L. Bienkowski and C. Homma	587

Section D. X-Ray CT and Terahertz NDE

High resolution X-ray micro-CT of ultra-thin wall space components D. J. Roth, R. W. Rauser, R. R. Bowman, P. J. Bonacuse, R. E. Martin, I. E. Locci, and M. Kelley	595
Influence of terahertz waves on the fiber direction of CFRP composite laminates Kwang-Hee Im, David K. Hsu, Chien-Ping Chiou, Daniel J. Barnard, In-Young Yang, and Je-Woong Park	604

CHAPTER 3

SIGNAL PROCESSING, DEFECT DETECTION AND SIZING

Section A. Signal Processing

Design of advanced automatic inspection system for turbine blade FPI analysis J. Zheng, W. F. Xie, M. Viens, L. Birglen, and I. Mantegh	612
Probabilistic fatigue life prediction using ultrasonic inspection data considering equivalent initial flaw size uncertainty X. Guan, J. Zhang, K. Kadau, and S. K. Zhou	620
Lamb wave mode decomposition using annular transducers and quadrature signals Alexander J. Dawson and Jennifer E. Michaels	628
Estimation of guided wave scattering matrices from spatially distributed transducer arrays (poster winner) Xin Chen, Jennifer E. Michaels, and Thomas E. Michaels	636
GPU based numerical modeling for eddy current non-destructive evaluation Naiguang Lei, Lalita Udpa, and Satish Udpa	644
Storage strategies of eddy-current FE-BI model for GPU implementation Charles Bardel, Naiguang Lei, and Lalita Udpa	651
Pulsed terahertz inspection of non-conducting sandwich composites P. Lopato and T. Chady	659

Section B. Defect Detection

- Detection of plate components defects by surface wave based on transducer arrays**
Zhao Liu, Fanwu Meng, Chunguang Xu, Xipeng Li, Shiyuan Zhou, and Dingguo Xiao 667
- Parametrical study of flaw detection in polycrystalline materials by reducing the multiple scattering contribution**
S. Shahjahan, A. Aubry, F. Rupin, B. Chassignole, and A. Derode 675
- Multi-level damage detection with nonlinear ultrasonic methods (poster winner)**
Kathryn H. Matlack, Jin-Yeon Kim, Laurence J. Jacobs, and Jianmin Qu 683

Section C. Imaging, Tomography, and Reconstruction

- Evolution of image processing methods for pulsed thermal imaging**
J. G. Sun 691
- Enhanced image processing methods for GMR array inspections of multilayer metallic structures**
John C. Aldrin, Doyle Motes, David S. Forsyth, and Gary Steffes 699
- Multi-path guided wave imaging for *in situ* monitoring of complex structures**
James S. Hall and Jennifer E. Michaels 707
- Ultrasonic quantitative imaging with limited view arrays**
P. Huthwaite, F. Simonetti, and M. J. S. Lowe 714
- Ultrasonic multi-skip tomography for pipe inspection**
Arno Volker and Tim van Zon 722
- High resolution guided wave tomography**
P. Huthwaite, R. Ribichini, F. Simonetti, P. Cawley, and M. J. S. Lowe 729
- Guided wave travel time tomography for bends**
Arno Volker and Tim van Zon 737

Annular plate inspection using guided wave tomography Arno Volker and Rik Vos	745
Inversion of tone burst eddy current thermography data for defect sizing - A simulation study N. Biju, N. Ganesan, C. V. Krishnamurthy, and Krishnan Balasubramaniam	753
Numerical analysis of angular defects in bent plates using tone burst eddy-current thermography (TBET) M. N. Libin, Krishnan Balasubramaniam, and B. W. Maxfield	761
Progress in defect quantification in multi-layered structures using ultrasonic inspection Josiah Dierken, John C. Aldrin, Robert Holec, Michael LaCivita, Joshua Shearer, and Eric Lindgren	769
GPU implementation of simultaneous iterative reconstruction techniques for computed tomography Junjun Xin, Chuck Bardel, Lalita Udpa, and Satish Udpa	777
Amplitude-independent flaw length determination using differential eddy current E. Shell	785

CHAPTER 4

ULTRASONIC PHASED ARRAYS AND ULTRASONIC TRANSDUCERS

Section A. Phased Arrays

New designs of ultrasonic 2D array probes F. Reverdy, P. Calmon, G. Ithurralde, and N. Dominguez	793
Design by simulation of the UT array inspection of a nozzle with a flexible probe: Definition of 3D trajectories and focusing parameters A. Vanhoye, O. Casula, and D. Moussebois	801
Surface-Adaptive Ultrasound (SAUL) for phased-array inspection of composite specimens with curved edges and complex geometry D. L. Hopkins, M. Brassard, G. A. Neau, Jean-Noel Noiret, W. V. Johnson, and L. Le Ber	809

NDT process using Lamb waves generated/detected by ultrasonic phased array probes for the defect detection in metallic and composite plates	
A. Leleux, P. Micheau, and M. Castaings	817
Comparison of ultrasonic array imaging algorithms for non-destructive evaluation	
J. Zhang, B. W. Drinkwater, and P. D. Wilcox	825
Phased array ultrasonic processing for enhanced and affordable diagnosis	
N. Dominguez, G. Rougeron, S. Leberre, and R. Pautel	833
Defects detection in thin components using two-dimensional ultrasonic arrays	
A. Velichko, P. D. Wilcox, and B. W. Drinkwater	841
Characterization of inhomogeneous and anisotropic steel welds by ultrasonic array measurements	
Z. Fan and M. J. S. Lowe	849
Noise filtering in the total focusing method by decomposition of the time reversal operator and the virtual array approach	
S. Bannouf, S. Robert, O. Casula, and C. Prada	857
A new speckle noise suppression technique using cross-correlation of array sub-apertures in ultrasonic NDE of coarse grain materials	
T. Lardner, M. Li, R. Gongzhang, and A. Gachagan	865
Forming non-diffracting beams using a 2D matrix phased array probe	
J. Menges and J. Bamberg	872
Root crack sizing using phased array inspections and autoregressive spectral extrapolation signal processing	
J. Caldwell, B. Shakibi, M. Moles, and A. N. Sinclair	879
Rail weld inspection using phased array ultrasonics	
Girish N. Namboodiri, Krishnan Balasubramaniam, T. Balasubramanian, Jerry James, and Sriharsha	887
Equivalent flaw time-of-flight diffraction sizing with ultrasonic phased arrays	
Brady J. Engle, Lester W. Schmerr, Jr., and Alexander Sedov	895

Section B. Ultrasonic Transducers

New developments in EMAT techniques for surface inspection H. Gao, S. Ali, B. Lopez, and P. Lopez	902
Mode conversion of torsional waves generated by electromagnetic acoustic transducer Nurmalia, N. Nakamura, H. Ogi, and M. Hirao	909
Design and some practical applications of ultrasonic transducers with axicon lenses P. Katchadjian, C. Desimone, and A. Garcia	916
Pencil beam generation from a focused transducer M. Melo Mota, P. L. M. J. van Neer, and A. Volker	924
Transducer pressure waveform and signal on screen simulation: Part 1 Yoshio Udagawa and Guy Reim	932
Transducer pressure waveform and signal on screen simulation: Part 2 Yoshio Udagawa and Guy Reim	937

PART B

CHAPTER 5

ENGINEERED MATERIALS

Section A. Fibrous Composites

Microcracking in composite laminates: Simulation of crack-induced ultrasound attenuation C. A. C. Leckey, M. D. Rogge, and F. R. Parker	947
Modeling the effects of beam size and flaw morphology on ultrasonic pulse/echo sizing of delaminations in carbon composites Frank J. Margetan, Cara A. Leckey, and Dan Barnard	955
Local guided wavefield analysis for characterization of delaminations in composites M. D. Rogge and C. A. C. Leckey	963

Micro-crack ultrasound scattering in anisotropic composite laminates R. A. Roberts	971
Computational modeling of micro-crack induced attenuation in CFRP composites R. A. Roberts and C. A. C. Leckey	979
Damage characterization of carbon/epoxy laminates using compression-after-impact (CAI) and ultrasonic NDE A. Subramanian, V. Dayal, and D. J. Barnard	987
Ultrasonic assessment of bonding integrity in foam-based hybrid composite materials M. Y. Chen, R. T. Ko, W. C. Hoppe, and J. L. Blackshire	995
Impact damage detection in sandwich composite structures using Lamb waves and laser vibrometry B. Lamboul, B. Passilly, J.-M. Roche, and D. Osmont	1003
Characterization of delaminations and transverse matrix cracks in composite laminates using multiple-angle ultrasonic inspection Patrick H. Johnston, Chelsea D. Appleget, and Michael T. Odarczenko	1011
Effective dynamic moduli and density of fiber-reinforced composites Mihai Caleap, Bruce W. Drinkwater, and Paul D. Wilcox	1019
Quantitative ultrasonic guided wave testing of composites B. Boro Djordjevic	1028
Inspection and evaluation of dry fibers in thick composites Vinay Dayal, Sunil Kishore Chakrapani, and Daniel Barnard	1036
Section B. NDE for Welds	
A comparative study of ray tracing and CIVA simulation for ultrasonic examination of anisotropic inhomogeneous austenitic welds S. R. Kolkoori, P. Shokouhi, C. Hoehne, M.-U. Rahman, M. Kreutzbruck, and J. Prager	1043
Ultrasonic imaging of welds using boundary reflections L. Hörchens, X. Deleye, and K. Chougrani	1051

A new application of laser vibrometric wave field propagation measurements: Grain structure visualization B. Köhler, M. Barth, and F. Schubert	1059
Inspection of laser welds with array eddy current technique E. Todorov, B. Nagy, S. Levesque, N. Ames, and J. Na	1065
Evaluation of ray-based methods for the simulation of UT welds inspection K. Jezzine, A. Gardahaut, N. Leymarie, and S. Chatillon	1073
Ultrasonic beam focusing on a defect in anisotropic inhomogeneous media Hyunjo Jeong and Sungjong Cho	1081
Sensitivity analysis of an ultrasonic inspection of a weld structure simulated with the finite element code ATHENA2D F. Rupin, G. Blatman, S. Lacaze, and T. Fouquet	1089
New international Program to Assess the Reliability of Emerging Nondestructive Techniques (PARENT) Iouri Prokofiev, Stephen E. Cumblidge, Aladar A. Csontos, Brett G. Braatz, and Steven R. Doctor	1097
The software application and classification algorithms for welds radiograms analysis R. Sikora, T. Chady, P. Baniukiewicz, B. Grzywacz, P. Lopato, L. Misztal, L. Napierała, B. Piekarczyk, T. Pietrusewicz, and G. Psuj	1104
New requirements for digital radiographic testing of welds according to ISO standards U. Zscherpel, U. Ewert, and M. Jechow	1112
Ultrasonic C-scan evaluation of Ti-alloy/Al brazed joint G. V. S. Murthy and G. Sridhar	1120
Section C. Coatings	
Non-destructive evaluation of degradation in EB-PVD thermal barrier coatings by infrared reflectance spectroscopy Richard Y. Flattum and Adam T. Cooney	1125

CHAPTER 6
MATERIALS CHARACTERIZATION
Section A. Properties and Microstructure

Focused acoustic beam imaging of grain structure and local Young's modulus with Rayleigh and surface skimming longitudinal waves R. W. Martin, S. Sathish, and M. P. Blodgett	1133
Measurement of elastic constants of a thin metal sheet with guided waves based EMAT system Dong Jin Lee, Younho Cho, and Bongyoung Ahn	1139
Quantitative assessment of thermal diffusion using NDE C. T. Howard, E. A. Pfeif, J. M. Porter, B. Mishra, and D. L. Olson	1143
Modeling ultrasonic noise and attenuation in elongated duplex polycrystalline materials V. Dorval, L. Ganjehi, S. Chatillon, and F. Jenson	1150
Characterization and modeling of ultrasonic structural noise in the multiple scattering regime T. Bedetti, V. Dorval, F. Jenson, and A. Derode	1158
Reconstruction of temperature distribution in a steel block using an ultrasonic sensor array A. Gajdacs, A. J. C. Jarvis, and F. B. Cegla	1166
Simple measurement of electromagnetic properties of steel in the Rayleigh domain J. I. Etcheverry and G. A. Sánchez	1174
Characterization of the magnetic micro- and nanostructure in unalloyed steels by magnetic force microscopy L. Batista, U. Rabe, and S. Hirsekorn	1180
Evaluation of microstructural damage and alteration of polytypes to determine the aging of silicon carbide T. W. Koenig, L. Meshi, Z. Foxman, J. L. Riesterer, J. R. Kennedy, A. Landau, B. Mishra, and D. L. Olson	1188

Section B. Plastic Deformation and Fatigue Damage

Regulation of residual stress in elastic solid component with high-energy acoustic field	
W. T. Song, C. G. Xu, Q. X. Pan, X. C. Yang, L. Xu, and J. Guo	1196
Detecting plastic strain distribution by a nonlinear wave mixing method	
Guangxin Tang, Minghe Liu, Laurence J. Jacobs, and Jianmin Qu	1204
Improving practical nonlinear measurements by modeling of the ultrasonic field	
S. R. Best, A. J. Croxford, and S. A. Neild	1212
Effects of cold work on near-surface conductivity profiles in laser shock peened and shot peened nickel-base superalloy	
T. J. Lesthaeghe, B. F. Larson, R. Chandrasekar, A. M. Frishman, C. C. H. Lo, and N. Nakagawa	1219
Noncontact nonlinear resonant ultrasound spectroscopy to evaluate creep damage in an austenitic stainless steel	
T. Ohtani, Y. Kusanagi, and Y. Ishii	1227
Nonlinear acoustic measurements ahead of a notch during fatigue	
R. W. Martin, R. D. Mooers, A. L. Hutson, S. Sathish, and M. P. Blodgett	1234
Pre-crack fatigue life assessment of relevant aircraft materials using fractal analysis of eddy current test data	
Jürgen Schreiber, Ulana Cikalova, Susanne Hillmann, Norbert Meyendorf, and Jochen Hoffmann	1242
Ultrasonic absorption in fatigued materials	
S. Dugan and W. Arnold	1250

Section C. Corrosion and Stress Corrosion Cracking

Computational modeling to enhance NDE experimental assessment of high temperature corrosion damage of near surface furnace/reactor structural material	
W. Alharbi, G. D. Meegan, B. Mishra, and D. L. Olson	1258

NDE evaluation of the intergranular corrosion susceptibility of a 2205 duplex stainless steel using thermoelectric power and double loop electrochemical potentiokinetic reactivation methods	1264
N. Ortiz, H. Carreón, and A. Ruiz	
Could non-destructive methodologies enhance the microbiologically influenced corrosion (MIC) in pipeline systems?	1270
F. Al-Abbas, A. Kakpovbia, B. Mishra, D. Olson, and J. Spear	
Eddy current measurement system evaluation for corrosion depth determination on cast aluminum aircraft structure	1278
Surendra Singh, Dan Greving, Andy Kinney, Fred Vensel, Jim Ohm, and Mike Peeler	
Characterization of damage due to stress corrosion cracking in carbon steel using nonlinear surface acoustic waves (poster winner)	1286
D. T. Zeitvogel, K. H. Matlack, J.-Y. Kim, L. J. Jacobs, P. M. Singh, and J. Qu	
Section D. Civil Materials and Structures—Mostly Concrete	
Air-coupled detection of the S1-ZGV lamb mode in a concrete plate based on backward wave propagation	1294
H. Bjurström and N. Ryden	
Nondestructive evaluation of the complex modulus master curve of asphalt concrete specimens	1301
A. Gudmarsson, N. Ryden, and B. Birgisson	
Evaluation of near surface material degradation in concrete using nonlinear Rayleigh surface waves	1309
J. Gross, J.-Y. Kim, L. J. Jacobs, K. E. Kurtis, and J. Qu	
Ultrasonic slow dynamics to probe concrete aging and damage	1317
E. Larose, N. Tremblay, C. Payan, V. Garnier, and V. Rossetto	
A chemo-mechanical model for the acoustic nonlinearity change in concrete with alkali-silica reactions	1325
M. Liu, L. J. Jacobs, and J. Qu	

Understanding the impulse response method applied to concrete bridge decks	
D. J. Clem, J. S. Popovics, T. Schumacher, T. Oh, S. Ham, and D. Wu	1333
Ground penetrating radar applied to rebar corrosion inspection	
David Eisenmann, Frank Margetan, Chien-Ping T. Chiou, Ron Roberts, and Scott Wendt	1341
Eddy current inspection of concrete embedded steel elements	
G. V. Minesawa, E. Sasaki, C. Miki, K. Kozaki, and K. Suzuki	1349
Electromagnetic evaluation of reinforced concrete structure	
T. Chady and P. Frankowski	1355
Development of seismology-based acoustic emission methods for civil infrastructure applications	
L. Mhamdi, T. Schumacher, and L. Linzer	1363
Evaluation of eddy current and magnetic techniques for inspecting rebars in bridge barrier rails	
C. C. H. Lo and N. Nakagawa	1371
Acoustic emission source mechanisms for steel bridge material	
M. Hossain, J. Yu, P. Ziehl, J. Caicedo, F. Matta, S. Guo, and M. Sutton	1378
Non-invasive means of detecting subterranean border crossing tunnels	
Philip M. Kani and Ronald A. Kline	1385

CHAPTER 7

NEW TECHNIQUES, SENSORS, SYSTEMS, AND SYSTEMS

FOR NUCLEAR REACTORS

Section A. New Techniques

Models for process compensated resonant testing (PCRT) of silicon nitride balls	
John C. Aldrin, Leanne Jauriqui, and Lem Hunter	1393
Graphics processing unit (GPU)-based computation of heat conduction in thermally anisotropic solids	
C. A. Nahas, Krishnan Balasubramaniam, and Prabhu Rajagopal	1401

Ultrasonic NDE of titanium diffusion bonds using signal phase E. Escobar-Ruiz, P. Cawley, P. B. Nagy, I. Collison, and D. Wright	1409
Guided wave propagation study in an ACSR cable with artificial damage R. Mijarez and A. Baltazar	1417
Inspection of helicopter rotor blades with the help of guided waves and "turning modes": Experimental and finite element analysis Daniel Barnard, Sunil Kishore Chakrapani, and Vinay Dayal	1425
Ultrasonic monitoring of pitting corrosion A. J. C. Jarvis, F. B. Cegla, H. Bazaz, and M. Lozev	1433
Real time monitoring of electroless nickel plating Aaron E. Rains and Ronald A. Kline	1441
Ultrasonic measurements of velocity for modulus assessment of a material using a delay line approach R. T. Ko, M. Y. Chen, W. C. Hoppe, and J. L. Blackshire	1446
Ultrasonic scatterer detection in a pipe under operating conditions using singular value decomposition Chang Liu, Joel B. Harley, Nicholas O'Donoghue, Yujie Ying, Mario Bergés, Martin H. Altschul, James H. Garrett, Jr., David Greve, José M. F. Moura, Irving J. Oppenheim, and Lucio Soibelman	1454
Nonlinear acoustic effects in multilayer ceramic capacitors W. L. Johnson, S. A. Kim, T. P. Quinn, and G. S. White	1462
High resolution mechano-optical method for acoustic field measurements in air J. T. Welter, S. Sathish, M. R. Cherry, and P. G. Brodrick	1470
Moisture content monitoring in a high-pressure gasket material using an RF method G. Bogdanov, J. Wiggins, K. Bertagnolli, and R. Ludwig	1474
Hall coefficient measurement for nondestructive materials characterization Peter B. Nagy	1482

Faraday induction effect applied to the detection of defects in a moving plate	
H. G. Ramos, T. Rocha, D. Pasadas, and A. L. Ribeiro	1490
Magnetic flux leakage: Experimental and numerical study of the influence of induced currents	
J. I. Etcheverry, D. H. Ziella, and G. A. Sánchez	1498
Nondestructive thermoelectric evaluation of the grit blasting induced effects in metallic biomaterials	
H. Carreon, A. Ruiz, S. Barriuso, J. L. González-Carrasco, F. G. Caballero, and M. Lieblich	1504
Section B. New Sensors	
A plate waveguide design for ultrasonic flow measurements in hostile environments	
M. Laws, S. N. Ramadas, and S. Dixon	1512
Ultrasonic waveguide transducer for high temperature testing of ceramic honeycomb	
N. Wang, C. P. An, S. T. Nickerson, N. Gunasekaran, and Z. Shi	1518
Development of a novel ultrasonic temperature probe for long-term monitoring of dry cask storage systems	
S. Bakhtiari, K. Wang, T. W. Elmer, E. Koehl, and A. C. Raptis	1526
Ferroelectret transducers for air-coupled ultrasonic testing of fiber-reinforced polymers	
M. Gaal, J. Döring, J. Bartusch, T. Lange, W. Hillger, G. Brekow, and M. Kreutzbruck	1534
A resonance-free nano-film airborne ultrasound emitter	
Maxim Daschewski, Andrea Harrer, Jens Prager, Marc Kreutzbruck, Uwe Beck, Thorid Lange, and Matthias Weise	1541
Electromagnetic characterization of metallic sensory alloy	
Buzz Wincheski, John Simpson, Terryl Wallace, Andy Newman, Paul Leser, and Rob Lahue	1547
Evaluation of an electric field sensor for nondestructive material inspection	
Kayatri Kalyanasundaram and Kavitha Arunachalam	1555

GMR sensing array technique validation study for the inspection of multi-layer metallic structures Doyle Motes, John C. Aldrin, Mark Keiser, Gary Steffes, and David S. Forsyth	1562
Pressure effects on the temperature sensitivity of fiber Bragg gratings Meng-Chou Wu	1570
An interdigital capacitive sensor for quantitative characterization of wire insulation Robert T. Sheldon and Nicola Bowler	1578
Design and characterization of planar capacitive imaging probe based on the measurement sensitivity distribution X. Yin, G. Chen, W. Li, and D. A. Huthchins	1586
Design of interdigital spiral and concentric capacitive sensors for materials evaluation Tianming Chen and Nicola Bowler	1593
Bio-inspired sensory membrane: Fabrication processes for full-scale implementation H. Saleem, M. Thunga, M. Kollosche, M. R. Kessler, and S. Laflamme	1601
Section C. New NDE Systems	
A wireless data acquisition system for acoustic emission testing A. T. Zimmerman and J. P. Lynch	1609
Ultrasonic inspection of rocket fuel model using laminated transducer and multi-channel step pulser T. Mihara, T. Hamajima, H. Tashiro, and A. Sato	1617
Instrumentation development for electrical conductivity imaging in polycrystalline diamond cutters G. Bogdanov, J. Wiggins, J. Rhodes, K. Bertagnolli, and R. Ludwig	1623
Portable automated imaging in complex ceramics with a microwave interference scanning system Ryan M. Goitia, Karl F. Schmidt, Jack R. Little, William A. Ellingson, William Green, and Lisa P. Franks	1631

Vector magnetic field camera for permanent magnets inspection T. Chady, G. Psuj, T. Todaka, and M. Enokizono	1638
Evaluation of an automatic system for detection and positioning of small pore defects using digital radiography Erik Lindgren and Lars Hammar	1646
Advances in inspection automation Walter H. Weber, H. Douglas Mair, Dion Jansen, and Luciano Lombardi	1654
Section D. New NDE Systems for Nuclear Reactors	
Qualification requirements of guided ultrasonic waves for inspection of piping in light water reactors R. M. Meyer, P. Ramuhalli, S. R. Doctor, and L. J. Bond	1662
Performance test of a plate-type ultrasonic waveguide sensor in sodium Young-Sang Joo, Jin-Ho Bae, Hoe-Woong Kim, and Jong-Bum Kim	1670
Selecting a radiation tolerant piezoelectric material for nuclear reactor applications D. A. Parks, B. T. Reinhardt, and B. R. Tittmann	1678
Fabrication and modeling of bismuth titanate-PZT ceramic transducers for high temperature applications B. Reinhardt, C. Searfass, R. Cyphers, K. Sinding, C. Pheil, and B. Tittmann	1685
Simplified modeling of liquid sodium medium with temperature and velocity gradient using real thermal-hydraulic data. Application to ultrasonic thermometry in sodium fast reactor N. Massaret, J. Moysan, M. A. Ploix, J. P. Jeannot, and G. Corneloup	1693
Optical fiber technique for in-reactor mechanical properties measurement R. S. Schley, D. H. Hurley, and Z. A. Hua	1701
Use of first order reversal curve measurements to understand Barkhausen noise emission in nuclear steel J. S. McCloy, Pradeep Ramuhalli, and Charles Henager, Jr.	1709
A Bayesian quantitative nondestructive evaluation (QNDE) approach to estimating remaining life of aging pressure vessels and piping J. T. Fong, W. F. Guthrie, J. J. Filliben, and N. A. Heckert,	1717

CHAPTER 8
POD AND RELIABILITY, BENCHMARKING, AND CHALLENGES
Section A. POD and Reliability

Methods for planning a statistical POD study Y.-M. Koh and W. Q. Meeker	1725
Bayesian methods in probability of detection estimation and model-assisted probability of detection evaluation John C. Aldrin, Jeremy S. Knopp, and Harold A. Sabbagh	1733
A Bayesian approach for the determination of POD curves from empirical data merged with simulation results F. Jenson, N. Dominguez, P. Willaume, and T. Yalamas	1741
A new approach of confidence in POD determination using simulation N. Dominguez, C. Reboud, A. Dubois, and F. Jenson	1749
Stochastic collocation method for higher dimensional NDE problems with tensor product grids M. R. Cherry and J. S. Knopp	1757
Stochastic-integral models for propagation-of-uncertainty problems in nondestructive evaluation Elias H. Sabbagh, R. Kim Murphy, Harold A. Sabbagh, John C. Aldrin, Jeremy Knopp, and Mark P. Blodgett	1765
Data registration for automated non-destructive inspection with multiple data sets T. Tippetts, N. Brierley, and P. Cawley	1773
Data fusion for improving the reliability of automated non-destructive inspection N. Brierley, T. Tippetts, and P. Cawley	1781
Metamaterial-inspired miniaturized microwave edge coupled surface scanning probe Nophadon Wiwatcharagoses, Kyoung Y. Park, Premjeet Chahal, and Lalita Udpa	1789
False call rate estimation John C. Aldrin and Jeremy S. Knopp	1795

Thermo-mechanical reliability evaluation for microelectronic packaging using C-mode scanning acoustic microscopy X. H. Guo, C. G. Xu, L. Yang, Z. Z. Liu, X. Y. Zhao, H. B. Wang, and K. Peng	1803
Probability of detection (POD) is not NDT/E reliability Ward D. Rummel	1809
Section B. NDE Benchmarking	
Ultrasonic flaw sizing - An overview Lester W. Schmerr Jr., Brady J. Engle, Alexander Sedov, and Xiongbing Li	1817
Numerical results for the WFNDEC 2012 eddy current benchmark problem T. P. Theodoulidis, J. Martinos, and N. Poulakis	1825
2012 eddy current benchmark modeling of impedance variation in coil due to a thin longitudinal through-wall notch in an inconel 600 tube João Marcos Rebello, Cesar Camerini, João Vicente Rocha, and Maria Cristina Areiza	1831
Section C. NDE Challenges	
USAF perspective on foundational challenges for enhanced damage sensing E. A. Lindgren and D. Stargel	1839
Attendees List	1847
Author Index	1867
Subject Index	1877
