Solar Wind 13
Proceedings of the Thirteenth International Solar Wind Conference
Table of Contents

Preface: Solar Wind 13 G. P. Zank	1
 CATEGORY 1: PHYSICS OF THE CORONA, ORIGIN AND ACCELERATION OF THE SOLAR WIND, AND RELEVANT OBSERVATIONS OF THE SUN Invited Talks 	
Observations of CMEs and models of the eruptive corona Nat Gopalswamy	5
 Contributed Talks 	
Modeling the corona and solar wind using ADAPT maps that include far-side observations C. Nick Arge, Carl J. Henney, Irene Gonzalez Hernandez, W. Alex Toussaint, Josef Koller, and Humberto C. Godinez	11
Solar wind ion observations: Comparison from the depths of solar minimum to the rising of the cycle A. B. Galvin, K. D.C. Simunac, L. K. Jian, C. J. Farrugia, and M. A. Popecki	15
Remote sensing of low-energy SEPs via charge exchange H. S. Hudson, A. L. MacKinnon, and N. R. Badnell	19
Kinetic models of fast solar wind driven by imbalanced ion cyclotron dissipation Philip A. Isenberg and Bernard J. Vasquez	22
Coronal and heliospheric modeling using flux-evolved maps Jon A. Linker, Zoran Mikić, Pete Riley, Cooper Downs, Roberto Lionello, Carl Henney, and Charles N. Arge	26
Integrating physics-based coronal heating and solar wind acceleration in a global MHD model Roberto Lionello, Marco Velli, Jon A. Linker, and Zoran Mikić	30
The effect of broad-band Alfvén-cyclotron waves spectra on the preferential heating and differential acceleration of He⁺⁺ ions in the solar wind Y. G. Maneva, L. Ofman, and A. F. Viñas	34
Connecting the photosphere and the solar wind Takuma Matsumoto and Takeru Ken Suzuki	38

The challenge in making models of fast CMEs Zoran Mikić, Tibor Török, Viacheslav Titov, Jon A. Linker, Roberto Lionello, Cooper Downs, and Pete Riley	42
Double-proton beams and magnetic switchbacks in the solar wind Marcia Neugebauer and Bruce E. Goldstein	46
Coronal pseudostreamers: Source of fast or slow solar wind? Olga Panasenco and Marco Velli	50
Expansion effects on solar wind hybrid simulations Tulasi N. Parashar, Marco Velli, and Bruce E. Goldstein	54
Coupling the solar surface and the corona: Coronal rotation, Alfvén wave-driven polar plumes R. F. Pinto, R. Grappin, M. Velli, and A. Verdini	58
An upper limit to the solar wind mass loading by X-ray polar jets Stefano Pucci, Giannina Poletto, Alphonse C. Sterling, and Marco Romoli	62
Multi-spacecraft observations of the heliospheric plasma sheet K. D. C. Simunac, A. B. Galvin, C. J. Farrugia, Y. C.-M. Liu, and J. G. Luhmann	66
Detection of collapsing Langmuir wave packets in solar type III radio bursts G. Thejappa, R. J. MacDowall, and M. Bergamo	70
Building small scales in MHD turbulence A. Verdini, R. Grappin, R. Pinto, and M. Velli	74
Modelling of the beam-plasma interaction in a strongly inhomogeneous plasma Aleksander Volokitin, Vladimir Krasnoselskikh, Catherine Krafft, and Evgenii Kuznetsov	78
Alfvén wave mixing in the solar wind G. M. Webb, J. F. McKenzie, G. P. Zank, and Q. Hu	82
Suprathermal particles in magnetic clouds Robert F. Wimmer-Schweingruber, Lars Berger, and George Gloeckler	86
The analysis of polar jet responses using images from the LASCO C2 and STEREO COR 2 coronagraphs H.-S. Yu, B. V. Jackson, J. M. Clover, and A. Buffington	90
Solar wind proton flux extremes and their association with pseudostreamers Liang Zhao, Sarah E. Gibson, and Lennard A. Fisk	94

CATEGORY 2: DYNAMICAL BEHAVIOR OF THE INTERPLANETARY MEDIUM THROUGHOUT THE HELIOSPHERE, INCLUDING LARGE AND SMALL SCALE STRUCTURES, THE EVOLUTION OF DISTURBANCES, DISSIPATIVE PROCESSES, TURBULENCE, AND SOLAR ENERGETIC PARTICLES

Invited Talks

Overview on numerical studies of reconnection and dissipation in the solar wind S. Donato, S. Servidio, P. Dmitruk, F. Valentini, A. Greco, P. Veltri, M. Wan, M. A. Shay, P. A. Cassak, and W. H. Matthaeus	99
Diffusive shock acceleration and large SEP events G. Li, G. Zank, O. Verkhoglyadova, and L. Ding	105
Large scale solar wind structure: Non-dipolar features and consequences J. G. Luhmann, M. Ellenburg, P. Riley, D. Odstrcil, G. Petrie, E. Kilpua, L. K. Jian, C. T. Russell, K. Simunac, and A. B. Galvin	110
Solar energetic particles and their variability from the sun and beyond R. A. Mewaldt, C. M. S. Cohen, G. M. Mason, T. T. von Rosenvinge, R. A. Leske, J. G. Luhmann, D. Odstrcil, and A. Vourlidas	116
Spectral scaling laws of solar wind fluctuations at 1 AU: Part 1 John J. Podesta	122
Spectral scaling laws of solar wind fluctuations at 1 AU: Part 2 John J. Podesta	126
Contributed Talks	
STEREO interplanetary shocks and foreshocks X. Blanco-Cano, P. Kajdič, E. Aguilar-Rodríguez, C. T. Russell, L. K. Jian, and J. G. Luhmann	131
Recent results on magnetic plasma turbulence Stanislav Boldyrev, Jean Carlos Perez, Joanne Mason, and Fausto Cattaneo	135
³He-rich SEP events observed by STEREO-A R. Bučík, U. Mall, A. Korth, G. M. Mason, and R. Gómez-Herrero	139
Kinetic scale density fluctuations in the solar wind C. H. K. Chen, G. G. Howes, J. W. Bonnell, F. S. Mozer, K. G. Klein, and S. D. Bale	143
The turbulent cascade and proton heating in the solar wind during solar minimum Jesse T. Coburn, Charles W. Smith, Bernard J. Vasquez, Joshua E. Stawarz, and Miriam A. Forman	147
Solar energetic particle characteristics and their dependence on longitude in solar cycle 24 C. M. S. Cohen, G. M. Mason, R. A. Mewaldt, and T. T. von Rosenvinge	151

The transport of low-frequency turbulence in astrophysical flows: Correlation lengths A. Dosch, L. Adhikari, and G. P. Zank	155
Multi-spacecraft observations of magnetic reconnection in the solar wind J. Enžl, L. Přech, J. Šafránková, and Z. Němeček	159
A planar, pressure-balanced, reconnecting structure embedded in a small solar wind transient C. J. Farrugia, W. Yu, A. B. Galvin, B. J. Vasquez, H. Kucharek, N. Lugaz, R. B. Torbert, A. Szabo, R. P. Lin, and K. W. Ogilvie	163
Scaling anisotropy of the power in parallel and perpendicular components of the solar wind magnetic field Miriam A. Forman, Robert T. Wicks, Timothy S. Horbury, and Sean Oughton	167
Alfvénic turbulence generated by the interstellar pickup protons in the outer heliosphere K. Gamayunov, M. Zhang, N. Pogorelov, J. Heerikhuisen, and H. Rassoul	171
A power spectral analysis of turbulence associated with interplanetary shock waves Qiang Hu, Gary P. Zank, Gang Li, and Xianzhi Ao	175
Properties of kinetic Alfvén waves: A comparison of fluid models with kinetic theory P. Hunana, M. L. Goldstein, T. Passot, P. L. Sulem, D. Laveder, and G. P. Zank	179
Kinematics of interplanetary coronal mass ejections in the inner heliosphere Tomoya Iju, Munetoshi Tokumaru, and Ken'ichi Fujiki	183
Self-consistent ion cyclotron anisotropy-beta relation for solar wind protons Philip A. Isenberg, Bennett A. Maruca, and Justin C. Kasper	187
Solar wind observations at STEREO: 2007 - 2011 L. K. Jian, C. T. Russell, J. G. Luhmann, A. B. Galvin, and K. D. C. Simunac	191
Burst mode trigger of STEREO in situ measurements L. K. Jian, C. T. Russell, J. G. Luhmann, D. Curtis, and P. Schroeder	195
Investigation of turbulence transport in the heliosphere L. E. Kahre, N. N. Jetha, and G. P. Zank	199
Electron distributions upstream and downstream of ICME driven IP shocks P. Kajdič, X. Blanco-Cano, A. Opitz, J.-A. Sauvaud, E. Aguilar-Rodriguez, C. T. Russell, J. G. Luhmann, L. K. Jian, A. P. Rouillard, and B. Lavraud	203
Heavy ion properties in ICMEs and signatures of magnetic reconnection in post-CME current sheet Yuan-Kuen Ko, John C. Raymond, Cara Rakowski, and Alexis Rouillard	207
Magnetic field turbulence spectra observed by the wind spacecraft Andriy Koval and Adam Szabo	211

A rogue solar energetic particle event at 0.33 AU: Importance of interplanetary structures in SEP events	215
D. Lario, G. C. Ho, E. C. Roelof, R. B. Decker, and B. J. Anderson	
On the spectral shape of SEP events: An extreme value statistics approach	219
M. Laurenza, G. Consolini, M. Storini, and A. Damiani	
Ensemble modeling of successive halo CMEs observed during 2-4 Aug 2011	223
Christina O. Lee, Charles N. Arge, Dusan Odstrcil, George Millward, and Vic Pizzo	
A survey of anisotropic energetic particle flows observed by STEREO	227
R. A. Leske, C. M. S. Cohen, B. Dotson, R. A. Mewaldt, A. C. Cummings, A. W. Labrador, E. C. Stone, M. E. Wiedenbeck, E. R. Christian, and T. T. von Rosenvinge	
Variation of Langmuir wave polarization with electron beam speed in type III radio bursts	231
David M. Malaspina, Iver H. Cairns, and Robert E. Ergun	
Speed evolution of CME/shocks using multi-spacecraft observations of type II radio bursts: A case study	235
T. Manuel-Hernandez, E. Aguilar-Rodriguez, J. A. Gonzalez-Esparza, and V. Ontiveros	
Magnetic helicity signature produced by cross-field 2D turbulence	239
S. A. Markovskii and Bernard J. Vasquez	
Diffusion in velocity space of solar wind protons exposed to parallel and oblique plasma waves	243
Eckart Marsch and Chuanyi Tu	
Proton temperature anisotropy and current sheet stability: 2-D hybrid simulations	247
Lorenzo Matteini, Simone Landi, Marco Velli, and William H. Matthaeus	
Solar wind fluctuations and the von Kármán–Howarth equations: The role of fourth-order correlations	251
Sean Oughton, Minping Wan, William H. Matthaeus, and Sergio Servidio	
On the variability of He⁺ suprathermal tails	255
M. A. Popecki, B. Klecker, K. D. C. Simunac, A. B. Galvin, and H. Kucharek	
Ensemble modeling of the ambient solar wind	259
Pete Riley, Jon A. Linker, and Zoran Mikić	
Solar wind fluctuations: Not your grandmother's turbulence	263
D. Aaron Roberts	
Multi-spacecraft study of five ICMEs and their shock waves: Helios, IMP-8 and Voyagers observations	267
E. Romero-Hernandez and J. A. Gonzalez-Esparza	

Analysis of multi-dimensional correlation functions in the solar wind Charles W. Smith, Bernard J. Vasquez, and Matthew R. Stenkowski	271
Evolution of global distribution of the solar wind from cycle 23 to the early phase of cycle 24 Munetoshi Tokumaru, Ken'ichi Fujiki, and Masayoshi Kojima	275
Three-fluid MHD solar wind model with eddy viscosity A. V. Usmanov, M. L. Goldstein, and W. H. Matthaeus	279
Magnetic field disturbance in front of a super-sonic toroidal magnetic cloud M. Vandas and E. P. Romashets	283
Dynamics of a toroidal magnetic cloud: A semi-analytic approach M. Vandas and E. P. Romashets	287
Solar wind magnetic field discontinuities and turbulence generated current layers Bernard J. Vasquez, Sergei A. Markovskii, and Charles W. Smith	291
Modeling of radial dependence of Fe/O elemental abundance ratio in mixed SEP events with the PATH code Olga P. Verkhoglyadova, Gang Li, Gary P. Zank, and Xianzhi Ao	295
Quiet-time solar wind superhalo electrons at solar minimum Linghua Wang, Robert P. Lin, Chadi Salem, Marc Pulupa, Davin E. Larson, Peter H. Yoon, and Janet G. Luhmann	299
Temperature anisotropy instabilities; combining plasma and magnetic field data at different distances from the Sun Robert T. Wicks, Lorenzo Matteini, Timothy S. Horbury, Petr Hellinger, and D. Aaron Roberts	303
Solar wind proton temperature anisotropy versus beta inverse correlation Peter H. Yoon and Jungjoon Seough	307
Small solar wind transients: Stereo-A observations in 2009 W. Yu, C. J. Farrugia, A. B. Galvin, K. D. C. Simunac, E. K. J. Kilpua, M. A. Popecki, C. Moestl, N. Lugaz, J. G. Luhmann, A. Opitz, and J. -A. Sauvaud	311
Transport of density fluctuations in the heliosphere G. P. Zank, N. N. Jetha, Q. Hu, and P. Hunana	315
 CATEGORY 3: INTERACTION OF THE SOLAR WIND WITH THE INTERSTELLAR MEDIUM AND THE HELIOSPHERIC BOUNDARIES, AND COSMIC RAYS Invited Talks 	
Connection of the solar wind with the interstellar medium through numerical modeling J. Heerikhuisen, E. Zirnstein, A. D. Kawamura, N. V. Pogorelov, and G. P. Zank	319

Physics derived from IBEX ENA fluxes and direct interstellar neutral measurements David J. McComas	325
--------------------------------------------------------------------------------------------------------------	-----

Contributed Talks

The descent of the solar cycle 24 cosmic ray modulation H. S. Ahluwalia and R. C. Ygbuhay	331
-----------------------------------------------------------------------------------------------------	-----

Preliminary analysis of magnetic waves due to newborn interstellar pickup ions Bradford E. Cannon, Charles W. Smith, Philip A. Isenberg, Bernard J. Vasquez, Colin J. Joyce, Neil Murphy, and Raquel G. Nuno	334
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

The heliosphere—blowing in the interstellar wind Priscilla C. Frisch	338
--------------------------------------------------------------------------------	-----

Near-equilibrium heliosphere - Far-equilibrium heliosheath G. Livadiotis and D. J. McComas	344
------------------------------------------------------------------------------------------------------	-----

Interstellar helium in the heliosphere Hans-Reinhard Müller, Maciej Bzowski, Eberhard Möbius, and Gary P. Zank	348
--------------------------------------------------------------------------------------------------------------------------	-----

Unsteady processes in the vicinity of the heliopause: Are we in the LISM yet? N. V. Pogorelov, S. N. Borovikov, L. F. Burlaga, R. W. Ebert, I. A. Kryukov, S. T. Suess, G. P. Zank, and M. C. Bedford	352
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

Plasma and magnetic fields in the heliosheath John D. Richardson	356
----------------------------------------------------------------------------	-----

Modeling outer heliosphere structures near the heliopause H. Washimi, G. P. Zank, Q. Hu, T. Tanaka, and Y. Kubo	360
---------------------------------------------------------------------------------------------------------------------------	-----

**CATEGORY 4: INTERACTION OF THE SOLAR WIND WITH SOLAR SYSTEM
OBJECTS AND DUSTY ENVIRONMENTS, INCLUDING THE EARTH'S MAGNETOSPHERE,
PLANETS, AND COMETS**

Invited Talks

Using comet plasma tails to study the solar wind B. V. Jackson, A. Buffington, J. M. Clover, P. P. Hick, H. -S. Yu, and M. M. Bisi	364
----------------------------------------------------------------------------------------------------------------------------------------------	-----

What in the solar wind does the earth react to? Ian G. Richardson	370
-----------------------------------------------------------------------------	-----

Role of the solar wind in the structure and dynamics of magnetospheres Vytenis M. Vasyliūnas	376
--------------------------------------------------------------------------------------------------------	-----

Contributed Talks

Analysis of suprathermal proton events observed by STEREO/PLASTIC focusing on the observation of bow shock/magnetospheric events J. A. Barry, A. B. Galvin, M. Popecki, B. Klecker, H. Kucharek, K. Simunac, C. J. Farrugia, J. G. Luhmann, and L. K. Jian	382
Heavy pickup ion w-spectra at 1 AU with SOHO/CELIAS/CTOF L. Berger, C. Drews, A. Taut, and R. F. Wimmer-Schweingruber	386
The influence of corotating interaction regions and high speed streams on electrons in the martian magnetosheath and ionosphere Heather A. Elliott, Rudy A. Frahm, James R. Sharber, Timothy A. Howard, Dusan Odstrčil, Hermann J. Opgenoorth, David Andrew, Olivier Witasse, and Markus Fränz	390
Solar energetic particle arrival at Mars due to the 27 January 2012 solar storm R. A. Frahm, J. R. Sharber, J. D. Winningham, H. A. Elliott, T. A. Howard, C. E. DeForest, D. Odstrčil, E. Kallio, S. McKenna-Lawlor, and S. Barabash	394
The coronal mass ejection interaction with the induced magnetosphere of Mars due to the 27 January 2012 solar storm R. A. Frahm, J. R. Sharber, J. D. Winningham, H. A. Elliott, T. A. Howard, C. E. DeForest, D. Odstrčil, E. Kallio, S. McKenna-Lawlor, and S. Barabash	398
Solar wind plasma profiles during interplanetary field enhancements (IFEs): Consistent with charged-dust pickup H. R. Lai, H. Y. Wei, and C. T. Russell	402
Reconstruction of solar wind features that caused a super geomagnetic storm A. T. Y. Lui and W. D. Gonzalez	406
Kinetic and potential sputtering of lunar regolith: The contribution of the heavy (minority) solar wind ions F. W. Meyer, P. R. Harris, H. M. Meyer III, H. Hijazi, and A. F. Barghouty	410
On the detection of nano dust using spacecraft based boom antennas F. Pantellini, G. Le Chat, S. Belheouane, N. Meyer-Vernet, and A. Zaslavsky	414
Solar wind mass-loading due to dust A. P. Rasca and M. Horányi	418
Solar wind drivers of geomagnetic storms over more than four solar cycles Ian G. Richardson and Hilary V. Cane	422
Near-Earth solar wind flows and geomagnetic activity over more than four solar cycles (1963-2011) Ian G. Richardson and Hilary V. Cane	426

Solar wind charge exchange and Earth's magnetosheath Ina P. Robertson, Thomas E. Cravens, Michael R. Collier, David G. Sibeck, Kip D. Kuntz, and Steven L. Snowden	430
Compressional boundaries in the Earth's foreshock D. Rojas-Castillo, X. Blanco-Cano, P. Kajdič, and N. Omid	434
Solar wind modification upstream of the bow shock J. Urbář, Z. Němeček, L. Přech, J. Šafránková, and K. Jelínek	438
CATEGORY 5: STATUS AND PROSPECTS OF CURRENT AND FUTURE SOLAR WIND AND HELIOSPHERIC MISSIONS, INCLUDING NEW ADVANCES IN INSTRUMENTATION	
Invited Talks	
A view from the ground: Next generation instrumentation for solar and heliospheric physics T. S. Bastian	442
Solar orbiter - Close-up view of the sun Richard G. Marsden, Daniel Müller, and O. Chris StCyr	448
Contributed Talks	
Monte Carlo simulations of heavy ion sensor measurements including neon, magnesium, silicon, and sulfur T. W. Broiles and S. A. Livi	454
Designing a sun-pointing Faraday cup for solar probe plus A. W. Case, J. C. Kasper, P. S. Daigneau, D. Caldwell, M. Freeman, T. Gauron, B. A. Maruca, J. Bookbinder, K. E. Korreck, J. W. Cirtain, M. E. Effinger, J. S. Halekas, D. E. Larson, A. J. Lazarus, M. L. Stevens, E. R. Taylor, and K. H. Wright Jr.	458
Analysis of solar Lyman alpha radiation in the heliosphere B. Fayock, G. P. Zank, and J. Heerikhuisen	462
Fast solar wind monitoring available: BMSW in operation J. Šafránková, Z. Němeček, L. Přech, and G. Zastenker	466
Author Index	471
