Bayesian Inference and Maximum Entropy Methods in Science and Engineering

32nd International Workshop on Bayesian Inference and Maximum Entropy Methods in Science and Engineering

Garching, Germany
15-20 July 2012

Editor
Udo von Toussaint
Max-Planck-Institut, Garching, Germany

AIP Publishing

Melville, New York, 2013
AIP Proceedings

Volume 1553

Bayesian Inference and Maximum Entropy Methods in Science and Engineering

Table of Contents

Preface: 32nd International Workshop on Bayesian Inference and Maximum Entropy Methods in Science and Engineering
Udo von Toussaint 1

Group Photo 2

APPLICATIONS

The maximum entropy method of moments and Bayesian probability theory
G. Larry Bretthorst 3

Bayesian parameter estimation for stochastic models of biological cell migration
Peter Dieterich and Roland Preuss 16

Detecting non-transiting exoplanets
Ben Placek, Zachary Richards, and Kevin H. Knuth 23

Background-source separation—Not only for astronomical images
F. Guglielmetti, R. Fischer, and V. Dose 30

Bayesian inference approach to room-acoustic modal analysis
Wesley Henderson, Paul Goggans, Ning Xiang, and Jonathan Botts 38

MCMC-based inversion algorithm dedicated to NEMS mass spectrometry
R. Pérenon, A. Mohammad-Djafari, E. Sage, L. Duraffourg, S. Hentz, A. Brenac, R. Morel, and P. Grangeat 46

Precise control of an inexpensive turntable for gyro testing and calibration
Julian L. Center, Jr. 54

Bayesian data analysis of the dynamics of rolling leukocytes
Mats Leif Moskopp, Roland Preuss, Andreas Deussen, Triantafyllos Chavakis, and Peter Dieterich 61

Towards identification of relevant variables in the observed aerosol optical depth bias between MODIS and AERONET observations
N. K. Malakar, D. J. Lary, D. Gencaga, A. Albayrak, and J. Wei 69

Neutron fluence rate measurements at an underground laboratory: A Bayesian approach
Marcel Reginatto, Angelika Kasper, Helmut Schuhmacher, Burkhard Wiegel, and Andreas Zimbal 77

Geometry of nuclear fusion diagnostic data on information manifolds with an application to fusion plasma confinement
Geert Verdoolaege, Giorgos Karagounis, and Guido Van Oost 84

Beyond least squares
V. Dose and U. von Toussaint 92

ALGORITHMS

Exploring multi-modal distributions with nested sampling
Farhan Feroz and John Skilling 106

Employment of the covariance matrix in parameter estimation for stochastic processes in cell biology
R. Preuss and P. Dieterich 114

Reconstructing signals from noisy data with unknown signal and noise covariance
N. Oppermann, G. Robbers, and T. A. Enßlin 122

Variational Bayesian approximation with scale mixture prior for inverse problems: A numerical comparison between three algorithms
Leila Gharsalli, Ali Mohammad-Djafari, Aurélia Fraysse, and Thomas Rodet 130

Bayesian inference in the numerical solution of ordinary differential equations
Fábio Macêdo Mendes 139

Bayesian logistic regression analysis
N. van Erp and P. van Gelder 147

Entropy-based goodness-of-fit test: Application to the Pareto distribution
Justine Lequesne 155

Bayesian inference tools for inverse problems
Ali Mohammad-Djafari 163

Importance timing
John Skilling 171

FOUNDATIONS

The entropic dynamics of relativistic quantum fields
Ariel Caticha 176

Information field theory
Torsten Enßlin 184

Discontinuities in the maximum-entropy inference
Stephan Weis 192

Entropic inference: Some pitfalls and paradoxes we can avoid
Ariel Caticha 200

Newtonian mechanics: An implication of extended relativity
Arthur Baraov 212

On the origin of the quantum rules for identical particles
Klil H. Neori and Philip Goyal 220

Inferences about interactions: Fermions and the Dirac equation
Kevin H. Knuth 228

Local softening of chaotic statistical models with quantum consideration
Adom Giffin, Sean A. Ali, and Carlo Cafaro 238

Information geometry, dynamics and discrete quantum mechanics
Marcel Reginatto and Michael J. W. Hall 246

Bayesian classification of astronomical objects—And what is behind it
Jörg P. Rachen 254

A Bayesian perspective on Markovian dynamics and the fluctuation theorem
Nathaniel Virgo 262

The non-existence in Bayesianism of alternative-free hypothesis tests is not a shortcoming
Anthony J. M. Garrett 270

Towards an entropic analysis of quantum error correction with imperfections
Carlo Cafaro and Peter van Loock 275

Author Index 283
