CONTRIBUTED ORAL PAPERS ON MATHEMATICS

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Boundary variation for non-autonomous parabolic equations with Neumann boundary condition Parinya Sa Ngiamsunthorn | 3 |
| On quasi-Armendariz properties on skew polynomial rings Hamideh Pourtaherian and Isamiddin S. Rakhimov | 8 |
| The $\tilde{\pi}$ homomorphism of $E_{a,b}(\mathbb{F}_3^d)$ A. Chillali and H. Hassib | 12 |
| Randomness analysis on grain - 128 stream cipher Norul Hidayah Lot @ Ahmad Zawawi, Kamaruzzaman Seman, and Nurzi Juana Mohd Zaizi | 15 |
| A new homotopy function for solving nonlinear equations Hafizudin Mohamad Nor, Ahmad Izani Md Ismail, and Ahmad Abdul Majid | 21 |
| On classification of associative non-division genetic algebras Nasir Ganikhodjaev and Gavhar Dustmuradova | 26 |
| The diophantine equation hard problem (DEHP) as an asymmetric primitive - Is it possible? Muhammad Rezal Kamel Ariffin | 31 |
| On connected sub-tree of Cayley tree of order 2 with fixed nodes F. Mukhamedov, C. H. Pah, and M. Saburov | 36 |
| Specific automorphisms on a 2-generated p-group of class two Nor Haniza Sarmin and Yasamin Barakat | 41 |
| On $(2,3,t)$-generations for the Conway group Co_1 Faryad Ali | 46 |
| $(2,3,t)$-generations for the Harada-Norton group HN Mohammed Ali Faya Ibrahim | 50 |
| A method to decrease computation time for fourth order Lucas sequence Wong Tze Jin, Mohd. Rushdan Md. Said, Mohamed Othman, and Koo Lee Feng | 55 |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Pseudocontractions in the intermediate sense: Fixed and best proximity points Manuel De la Sen | 59 |
| Existence and multiplicity of positive solutions for singular second order Dirichlet boundary value problem Wan Ashraf Wan Azmi and Mesliza Mohamed | 66 |
| New fuzzy preference relations for group decision-making T. Zamali, M. Norfazillah, M. T. Abu Osman, and M. A Lazim | 72 |
| The criteria weight determination of factors impacting the melt flow index of degradable plastics using Lambda-Max method Rosma Mohd Dom, Nurul Adzlyana Saadon, and Daud Mohamad | 78 |
| Best trapezoidal solution of fuzzy nonlinear equations by metric space Y. Jafarzadeh | 82 |
| Power geometry and algebraic equations A. Soleev and N. Soleeva | 85 |
| The role of convexity for solving some shortest path problems in plane without triangulation Phan Thanh An, Nguyen Ngoc Hai, and Tran Van Hoai | 89 |
| Treatment of a two-level system with a pseudo-Hermitian Hamiltonian by the spin coherent state path integral approach Mekki Aouachria, Farida Halimi, and Rima Rekik | 94 |
| Super strongly perfectness of hypercube network R. Mary Jeya Jothi and A. Amutha | 99 |
| Numerical solutions of two-point fuzzy boundary value problem using half-sweep alternating group explicit method A. A. Dahalan, M. S. Muthuvalu, and J. Sulaiman | 103 |
| Schur monotone decreasing sequences Rasul Ganikhodjaev, Mansoor Saburov, and Khikmat Saburov | 108 |
| A double hit model for the distribution of time to AIDS onset Nagaraja Rao Chillale | 112 |
| The mathematical model of fluid filtration to the well of drift type in stress heterogeneous medium B. T. Zhumagulov, N. T. Azhikhanov, Zh. K. Masanov, and K. T. Bissembaeva | 117 |
| Exact solution of the unsteady natural convective radiating gas flow in a vertical channel M. Narahari and Rajashekhar Pendyala | 121 |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Piecewise-homotopy analysis method (P-HAM) for first order nonlinear ODE F. Y. Chin, K. H. Lem, and F. S. Chong | 125 |
| Convective instability in a horizontal porous layer saturated with a chemically reacting Maxwell fluid Syeda Khudeja Akbar, Achala L. Nargund, and S. Maruthamanikandan | 130 |
| Phase synchronization of a new chaotic system Shahed Vahedi and Mohd Salmi Md Noorani | 137 |
| Evasion differential game of two evaders and one pursuer with integral constraints Idham Arif Alias, Yusra Salleh, and Abdulla Azamov | 140 |
| The effective ratio of acoustic impedance in predicting stress and velocity of wave propagation in viscoelastic material (standard linear solid model) Abu Bakar Musa | 146 |
| Estimation of energies for singlet and triplet states of helium K. M Ariful Kabir and Amal Halder | 152 |
| Magnetohydrodynamics (MHD) boundary layer flow over a stretching cylinder embedded in a porous medium Zanariah Mohd Yusof, Siti Khuzaimah Soid, Ahmad Sukri Abd Aziz, and Seripah Awang Kechil | 158 |
| Extension of ranking method based on effectiveness of units in society by common weights approach in stochastic DEA A. A. Noura and M. Nozohour | 163 |
| Squeezing in four-mode Kerr nonlinear coupler via phase space representation R. Julius, A-B. M. A. Ibrahim, M. S. M. Deni, and B. Umarov | 169 |
| The interactions of the kinetic chemistry and the turbulence on the turbulent diffusion flame Hadeef Ammar and Aouachria Zeroual | 174 |
| Boundary layer flow for a nanofluid over a flat plate with a convective boundary condition Syahira Mansur and Anuar Ishak | 180 |
| Radiation effects on laminar boundary layer flow along a stretching cylinder Siti Khuzaimah Soid, Noor Hanisah Mohd Gazali, Zanariah Mohd Yusof, Zaileha Md Ali, Ahmad Sukri Abd Aziz, and Seripah Awang Kechil | 186 |
| On solutions of matrix initial value problems by using differential transform method and convolution Omer Altun and Adem Kılıçman | 191 |
| Weld defect detection on digital radiographic image using level set method Suhaila Abd Halim, Bertha Trissan Petrus, Arsmah Ibrahim, Yupiter HP Manurung, and Mohd Idris Jayes | 195 |

| | |
|------------------------------------------------------------------------------------------------------------------------------|-----|
| Radiation effects on MHD flow and heat transfer over a stretching sheet with convective boundary conditions | 200 |
| Norhafizah Md Sarif, Mohd Zuki Salleh, Razman Mat Tahar, and Roslinda Nazar | |
| Portfolio optimization using fuzzy linear programming | 206 |
| Purnima K. Pandit | |
| A genetic algorithm for solving supply chain network design model | 211 |
| Z. Firoozi, N. Ismail, S. H. Ariafar, S. H. Tang, and M. K. M. A. Ariffin | |
| Formulation for multiple curved and kinked cracks problems in antiplane elasticity | 215 |
| Mohd Radzi Aridi, Nik Mohd Asri Nik Long, and Z. K. Eshkuvatov | |
| Random trinomial tree models and vanilla options | 220 |
| Nasir Ganikhodjaev and Kamola Bayram | |
| Forecasting Taiwan's GDP by the novel nash nonlinear grey Bernoulli model with trembling-hand perfect equilibrium | 224 |
| Pei-Han Hsin | |
| A fifth order phase-fitted Runge-Kutta-Nyström method for periodic initial value problems | 229 |
| M. Mohamad, N. Senu, M. Suleiman, and F. Ismail | |
| Building phylogenomic tree with N-gram contrast value vector | 233 |
| Goh Yong Kheng, Lim Foo Weng, and Leo Yean Ling | |
| Two - layers Couette flow of a third grade fluid | 236 |
| Maya K. Mitkova, Ali R. Ansari, and Abdul M. Siddiqui | |
| The effect of road characteristics on motorcycle accident in Batu east Java Indonesia | 241 |
| Sobri Abusini | |
| Comparison of the financial performance of Islamic and conventional bank in Malaysia during and after economic crisis | 247 |
| Norhidayah A. Kadir, Aidatullaini Jaffar, Nur Lina Abdullah, and Nurzalina Harun | |
| Sprinkler arrangement for UiTM's stadium field | 252 |
| Nur Lina Abdullah, Norhidayah A. Kadir, Saiful Bahri Safaron, Nurazeera Md Suder, and Nurul Wahidah Omar | |
| Path partition in directed graph | 257 |
| Issam Abdel Kader | |
| A three-stage dispersion and dissipation of order infinity Runge-Kutta-Nyström method for periodic IVPs | 263 |
| Moo Kwong Wing, Norazak Senu, Mohamed Suleiman, and Fudziah Ismail | |

| | |
|------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The interval zero-symmetric single-step procedure IZSS2-5D for the simultaneous bounding of simple polynomial zeros | 268 |
| Noraini Jamaludin, Mansor Monsi, Sharifah Kartini Said Husain, and Nasruddin Hassan | |
| On modification of the interval zero symmetric single-step procedure <i>IZSS1-5D</i> for the simultaneously bounding of real polynomial zeros | 272 |
| W. M. S. Atiyah, M. Mansor, and S. K. Said Husain | |
| Laminar source flow and heat transfer between naturally permeable disks | 276 |
| Shalini Jain | |
| Numerical investigation of mixed convective hydromagnetic nonlinear nanofluid flow past an inclined plate | 281 |
| S. P. Anjali Devi and P. Suriyakumar | |
| Effect of prescribed temperature on mixed convection boundary layer in the unsteady stagnation point flow toward a stretching vertical sheet | 286 |
| N. M.A. Nik Long, L. F. Koo, T. J. Wong, and M. Suali | |
| Mixed convection flow about a solid sphere with a constant surface heat flux embedded in a porous medium filled with a nanofluid | 291 |
| Leony Tham and Roslinda Nazar | |
| Construction the evasion strategy in the differential game of many pursuers and one evader with integral constraints | 296 |
| Yusra Salleh, Gafurjan Ibragimov, Asqar Rahmanov, and Abduvali Khaldjigitov | |
| Mathematical modeling of catalytic reactor for oxidizing phosphorus containing gases | 300 |
| Akzhigitova Meruert, Yeskendirov Sharip, Umarova Zhanat, and Mohamed Othman | |
| Magnetic moment effects from time-space non-commutativity in the Dirac equation for hydrogen atom | 304 |
| Slimane Zaim | |
| Psychovisual model on discrete orthonormal transform | 309 |
| Nur Azman Abu, Ferda Ernawan, and Shahrin Sahib | |
| On the stability of diagonally implicit 2-point block backward differentiation formulae | 315 |
| Iskandar Shah Mohd Zawawi, Zarina Bibi Ibrahim, and Mohamed Suleiman | |
| Monte-Carlo solution of the Neumann problem for nonlinear Helmholtz equation | 320 |
| Abdujabar Rasulov and Gulnora Raimova | |
| Third-order explicit two-step Runge-Kutta-Nyström method for solving second-order ordinary differential equations | 326 |
| Latifah Md Ariffin, Norazak Senu, and Mohamed Suleiman | |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Numerical solutions of Wang's stretching/shrinking sheet problem for nanofluids Fadzilah Md Ali, Roslinda Nazar, Norihan Md Arifin, and Ioan Pop | 330 |
| On the derivation of second order variable step variable order block backward differentiation formulae for solving stiff ODEs Siti Ainor Mohd Yatim, Zarina Bibi Ibrahim, Khairil Iskandar Othman, and Mohamed Suleiman | 335 |
| The fractional transportation problem with interval demand, supply and costs Hale Gonc Kocken, Ibrahim Emirođlu, Cořkun Gđler, Fatih Tařçı, and Mustafa Sivri | 339 |
| Boundary layer stagnation-point flow and heat transfer past a permeable exponentially shrinking sheet Juliana Kasmuri, Norfifah Bachok, and Anuar Ishak | 345 |
| Solving first kind linear Fredholm integral equations with semi-smooth kernel using 2-point half-sweep block arithmetic mean method Mohana Sundaram Muthuvalu, Elayaraja Aruchunan, and Jumat Sulaiman | 350 |
| Fuzzy approaches to supplier selection problem Beyza Ahlatcioglu Ozkok and Hale Gonc Kocken | 355 |
| Positive solutions for a semipositone three-point fractional boundary value problem Farah M. Al-Askar | 361 |
| Criteria of cyclic compactness of the sets from L_p - spaces, associated with vector measure V. Chilin, B. Rakhimov, and A. Rakhimov | 367 |
| On π-closed sets and π-normal property in topological spaces Sadeq Ali Saad Thabit and Hailiza Kamarulhaili | 370 |
| On pairwise super continuous multifunctions Hend M. Bouseliana and A. Kılıçman | 376 |
| Equivariant compactifications of free G-spaces Natella Antonyan | 380 |
| On polynomials associated with Humbert's polynomials of two variables Ghazi S. Khammash | 385 |
| Dense topological spaces and dense continuity Khaled A. Aldwoah | 391 |
| Weakly $\omega\beta$-continuous functions Heyam Hussein Aljarrah and Mohd Salmi Md Noorani | 396 |
| Estimate on the second Hankel determinant for a subclass of quasi-convex functions Jiun Shyan Goh and Aini Janteng | 401 |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Exact solution of sixth-order thin-film equation by (G'/G)-expansion method W. M. Taha, M. S. M. Noorani, and I. Hashim | 406 |
| A two-phased fuzzy decision making procedure for IT supplier selection Fairuz Shohaimay, Nazirah Ramli, Siti Rosiah Mohamed, and Ainun Hafizah Mohd | 411 |
| CONTRIBUTED ORAL PAPERS ON STATISTICS | |
| Overcoming multicollinearity in multiple regression using correlation coefficient H. J. Zainodin and S. J. Yap | 416 |
| The multi-sample block-scalar sphericity test under the complex multivariate normal case Filipe J. Marques and Carlos A. Coelho | 420 |
| Bayesian extreme modeling for non-stationary air quality data Nor Azrita Mohd Amin, Mohd Bakri Adam, Noor Akma Ibrahim, and Ahmad Zaharin Aris | 424 |
| Near-exact distributions for the block equicorrelation and equivariance likelihood ratio test statistic Carlos A. Coelho and Filipe J. Marques | 429 |
| New approach of assessing hypovolemic shock class 1 during acute emergencies: Ultrasonographic inferior vena cava and abdominal aorta diameter ratio Rashidi Ahmad, Mohamad Iqbal Kunji, Meera Mohaideen Hj Abd Kareem, and Shamimi A. Halim | 434 |
| An improved GRM_{OD} heuristic for container loading problem Ziao-Fung Ho, Lai-Soon Lee, Zanariah Abdul Majid, and Hsin-Vonn Seow | 439 |
| Modeling and forecasting foreign exchange daily closing prices with normal inverse Gaussian Dean Teneng | 444 |
| Application of queuing model in Dubai's busiest megaplex Maneesha Bhagchandani and Priti Bajpai | 449 |
| Liver cancer mortality rate model in Thailand Wattanavadee Sriwattanapongse and Sukon Prasitwattanaseree | 455 |
| Empirical performance of the multivariate normal universal portfolio Choon Peng Tan and Sook Theng Pang | 462 |
| Risk modelling in portfolio optimization W. H. Lam, Saiful Hafizah Hj. Jaaman, and Zaidi Isa | 466 |
| Enhanced index tracking modelling in portfolio optimization W. S. Lam, Saiful Hafizah Hj. Jaaman, and Hamizun bin Ismail | 469 |
| Slice sampling technique in Bayesian extreme of gold price modelling Mohammad Rostami, Mohd Bakri Adam, Noor Akma Ibrahim, and Mohamed Hisham Yahya | 473 |

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Improved exponential product cum dual to product type estimator of population mean B. K. Singh, Sanjib Choudhury, and Abhishek Kumar | 478 |
| Rank test for two-factor interaction Pooi Ah Hin | 482 |
| Brownian motion model with stochastic parameters for asset prices Soo Huei Ching and Pooi Ah Hin | 485 |
| Evaluating supplier quality performance using analytical hierarchy process Shanmugam Sundram Kalimuthu Rajoo, Maznah Mat Kasim, and Nazihah Ahmad | 490 |
| Estimating the monetary value of willingness to pay for E-book reader's attributes using partially confounded factorial conjoint choice experiment Chin-Khian Yong | 495 |
| Modeling of information flows in natural gas storage facility Leyla Ranjbari, Arifah Bahar, and Zainal Abdul Aziz | 500 |
| Modified reactive tabu search for the symmetric traveling salesman problems Yai-Fung Lim, Pei-Yee Hong, Razamin Ramli, and Ruzelan Khalid | 505 |
| Analysis of gene set using shrinkage covariance matrix approach Suryaefiza Karjanto and Rasimah Aripin | 510 |
| Simulated annealing with probabilistic analysis for solving traveling salesman problems Pei-Yee Hong, Yai-Fung Lim, Razamin Ramli, and Ruzelan Khalid | 515 |
| Estimating the abundance of clustered animal population by using adaptive cluster sampling and negative binomial distribution Yizhou Bo and Naima Shifa | 520 |
| Resource allocation in road infrastructure using ANP priorities with ZOGP formulation-A case study Suriana Alias, Norfarziah Adna, Siti Khuzaimah Soid, and Mahani Kardri | 524 |
| Base stock system for patient vs impatient customers with varying demand distribution Dowlath Fathima and P. Sheik Uduman | 529 |
| Trend and forecasting rate of cancer deaths at a public university hospital using univariate modeling A. Ismail and Noor I. Hassan | 534 |
| Integration of fuzzy analytic hierarchy process and probabilistic dynamic programming in formulating an optimal fleet management model Lay Eng Teoh and Hooi Ling Khoo | 539 |

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Assessing the performance of the log-normal distribution with left truncated survival data Thirunanthini Manoharan and Jayanthi Arasan | 545 |
| Multidimensional stock network analysis: An Escoufier's RV coefficient approach Gan Siew Lee and Maman A. Djauhari | 550 |
| Monitoring autocorrelated process: A geometric Brownian motion process approach Lee Siaw Li and Maman A. Djauhari | 556 |
| Time series behaviour of the number of Air Asia passengers: A distributional approach Norhaidah Mohd Asrah and Maman Abdurachman Djauhari | 561 |
| A hybrid group method of data handling with discrete wavelet transform for GDP forecasting Nadira Mohamed Isa and Ani Shabri | 566 |
| Autocorrelated multivariate process control: A geometric Brownian motion approach Revathi Sagadavan and Maman A. Djauhari | 571 |
| Bayesian network modelling of upper gastrointestinal bleeding Nazziwa Aisha, Shamarina Shohaimi, and Mohd Bakri Adam | 576 |
| On the limit theorem for life time distribution connected with some reliability systems and their validation by means of the Monte Carlo method Munteanu Bogdan Gheorghe, Leahu Alexei, and Cataranciuc Sergiu | 582 |
| Some fixed point results for multi-valued cyclic mappings M. De la Sen, S. L. Singh, and M. E. Gordji | 589 |
| Steady MHD free convection heat and mass transfer flow about a vertical porous surface with thermal diffusion and induced magnetic field M. M. Touhid Hossain, Md. Afruz-Zaman, Fouzia Rahman, and M. Arif Hossain | 594 |
| MHD mixed convection flow of a power law nanofluid over a vertical stretching sheet with radiation effect Nor Azian Aini Mat, Norihan Md. Arifin, Roslinda Nazar, Fudziah Ismail, and Norfifah Bachok | 604 |
| On the convergence rate of interval repeated midpoint zero symmetric single-step procedure for simultaneous bounding the polynomial zeros Mansor Monsi, Syaida Fadhilah Mohammad Rusli, Norazak Senu, Fudziah Ismail, and Zarina Bibi Ibrahim | 610 |
| Author Index | 615 |
