

39th International Conference Applications of Mathematics in Engineering and Economics AMEE13

Sozopol, Bulgaria

8-13 June 2013

Editors

Vesela Pasheva

George Venkov

Technical University of Sofia, Sofia, Bulgaria

All papers have been peer reviewed.

Sponsoring Organization

Department of Scientific Research at the Technical University of Sofia

Melville, New York, 2013
AIP Proceedings

Volume 1570

Editors

AMEE13

Table of Contents

Preface: 39th International Conference "Applications of Mathematics in Engineering and Economics" George Venkov and Vesela Pasheva	1
Organizing Committees	N/A
MATHEMATICAL MODELING	
Alternative method for calculations of volumes by using parameterizations surfaces areas Daniela Bittnerova	3
On some control problem of extended object with non-fixed direction A. G. Malev, G. V. Parshikov, and A. R. Matviychuk	11
Local refinement of GERBS surfaces with applications to interactive geometric modeling Jostein Bratlie	18
Nonlinearity measure and internal model control based linearization in anti-windup design Kamen Perev	26
Modeling data for pancreatitis in presence of a duodenal diverticula using logistic regression S. Dineva, K. Prodanova, and D. Mlachkova	39
Modeling of column apparatuses: A review M. Doichinova and P. Popova-Krumova	45
Optimization problems in the Bulgarian electoral system Mihail Konstantinov, Kostadin Yanev, Galina Pelova, and Juliana Boneva	54
Valuation of exotic options in the framework of Levy processes Mariyan Milev, Svetla Georgieva, and Veneta Markovska	65
Mathematical modeling of glycerol biotransformation Petya Popova-Krumova, Sofia Yankova, and Biliana Ilieva	74
Improvement of the noise characteristics of the MEMS inertial systems based on the quad sensor structure and signal processing Rosen Miletiev, Radostin Kenov, Ivaylo Simeonov, and Rumen Yordanov	80
Using real options analysis to support strategic management decisions Stanimir Kabaivanov, Veneta Markovska, and Mariyan Milev	87

Numerical analysis of an Asian-rate call option T. Gyulov and R. Valkov	97
Inverse scattering of anti-plane waves by cracks in magneto-electro-elastic materials Yonko Stoyanov	105
NUMERICAL METHODS	
ERBS-surface construction on irregular grids Arne Lakså	113
Using radial generalized expo-rational B-splines to bivariate data smoothing I. Dakov and Vesela Pasheva	121
A numerical approach to the study of the perpetual case of American options J. Kandilarov	128
Smooth GERBS, orthogonal systems and energy minimization Lubomir T. Dechevsky and Peter Zanaty	135
Numerical study of super cooled water droplet splashing and distribution spectrum on atmospheric ice accretion of wind turbine blade Muhammad S. Virk	163
Numerical solution of optimal design for axisymmetrical cooling canal Petr Salač and Václav Dvořák	172
Numerical quadratures for approximate computation of ERBS Peter Zanaty	180
On the numerical performance of FEM based on piecewise rational smooth resolutions of unity on triangulations Peter Zanaty and Lubomir T. Dechevsky	191
Local refinement of ERBS curves Rune Dalmo	204
Dielectric based sensing of atmospheric ice U. N. Mughal, M. S. Virk, and M. Y. Mustafa	212
Cubic spline wavelets with short support adapted to the interval Dana Černá and Václav Finěk	221
Analysis of the discontinuous Galerkin method applied to the European option pricing problem J. Hozman	227

Parallel implementation of wavelet Galerkin method in higher dimensions Václav Finěk and Martina Šimunková	235
DIFFERENTIAL EQUATIONS AND APPLICATIONS	
On an optimal boundary control problem for 1-D wave equation with a damping boundary condition A. A. Kholomeeva and E. I. Moiseev	241
Asymptotic expansion of singular solutions to Protter problem for $(2+\epsilon)$-D degenerate wave equation Aleksy Nikolov and Nedyu Popivanov	249
Asymptotically optimal feedback control for a system of linear oscillators Alexander Ovseevich and Aleksy Fedorov	257
Singular linear-quadratic control problem for systems with linear delay A. N. Seseikin	268
Integral representations in plane anisotropic elasticity Alexander P. Soldatov	276
On the exchange formula for multi-linear operators related to integrable nonlinear PDE's K. Endo, H. Kubo, and K. Toda	284
Effective solution of boundary value problems of the theory of thermopiezoelectricity for a half-plane Manana Chumburidze and David Lekveishvili	290
To inverse scattering problem of Gelfand, Levitan, Marchenko Alexander P. Soldatov and Nikolay A. Zhura	298
Non-integrability of a system describing the stationary solutions in Bose-Fermi mixtures G. Georgiev and O. Christov	305
Generalization of practical stability for delay differential equations with respect to initial time difference Snezhana Hristova	313
On uniqueness of quasi-regular solutions to Protter problem for Keldish type equations T. D. Hristov, N. I. Popivanov, and M. Schneider	321
Third order convergence for forced Duffing equations with integral boundary conditions Tanya G. Melton and A. S. Vatsala	327
Semi-Fredholm solvability and asymptotic expansions of singular solutions for Protter problems Nedyu Popivanov, Todor Popov, and Allen Tesdall	335

Far field expansion for Hartree type equation V. Georgiev and G. Venkov	343
MATHEMATICAL ANALYSIS AND APPLICATIONS	
A criterion of Riesz basis property for L_2 space A. M. Sarsenbi	356
On necessary conditions in an optimization problem for differential inclusions with random initial data B. I. Ananyev	360
New perspective on the gimbal lock problem Danail S. Brezov, Clementina D. Mladenova, and Ivaïlo M. Mladenov	367
Epipolar geometry with one epipole at infinity Georgi Hristov Georgiev and Vencislav Dakov Radulov	375
Comparison between the convergence of power and Bessel series Jordanka Paneva-Konovska	383
Commutational properties of powers of operators of mixed type decreasing the powers Miryana S. Hristova	393
Maximally convergent sequences of multipoint Padé approximants and distribution of points of interpolation Ralitza Kovacheva	401
Matrix anticirculant calculus Stancho Dimiev, Peter Stoev, and Stanislava Stoilova	409
Some estimates below the modulus of some integrals in the complex plane using symmetric polynomials Todor Stoyanov	416
A characterization of the K-functional for the algebraic version of the trigonometric Jackson integrals $G_{s,n}$ in weighted integral metric Teodora Zapryanova	423
Operational and approximate solutions of a fractional integro-differential equation Djurdjica Takači, Virginia S. Kiryakova, and Arpad Takači	430
A smooth transitive vector function Michail A. Hamamdjiev and Vladimir T. Todorov	442

About the best approximations with trigonometric polynomials on the class $\overline{W^0H^0}$ of the space L, Part II	446
Yanka Nikolova	
ALGEBRA AND SCIENTIFIC COMPUTING	
Test-driven programming	455
Bozhidar Georgiev and Adriana Georgieva	
Combinatorial results for geometric structures in endomorphism semiring	461
Ivan D. Trendafilov and Dimitrinka I. Vladeva	
Generalized complement operators and applications in some semirings	469
G. Bijev	
Simplicial complexes in the endomorphism semiring of a finite chain	477
Ivan D. Trendafilov	
Graph algorithms in sparse linear systems with rectangular matrices	485
L. A. Pilipchuk, A. S. Pilipchuk, and Y. H. Pesheva	
Public key cryptography with max-plus matrices and polynomials	491
Mariana I. Durcheva	
Technology of construction the unique solution to sensor location problem	499
L. A. Pilipchuk and T. S. Vishnevetskaya	
Investment portfolio management from cybernetic point of view	506
Angel Marchev Jr. and Angel Marchev	
Computer simulation environment for comparative analysis of models for investment portfolio management	514
Angel Marchev Jr. and Angel Marchev	
List of Participants	N/A
Author Index	535
