### TABLE OF CONTENTS

Seizure Detection Using Empirical Mode Decomposition And Time-Frequency Energy Concentration ........................................ 1  
A. Feltane, G. Bartels, Y. Boudria, W. Besio

Instantaneous Frequency Analysis Shows Greater Sensitivity To Parasympathetic Components Of Heart Rate Than Spectral Analysis .................................................................................................................. 7  
B. Griffel, S. Calvano, S. Coyle, M. Macor, B. Jan, M. Redell, J. Semmlow, S. Corbett, S. Lowry

Continuous Wave Simulations On The Propagation Of Electromagnetic Fields Through The Human Head .......................................................................................................................................................... 12  
J. Elloian, G. Noetscher, S. Makarov, A. Pascual-Leone

Virtual Musculoskeletal Arm And Robotic Arm Driven By A Biomimetic Model Of Sensorimotor Cortex With Reinforcement Learning ...................................................................................................................................................... 18  

Speckle Reduction Of Medical Ultrasound Using Compressive Re-Sampling And Instantaneous SNR ........................................................................................................................................................................ 24  
R. Mammone, L. Barinov, A. Jairaj, W. Hulbert, C. Podilchuk

Enhanced Eye Gaze Direction Classification Using A Combination Of Face Detection, CHT And SVM .............................................................................................................................................................................................................. 30  
A. Al-Rahayef, M. Faezipour

Low-Power Signal Processing Methodologies For Implantable Biosensing Platforms ................................................................................................................................. 36  
R. Croce, S. Vaddiraju, A. Legassey, S. Islam, F. Papadimitrakopoulos, F. Jain

EMG-Force Estimation For Multiple Fingers .......................................................................................................................................................................................... 41  
P. Liu, D. Brown, E. Clancy, F. Martel, D. Rancourt

Resting State fMRI Data Analysis Using Support Vector Machines ................................................................................................................................. 47  
X. Song, N. Chen

Improved Clustering Of Spike Patterns Through Video Segmentation And Motion Analysis Of Micro Electroocorticographic Data .................................................................................................................................................. 53  
B. Akyildiz, Y. Song, J. Viventi, Y. Wang

Optimal Chaotic Synchronization Of Stochastic Delayed Recurrent Neural Networks ................................................................................................................................................................................ 59  
Z. Liu

Preprocessing For Improved Computer Aided Detection In Medical Ultrasound .................................................................................................................................................................................................................. 65  
R. Mammone, S. Lobe, L. Barinov, W. Hulbert, A. Jairaj, C. Podilchuk

Initial Assessment Of Artifact Filtering For RSVP Keyboard TM .................................................................................................................................................................................................................. 68  

Emulating Conventional Disc Electrode With The Outer Ring Of The Tripolar Concentric Ring Electrode In Phantom And Human Electroencephalogram Data ........................................................................................................................................................................................................ 73  
O. Makeyev, Y. Boudria, Z. Zhu, T. Lennon, W. Besio

Functional Connectivity Network Based On Graph Analysis Of Scalp EEG For Epileptic Classification ........................................................................................................................................................................................................................................ 77  
S. Sargolzaei, M. Cabrerozo, M. Goryawala, A. Eddin, M. Adjouadi

Reduced-Order Nonlinear Arterial Compliance Parameter Estimation Under Vasoactive States ........................................................................................................................................................................................................................................ 81  
T. Phan, J. Li

Robust Adaptive Dynamic Programming For Sensorimotor Control With Signal-Dependent Noise ........................................................................................................................................................................................................................................ 86  
Y. Jiang, Z. Jiang

Wavelet Based Photoplethysmogram Foot Delineation For Heart Rate Variability Applications ........................................................................................................................................................................................................................................ 92  
N. Conn, D. Borkholder

Prediction Of Longterm Outcome Of Neuropsychological Tests Of MTBI Patients Using Imaging Features ........................................................................................................................................................................................................................................ 97  
S. Minaee, Y. Wang, Y. Lui

Comparison Of Cephalic And Extracephalic Montages For Transcranial Direct Current Stimulation - A Numerical Study ........................................................................................................................................................................................................................................ 103  
J. Yanamadala, G. Noetscher, S. Makarov, A. Pascual-Leone

A Method To Detect Cardiac Arrhythmias With A Webcam ........................................................................................................................................................................................................................................ 109  
S. Kyal, L. Meshba, B. Xu, J. Couderc
