**Theory and Applications in Computational Chemistry: The First Decade of the Second
Millennium**
International Congress TACC-2012

Table of Contents

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Preface: Theory and Applications in Computational Chemistry: The First Decade of the Second Millennium-Dedication to the Academic Editors of the International Journal of Quantum Chemistry Enrico Clementi, Jean-Marie André, and J. Andrew McCammon | 1 |
| CHAPTERS | |
| Evolution of computational chemistry, the "launch pad" to scientific computational models: The early days from a personal account, the present status from the TACC-2012 congress, and eventual future applications from the global simulation approach Enrico Clementi | 5 |
| The next decade of computing Greg Taylor | 55 |
| The 'big picture' of relativistic molecular quantum mechanics Wenjian Liu | 62 |
| AGP: Search for the consistent RPA reference state Yngve Öhrn | 67 |
| Concepts of chemical bonding from electron propagator theory J. V. Ortiz | 73 |
| Recent advances in spin-free state-specific and state-universal multi-reference coupled cluster formalisms: A unitary group adapted approach Rahul Maitra, Debalina Sinha, Sangita Sen, Avijit Shee, and Debashis Mukherjee | 81 |
| Explicitly correlated projector Monte Carlo method based on Slater determinants (PMC-SD-F12 method) Yuhki Ohtsuka and Seiichiro Ten-no | 97 |
| SAC-CI methodology applied to molecular spectroscopy and photo-biology J. Hasegawa, T. Miyahara, H. Nakashima, and H. Nakatsuji | 101 |
| Quantum chemistry, band structures and polymers Jean-Marie André | 109 |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Beyond NICS Stefano Pelloni, Guglielmo Monaco, Riccardo Zanasi, and Paolo Lazzeretti | 114 |
| Semiclassical instanton theory of nonadiabatic reaction rate constant. I. Formulation Yoshiaki Teranishi, Hiroki Nakamura, and Sheng H. Lin | 119 |
| QM/MM studies of gas-liquid collisional energy transfer Xiaohu Li and George C. Schatz | 131 |
| Design of modified proteins using knowledge-based approaches Yves Dehouck, Dimitri Gilis, and Marianne Rooman | 139 |
| On the fundamental processes in molecular electrical doping of organic semiconductors Georg Heimel, Ingo Salzmann, and Norbert Koch | 148 |
| Computational approaches to target fishing and ligand profiling Didier Rognan | 157 |
| Accelerated molecular dynamics: Theory, implementation and applications Yi Wang and J. Andrew McCammon | 165 |
| Sampling and statistics in biomolecular simulations Hoon Sim, Karthikeyan Diraviyam, Akansha Saxena, and David Sept | 173 |
| Narrowing the gap in understanding protein structure and function through computer simulations Hong Guo | 180 |
| Minimalist models for biopolymers: Open problems, latest advances and perspectives Fabio Trovato and Valentina Tozzini | 187 |
| Exploring folding pathways of single proteins using mechanical manipulation Pétur O. Heidarsson and Ciro Ceconi | 201 |
| Molecular dynamics techniques in the studies of the bacterial ribosome Joanna Panecka and Joanna Trylska | 207 |
| Molecular dynamics simulation of water in the low temperature region A. Krallafa, A. Adda, A. Seddiki, and M. Dauchez | 215 |
| Structure of crown ethers A. A. El-Azhary, N. Al-Jallal, A. Al-Kahtani, N. Al-Badri, K. Al-Farhan, and M. Al-Qunaibit | 223 |
| Controlling drug efficiency by encapsulation into carbon nanotubes: A theoretical study of the antitumor Cisplatin and the anti-HIV TIBO molecules R. Bessrou, Y. Belmiloud, Z. Hosni, and B. Tangour | 229 |
| Nanoscale chemical mapping through plasmonic tips on AFM-based cantilevers M. Patrini, F. De Angelis, R. Proietti Zaccaria, M. Francardi, M. Lazzarino, L. Businaro, and E. Di Fabrizio | 240 |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| On the use of symmetry in SCF calculations. The case of fullerenes and nanotubes C. M. Zicovich-Wilson, Y. Noël, A. M. Ferrari, R. Orlando, M. De La Pierre, and R. Dovesi | 248 |
| Nanotechnology drives a paradigm shift on protein misfolding diseases and amyloidosis Vittorio Bellotti and Monica Stoppini | 256 |
| Quantum Chemical Topology: Knowledgeable atoms in peptides Paul L. A. Popelier | 261 |
| OBITUARY | |
| Remembering Cesare Pisani Roberto Dovesi | 271 |
| Remembering Björn O. Roos Enrico Clementi | 272 |
| Remembering Eolo Scrocco Caterina Ghio, Maurizio Persico, Carlo Petrongolo, and Jacopo Tomasi | 273 |
| Author Index | 275 |
