

FIRST INTERNATIONAL CONFERENCE ON ANALYSIS AND APPLIED MATHEMATICS

ICAAM 2012

Gumushane, Turkey 18 – 21 October 2012

EDITORS

Allaberen Ashyralyev
Fatih University, Istanbul, Turkey
International Turkmen Turkish University, Ashgabat, Turkmenistan

Alexey Lukashov
Fatih University, Istanbul, Turkey
Saratov State University, Saratov, Russia

All papers have been peer reviewed.

SPONSORING ORGANIZATIONS

The Scientific and Technological Research Council of Turkey
Gumushane University
Fatih University

AIP
American Institute
of Physics

Melville, New York, 2012

First International Conference on Analysis and Applied Mathematics
ICAAM 2012

Table of Contents

Preface: First International Conference on Analysis and Applied Mathematics (ICAAM 2012) Allaberen Ashyralyev and Alexey Lukashov	1
Well-posedness of boundary value problems for partial differential equations of even order Djumaklych Amanov and Allaberen Ashyralyev	3
Existence and uniqueness of solutions for nonlinear impulsive differential equations with two-point and integral boundary conditions Allaberen Ashyralyev and Y. A. Sharifov	8
Optimal control problem for impulsive systems with integral boundary conditions Allaberen Ashyralyev and Y. A. Sharifov	12
On the solution of a three dimensional convection diffusion problem Abdullah Said Erdogan and Mustafa Alp	16
On the numerical solution of a diffusion equation arising in two-phase fluid flow Abdullah Said Erdogan and Ali Ugur Sazaklioglu	22
Composited dual summability methods of the new kind Aysun Caner and Feyzi Başar	27
Bright and dark soliton solutions for the variable coefficient generalizations of the KP equation Ahmet Bekir, Özkan Güner, and Adem Cengiz Çevikel	31
On some new inequalities of Hadamard type for h-convex functions Ahmet Ocak Akdemir, Erhan Set, M. Emin Özdemir, and Çetin Yıldız	35
Parabolic problems with parameter occurring in environmental engineering Aida Sahmurova and Veli B. Shakhmurov	39
Remez type inequality for trigonometric polynomials on an interval Alexey Lukashov and Mehmet Ali Aktürk	42

Newton-Padé approximations for univariate and multivariate functions Cevdet Akal and Alexey Lukashov	45
The nature of solutions of the difference equation $x_n = \max\{A/x_{n-2}, B/x_{n-3}^a\}$ A. Gelişken, C. Çınar, R. Karataş, and A. S. Kurbanlı	50
On Darboux helices in Minkowski space Ali Şenol, Evren Zıplar, and Yusuf Yaylı	53
The structure of fractional spaces generated by the positive operator with periodic conditions Allaberen Ashyralyev and Fatih Sabahattin Tetikoğlu	57
A third-order of accuracy difference scheme for the Bitsadze-Samarskii type nonlocal boundary value problem Allaberen Ashyralyev and Fatma Songul Ozesenli Tetikoglu	61
NBVP for hyperbolic equations involving multi-point and integral conditions Allaberen Ashyralyev and Necmettin Aggez	65
Fractional parabolic differential and difference equations with the Dirichlet-Neumann condition Allaberen Ashyralyev, Nazar Emirov, and Zafer Cakir	69
On stability of hyperbolic-elliptic differential equations with nonlocal integral condition Allaberen Ashyralyev, Zeynep Ödemiş Özger, and Faruk Özger	73
Positivity of two-dimensional elliptic differential operators in Hölder spaces Allaberen Ashyralyev, Sema Akturk, and Yasar Sozen	77
On numerical solution of multipoint NBVP for hyperbolic-parabolic equations with Neumann condition Allaberen Ashyralyev and Yildirim Ozdemir	80
High order of accuracy stable difference schemes for numerical solutions of NBVP for hyperbolic equations Allaberen Ashyralyev and Ozgur Yildirim	84
Identifying an unknown function in a parabolic equation by homotopy analysis method and comparison with the adomian decomposition method M. Aylin Bayrak and Iclal Ulvi	88
A note on the numerical solution of fractional Schrödinger differential equations Allaberen Ashyralyev and Betul Hicdurmaz	92
Some basic results on the sets of sequences with geometric calculus Cengiz Türkmen and Feyzi Başar	95

New inequalities of Hadamard type for quasi-convex functions M. Emin Özdemir, Çetin Yıldız, Ahmet Ocak Akdemir, and Erhan Set	99
Finite difference method for the reverse parabolic problem with Neumann condition Charyyar Ashyralyev, Ayfer Dural, and Yasar Sozen	102
Approximate solutions of the Cauchy problem for the heat equations Deniz Ağırseven	106
Compact and Fredholm operators on matrix domains of triangles in the space of null sequences Eberhard Malkowsky	110
On Bitsadze-Samarskii type nonlocal boundary value problems for semi-linear elliptic equations Allaberen Ashyralyev and Elif Ozturk	114
Exponential decay and blow up of a solution for a system of nonlinear higher-order wave equations Erhan Pişkin and Necat Polat	118
A new general inequality for double integrals Erhan Set, Mehmet Zeki Sarikaya, and Ahmet Ocak Akdemir	122
Sturm Liouville problem with discontinuity conditions at several points Fatma Hıra and Nihat Altınışık	126
Boundary value problem for a third order partial differential equation Allaberen Ashyralyev, Necmettin Aggez, and Fatih Hezenci	130
Fine spectra of upper triangle triple band matrices over the sequence spaces ℓ_p, ($0 < p < \infty$) Feyzi Başar and Ali Karaisa	134
Characterization of three dimensional cellular automata over Z_m Ferhat Şah, Irfan Şiap, and Hasan Akın	138
Fractals arising from Newton's method Figen Çilingir	142
Exact solutions of the Schrödinger equation with position dependent mass for the solvable potentials F. Arıcak and M. Sezgin	148
Domain of the double sequential band matrix $B(\tilde{r}, \tilde{s})$ on some Maddox's spaces Faruk Özger and Feyzi Başar	152
Transient and cycle structure of elementary rule 150 with reflective boundary Hasan Akin, Irfan Siap, and Mehmet E. Koroğlu	156

Existence of global solutions for a multidimensional Boussinesq-type equation with supercritical initial energy	159
Hatice Taskesen and Necat Polat	
Some topological and geometric properties of the domain of the double sequential band matrix $B(r^{\sim}, s^{\sim})$ in the sequence space $\ell(p)$	163
Havva Nergiz and Feyzi Başar	
Using inverse Laplace transform for the solution of a flood routing problem	169
H. Saboorkazeran and M. F. Maghrebi	
On the stability of the steady-state solutions of cell equations in a tumor growth model	172
I. Atac and S. Pamuk	
On the numerical solution of diffusion problem with singular source terms	176
Irfan Turk and Maksat Ashyraliyev	
Compact operators on spaces of sequences of weighted means	179
Eberhard Malkowsky and Faruk Özger	
Cellular automata based byte error correcting codes over finite fields	183
Mehmet E. Köroğlu, İrfan Şiap, and Hasan Akın	
An application on suborbital graphs	187
Murat Beşenk, Ali Hikmet Değer, and Bahadır Özgür Güler	
Almost convergence and generalized weighted mean	191
Murat Kirişçi	
Simpson type inequalities for Q- class functions	195
M. Emin Özdemir, Alper Ekinci, Mustafa Gürbüz, and Ahmet Ocak Akdemir	
On the fine spectrum of the operator defined by a lambda matrix over the sequence space c_0 and c	199
Medine Yeşilkayagil and Feyzi Başar	
Blow up of a solution for a system of nonlinear higher-order wave equations with strong damping terms	203
Necat Polat and Erhan Pişkin	
Three-term asymptotic expansion for the moments of the ergodic distribution of a renewal-reward process with gamma distributed interference of chance	207
Nurgül Okur Bekar, Rovshan Aliyev, and Tahir Khaniev	
Existence of local solution for a double dispersive bad Boussinesq-type equation	211
Nurhan Dünder and Necat Polat	

Numerical solution of hyperbolic-Schrödinger equations with nonlocal boundary condition Yildirim Ozdemir and Mehmet Kucukunal	214
Dollar and the stock market: An approach using Haar wavelet Aldo Artur Belardi and Renato A. Aguiar	218
Applied mathematics analysis of the multibody systems H. Sahin, A. K. Kar, and E. Tacgin	222
Mixed problem for a differential equation with involution under boundary conditions of general form M. A. Sadybekov and A. M. Sarsenbi	225
The finite element method solution of variable diffusion coefficient convection-diffusion equations Selçuk Han Aydın and Canan Çiftçi	228
Positivity of elliptic difference operators and its applications Galina E. Semenova	232
Semismooth Newton method for gradient constrained minimization problem Serbiniyaz Anyyeva and Karl Kunisch	236
On the numerical solution of ultra-parabolic equations with the Neumann condition Allaberen Ashyralyev and Serhat Yulmaz	240
The modified Kudryashov method for solving some evolution equations Serife Muge Ege and Emine Misirli	244
The Zipfian distributions on term x document matrix Bahar Karaoğlu, Sinem Aslan, and Erdem Karayer	247
Oscillation theorems for second-order damped dynamic equation on time scales M. Tamer Şenel	251
Weak convergence theorem for a semi-Markovian random walk with delay and Pareto distributed interference of chance Tülay Kesemen and Fuat Yetim	255
Parameter dependent Navier-Stokes type problems Veli B. Shakhmurov	259
\mathbb{C}-symplectic complex and Riedemeister torsion Yasar Sozen	262

Finite difference method for the integral-differential equation of the hyperbolic type Zilal Direk and Maksat Ashyraliyev	266
Some studies of the numerical solution of ordinary differential equations G. Mehdiyeva, V. Ibrahimov, and M. Imanova	270
Author Index	273
