

THE SIXTH INTERNATIONAL SCHOOL ON FIELD THEORY AND GRAVITATION-2012

Petrópolis - RJ, Brazil 23 – 27 April 2012

EDITORS

Waldyr Alves Rodrigues Jr.
State University of Campinas, Campinas, SP, Brazil

Richard Kerner
Université Pierre et Marie Curie, Paris, France

Gentil O. Pires
Carlos Pinheiro

Universidade Federal Rural do Rio de Janeiro, Seropédica, RJ – Brazil

All papers have been peer reviewed.

SPONSORING ORGANIZATIONS

CNPq - Conselho Nacional de Desenvolvimento Científico e Tecnológico
CAPES - Coordenação de Aperfeiçoamento de Pessoal de Nível Superior
FAPERJ - Fundação de Amparo à Pesquisa do Estado do Rio de Janeiro
ICTP - International Centre for Theoretical Physics
CLAF - Centro Latino Americano de Física

Melville, New York, 2012
AIP | CONFERENCE PROCEEDINGS ■ 1483

AIP Conference Proceedings, Volume 1483
The Sixth International School on Field Theory and Gravitation-2012

Table of Contents

Photograph	1
Preface: VI International School on Field Theory and Gravitation 2012 Waldyr Alves Rodrigues Jr., Richard Kerner, Gentil O. Pires, and Carlos Pinheiro	3
 LECTURES 	
Loop quantum gravity as an effective theory Martin Bojowald	5
Introduction to multifractional spacetimes Gianluca Calcagni	31
Effective conformal descriptions of black hole entropy: A review Steven Carlip	54
Spontaneous dimensional reduction? Steven Carlip	63
The effective field theory treatment of quantum gravity John F. Donoghue	73
Physics of light R. Doria	95
Aspects of metric-like higher-spin geometry D. Francia	118
RG flows and instantons Edi Gava	135

A Z_3 generalization of Pauli's principle, quark algebra and the Lorentz invariance	144
Richard Kerner	
Emergence of wave equations from quantum geometry	169
Shahn Majid	
Equations on knot polynomials and 3d/5d duality	189
A. Mironov and A. Morozov	
Structural aspect of gravitational dynamics and the emergent perspective of gravity	212
T. Padmanabhan	
Lorentz connections and gravitation	239
J. G. Pereira	
Retarded gravitation theory	260
C. K. Raju	
The Maxwell and Navier-Stokes equations that follow from Einstein equation in a spacetime containing a Killing vector field	277
Fabio Grangeiro Rodrigues, Waldyr Alves Rodrigues Jr., and Roldão da Rocha	
High energy physics - The large and the small	296
Alberto Santoro	
Engineering holographic graphene	305
Gordon W. Semenoff	
POSTERS	
CDT coupled to dimer matter: An analytical approach via tree bijections	330
Max R. Atkin and Stefan Zohren	
The deformation method and the Bäcklund Transformations	336
D. Bazeia, L. Losano, and J. R. L. Santos	

Non-linear Abelian gauge model	
J. Chauca, R. Doria, and W. Soares	342
On whole Abelian model dynamics	
J. Chauca and R. Doria	352
On vectorial fields as Lorentz specie	
J. Chauca, R. Doria, and W. Soares	371
Electromagnetic fields from two potential fields	
J. Chauca, R. Doria, and W. Soares	377
Lorentz transformations for whole electromagnetic fields	
J. Chauca, R. Doria, and W. Soares	383
Feynman rules for a whole Abelian model	
J. Chauca, R. Doria, and W. Soares	388
A whole origin for polarization and magnetization	
J. Chauca, R. Doria, and W. Soares	395
Gauge invariance for a whole Abelian model	
J. Chauca, R. Doria, and W. Soares	400
On spectroscopy for a whole Abelian model	
J. Chauca and R. Doria	407
On discrete symmetries for a whole Abelian model	
J. Chauca and R. Doria	419
Geometric unification of the fundamental interactions	
Disrael Camargo Neves Da Cunha	429
Cosmology from Kaluza-Klein gravitational model	
P. H. R. S. Moraes and O. D. Miranda	435
An alternative singularity-free cosmological scenario from cusp geometries	
Reinaldo R. Rosa, Cristiano Strieder, and Diego H. Stalder	441

A new gravitational N-body simulation algorithm for investigation of cosmological chaotic advection

Diego H. Stalder, Reinaldo R. Rosa, José R. da Silva Junior, Esteban Clua, Renata S. R. Ruiz, Haroldo F. Campos Velho, Fernando M. Ramos, Amarísio Da S. Araújo, and Vitor G. Conrado
