

# SPACE WEATHER: THE SPACE RADIATION ENVIRONMENT

11th Annual International Astrophysics Conference

*Palm Springs, CA, USA 19 – 23 March 2012*

## **EDITORS**

Qiang Hu  
Gang Li  
Gary P. Zank  
Xianzhi Ao

*University of Alabama in Huntsville, Huntsville, AL, USA*

Olga Verkhoglyadova  
*University of Alabama in Huntsville, Huntsville, AL, USA*  
*Jet Propulsion Laboratory, Pasadena, CA, USA*

James H. Adams  
*University of Alabama in Huntsville, Huntsville, AL, USA*

**All papers have been peer reviewed.**

## **SPONSORING ORGANIZATIONS**

Center for Space Plasma and Aeronomic Research (CSPAR)  
at the University of Alabama in Huntsville

**AIP**  
American Institute  
of Physics

**Melville, New York, 2012**  
**AIP | CONFERENCE PROCEEDINGS ■ 1500**

## Editors

**SPACE WEATHER: THE SPACE RADIATION ENVIRONMENT**  
**11th Annual International Astrophysics Conference**

**Table of Contents**

<b>Preface: 11th Annual International Astrophysics Conference</b> Qiang Hu, Gang Li, Gary P. Zank, Xianzhi Ao, Olga Verkhoglyadova, and James H. Adams	1
<b>NEAR-SUN RADIATION ENVIRONMENT</b>	
<b>Issues in heliospheric field mapping to flare SEP sources</b> J. G. Luhmann, Yan Li, D. J. Bercik, Linghua Wang, and D. Odstrcil	3
<b>Energetic particle and other space weather events of solar cycle 24</b> Nat Gopalswamy	14
<b>Problems encountered when characterizing CMEs in an operational setting</b> C. A. de Koning, G. Millward, V. J. Pizzo, and D. A. Biesecker	20
<b>On the relationship between heavy-ion composition variability in gradual SEP events and the associated IMF source regions</b> Yuan-Kuen Ko, Allan J. Tylka, Chee K. Ng, and Yi-Ming Wang	26
<b>Estimating upper limits of solar flare hard X-ray fluences for space missions near the Sun</b> D. Lario and R. B. Decker	32
<b>Energy distribution of nanoflares in three-dimensional simulations of coronal heating</b> C. S. Ng and L. Lin	38
<b>The Centennial Gleissberg Cycle in space weather</b> Joan Feynman and Alexander Ruzmaikin	44
<b>Evolution of a magnetohydrodynamic coronal shock</b> C.-C. Wu, S. T. Wu, K. Liou, and S. Plunkett	50
<b>Particle transport and acceleration in a chaotic magnetic field: Implications for seed population to solar flare and CME</b> B. Dasgupta, Gang Li, Xiaocan Li, and Abhay Ram	56

## INTERPLANETARY CONSEQUENCES AND ENERGETIC PARTICLES

<b>Shock surfing at a two-fluid plasma model</b> Ross H. Burrows, Xianzhi Ao, and Gary P. Zank	64
<b>Investigating the longitude dependence of solar energetic particle spectra</b> C. M. S. Cohen, G. M. Mason, R. A. Mewaldt, and R. A. Leske	74
<b>Ion acceleration at CME-driven shocks near the Earth and the Sun</b> Mihir Desai, Maher Dayeh, Robert Ebert, Charles Smith, Glenn Mason, and G. Li	80
<b>Diffusion of energetic particles in heliospheric intermittent slab turbulence</b> Fathallah Alouani-Bibi and Jakobus le Roux	86
<b>The acceleration of electrons at perpendicular shocks and its implication for solar energetic particle events</b> Fan Guo and Joe Giacalone	93
<b>Space weather throughout the heliosphere</b> Devrie S. Intriligator, Thomas Detman, James Intriligator, Murray Dryer, Wei Sun, Charles Deehr, William R. Webber, Robert B. Decker, and Robert L. McPherron	100
<b>Test-particle simulations of SEP propagation in IMF with large-scale fluctuations</b> J. Kelly, S. Dalla, and T. Laitinen	109
<b>What controls the maximum particle energy in large SEP events</b> G. Li, G. Zank, O. Verkhoglyadova, X. Ao, and L. Ding	115
<b>Solar cycle heavy ion abundance variations in CIRs</b> G. M. Mason, M. I. Desai, and G. Li	122
<b>The dependence of solar energetic particle fluences on suprathermal seed-particle densities</b> R. A. Mewaldt, G. M. Mason, and C. M. S. Cohen	128
<b>Numerical modeling of the solar wind flow with observational boundary conditions</b> N. V. Pogorelov, S. N. Borovikov, L. F. Burlaga, R. W. Ebert, J. Heerikhuisen, T. K. Kim, I. A. Kryukov, S. T. Suess, S. T. Wu, and G. P. Zank	134

<b>Time-dependent MHD simulations of the solar wind outflow using interplanetary scintillation observations</b>	
Tae K. Kim, Nikolai V. Pogorelov, Sergey N. Borovikov, John M. Clover, Bernard V. Jackson, and Hsiu-Shan Yu	140
<b>3-D reconstruction of the inner heliosphere from remote-sensing data: A global solar wind boundary that includes CME transient effects</b>	
H.-S. Yu, B. V. Jackson, P. P. Hick, A. Buffington, J. M. Clover, and M. Tokumaru	147
<b>Efficiency of particle acceleration at oblique strong CME shocks from 0.13 to 2.5 AU: PATH modeling</b>	
Olga P. Verkhoglyadova, Gang Li, Gary P. Zank, and Xianzhi Ao	153
<b>Forecasting the space weather impact: The COMESEP project</b>	
N. B. Crosby, A. Veronig, E. Robbrecht, B. Vrsnak, S. Vennerstrom, O. Malandraki, S. Dalla, L. Rodriguez, N. Srivastava, M. Hesse, D. Odstrcil, and COMESEP Consortium	159
<b>The radiation, interplanetary shocks, and coronal sources (RISCS) toolset</b>	
G. P. Zank, E. K. Newton, C. Fry, J. H. Adams Jr, Gang Li, O. Verkhoglyadova, X. Ao, N. V. Pogorelov, and D. Falconer	165
<b>Energetic particle reservoirs: 1. Derivation of the transport equation</b>	
Edmond C. Roelof	174
<b>Energetic particle reservoirs: 2. Solutions of the transport equation and comparison with data</b>	
Edmond C. Roelof	180
<b>Alfvén wave interactions in the solar wind</b>	
G. M. Webb, J. F. McKenzie, Q. Hu, J. A. le Roux, and G. P. Zank	186
<b>Turbulence properties associated with interplanetary shock waves</b>	
Qiang Hu, Xianzhi Ao, R. Peltzer, and Gary P. Zank	192
<b>TERRESTRIAL AND PLANETARY RADIATION ENVIRONMENT</b>	
<b>The ionizing radiation environment in space and its effects</b>	
Jim Adams, David Falconer, and Dan Fry	198

<b>Space weathering investigations enabled by NASA's virtual heliophysical observatories</b>	
John F. Cooper, Joseph H. King, Natalia E. Papitashvili, Nand Lal, Edward C. Sittler, Steven J. Sturmer, H. Kent Hills, Alexander S. Lipatov, Tamara J. Kovalick, Rita C. Johnson, Howard A. Leckner, Robert E. McGuire, Thomas W. Narock, Adam Szabo, D. Aaron Roberts, Thomas P. Armstrong, Jerry W. Manweiler, J. Douglas Patterson, Robert B. McKibben, and Cecil Tranquille	204
<b>Precipitation of relativistic electrons</b>	
G. K. Parks, J. J. Lee, E. S. Lee, J. Sample, and M. McCarthy	210
<b>The dynamics of the terrestrial radiation belts and its links to the plasmasphere</b>	
Viviane Pierrard and Sylvie Benck	216
<b>OUTER HELIOSPHERE AND BEYOND</b>	
<b>Update on IBEX and the outer boundary of the space radiation environment</b>	
D. J. McComas and IBEX Science Team	222
<b>Cosmic-ray diffusion in the heliosheath: The effects of scattering and the current sheet drift</b>	
V. Florinski and F. Alouani-Bibi	228
<b>3D simulation of LISM oxygen flux with PUIs inside of heliosphere</b>	
Akito D. Kawamura, Jacob Heerikhuisen, Nikolai V. Pogorelov, and Gary P. Zank	234
<b>Ion velocity distribution at the termination shock: 1-D PIC simulation</b>	
Quanming Lu, Zhongwei Yang, and Bertrand Lembège	241
<b>The Halloween shock of 2003 as it reached Voyager 2 at ~73 AU - Two separate acceleration zones and two different spectra for energetic protons</b>	
W. R. Webber, D. S. Intriligator, and R. B. Decker	249
<b>Acceleration of Anomalous Cosmic Rays at the termination shock</b>	
U. K. Senanayake and Vladimir Florinski	255
<b>Numerical simulations of primary and secondary hydrogen ENA fluxes at 1 AU</b>	
Eric Zirnstein, Jacob Heerikhuisen, and Nikolai Pogorelov	262
<b>Author Index</b>	269
