**Second Law of Thermodynamics: Status and Challenges**

**Table of Contents**

<b>Preface: Second Law of Thermodynamics: Status and Challenges</b>	
Daniel P. Sheehan	1
<b>Acknowledgments</b>	3
<b>Dedication</b>	4
<b>I. THEORETICAL CHALLENGES</b>	
<b>Reduced statistical fluctuations of the position of an object partitioning in two its environment</b>	
Eugenio DelRe, Paolo Di Porto, Stefano Di Sabatino, and Bruno Crosignani	7
<b>Work from the most probable macrostate, and relation to the adiabatic piston problem</b>	
Jack Denur	27
<b>Feynman's Achilles' Heel?</b>	
Lyndsay G.M. Gordon	38
<b>The second law of thermodynamics and the thermo-charged capacitor</b>	
Germano D'Abramo	46
<b>II. EXPERIMENTAL CHALLENGES: HIGH- AND LOW-TEMPERATURE</b>	
<b>Experimental challenge to the second law of thermodynamics in high-temperature, gas-surface reactions</b>	
Daniel P. Sheehan, J. T. Garamella, D. J. Mallin, and W. F. Sheehan	65

**Transformation of thermal energy into electric energy via thermionic emission of electrons from dielectric surfaces in magnetic fields**  
Alexander Perminov and Alexey Nikulov 82

**Superconductor particles as the working media of a heat engine**  
Peter D. Keefe 101

**Observations of persistent current at non-zero resistance: Challenge to the second law of thermodynamics**  
Alexey Nikulov 122

### III. EXPERIMENTAL CHALLENGES: ROOM TEMPERATURE

**Experimental measurements of electric fields in diodic air gaps: Toward a second law challenge**  
Daniel P. Sheehan and J. H. Wright 147

**Experimental evidence violating laws of thermodynamics in magnetostrictive materials**  
Gerald Pellegrini 158

**The Proell Effect: A macroscopic Maxwell's demon**  
Kenneth M. Rauen 167

**The production of electricity out of a heat bath**  
Roderich W. Graeff 193

### IV. QUANTUM AND ELECTROMAGNETIC PERSPECTIVES

**Charge acceleration and field-lines curvature: A fundamental symmetry and consequent asymmetries**  
Avshalom C. Elitzur, Eliahu Cohen, and Paz Beniamini 221

<b>Non-thermodynamic behavior for non-ergodic interactions</b>	
B. Gaveau and L. S. Schulman	245
<b>Quantum thermodynamics of photo and solar cells</b>	
Konstantin E. Dorfman, Kimberly R. Chapin, C. H. Raymond Ooi, Anatoly A. Svidzinsky, and Marlan O. Scully	256
<b>Repelling point bosons</b>	
J. B. McGuire	265
<b>V. CLASSICAL AND KINETIC PERSPECTIVES</b>	
<b>On entropy in Eulerian thermodynamics</b>	
Christian Fronsdal and Abhishek Pathak	277
<b>I. Time reversibility concepts, the second law and irreversible thermodynamics</b>	
Christopher G. Jesudason	292
<b>II. The second law in relation to thermal radiative transfer</b>	
Christopher G. Jesudason	308
<b>Revisiting the second law of energy degradation and entropy generation: From Sadi Carnot's ingenious reasoning to holistic generalization</b>	
Milivoje M. Kostic	327
<b>Large (and small) energy fluctuations in a single classical degree of freedom and the second law of thermodynamics</b>	
Jack Denur	351
<b>Author Index</b>	357
