International Conference on Noise and Vibration Engineering 2006

(ISMA 2006)

Heverlee, Belgium
18-20 September 2006

Volume 1 of 8

Editors:

P. Sas **M. De Munck**

ISBN: 978-1-62993-927-8

Printed from e-media with permission by:

Table of contents

Keynote
Session KEY

A future for experimental structural dynamics 1
D.J. Ewins, Imperial College London, United Kingdom

Auralization of structure-borne sound 7
M. Vorländer, RWTH Aachen, Germany

Tutorial papers

Multiphysics modeling of mechatronic multibody systems 41
P. Fisette, Université Catholique de Louvain, Belgium
O. Brüls, Université de Liège, Belgium
J. Swevers, Katholieke Universiteit Leuven, Belgium
in session AMS1 (AMS1 - Multibody dynamics for multi-physics applications)

Wind turbine noise from an industrial point of view 641
G.A. Matesanz, Gamesa Eolica, Spain
in session AA (Aeroacoustics and flow noise)

Current Status and Challenges for Flight Flutter Testing 1523
A.A. Abbassi, J.E. Cooper, University of Manchester, United Kingdom
in session FLI (Flite Eureka 2)

Wave based modelling methods for steady-state interior acoustics: an overview 2303
B. Pluymers, W. Desmet, D. Vandepitte, P. Sas, Katholieke Universiteit Leuven, Belgium
in session MHF (Medium and high frequency techniques)

A Complete Review of the Complex Mode Indicator Function (CMIF) with Applications 3209
R.J. Allemang, D.L. Brown, University of Cincinnati, United States of America
in session PE (Parameter estimation)

AMS1 - Multibody dynamics for multi-physics applications
Session AMS1

An extended flexible multibody dynamics software for mechatronic applications 17
O. Brüls, P. Duysinx, J.-C. Golinval, Université de Liège, Belgium

Optimal synthesis of planar mechanisms via an extensible-link approach 27
J.-F. Collard, Université Catholique de Louvain, Belgium
P. Duysinx, Université de Liège, Belgium
P. Fisette, Université Catholique de Louvain, Belgium

Multiphysics modeling of mechatronic multibody systems 41
P. Fisette, Université Catholique de Louvain, Belgium
O. Brüls, Université de Liège, Belgium
J. Swevers, Katholieke Universiteit Leuven, Belgium

Concurrent simulation of mechatronic systems with variable mechanical configuration 69
M. da Silva, Katholieke Universiteit Leuven, Belgium
O. Brüls, Université de Liège, Belgium
B. Paijmans, Katholieke Universiteit Leuven / Flanders Mechatronics Technology Center, Belgium
W. Desmet, H. Van Brussel, Katholieke Universiteit Leuven, Belgium

AMS2 - Control and optimisation

Session AMS2

Tracking Performances of Cascade and Sliding Mode Controllers with Application to a XY Milling Table 81
Z. Jamaludin, H. Van Brussel, J. Swevers, Katholieke Universiteit Leuven, Belgium

Gain-scheduling control for mechatronic systems with position-dependent dynamics 93
B. Paijmans, Katholieke Universiteit Leuven / Flanders Mechatronics Technology Center, Belgium
W. Symens, Flanders Mechatronics Technology Center, Belgium
H. Van Brussel, J. Swevers, Katholieke Universiteit Leuven, Belgium

Optimal Attenuation of Known Periodic Disturbances: a Convex Control Design Approach 107
G. Pipeleers, B. Demeulenaere, J. De Schutter, J. Swevers, Katholieke Universiteit Leuven, Belgium

A new semi-active method for the damping of a piezoelectric structure 119
B. de Marneffe, M. Horodinca, A. Preumont, Université Libre de Bruxelles, Belgium

AMS3 - Applications

Session AMS3

A dynamic vibration absorber for torsional oscillations of metro wheel sets 135
C. Collette, R. Bastaits, M. Horodinca, Université Libre de Bruxelles, Belgium

Damping of spray boomstructures with non-linear dampers 147
K. Engelen, H. Ramon, J. Anthonis, Katholieke Universiteit Leuven, Belgium

Development of a numerical modelling methodology for the NVH behaviour of elastomeric line connections 157
A. Stenti, D. Moens, P. Sas, W. Desmet, Katholieke Universiteit Leuven, Belgium

Design and control of a novel piezoelectric drive module for application in a multi-DOF positioning stage 169
W. Van de Vijver, D. Reynaerts, H. Van Brussel, Katholieke Universiteit Leuven, Belgium

Rotordynamic behaviour of a micro-turbine rotor on air bearings: modelling techniques and experimental verification 181
T. Waumans, P. Vleugels, J. Peirs, F. Al-Bender, D. Reynaerts, Katholieke Universiteit Leuven, Belgium

Active noise control

Session ANC

Comparing a Filtered-X LMS and an H2 Controller for the Attenuation of the Sound Radiated by a Panel 199
L.V. Donadon, D.A. Siviero, J.F. Camino, J.R.F. Arruda, Universidade Estadual de Campinas, Brazil

Force transmission loss as a mechanism for the active control of noise using an active bearing: Preliminary results 211
S. Hill, Katholieke Universiteit Leuven / Flanders Mechatronics Technology Center, Belgium
B. Stallaert, Katholieke Universiteit Leuven, Belgium
W. Symens, Flanders Mechatronics Technology Center, Belgium
P. Sas, Katholieke Universiteit Leuven, Belgium

Experimental and numerical investigations of a smart acoustic box 223
F. Laugwitz, J. Lefèvre, G. Schmidt, T. Nestoroviæ, U. Gabbert, Otto-von-Guericke University of Magdeburg, Germany

Enhancement of a Passive Acoustic Liner by Active Control of Intensity 233
A. Minotti, V. Pommier-Budinger, J. Bordeneuve-Guibe, ENSICA-DAS, France
F. Simon, ONERA, France

Active Structural Acoustic Control of repetitive impact noise 245
G. Pinte, R. Boonen, W. Desmet, P. Sas, Katholieke Universiteit Leuven, Belgium

Application of dither control for automotive wiper squeal 263
B. Stallaert, F. Doucet, J. Rys, Katholieke Universiteit Leuven, Belgium
A. Diallo, S. Chaigne, Renault, France
J. Swevers, P. Sas, Katholieke Universiteit Leuven, Belgium

A Virtual Prototyping Approach to the Design of Smart Structures Applications 273
H. Van der Auweraer, LMS International, Belgium
L.P.R. de Oliveira, M. da Silva, Katholieke Universiteit Leuven, Belgium
S. Herold, LBF, Fraunhofer Institute for Structural Durability, Germany
J. Mohring, ITWM, Fraunhofer-Institut für Techno- und Wirtschaftsmathematik, Germany
A. Deraemaeker, Université Libre de Bruxelles, Belgium

Evaluation of the Performance Characteristics of the FxLMS and FxGAL Algorithms for ASAC applications 285
P. Vengala, A. Dhaliwal, J.R. Blough, G.G. Parker, Michigan Technological University, United States of America

Research and development on active sound attenuated enclosure for generator set 301
N. Zhang, W. Yang, Z. Liu, R. Fei, Beijing University of Technology, China

Further modeling and new results of active and passive noise reduction using elasto-poroelastic panels 309
T.G. Zielinski, Polish Academy of Sciences / Ecole Centrale de Lyon, France
M.-A. Galland, M. Ichchou, Ecole Centrale de Lyon, France

A CAE modeling approach for the analysis of vibro-acoustic systems with distributed ASAC control 321
L.P.R. de Oliveira, Katholieke Universiteit Leuven, Belgium
A. Deraemaeker, Université Libre de Bruxelles, Belgium
J. Mohring, ITWM, Fraunhofer-Institut für Techno- und Wirtschaftsmathematik, Germany
H. Van der Auweraer, LMS International, Belgium
P. Sas, W. Desmet, Katholieke Universiteit Leuven, Belgium

Active vibration control and smart structures
Session AVC

Magnetorheological landing gear design: A feasibility study for small and large-scale aircraft 337
D.C. Batterbee, N.D. Sims, University of Sheffield, United Kingdom
Z. Wolejsza, The Institute of Aviation, Poland
A. Lafitte, Messier Dowty, France

Generating 1D and 2D directional vibration waves 353
R. Gabay, I. Bucher, Technion - Israel Institute of Technology, Israel

Active Vibration Control in a Centerless Grinding Machine 369
I. Garitaonandia, J. Albizuri, M.H. Fernandes, J.M. Hernández, University of the Basque Country, Spain
Sabalza, IDEKO R&D Centre, Spain

Active Vibration Control of Space Truss Structures: Power Analysis and Energy Distribution 383
P. Gonçalves, S. Elliott, M.J. Brennan, University of Southampton, United Kingdom

Adaptive Landing Gear: optimum control strategy and improvement potential 397
L. Jankowski, G. Mikulowski, Institute of Fundamental Technological Research, Poland

Modelling and tuning the SMA absorber 413
W. Klein, A. Mezyk, E. Switonski, Silesian University of Technology, Poland

The use of dynamical recurrent neural network for identification and active vibration control of a laminated thin plate 421
S. Kouhi, J. Poshtan, Iran University of Science and Technology, Iran (Islamic Republic of)

Vibration decay using on-off stiffness control 433
D.F. Ledezma-Ramirez, N.S. Ferguson, M.J. Brennan, University of Southampton, United Kingdom

Damping measurements on a carbon fibre reinforced laminate 447
D. Montalvão, Escola Superior de Tecnologia de Setúbal, Portugal
A.M.R. Ribeiro, N.M.M. Maia, Instituto Superior Técnico, Portugal
J. Duarte Silva, R.A. Cláudio, Escola Superior de Tecnologia de Setúbal, Portugal

FE analysis of a PZT-actuated adaptive beam with vibration damping using an electric multiple-mode shunt system 461
N.H. Nguyen, S.J. Pietrzko, Empa - Materials Science & Technology, Switzerland

A fast converging adaptive control scheme for suppression of broadband disturbances on a multi-variable vibration isolation setup 473
G. Nijsse, J. van Dijk, J.B. Jonker, University of Twente, The Netherlands

Adaptive vibrations control of a turbine with magnetic bearings 483
Z. Ogonowski, K. Plaza, Silesian University of Technology, Poland

Semi-active damping of vibrations. Prestress Accumulation-Release strategy development. 499
A. Orlowska, A. Mróz, Institute of Fundamental Technological Research, Poland
J. Holnicki-Szulc, Institute of Fundamental Technological Research, Polish Academy of Sciences, Poland

Acoustic excitation of mechatronic systems by diffuse acoustic sound fields; Numerical predictions and measurements. 511
N.B. Roozen, B.T. Verhaar, Philips Applied Technologies, The Netherlands
M.J. Vervoordeldonk, Delft University of Technology / Philips Applied Technologies, The Netherlands

Vibration Testing Techniques for Active Membranes 525
E.J. Ruggiero, GE Global Research, United States of America
D.J. Inman, Virginia Polytechnic Institute and State University, United States of America

Piezoceramics-based Devices for Active Balancing of Flexible Shafts 543
P.J. Sloetjes, A. de Boer, University of Twente, The Netherlands

Electrical Coupling between Sensors and Actuators integrated in a Micro Active Suspension 557
T. Verdot, Y. Meyer, M. Collet, FEMTO-ST, France
J. Baborowski, P. Muralt, Ecole Polytechnique Fédérale de Lausanne, Switzerland

Active Structural Damping in high-precision equipment 573
M.J. Vervoordeldonk, J. van Eijk, Delft University of Technology / Philips Applied Technologies, The Netherlands
N.B. Roozen, Philips Applied Technologies, The Netherlands

Aeroacoustics and flow noise

Session AA

Airflow and acoustic optimization of cooling devices using 3D particle image velocimetry 583
J. Cordova, Intel Tecnologia de Mexico, Mexico
M. Trautman, W.M. Beltman, Intel Corporation, United States of America

On the Use of Filtering Techniques for Hybrid Metods in Computational Aero-Acoustics 595
W. De Roeck, G. Rubio, W. Desmet, Katholieke Universiteit Leuven, Belgium

Jet Flow induced noise computed using Large Eddy Simulations 611
Y. Detandt, G. Degrez, Université Libre de Bruxelles, Belgium
S. Caro, Free Field Technlogies, Belgium

Influence of geometry on the generation of aeroacoustic noise 619
C. Hahn, M. Kaltenbacher, R. Lerch, S. Becker, F. Durst, Friedrich-Alexander-University of Erlangen-Nuremberg, Germany

CAA as a Postprocessing-Step within CFD-Computations 633
M. Kaltenbacher, M. Escobar, C. Hahn, I. Ali, S. Becker, Friedrich-Alexander-University of Erlangen-Nuremberg, Germany

Wind turbine noise from an industrial point of view 641
G.A. Matesanz, Gamesa Eolica, Spain

Jet noise modelling for shielding calculations using RANS solution source localisation and WEM propagation 667
C.J. O'Reilly, H.J. Rice, Trinity College of Dublin, Ireland

Experimental identification of a boundary pressure field induced by a turbulent flow from plate vibration measurements 677
C. Pezerat, N. Totaro, INSA de Lyon, France
M. Pachebat, PSA Peugeot Citroën, France
J.-L. Guyader, INSA de Lyon, France

Vibro-acoustic interactions with mean flows. Coupling of Galbrun's and Biot's equations. 693
E. Redon, O. Andrianarison, R. Ohayon, I.S.A.T. Nevers, France

Influence of irregular grids on the accuracy of a Quadrature-Free Discontinuous Galerkin Method for solving the LEE equations 701
Y. Reymen, M. Baelmans, W. Desmet, Katholieke Universiteit Leuven, Belgium

Practical Formulas for Oscillating Flow and Sound Traveling in Pipe 715
Y. Sato, H. Kanki, Kobe University, Japan

Application of a Boundary Element reformulation of an aeroacoustical analogy based on incompressible flow data 731
C. Schram, M. Tournour, LMS International, Belgium

Application of (new) vibroacoustic methods to complex systems
Session AVM

Considerations on the Modelling of a Benchmark Structure and Applicability of Statistical Energy Analysis 739
N. Baldanzini, P. Citti, M. Pierini, A. Scippa, Università degli Studi di Firenze, Italy

Efficiency estimation of a benchmark SEA model 755
A. Culla, A. Sestieri, University of Rome "La Sapienza", Italy

Evaluation of the SEA parameters of a benchmark by the power injection method 767
A. Culla, A. Sestieri, University of Rome "La Sapienza", Italy

A review of the scaling procedure for the analysis of the vibroacoustic responses 781
S. De Rosa, F. Franco, University of Naples "Federico II", Italy

A hybrid formulation for vibro-acoustic analysis of structures in the mid-frequency domain 793
A. Pratellesi, Università degli Studi di Firenze, Italy
M. Viktorovitch, Rieter Automotive AG, Switzerland
N. Baldanzini, M. Pierini, Università degli Studi di Firenze, Italy

Application of the complex envelope vectorization to a benchmark made of three coupled plates 807
A. Sestieri, O. Giannini, A. Carcaterra, University of Rome "La Sapienza", Italy

Damage monitoring and identification
Session DMI

Energy Flow Method Applied to the Detection of Structural Damages 823
A. Amziani, A. Bouazzouni, Université Mouloud Mammeri de Tizi-Ouzou, Algeria

Experimental Damage Detection Using Observability Grammian Matrix 835
D.D. Bueno, C.R. Marqui, V. Lopes Jr., Universidade Estadual Paulista, Brazil
M.J. Brennan, University of Southampton, United Kingdom

Vibration based SHM : comparison of the performance of modal features vs features extracted from spatial filters under changing environmental conditions 849
A. Deraemaeker, Université Libre de Bruxelles, Belgium
E. Reynders, G. De Roeck, Katholieke Universiteit Leuven, Belgium
J. Kullaa, Helsinki Polytechnic Stadia, Finland

Detection of corrosion damage in RC beams using modal testing 865
Z. Ismail, P.L. Tan, H.A. Razak, University of Malaya, Malaysia

Sensor fault identification and correction in structural health monitoring 873
J. Kullaa, Helsinki Polytechnic Stadia, Finland

Vibration Signature Analysis for Engine Condition Monitoring and Diagnosis 885
M.J. Mahjoob, A. Zamanian, University of Tehran, Iran (Islamic Republic of)

Determination of Total Hip Replacement stem insertion endpoint and stability assessment by vibration analysis: first experiences with per-operative measurements 897
L.C. Pastrav, S.V.N. Jaecques, Katholieke Universiteit Leuven, Belgium
M. Mulier, University Hospital Gasthuisberg, Belgium
G. Van der Perre, Katholieke Universiteit Leuven, Belgium

A Study on the Correlation between PZT and MFC Resonance Peaks and Damage Detection Frequency Intervals Using the Impedance Method 909
D. Peairs, P.A. Tarazaga, D.J. Inman, Virginia Polytechnic Institute and State University, United States of America

Damage Identification based on Vibration Measurements Applied to Masonry Structures 925
L.F. Ramos, University of Minho, Portugal
G. De Roeck, Katholieke Universiteit Leuven, Belgium
P.B. Lourenço, University of Minho, Portugal
A. Campos-Costa, LNEC, Portugal

Damage identification for structural health monitoring using modal-based method and neural network classifier 941
A. Sorrentino, I. Dimino, Quaranta, E. Quaranta, CIRA SCpA, Italy

Damping
Session D

Damping Model Uncertainty in Structural Dynamics 949
S. Adhikari, University of Bristol, United Kingdom

Hysteretic behaviour of tape-spring actuators: Influence on the deployment of an hexapod 965
G. Aridon, D. Rémond, A. Al Majid, INSA de Lyon, France
L. Blanchard, Alcatel Alénia Space, France
R. Dufour, INSA de Lyon, France

Rheological and restoring force models regarding belt tensioner dymamic behavior: prediction & experiment. 975
J. Bastien, Université de Technologie de Belfort-Montbéliard, France
G. Michon, Valeo Electrical Systems, France
L. Manin, R. Dufour, INSA de Lyon, France

Metal-polymer-ceramic constrained layer damping system 991
L.V. Bochkareva, United Institute of Informatics Problems NAS of Belarus, Belarus
M.V. Kireitseu, University of Sheffield, United Kingdom
S. Panin, Institute of strength physics and mesomechanics of materials SB RAS, Russian Federation

Acceptance test for damped railway wheels 1001
A. Bracciali, Università degli Studi di Firenze, Italy
S. Cervello, Lucchini Sidermeccanica S.p.A., Italy

Fractional damping Induced by a slave system attached to a master oscillator 1011
A. Carcaterra, O. Giannini, University of Rome “La Sapienza”, Italy
A. Akay, Carnegie Mellon Unyversity, United States of America

Dynamic Properties and Damping Prediction for Laminated Plates 1021
B. Diveyev, Lviv National Polytechnic University, Ukraine
M.J. Crocker, Auburn University, United States of America

Mode based prediction of vibrations in highly damped structures 1029
K. Dovstam, Dovstam Innovation, Sweden
P. Göransson, KTH Kungliga Tekniska Högskolan, Sweden

Influence of the number of parameters of a rubber isolator viscoelastic model on the predicted dynamic behaviour of a suspended mass 1039
N. Gil-Negrete, M.J. García Tárrago, J. Vinolas, University of Navarra, Spain

Auxetic Materials and Structural Damping 1051
J.R. House, M. Greaves, M. Swan, QinetiQ, United Kingdom

Thermoelastic Damping in MEMS Resonators - The role of Thermal and Structural Modes 1061
N. Jaroesawat, S. McWilliam, C.H.J. Fox, University of Nottingham, United Kingdom

Numerical Simulation of Rubber Devices Dynamics by Discrete Modelling 1071
M. Lancini, A. Magalini, D. Vetturi, Università degli Studi di Brescia, Italy

Investigation of the sloshing effects of an aeroplane fuel tank without and including the new eXess-aluminium mesh 1085
N. Niedbal, G. Rosenhäger, Fachhochschule Bielefeld, Germany

On the Modelling of Damping in Structural Vibrations 1097
A.M.R. Ribeiro, N.M.M. Maia, J.M.M. Silva, Instituto Superior Técnico, Portugal

Experimental Study on Vibration Reduction System with Granular Materials 1107
T. Sato, M. Tanishima, A. Ban, Tokyo Denki University, Japan
K. Tanaka, Saitama University, Japan

Modeling of Assembled Combustion Engine Parts under Considertation of Micro Slip Effects in the Connection Flanges 1117
C. Schedlinski, ICS Engineering GmbH, Germany
A. Genzo, B. Läer, Volkswagen AG, Germany
L. Panning, University of Hannover, Germany

Dynamics of rigid bodies with rough contact surfaces and run-in wear 1131
J. Slavic, M. Boltezar, University of Ljubljana, Slovenia

On combined viscous and dry-friction modelling in kinematically excited vibration isolation systems 1143
G.J. Stein, R. Zahoransky, Institute of Materials and Machine Mechanics of Slovak Academy of Sciences, Slovakia (Slovak Republic)

Experimental investigation of the dynamic performances and durability of a colloidal damper 1153
C.V. Suciu, Fukuoka Institute of Technology, Faculty of Engineering, Japan

Dynamic behavior of civil structures
Session DCS

Output-only modal identification of Luiz I Bridge before and after rehabilitation 1165
Á. Cunha, F. Magalhaes, E. Caetano, Faculty of Engineering of the University of Porto (FEUP), Portugal

Time domain iterative procedures for vehicle-bridge dynamic interaction 1179
A. Feriani, Università degli Studi di Brescia, Italy
M.G. Mulas, Politecnico di Milano, Italy
C. Aliprandi, Università degli Studi di Brescia, Italy

Vertical vibration control of multi-track High-Speed railway bridges under resonant conditions retrofitted with Fluid Viscous Dampers 1195
M.D. Martinez-Rodrigo, University Jaume I, Spain
E. Moliner Cabedo, P. Museros, University of Granada, Spain

Global vertical modes of floor vibration in multi-storey buildings 1211
Z. Miskovic, A. Pavic, P. Reynolds, University of Sheffield, United Kingdom

FE Modelling and Updating of Unique Fink Truss Footbridge 1221
V. Racic, S. Zivanovic, A. Pavic, University of Sheffield, United Kingdom

Vibration of the railway track-viaduct system under moving vehicles taking into account the interaction effect 1233
C. Rigueiro, Institute Polytechnic of Castelo Branco, Portugal
C. Rebelo, L.S. Silva, University of Coimbra, Portugal

Design of lightweight floor system with minimized vibration 1249
S.F.A.J.G. Zegers, F. van Herwijnen, Technical University of Eindhoven, The Netherlands

Dynamic modelling
Session DMOD

Identification of a Bolted Lap Joint Parameters Using Response Surface Method 1259
H. Ahmadian, H. Hadad, Iran University of Science and Technology, Iran (Islamic Republic of)

Model validation for heavily damped structures. Application to a windshield joint. 1273
E. Balmes, Ecole Centrale de Paris / SDTools, France
M. Corus, ONERA / Ecole Centrale Paris, France
S. Germès, PSA Peugeot Citroën, France

A Linear Programming Approach to the Optimal Design of Spline-Based Motion System Inputs 1287
J. De Caigny, B. Demeulenaere, J. Swevers, J. De Schutter, Katholieke Universiteit Leuven, Belgium

Dynamic Behaviour of Elastic Bodies Coupled by Extended Friction Contacts 1303
A. Genzo, Volkswagen AG, Germany
W. Sextro, Technical University of Graz, Austria
L. Panning, University of Hannover, Germany

Prediction of the influence of structural modifications including viscoelastic materials 1319
B. Groult, EDF R&D, France

A model reduction method for determining modal parameters of a fluid-loaded structure 1333
X. Li, S. Li, Dalian University of Technology, China

Determining the dynamic properties of joints in piping systems 1341
J.M. Muggleton, T.P. Waters, B.R. Mace, University of Southampton, United Kingdom

Transfer function modeling and control of a flexible gear train 1353
I. Peled, Y. Halevi, Technion – Israel Institute of Technology, Israel

Modelling the Control Strategies for Riding a Motorcycle 1367
S. Rowell, A.A. Popov, J.P. Meijaard, University of Nottingham, United Kingdom

EDSVS
Session E

Decentralised feedback control systems in double panels 1379
N. Alujevic, P. Gardonio, University of Southampton, United Kingdom

Experimental investigation on the MRTLCD for vibration control of slender structures 1395
S. Colwell, A. Jakob, Technische Universität Berlin, Germany

A Method to Characterise Structure Borne Noise of a Source from In-Situ Measurement 1407
A.S. Elliott, University of Salford, United Kingdom
G. Pavic, INSA de Lyon / University of Salford, France
A.T. Moorhouse, University of Salford, United Kingdom

Reduced modal models and negative concept modifications in dynamic analysis 1421
E. Mucchi, University of Ferrara, Italy
S. Donders, R. Hadjit, LMS International, Belgium
W. Desmet, P. Sas, Katholieke Universiteit Leuven, Belgium

Presenting Noise Maps in a 3D Environment 1431
F. Pilla, H.J. Rice, Trinity College of Dublin, Ireland

Direct hybrid coupled finite element – wave based technique for 3D steady-state acoustic analysis 1447
P. Silar, A. Hepberger, ACC Acoustic Competence Center G.m.B.H., Austria
H.-H. Priebsch, ACC Acoustic Competence Center G.m.B.H. / Graz Technical University, Austria
H. Pramberger, AVL List GmbH, Austria
T. Bartosch, MAGNA STEYR Fahrzeugtechnik AG & Co KG, Austria

FRIENDCOPTER Rotorcraft noise and vibration

Session FCOP

Energy ratio approach for SEA model path identification 1457
G. Diodati, P. Vitiello, Italian Aerospace Research Center, Italy

Active solutions for reduction of the transmission of structure - borne noise to the cabin structure on a A109 mockup 1469
L. Dozio, W. Corbetta, E. Vigoni, A. Forghieri, G.L. Ghiringhelli, Politecnico di Milano, Italy
F. Cenedese, AgustaWestland, Italy

Modeling and Characterisation of the Vibration Dynamics Modeling of Anisotropic Porous Foam Materials 1481
R. Guastavino, P. Göransson, KTH Kungliga Tekniska Högskolan, Sweden

Simulation and Evaluation of Noise and Vibration Reduction Techniques in a Helicopter Cabin Using SEA 1489
A. Perazzolo, F. Cenedese, AgustaWestland, Italy

Hybrid Modelling of a helicopter gearbox using Inverse Boundary Elements Method 1497
A. Vecchio, LMS International, Belgium
F. Cenedese, AgustaWestland, Italy
C. Urbanet, University of Rome “La Sapienza”, Italy

Experimental Noise Transfer Path Analysis on Helicopters 1509
A. Vecchio, LMS International, Belgium
C. Urbanet, University of Rome “La Sapienza”, Italy
F. Cenedese, AgustaWestland, Italy

Flite Eureka 2

Session FLI

Current Status and Challenges for Flight Flutter Testing 1523
A.A. Abbassi, J.E. Cooper, University of Manchester, United Kingdom

Quantification of Asymmetric In-Flight LCO Response and Prediction using Neural Networks 1547
K. Dawson, D. Maxwell, TYBRIN Corporation, United States of America

Recursive subspace identification for in-flight modal analysis of airplanes 1563
K. De Cock, Katholieke Universiteit Leuven, Belgium
G. Mercère, Laboratoire d'Automatique et d'Informatique Industrielle, France
B. De Moor, Katholieke Universiteit Leuven, Belgium

Fast Derivation of Uncertainty Bounds for On-line Flight Flutter Testing 1579
T. De Troyer, Erasmushogeschool Brussel, Belgium
P. Guillaume, R. Pintelon, Vrije Universiteit Brussel, Belgium
B. Peeters, LMS International, Belgium

Output-only Technique for Estimation of Nonlinear System Parameters for In-flight Test Application 1589
J. Iwaniec, T. Uhl, AGH - University of Science and Technology, Poland

An experimental investigation of the subsonic stall flutter 1603
J. Li, N. Andrinopoulos, G. Dimitriadis, University of Manchester, United Kingdom

When is a pole spurious? 1615
I. Markovsky, J. Boets, B. Vanluyten, K. De Cock, B. De Moor, Katholieke Universiteit Leuven, Belgium

In-flight modal analysis - a comparison between sweep and turbulence excitation 1627
B. Peeters, LMS International, Belgium
T. De Troyer, Erasmushogeschool Brussel, Belgium
P. Guillaume, Vrije Universiteit Brussel, Belgium
H. Van der Auweraer, LMS International, Belgium

The use of wavelet transform for in-flight modal analysis 1643
T. Uhl, A. Klepka, AGH - University of Science and Technology, Poland

Detection of turbulence during flutter tests 1655
P. Vacher, A. Bucharles, ONERA, France

CUSUM test for flutter monitoring of modal dynamics 1671
R. Zouari, L. Mevel, M. Basseville, Institut de Recherche en Informatique et Systèmes Aléatoires, France

Ground vibrations

Session GRV

Identification of random field models for elastic moduli from spectral analysis of compression wave experiments 1685
M. Arnst, Q. Anh Ta, D. Clouteau, Ecole Centrale de Paris, France
M. Bonnet, Ecole Polytechnique, France

An iterative coupled boundary-finite element method for the dynamic response of structures 1701
S. François, H.R. Masoumi, G. Degrande, Katholieke Universiteit Leuven, Belgium

Soil induced vibrations due to high-speed trains considering dynamic interaction and ballast effects 1717
P. Galvín, J. Domínguez, Universidad de Sevilla, Spain

Seismic damage detection in existing buildings by finite element model updating 1725
P. Gundes Bakir, E. Reynders, G. De Roeck, G. Degrande, Katholieke Universiteit Leuven, Belgium

A numerical model for ground-borne vibrations and reradiated noise in buildings from underground railways 1741
S. Gupta, Katholieke Universiteit Leuven, Belgium
P. Fiala, Budapest University of Technology, Hungary
M.F.M. Hussein, University of Cambridge, United Kingdom
H. Chebli, Ecole Centrale de Paris, France
G. Degrande, Katholieke Universiteit Leuven, Belgium
F. Augusztinovicz, Budapest University of Technology, Hungary
H.E.M. Hunt, University of Cambridge, United Kingdom
D. Clouteau, Ecole Centrale de Paris, France

A new physical approach to generate a seismic excitation 1757
S. Lignon, L. Jézéquel, Ecole Centrale de Lyon, France

Human vibrations
Session HUM

Effect of automobile operating condition on the subjective equivalence of steering wheel vibration and sound 1767
M. Ajovalasit, J. Giacomin, Brunel University, United Kingdom

Identification methodology of the human pelvis for Low Back Pain diagnosis 1781
N.E. Conza, D.J. Rixen, Delft University of Technology, The Netherlands
C.J. Snijders, Erasmus MC University Medical Center, The Netherlands

Measurement and identification of the vibration characteristics of motorcycle riders 1793
V. Cossalter, A. Doria, D. Fabris, M. Maso, University of Padova, Italy

Measurement of human-structure interaction in vertical and lateral directions: a standing body 1807
E. Duarte, T. Ji, University of Manchester, United Kingdom

Subjective and Objective Vibration Characterization of User Interface Locations aboard Snowmobiles and ATVs 1821
J.D. Keske, J.R. Blough, Michigan Technological University, United States of America

Optimization of Child Restraint System for Crash-Safety with Child FE Human Model 1837
T. Koizumi, N. Tsujiuchi, T. Nagatani, Doshisha University, Japan
H. Horii, CD-adapco JAPAN Co., LTD., Japan

Instrumentation
Session I

Seismicity induced by excavation activities: monitoring system problems 1849
P. Berry, S. Capponi, A. Fabbri, University of Bologna, Italy

Non contact sensors comparison for dynamic testing of lightweight structures 1861
L. Bregant, Università di Trieste, Italy
M. Bressanutti, APE Research, Italy
L. Valent, A. Vecchio, LMS International, Belgium

High Channel Count Systems Architecture for Noise and Vibration Measurements 1871
T. Debelle, K. Veggeberg, National Instruments, United States of America

The application of spatial vision-based measurement for modal analysis 1879
P. Kohut, P. Kurowski, M. Szwedo, AGH - University of Science and Technology, Poland

Two complementary Microflown based methods to determine the reflection coefficient in situ 1889
H.-E. de Bree, Microflown Technologies / HAN University, The Netherlands
E. Tijs, Microflown Technologies, The Netherlands
T. Basten, TNO Science and Industry, The Netherlands

Maduse

Session MAD

A Wave-Based Substructuring Approach for Fast Modification Predictions and Industrial Vehicle Optimization 1901
S. Donders, R. Hadjit, L. Hermans, M. Brughmans, LMS International, Belgium
W. Desmet, Katholieke Universiteit Leuven, Belgium

An application of response surface methodology in the field of dynamic analysis of mechanical structures considering uncertain parameters 1913
A. Gallina, A. Martowicz, T. Uhl, AGH - University of Science and Technology, Poland

Analysis of the uncertain dynamic behavior of an automotive control unit using the component mode transformation method 1925
O. Giannini, University of Rome “La Sapienza”, Italy
U. Gauger, M. Hanss, Universität Stuttgart, Germany

Analysis of structures with uncertain parameters using component mode synthesis 1935
L. Hinke, B.R. Mace, T.P. Waters, University of Southampton, United Kingdom

Verification and validation of finite element models for the vibro-acoustic behavior of a windscreen in presence of variability 1951
P. Lardeur, Renault / Université de Technologie de Compiègne, France
M. Scionti, R. Scigliano, Renault, France

Extending the Prediction Horizon of Uncertain-weighted Regression Models 1963
G. Manson, D. Chetwynd, K. Worden, University of Sheffield, United Kingdom

Possibilities and limitations of a reanalysis–based procedure for structural dynamic analysis of uncertain systems 1975
L. Martini, E. Arnoult, Université de Technologie de Compiègne, France
P. Lardeur, Renault / Université de Technologie de Compiègne, France

An approach to sensitivities-based prediction methods within uncertainty modeling of the dynamic behavior of structures. 1989
M.A. Schoen, Centro Ricerche FIAT, Italy

Experimental and numerical study of the intra/inter variability of an acoustic windscreen 1999
M. Scionti, Renault, France
P. Lardeur, Renault / Université de Technologie de Compiègne, France

Fuzzy Uncertainty Analysis in Automotive Crash Simulation 2015
S. Turrin, M. Hanss, L. Gaul, Universität Stuttgart, Germany

Modelling of a vehicle windshield with realistic uncertainty 2023
R. d'Ippolito, LMS International, Belgium
U. Tabak, M. De Munck, Katholieke Universiteit Leuven, Belgium
S. Donders, LMS International, Belgium
D. Moens, D. Vandepitte, Katholieke Universiteit Leuven, Belgium

Material characterisation based on dynamic measurements
Session MAT

Experimental assessment of a non-destructive method for measuring the elastic properties of thin isotropic plates 2033
M. Alfano, L. Pagnotta, G. Stigliano, University of Calabria, Italy

Accounting for glue and temperature effects in Nomex based honeycomb models 2041
C. Florens, ONERA / Ecole Centrale Paris, France
E. Balmes, Ecole Centrale de Paris / SDTools, France
F. Clero, M. Corus, ONERA / Ecole Centrale Paris, France

Material properties' identification using full field measurements on vibrating plates 2055
B. Guo, A. Giraudeau, F. Pierron, S. Avril, Ecole Nationale Supérieure d'Arts et Métiers (ENSAM), France

Test method development for determination of dynamic properties of shock and vibration absorbing materials 2065
M. Juntunen, VTT Smart Machines, Finland
K. Ojala, Nokia Research Center, Finland
J. Keinänen, K. Vehviläinen, VTT Smart Machines, Finland

Wave Propagation Modelling in Composite Plates 2075
P. Kudela, Polish Academy of Sciences, Poland
W. Ostachowicz, Gdynia Maritime University, Poland

Resonant-Based Identification of the Elastic Properties of Ceramic Coatings 2087
T. Lauwagie, W. Heylen, Katholieke Universiteit Leuven, Belgium

An evaluation of a mixed experimental/numerical method using FRF for the identification of viscoelastic materials 2099
A. Moreau, E. Pagnacco, D. Lemosse, D. Borza, INSA de Rouen, France

Pipe thickness identification by modal order analysis 2113
G. Pavic, INSA de Lyon / University of Salford, France
H. Cãlin-Ioan, University of Transylvania, Romania

Evaluation of Strain Dependent Material Properties of Hard Coatings 2121
M.S. Reed, A.N. Palazotto, Air Force Institute of Technology, United States of America

Identification of damage using low frequency harmonics in trusses and beams 2137
A. Swiercz, P. Kolakowski, J. Holnicki-Szulc, Institute of Fundamental Technological Research, Polish Academy of Sciences, Poland

Medium and high frequency techniques
Session MHF

Sound transmission loss calculations of different structural subsystems using "OpenSourceSEA" 2145
S. Callsen, O. von Estorff, Hamburg University of Technology, Germany
A. Peiffer, EADS Corporate Research Centre, Germany

Advanced modeling of periodic structures in SEA 2159
V. Cotoni, ESI-US R&D, United States of America
R.S. Langley, University of Cambridge, United States of America

Test strategy for aero-engine structural dynamic model validation 2175
J.V. Garcia, Rolls-Royce plc., United Kingdom
D.J. Ewins, Imperial College London, United Kingdom

Numerical Solution of High-Frequency Oscillations of a Gas Column Using a Modified Lax-Wendroff Scheme 2191
A. Ghasemi, Sharif University of Technology, Iran (Islamic Republic of)

On the convergence of the WBM solution in certain nonconvex domains 2201
J. Jegorovs, ITWM, Fraunhofer-Institut für Techno- und Wirtschaftsmathematik, Germany

On the application of the Wave Based Method in the case of an exterior 3D domain 2211
J. Jegorovs, J. Mohring, ITWM, Fraunhofer-Institut für Techno- und Wirtschaftsmathematik, Germany

Prediction of the ensemble mean and variance of the response of uncertain structures using the Hybrid FE-SEA method 2221
R.S. Langley, University of Cambridge, United States of America
V. Cotoni, ESI-US R&D, United States of America

The Vibro-acoustic Responses of Structures with Uncertainties 2237
G. Lucas, N.J. Kessissoglou, The University of New South Wales, Australia

Acoustic convected radiation using a partition of unity formulation 2251
T. Mertens, Ph. Bouillard, Université Libre de Bruxelles, Belgium
J. Astley, P. Gamallo, University of Southampton, United Kingdom
L. Hazard, Université Libre de Bruxelles, Belgium

Noise reduction of a laser printer using SEA and FEM 2267
A. Mori, Nihon ESI K.K., Japan
T. Yamazaki, K. Kuroda, Kanagawa University, Japan
F. Kuratani, Wakayama University, Japan

Modeling of structural sound transmission in train structures using hybrid FE-SEA and EFM analysis 2275
U. Orrenius, L. Baurès, Bombardier Transportation, Sweden
V. Cotoni, ESI-US R&D, United States of America

Application of the Fast Multipole Method to the Variational Boundary Element Method for Large Acoustic Radiation Problems 2289
S. Paquay, Open Engineering S.A., Belgium
M. Géradin, Joint Research Centre, European Commission, Italy

Wave based modelling methods for steady-state interior acoustics: an overview 2303
B. Pluymers, W. Desmet, D. Vandepitte, P. Sas, Katholieke Universiteit Leuven, Belgium

Coupled vibro-acoustic analysis in 3D using a wave expansion finite difference technique 2359
G. Ruiz, Harman/Becker Automotive Systems, United Kingdom

Boundary Element Energy Method for the acoustic design of vehicles shields 2367
M. Thivant, P. Bouvet, VIBRATEC, France
N. Blairon, VOLVO 3P, France

On the coupling of Wave Based models with modally reduced Finite Element models for structural-acoustic analysis 2383
B. Van Genechten, B. Pluymers, C. Vanmaele, D. Vandepitte, W. Desmet, Katholieke Universiteit Leuven, Belgium

Application of the Wave Based Prediction Technique for structural problems with stress singularities 2405
C. Vanmaele, W. Desmet, D. Vandepitte, Katholieke Universiteit Leuven, Belgium

Acoustical method for radiation calculation of complex structures 2425
M. Viallet, Ecole Centrale de Lyon / PSA Peugeot Citroën, France
G. Poumérol, O. Sauvage, PSA Peugeot Citroën, France
O. Dessombz, L. Jézéquel, Ecole Centrale de Lyon, France

Waveguide finite element modelling: numerical issues 2435
Y. Waki, B.R. Mace, M.J. Brennan, University of Southampton, United Kingdom

Modal testing and FRF estimation

Session MT

Practical Guidelines for Optimising the Measurement of Frequency Response and Coherence Functions with Digital Spectral Analysers 2451
J. Antoni, Université de Technologie de Compiègne, France
J. Schoukens, Vrije Universiteit Brussel, Belgium

A Review of Experimental Modal Analysis Methods with respect to their Applicability to Test Data of Large Aircraft Structures 2461
M. Böswald, D. Göge, U. Füllekrug, Y. Govers, Deutsches Zentrum für Luft- und Raumfahrt e.V., Germany

Development of a New Automated Modal Test Planning Algorithm 2483
P.M. Daborn, P.R. Ind, A. Tribe, K. Garraway, AWE, United Kingdom

The poly-reference LSCF estimator optimised for vibro-acoustic systems 2495
G. De Sitter, P. Guillaume, Vrije Universiteit Brussel, Belgium

A Study on Modal Characteristics of a Commercial Vehicle Rear Door 2507
E. Dikmen, I. Basdogan, Koc University, Turkey

Vibration Testing of Large Spacecraft Structure 2513
Y. Feng, S. Yang, China Academy of Space Technology (CAST), China

Estimation of Powertrain Inertia Properties via an In-situ Method 2521
D. Johnson, J. Van Karsen, J.R. Blough, M. Rao, Michigan Technological University, United States of America
T. Ge, Ford Motor Company, United States of America

Measurement plan definition on Ariane V launcher 2537
A. Macaire, EADS SPACE Transportation, France
F. Dubois, CNAM, France

The influence of the sharp transients introduced by the force window when applied to signals with DC components 2551
A.F. Nicula, C. Mohr, A. Anstätt, LuK GmbH &Co.oHG, Germany

Investigation of Boring Bar Mode Shape Rotation by Experimental Modal Analysis in Correlation with Finite Element Modeling 2557
T. Smirnova, H. Åkesson, L. Håkansson, I. Claesson, Blekinge Institute of Technology, Sweden
T. Lagö, Acticut International AB, Sweden

Model updating and correlation

Session MU

The Fuzzy Parameterization Method for Model Updating: Application to Welded Joints 2567
O. Ait-Salem Duque, Polytechnic University of Madrid, INSIA, Spain
M. De Munck, A. Stenti, D. Moens, Katholieke Universiteit Leuven, Belgium
A.R. Senín, Nebrija University, Spain

Model Updating of Ship Decks loaded with Welding Stresses 2579
A. Hanke, G. Schlottmann, University of Rostock, Germany

Using Complex Modes for Model Updating of Structures with Non-Proportional Damping 2593
M. Link, University of Kassel, Germany

Model Updating using Bayesian Estimation 2607
C. Mares, Brunel University, United Kingdom
B. Dratz, Ecole Centrale de Lille, France
J.E. Mottershead, University of Liverpool, United Kingdom
M.I. Friswell, University of Bristol, United Kingdom

Updating of the Myriade Platform FE Model using Microvibration Test Data 2617
N. Roy, Top Modal, France
S. Mary, CNES - Centre Spatial de Toulouse, France

The QCM approach for model updating from noisy data 2633
P.A. Tarazaga, Virginia Polytechnic Institute and State University, United States of America
Y. Halevi, Technion – Israel Institute of Technology, Israel
D.J. Inman, Virginia Polytechnic Institute and State University, United States of America

Multi-body dynamics and control
Session MB

Suspension system optimisation of an articulated dump truck to reduce whole body vibration 2649
J.C. Kirstein, J.L. van Niekerk, Stellenbosch University, South Africa

Flexible Multi-body Dynamics Simulation – A Powerful Method for Prediction of Structure Borne Noise of Internal Combustion Engines 2663
G. Offner, AVL List GmbH, Austria
H.-H. Priebsch, ACC Acoustic Competence Center G.m.B.H. / Graz Technical University, Austria

Simulation of Engine Dynamics by using MBS/FEM Composite Structures 2677
H. Riener, W. Witteveen, M. Fisher, MAGNA Powertrain, Engineering Center Steyr GmbH & Co KG, Austria

A Geartrain Model for the Dynamic Analysis of a Motorbike Timing System 2689
A. Rivola, University of Bologna, Italy
M. Milandri, E. Mucchi, University of Ferrara, Italy

Non-linearities: identification and modelling
Session NL

Nonlinearity Characterization for Nonlinear Dynamic System Identification Using an Expert Approach 2705
G. Dimitriadis, G.A. Vio, University of Manchester, United Kingdom

Experimental identification of non-linear parameters over a scaled multi-storey building 2723
L. Garibaldi, E. Giorcelli, S. Marchesiello, Politecnico di Torino, Italy

Nonlinear MDOF system characterization and identification using the Hilbert-Huang transform 2735
G. Kerschen, Université de Liège, Belgium
A.F. Vakakis, National Technical University of Athens, Greece
Y.S. Lee, D.M. McFarland, L.A. Bergman, University of Illinois at Urbana-Champaign, United States of America

Nonlinear Structure Analysis Using the Best Linear Approximation 2751
L. Lauwers, J. Schoukens, R. Pintelon, M. Enqvist, Vrije Universiteit Brussel, Belgium

On Nonlinear Parameter Estimation 2761
M. Magnevall, A. Josefsson, K. Ahlin, Blekinge Institute of Technology, Sweden

Comparison of two different nonlinear state-space identification algorithms 2777
J. Paduart, J. Schoukens, Vrije Universiteit Brussel, Belgium
K. Smolders, J. Swevers, Katholieke Universiteit Leuven, Belgium

Nonlinear Modelling and Identification of Torsional Behaviour in Harmonic Drives 2785
T. Tjahjowidodo, F. Al-Bender, H. Van Brussel, Katholieke Universiteit Leuven, Belgium

Identification of Structural Free-play Non-linearities using the Non-Linear Resonant Decay Method 2797
Z. Yang, University of Manchester / Tianjin University, United Kingdom
G. Dimitriadis, G.A. Vio, J.E. Cooper, J.R. Wright, University of Manchester, United Kingdom

Experiments, measurement procedures and curve-fitting of a post-buckled vibrating beam 2811
O. Yogev, I. Bucher, M. Rubin, Technion - Israel Institute of Technology, Israel

Identification and Characterization of the Non-linear Dynamic Behavior of a Laboratory Aircraft Structure 2821
D.G. da Silva, P.S. Varoto, University of Sao Paulo, Brazil

Non-stationary sound and vibration analysis and applications
Session NSV

Don't ignore nonstationarity: use it to advantage 2835
F. Bonnardot, LASPI, France
R. Roustany, Université de Technologie de Compiègne, France
A. Ibrahim, LASPI, France
K. Sabri, LASPI / University of New South Wales, France
J. Antoni, Université de Technologie de Compiègne, France
M. El Badaoui, LASPI, France

Non stationary analysis of a railway bridge scaled model under operational conditions 2851
L. Garibaldi, S. Marchesiello, Politecnico di Torino, Italy

Choi-Wiliams time frequency analysis of a three degree of freedom non-linear system 2863
A. Kyprianou, University of Cyprus, Cyprus
W. Staszewski, K. Worden, University of Sheffield, United Kingdom

Time-frequency domain decomposition for modal identification using ambient excitation tests 2873
T.-L. Le, P. Paultre, University of Sherbrooke, Canada

Parametric Time-Domain Methods for Non-Stationary Random Vibration Identication and Analysis: An Overview and Comparison 2885
A. Poulimenos A.G., M. Spiridonakos, S. Fassois, University of Patras, Greece

Modal Parameters Identification Using Bilinear Joint Time-Frequency Analysis 2907
A. Roshan-Ghias, M. Mobed, M.B. Shamsollahi, Sharif University of Technology, Iran (Islamic Republic of)
Behzad, Sharif University of Technlogy, Iran (Islamic Republic of)

Cyclostationary modeling of reciprocating compressors and application to valve fault detection 2921
R. Zouari, Institut de Recherche en Informatique et Systèmes Aléatoires, France
J. Antoni, J.-L. Ille, Université de Technologie de Compiègne, France
M. Willaert, Burton Corblin, France
M. Watremetz, Centre Technique des Industries Mécaniques, France
M. Sidahmed, Université de Technologie de Compiègne, France

OMAX Operational Modal Analysis in presence of exogeneous inputs
Session OMAX

Office floor vibrations: modal parameter identification and vibration monitoring 2937
R. Cantieni, rci dynamics, Switzerland

Load spectrum estimation from output-only measurements applied to a spray boom model 2949
K. Engelen, H. Ramon, J. Anthonis, Katholieke Universiteit Leuven, Belgium

Challenges in operational modal analysis of suspension bridges 2961
K.A. Grimmelsman, A.E. Aktan, Drexel University, United States of America

OMAX – A Combined Experimental-Operational Modal Analysis Approach 2985
P. Guillaume, Vrije Universiteit Brussel, Belgium
T. De Troyer, Erasmushogeschool Brussel, Belgium
C. Devriendt, G. De Sitter, Vrije Universiteit Brussel, Belgium

A Comparison of Experimental, Operational, and Combined Experimental-Operational Parameter Estimation Techniques 2997
T. Lauwagie, R. Van Assche, J. Van der Straeten, W. Heylen, Katholieke Universiteit Leuven, Belgium

Identification of damage in brittle materials using mode shapes obtained with a laser scanner 3007
A. Petreli, H. Sol, P. Guillaume, Vrije Universiteit Brussel, Belgium

Continuous-time operational modal analysis 3021
R. Pintelon, P. Guillaume, J. Schoukens, Vrije Universiteit Brussel, Belgium

Reference-based combined deterministic-stochastic subspace identification for operational modal analysis with deterministic inputs 3035
E. Reynders, G. De Roeck, Katholieke Universiteit Leuven, Belgium

Operational modal analysis of time varying systems using an exogenous multi-sine excitation 3047
S. Vanlanduit, R. Pintelon, Vrije Universiteit Brussel, Belgium
T. De Troyer, Erasmushogeschool Brussel, Belgium
P. Guillaume, Vrije Universiteit Brussel, Belgium

Operational modal analysis

Session OMA

Modal Parameter Identification From Operative Responses 3061
A. Agneni, G. Coppotelli, University of Rome “La Sapienza”, Italy

A Low Order Frequency Domain Algorithm for Operational Modal Analysis 3071
S. Chauhan, R. Martell, D.L. Brown, R.J. Allemang, University of Cincinnati, United States of America

Considerations in the Application of Spatial Domain Algorithms to Operational Modal Analysis 3087
S. Chauhan, R. Martell, D.L. Brown, R.J. Allemang, University of Cincinnati, United States of America

Modal Parameter Identification and Correlation of a Launch-Vehicle Interstage Using “Output-Only” Experimental Data 3103
G. Coppotelli, F. Mastroddi, G.M. Polli, University of Rome “La Sapienza”, Italy
L. Cospite, Avio S.p.A. - Propulsione Aerospaziale, Italy

Structural Dynamics of a Mobile Substation during Transport 3117
C. Devriendt, P. Guillaume, Vrije Universiteit Brussel, Belgium
J. Lopez-Roldan, Pauwels Contracting, Belgium

Using Enhanced Frequency Domain Decomposition as a Robust Technique to Harmonic Excitation in Operational Modal Analysis 3129
N.-J. Jacobsen, Brüel & Kjaer Sound & Vibration Measurements A/S, Denmark
P. Andersen, Structural Vibration Solutions A/S, Denmark
R. Brincker, University of Aalborg, Denmark

Parameter identification of ship structures using classical and operational modal analysis 3141
S.-E. Rosenow, G. Schlottmann, University of Rostock, Germany

Optical measurement techniques OPTIMESS

Session OPT

MIMO testing on a car body using a three-dimensional scanning vibrometer 3157
F. Bouteille, M. Schüssler, Polytec GmbH, Germany

A review of 10 years of continuous-scan LDV developments 3165
A.B. Stanbridge, D.J. Ewins, Imperial College London, United Kingdom

Acoustic source identification using a continuous scanning LDV 3181
J. Vanherzeele, S. Vanlanduit, P. Guillaume, Vrije Universiteit Brussel, Belgium

Refracto-Vibrometry for Visualizing Sound Radiation from Vibrating Objects 3193
L. Zipser, F. Wächter, H. Franke, HTW University of Applied Sciences Dresden, Germany

Four channel high resolution heterodyne interferometer based on birefringent optics 3201
H. van Elburg , J.J.J. Dirckx, W.F. Decraemer, Universiteit Antwerpen, Belgium

Parameter estimation

Session PE

A Complete Review of the Complex Mode Indicator Function (CMIF) with Applications 3209
R.J. Allemang, D.L. Brown, University of Cincinnati, United States of America

Mechanical System Identification by Multivariate Time Series Models 3247
R.P. Baldeón Amaro, Universidade Estadual de Mato Grosso, Brazil
P.R.G. Kurka, Universidade Estadual de Campinas, Brazil

Direct and simple estimation of physical residual effect for measured and unmeasured DOFs in experimental modal analysis 3257
P. Cermelj, M. Boltezar, University of Ljubljana, Slovenia

Continuous wavelet transform and entropy criterion in modal analysis 3269
M. Dahmani, A. Bouazzouni, Université Mouloud Mammeri de Tizi-Ouzou, Algeria

Identification of a Global Model Describing the Temperature Effects on the Dynamics of a Smart Composite Beam 3279
J.D. Hios, S. Fassois, University of Patras, Greece

Modal Cluster Decomposition on Two-Dimensional Frequency Domain and Its Real-Time Filtering 3295
Y. Matsumura, University of Shiga Prefecture, Japan
N. Hosoya, Saitama University, Japan

Identification of Flexibility Parameters of 6-axis Industrial Manipulator Models 3305
J. Ohr, ABB AB, Corporate Research, Sweden
S. Moberg, ABB Robotics / Linköpings universitet, Sweden
E. Wernholt, Linköpings universitet, Sweden
S. Hanssen, ABB Robotics, Sweden
J. Pettersson, ABB AB, Corporate Research, Sweden
S. Persson, ABB Robotics, Sweden
S. Sander-Tavallaey, ABB AB, Corporate Research, Sweden

Experimental modal analysis using blind source separation techniques 3315
F. Poncelet, G. Kerschen, J.-C. Golinval, Université de Liège, Belgium

Identification of a Nonlinear State Space Model for Control using a Feature Space Transformation 3331
K. Smolders, M. Witters, J. Swevers, P. Sas, Katholieke Universiteit Leuven, Belgium

Rigid Body Properties of An Actual Diesel Engine by Experimental Spatial Matrix Identification Method 3343
T. Uyama, YANMAR CO.,LTD., Japan
M. Okuma, A. Oyama, Tokyo Institute of Technology, Japan

Morlet Wavelet–based Parameter Identification in Different Stimulation 3357
L. Yue, X.Q. Liu, College of Mechanical and Electric Engineering Nanjing University of Aeronautics & Astronautics, China

Passive control of noise and vibration

Session PNVC

Noise reduction of handheld vacuum cleaners by geometric optimization of components 3365
H. Ashrafi, M.J. Mahjoob, University of Tehran, Iran (Islamic Republic of)

Static Analysis of a Quasi-Zero-Stiffness Vibration Isolator 3373
A. Carrella, M.J. Brennan, T.P. Waters, University of Southampton, United Kingdom

Novel Passive Vibration Isolators 3381
A.I.J. Forrester, A.J. Keane, University of Southampton, United Kingdom

Transmissibility of Forces in Multiple-Degree-of-Freedom Systems 3393
N.M.M. Maia, M. Fontul, A.M.R. Ribeiro, Instituto Superior Técnico, Portugal

Rubber isolating elements to prevent vibro-acoustic propagation 3401
S. Manzoni, M. Vanali, Politecnico di Milano, Italy
C. Carbone, Studio di architettura Carlo Carbone, Italy

Study on sound absorption of a multi-leaf microperforated panel 3413
I.M. Miasa, G. Kishimoto, M. Okuma, Tokyo Institute of Technology, Japan

Control of sound transmission through double wall partitions using optimally tuned Helmholtz resonators 3423
S.J. Pietrzko, Q. Mao, Empa - Materials Science & Technology, Switzerland

Rotating machinery: monitoring and diagnostics
Session RMM

Study on the sensitivity of gear stiffness to tooth crack length and location for diagnostic applications 3435
C. Carmignani, P. Forte, G. Melani, University of Pisa, Italy

Modelling dynamic interactions of rolling elements in bearings for condition monitoring 3451
J.H.D. Guimaraes, RWTH Aachen, Germany

Modal Control of Vibration in Rotating Machines and Other Generally Damped Systems 3467
P.R. Houlston, S.D. Garvey, A.A. Popov, University of Nottingham, United Kingdom

Using of Matching Pursuit and Genetic Algorithms for Bearings' Fault Detection, Diagnosis and Prediction 3475
F. Ionescu, HTWG-University of Applied Sciences-Konstanz, Germany
D. Stefanoiu, University Politehnica of Bucharest, Romania

Combustion diagnosis for internal combustion engines with real-time acquisition and processing 3485
S. Ker, F. Guillemin, L. Duval, IFP, France

Condition Monitoring of Rotating Machinery using Active Magnetic Bearings 3497
J.E.T. Penny, Aston University, United Kingdom
M.I. Friswell, University of Bristol, United Kingdom
C. Zhou, Harbin Engineering University, China

Identification of the Running-State of Railway Wheelsets 3507
L. Reicke, University of Hannover, Germany
I. Kaiser, German Aerospace Center (DLR), Germany
M. Kröger, University of Hannover, Germany

Research on Several Envelope Analysis Methods 3523
Q. Shuren, L. Xiaofeng, B. Lin, Chongqing University, China

Autoregressive based diagnostics scheme for detection of bearing faults 3531
S. Thanagasundram, F.S. Schlindwein, University of Leicester, United Kingdom

Rotating machinery:dynamics
Session RMD

Modal Balancing of turbo-generator rotors using simplified spatial models 3547
J.E. Aguirre-Romano, Instituto de Investigaciones Electricas, Mexico
J. Cervantes Contreras, E.S. Gutierrez Wing, Centro Nacional de Investigación y Desarrollo Tecnológico, Mexico

Steam whirl stability margin in a power unit 3561
N. Bachschmid, P. Pennacchi, E. Tanzi, A. Vania, Politecnico di Milano, Italy

Vibration of Gears: a Global Optimization Approach 3577
G. Bonori, G. Scagliarini, M. Barbieri, F. Pellicano, University of Modena and Reggio Emilia, Italy

Vibro-acoustic measurements for the identification of incoming stall in axial compressors 3593
G. Dalpiaz, G. D'Elia, E. Mucchi, University of Ferrara, Italy
A. Rivola, University of Bologna, Italy

Pressure phenomena in dynamic analysis of external gear pumps 3605
G. Dalpiaz, E. Mucchi, G. D'Elia, University of Ferrara, Italy
A. Fernández del Rincón, University of Cantabria, Spain

Difficulties in Predicting Vibrations in Turbomachinery with Hydrodynamic Bearings 3621
N.S. Feng, E.J. Hahn, The University of New South Wales, Australia
W. Hu, The University of Technology, Sydney, Australia

The response of rotating on viscoelastic supports 3631
M.I. Friswell, University of Bristol, United Kingdom
J.T. Sawicki, Cleveland State University, United States of America
D.J. Inman, Virginia Polytechnic Institute and State University, United States of America
A.W. Lees, University of Wales Swansea, United Kingdom

Dynamic Modelling and Testing of a Representative Aero-engine Test Rig with Adjustable Nonlinear Bearing Supports 3643
S. Huang, D.A. Robb, D.J. Ewins, E. Petrov, Imperial College London, United Kingdom

Modeling the structural dynamics of horizontal axis wind turbine 3653
M. Pawlak, A. Mezyk, Silesian University of Technology, Poland

Structural analysis of a wind turbine and its drive train using the flexible multibody simulation technique 3665
J. Peeters, Hansen Transmissions International, Belgium
D. Vandepitte, P. Sas, Katholieke Universiteit Leuven, Belgium

Analysis of Dynamic Loads in Multi-Megawatt-Drive-Trains 3681
B. Schlecht, T. Schulze, T. Hähnel, T. Rosenlöcher, Technical University of Dresden, Germany

Counterweight balancing for machine frame vibration reduction: design and robustness analysis 3699
M. Verschuure, B. Demeulenaere, J. Swevers, J. De Schutter, Katholieke Universiteit Leuven, Belgium

Unbalance Response of Statically Indeterminate Rotors Supported on Hydrodynamic Journal Bearings: Use of the 32 Coefficients Bearing Model 3715
D.C. Zachariadis, Polytechnic School - University of São Paulo, Brazil

Self-excited vibrations

Session SEV

A Higher Order Harmonic Balance Approach for an Aeroelastic Airfoil with a Freeplay Control Surface 3729
N. Amuyedo, J.E. Cooper, University of Manchester, United Kingdom

Effects of track parameters and environmental conditions on tramcar induced squeal noise 3745
R. Corradi, A. Facchinetti, S. Manzoni, M. Vanali, Politecnico di Milano, Italy

Brake squeal: a multi parametric phenomenon assessed in terms of robustness 3761
G. Fritz, J.M. Duffal, Renault, France
D. Perez-Recio, S. Bonnet, Renault, Spain
J.J. Sinou, L. Jézéquel, Ecole Centrale de Lyon, France

Squeal prediction on a simplified brake system by complex eigenvalues analysis 3777
F. Massi, University of Rome "La Sapienza" / INSA de Lyon, Italy
L. Baillet, University of Joseph Fourier, France
O. Giannini, University of Rome "La Sapienza", Italy

Determination of the Cutting Performance and Dynamic Behaviour of Universal Milling Machines by means of a Stability Model 3789
J. Muñoa, IDEKO Centro Tecnológico S.Coop., Spain
M. Zatarain, TEKNIKER Fundazioa-IK4, Spain
I. Bediaga, IDEKO Centro Tecnológico S.Coop., Spain

Aeroelastic Analyses of Low Aspect Ratio Wings Based on Non-Classic Plate Theory Including Transverse Shear Deformation and Rotary Inertia 3805
S. Shokrollahi, Malek.E.Ashtar University of Technology, Iran (Islamic Republic of)

Structural dynamic analysis: case studies
Session SD

Simulation of forced response in linear and nonlinear mechanical systems using digital filters 3817
K. Ahlin, M. Magnevall, A. Josefsson, Blekinge Institute of Technology, Sweden

Frequency response function as machinability indicator 3833
A. Giraudeau, M. El Mansori, Ecole Nationale Supérieure d'Arts et Métiers (ENSAM), France

Influence of the Structural Modification on the Stiffened Plate Energy Balance 3845
M. Iwaniec, J. Iwaniec, AGH - University of Science and Technology, Poland

Analytical methods applied to pyrotechnic shock modelling (comparison of model results with shock test results) 3855
M. Palladino, Techspace Aero (Safran group), Belgium

Sensibility analysis of the dynamic behaviour the violin plates in function of their geometry 3871
M. Razeto, C. Staforelli, G. Barrientos, Universidad de Concepción, Chile

Damping of floating yacht harbours determined by experimental modal analysis 3885
S. Uhlenbrock, G. Schlottmann, University of Rostock, Germany

Substructuring and coupling
Session SC

Dual Assembly of substructures and the FBS Method: Application to the Dynamic Testing of a Guitar 3899
D.J. Rixen, Delft University of Technology, The Netherlands
T. Godeby, E. Pagnacco, INSA de Rouen, France

Damping Allocation in Automotive Structures using Reduced Models 3915
N. Roy, Top Modal, France
S. Germès, B. Lefebvre, PSA Peugeot Citroën, France
E. Balmes, Ecole Centrale de Paris / SDTools, France

On the reduction of quasi-cyclic disk models with variable rotation speeds 3925
A. Sternchuss, Ecole Centrale de Paris, France
E. Balmes, Ecole Centrale de Paris / SDTools, France

Assignment of receptances by added mass-spring absorbers 3941
J. Zhu, J.E. Mottershead, University of Liverpool, United Kingdom

Transfer path analysis and source identification
Session TPA

Online estimation of external loads from dynamic measurements 3957
M. Klinkov, C.-P. Fritzen, Universitet Siegen, Germany

Acoustic Equivalent Point Source Models of Tires using Combinatorial Optimization 3969
J. Mørkholt, A. Schuhmacher, Brüel & Kjaer Sound & Vibration Measurement A/S, Denmark
E.-U. Saemann, Continental AG, Germany

Identification of Excitation Force Generated From Automobile Engine in High Frequency Range 3985
N. Okubo, S. Shimamura, T. Toi, Chuo University, Japan

Blind source separation and system identification for convolutive mixtures with well separated modes 3993
R.B. Randall, L. Holley, The University of New South Wales, Australia

Engine contribution analysis using a noise and vibration simulator 4003
A. Schuhmacher, D. Tcherniak, Brüel & Kjaer Sound & Vibration Measurement A/S, Denmark

An Analysis of Friction Noise 4015
S. Smyth, H.J. Rice, Trinity College of Dublin, Ireland

Reconstruction of loading forces from responses data measured in-flight 4029
T. Uhl, K. Mendrok, AGH - University of Science and Technology, Poland

Uncertainties in structural dynamics and acoustics
Session UNC

Robust design optimization for uncertain complex dynamical systems 4041
E. Capiez-Lernout, C. Soize, University of Marne-La-Vallée, France

Coupling of substructures with in-tolerance uncertain dimensions 4055
W. D'Ambrogio, Università de L'Aquila, Italy
A. Fregolent, University of Rome "La Sapienza", Italy

Using Design of Experiments to model the effect of uncertainties in substructure coupling 4067
W. D'Ambrogio, Università de L'Aquila, Italy
A. Fregolent, University of Rome "La Sapienza", Italy

Dynamic Interval Analysis of FE models with uncertain substructures 4077
H. De Gersem, D. Moens, W. Desmet, D. Vandepitte, Katholieke Universiteit Leuven, Belgium

An automated response surface based optimisation technique for the calculation of fuzzy envelope FRFs of models with uncertain properties 4091
M. De Munck, D. Moens, W. Desmet, D. Vandepitte, Katholieke Universiteit Leuven, Belgium

An efficient fuzzy calculation algorithm with application to finite element model updating 4105
D. Degrauwe, E.O. Arman, E. Reynders, G. De Roeck, G. Lombaert, Katholieke Universiteit Leuven, Belgium

Inverse problem for the identification of Chaos representations of random fields using experimental vibrational tests 4117
C. Desceliers, C. Soize, University of Marne-La-Vallée, France
R. Ghanem, University of Southern California, United States of America

The fuzzy FE approach to assess the uncertain static response of an industrial vehicle 4125
L. Farkas, D. Moens, Katholieke Universiteit Leuven, Belgium
S. Donders, LMS International, Belgium
D. Vandepitte, W. Desmet, Katholieke Universiteit Leuven, Belgium

FE Model Updating with uncertain parameters 4145
S. Gabriele, University of "Roma Tre", Italy
C. Valente, University of Chieti-Pescara "G. d'Annunzio", Italy
D. Spina, Department of Civil Protection, Italy

Analysis of Sources and Quantification of Uncertainty in Experimental Modal Data 4161
Y. Govers, M. Böswald, U. Füllekrug, D. Göge, Deutsches Zentrum für Luft- und Raumfahrt e.V., Germany
M. Link, University of Kassel, Germany

A hierarchical approach to study the intra and inter variability of structure borne noise in vehicles 4175
C. Lionnet, Renault, Technocentre, France
P. Lardeur, Renault / Université de Technologie de Compiègne, France
F. Vieuille, Université de Technologie de Compiègne, France

Fuzzy Finite Element Method: Computer Aided Design Application 4187
F. Massa, K. Ruffin, B. Lallemand, T. Tison, Université de Valenciennes et du Hainaut Cambrésis, France

Sensitivity analysis of frequency response function envelopes of mechanical structures with interval uncertainties 4197
D. Moens, D. Vandepitte, Katholieke Universiteit Leuven, Belgium

Variation of structure modal parameters due to the structured uncertainties 4213
K. Sepahvand, S. Marburg, H.J. Hardtke, Technische Universität Dresden, Germany

Fuzzy Finite Element Method: An Experimental Modal Analysis Comparison 4219
T. Tison, K. Ruffin, F. Massa, B. Lallemand, Université de Valenciennes et du Hainaut Cambrésis, France

Fuzzy finite elements: combination of Guyan reduction and a new method to solve linear fuzzy system 4227
A. Vroman, G. Deschrijver, Universiteit Gent, Belgium
M. De Munck, D. Moens, Katholieke Universiteit Leuven, Belgium
E.E. Kerre, Universiteit Gent, Belgium
D. Vandepitte, Katholieke Universiteit Leuven, Belgium

Modal Analysis of Composite Lightweight Structures with Manufacturing Uncertainties 4243
M. Zehn, M. Machina, Otto-von-Guericke University of Magdeburg, Germany

Vehicle noise and vibration (NVH)

Session NVH

A new method for aircraft noise synthesis 4257
D. Berckmans, Katholieke Universiteit Leuven, Belgium
K. Janssens, LMS International, Belgium
P. Sas, W. Desmet, Katholieke Universiteit Leuven, Belgium
H. Van der Auweraer, LMS International, Belgium

Measurement of dynamic loads at wheel center for road excitations (NVH application) 4271
P. Bouvet, C. Braguy, VIBRATEC, France
L. Gagliardini, PSA Peugeot Citroën, France

On the vibro-acoustic behaviour of high-speed train wheels 4283
A. Cigada, S. Manzoni, M. Vanali, Politecnico di Milano, Italy

Expanding the bandwidth of MDOF Road Reproductions 4299
F. De Coninck, W. Desmet, P. Sas, Katholieke Universiteit Leuven, Belgium

Noise sources balancing on vehicle development to improve customer satisfaction 4309
T.C. Giorjão, E.L. Albuquerque, A.L. Cherman, Ford Motor Company, Brazil

Automatic extraction of noise annoyance features from vehicle run-up sounds 4317
K. Janssens, A. Vecchio, H. Van der Auweraer, LMS International, Belgium

Test setup for tire/road noise caused by impact road excitations: first outlines 4327
P. Kindt, F. De Coninck, P. Sas, W. Desmet, Katholieke Universiteit Leuven, Belgium

Energy minimization criterion as a methodological guide to the dynamic analysis and optimization of fully trimmed and equipped vehicles. 4337
S. Lorea, F. Avenati Bassi, F. Tinti, Rieter Automotive Fimit, Italy

Determination of Operational Modal Parameters and its applications in Engine NVH Development 4347
Q. Luo, L. Polac, Renault SAS, France

New NVH optimization procedure applied to weight reduction of an automotive engine 4357
S. Malcuy, Renault SAS, France
S. Perrin, ANSYS France SAS, France

Transmission Loss Modeling of Trimmed vehicle Components 4373
A. Omrani, L. Mebarek, M.A. Hamdi, ESI Group, France

Towards a robust optimization of spot weld design in automotive structures 4387
M. Ouisse, S. Cogan, University of Franche Comté, France
B. Guillaume, PSA Peugeot Citroën, France

Measurement of vibration and noise of railway wheels on track 4395
L. Pesek, F. Vanìk, J. Veselý, J. Cibulka, AS CR Institute of Thermomechanics, Czech Republic
T. Bohác, Bonatrans a.s., Czech Republic

Two-way Coupled Structural Acoustic Optimization via Model Order Reduction (MOR). 4409
R.S. Puri, D. Morrey, A. Bell, J.F. Durodola, Oxford Brookes University, United Kingdom
E.B. Rudnyi, J.G. Korvink, University of Freiburg, Germany

Investigation on airborne and structure borne balance for vehicle interior noise 4425
F. Sbarbati, M. Martorelli, L. Petrella, P. Liccardo, ELASIS S.C.p.A., Italy

Application of strain integral damping to engine mounts 4433
U. Tornar, PSA Peugeot Citroen, France

The Finite Element Modeling of Engine Block and Response Analysis by Piston Slap 4441
N. Tsujiuchi, T. Koizumi, S. Uemura, Doshisha University, Japan

A new approach to model tyre/road contact. 4453
Y.H. Wijnant, A. de Boer, University of Twente, The Netherlands

An efficient approach to include interactivity in the vehicle NVH evaluation process 4463
R. Williams, M. Allman-Ward, Sound and Vibration Technology, United Kingdom
B. Ginn, D. Tcherniak, Brüel & Kjaer Sound & Vibration Measurement A/S, Denmark

The influence of suspension and tyre dynamics on Driveline NVH 4477
N.A. Zaidi, Romax Technology, United Kingdom
A.A. Popov, S.D. Garvey, University of Nottingham, United Kingdom

Investigation of binaural transfer functions; reciprocity in free field and in-vehicle 4485
P. van der Linden, P. Van de Ponseele, G. Coppens, LMS International, Belgium

Vibro-acoustic analysis

Session VAA

Calibration of the two microphone transfer function method to measure acoustic impedance in a wide frequency range 4501
R. Boonen, P. Sas, W. Desmet, W. Lauriks, G. Vermeir, Katholieke Universiteit Leuven, Belgium

Impedance Identification out of Pressure Data's with a hybrid Measurement-Simulation Methodology up to 1kHz 4513
A. Hepberger, S. Volkwein, F. Diwoky, ACC Acoustic Competence Center G.m.B.H., Austria
H.-H. Priebsch, ACC Acoustic Competence Center G.m.B.H. / Graz Technical University, Austria

Acoustic measurements in a small transmission loss facility 4525
F. Marulo, T. Polito, Università degli Studi di Napoli "Federico II", Italy
A. Paonessa, Alenia Aeronautica, Italy

In-situ estimation of acoustic impedance on the surfaces of a room for inverse sound rendering 4531
G. Pablo Nava, Y. Yasuda, Y. Sato, S. Sakamoto, University of Tokyo, Japan

Vibro-acoustic modelling and prediction
Session VAM

Optimization of a complex structure using a modal approach 4545
S. Besset, L. Jézéquel, Ecole Centrale de Lyon, France

Fluid-structure interaction applied to ovalling oscillations of silos 4557
D. Dooms, G. De Roeck, G. Degrande, Katholieke Universiteit Leuven, Belgium

Coupling Factor in Vibro-Acoustic Problems and Sound Pressure Minimization by Structural Modification 4573
K. Furuya, T. Yoshimura, Tokyo Metropolitan University, Japan
A. Suto, S. Narikuni, HONDA R&D Co., Japan

Transmission Loss analyses on fuselage panels: approach, numerical results and validation 4583
F.P. Grooteman, National Aerospace Laboratory (NLR), The Netherlands

Orthogonal radiation patterns for three-dimensional noise sources based on the spherical harmonics of sphere(s) 4601
S. Hill, Katholieke Universiteit Leuven / Flanders Mechatronics Technology Center, Belgium

Viscothermal wave propagation in a circular layer with a partially open and partially closed boundary 4617
R. Kampinga, Y.H. Wijnant, A. de Boer, University of Twente, The Netherlands

Robust Acoustic Vehicle Body Design Using Evolutionary Algorithms 4627
A. Kropp, BMW AG, Germany

A fast interpolation method for multi-frequency acoustic analysis by boundary element method 4643
X. Li, Dalian University of Technology, China

Vibro-acoustic analysis of fluid-loaded structures using component mode synthesis 4651
X. Li, Dalian University of Technology, China

Vibro-acoustic modelling of a rail vehicle bodyshell and resilient Floor 4659
M. Liu, X. Lu, A. Barlow, Areva T&D Technology Centre, United Kingdom

Acoustic Theoretical x Experimental Comparison of the Brazilian Satellite Launcher Vehicle (VLS) Fairing 4669
R. Pirk, L.C.S. Góes, Aerospace Technological General Command, Brazil

A boundary integral method for noise shielding analysis in non-conventional aircraft configurations 4685
A. Randazzo, Trinity College of Dublin, Ireland
U. Iemma, University of ”Roma Tre”, Italy
H.J. Rice, Trinity College of Dublin, Ireland

Vibration of a coated plate with absorbing material produced by an acoustic source. Theoretical-experimental correlation 4699
X. Sagartzazu, J.M. Pagalday, A. Ugarte, S. Villodas, Ikerlan S. Coop., Spain
M.J. Elejabarrieta, Escuela Politécnica Superior de Mondragon Unibertsitatea, Spain
L.M. Hervella, Universidade da Coruña, Spain
