Second International Symposium on New Frontiers in Human-Robot Interaction

Table of Contents:

Policy Adaptation through Tactile Correction

Brenna D. Argall, Eric L. Sauser and Aude G. Billard (École Polytechnique
Fédérale de Lausanne, Switzerland)

Pages 1-8

An Autonomous Proxemic System for a Mobile Companion Robot

Mohammadreza Asghari Oskoei, Michael L. Walters and Kerstin Dautenhahn
(University of Hertfordshire, UK)

Pages 9-15

Towards a Skin-Like Embedded Tactile Sensor for Robotic Hands

Andrea Biggio, Perla Maiolino and Giorgio Cannata (University of Genova, Italy)

Pages 16-21

Towards HRI on the Move with Mixed Initiative

Cristian Bogdan, Dominik Ertl, Michael Göller, Anders Green and Kerstin
Severinson Eklundh (Royal Institute of Technology, Sweden; Vienna University
of Technology, Austria; Research Center for Information Technology (FZI),
Germany)

Pages 22-26

Touch-Triggered Protective Reflexes for Safer Robots

Torbjørn S. Dahl and Andrew Palmer (University of Wales, UK)

Pages 27-33

*Reducing Speech Collisions by Using an Artificial Subtle Expression in a Decelerated
Spoken Dialogue – Should communication robots respond quickly?*

Kotaro Funakoshi, Kazuki Kobayashi, Mikio Nakano, Takanori Komatsu and Seiji
Yamada (Honda Research Institute Japan Co. Ltd, Japan; Shinshu University,
Japan; National Institute of Informatics / The Graduate University for Advanced
Studies, Japan)

Pages 34-41

Evaluation of Robot Body Movements Supporting Communication

Helge Hüttenrauch, Cristian Bogdan, Anders Green, Kerstin Severinson Eklundh,
Dominik Ertl, Jürgen Falb, Hermann Kaindl, Michael Göller (Royal Institute of
Technology, Sweden; Vienna University of Technology, Austria; Research Center
for Information Technology (FZI), Germany)

Pages 42-49

Validating Characterizations of Sociality in HRI: The Case of Interaction Patterns
Peter H. Kahn, Jr., Brian T. Gill, Aimee L. Reichert, Takayuki Kanda, Hiroshi
Ishiguro and Jolina H. Ruckert (University of Washington, USA; Seattle Pacific
University, USA; ATR, Japan; Osaka University, Japan)
Pages 50-57

*Smart Action Selection Architecture Taking into account both Goal-orientedness
and Proactivity*
Woo Young Kwon and Il Hong Suh (Hanyang University, Korea)
Pages 58-63

*Social, functional, and problem-related tasks in HRI - a comparative analysis of
body orientation and gaze*
Manja Lohse (Bielefeld University, Germany)
Pages 64-71

Towards Intrinsically Learned Skin Models in Robots
Simon McGregor and Daniel Polani (University of Hertfordshire, UK)
Pages 72-75

*Expressive Gestures Displayed by a Humanoid Robot during a Storytelling
Application*
Catherine Pelachaud, Rodolphe Gelin, Jean-Claude Martin and Quoc Anh Le
(CNRS, LTCI Telecom ParisTech, CNRS LIMSI, France; Aldebaran, France)
Pages 76-79

*How infants perceive the toy robot Pleo. An exploratory case study on infant-robot-
interaction*
Karola Pitsch and Benjamin Koch (Bielefeld University, Germany)
Pages 80-87

Ibn Sina Steps Out: Exploring Arabic Attitudes Toward Humanoid Robots
Laurel D. Riek, Nikolaos Mavridis, Shammah Antali, Noura Darmaki, Zeeshan
Ahmed, Maitha Al-Neyadi and Amina Alketheri (University of Cambridge, UK;
United Arab Emirates University, UAE; University of Nancy, France)
Pages 88-94

*Robot learning of lexical semantics from sensorimotor interaction and the
unrestricted speech of human tutors*
Joe Saunders, Chrystopher L. Nehaniv and Caroline Lyon (University of
Hertfordshire, UK)
Pages 95-102

Ethical issues in robot care for the elderly: Dystopia or optimism?
Amanda Sharkey and Noel Sharkey (University of Sheffield, UK)
Pages 103-107

Mirror my emotions! Combining facial expression analysis and synthesis on a robot
Stefan Sosnowski, Christoph Mayer, Kolja Kühnlenz and Bernd Radig
(Technische Universität München, Germany)
Pages 108-112

On Making Robots Invisible-in-Use
Leila Takayama (Willow Garage, USA)
Pages 113-119

Exploratory Analysis of Operator:Robot ratio in Search and Rescue Missions
Alberto Valero, Chiara Saracini, Paloma de la Puente, Diego Rodriguez-Losada,
Fernando Matia (Universidad Politecnica de Madrid, Spain; Università di Roma,
Italy)
Pages 120-127

Development of HRI Models by means of a Cognitive Walkthrough Approach
Astrid Weiss, Florian Foerster, Daniela Wurhofer and Manfred Tscheligi
(University of Salzburg, Austria)
Pages 128-135

A Robot as Persuasive Social Actor A Field Trial on Child-Robot Interaction
Astrid Weiss, Thomas Scherndl, Roland Buchner and Manfred Tscheligi
(University of Salzburg, Austria)
Pages 136-142

36th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2010)

**Leicester, United Kingdom
29 March – 1 April 2010**

Part 2 of 11

ISBN: 978-1-62993-963-6

Content

An emotional humanoid partner	1
Anzalone S.M., Cinquegrani F., Sorbello R. and Chella A.	
Machine Learning and Affect Analysis Against Cyber-Bullying	7
Michal Ptaszynski, Pawel Dybala, Tatsuaki Matsuba, Fumito Masui, Rafal Rzepka, Kenji Araki	
An idea of a web-crowd based moral reasoning agent	17
Radoslaw KOMUDA, Michal PTASZYNSKI, Rafal RZEPKA, and Kenji ARAKI	
Learning a Grounded Language Model for Human-Robot Interaction	20
Antonio Chella and Haris Dindo and Daniele Zambuto	
Facial Expressions for Communicating User Feedback	28
Savandie Abeyratna, Galina Paramei, Hissam Tawfik and Rentian Huang	
Forgetful and Emotional: Recent Progress in Development of Dynamic Memory Management System for Conversational Agents	32
Michal Ptaszynski, Pawel Dybala, Rafal Rzepka, and Kenji Araki	
Associative Text Categorisation Rules Pruning Method	39
Hussein Abu-Mansour, Wa'el Hadi, T.L.McCluskey, and Fadi Thabtah	
Metaphorical and Contextual Affect Detection in an Intelligent Agent	45
Li Zhang	
Chain of Events: Multi-stage Approach to Humor and Emotions in HCI	53
Pawel Dybala, Michal Ptaszynski, Rafal Rzepka1 and Kenji Araki	
Evaluation of a Humor Generation System by Real World Application with ¥500,000 to Win	59
Jonas Sjobergh and Kenji Araki	
Political Question Generation Method Using Minutes of Municipal Councils	65
Yasutomo Kimura, Hideyuki Shibuki, Keiichi Takamaru, Tetsuro Kobayashi, and Tatsunori Mori	

36th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2010)

**Leicester, United Kingdom
29 March – 1 April 2010**

Part 3 of 11

ISBN: 978-1-62993-963-6

Content

Timing in Episodic Memory: Virtual Characters in Action Ondřej Burkert ¹ , Cyril Brom ¹ , Rudolf Kadlec ¹ , Jiří Lukavský	1
An Object-Based Memory for Supporting Attentive Virtual Agents Christopher Peters	10
Comparing Forgetting Algorithms for Artificial Episodic Memory Systems Andrew Nuxoll, Dan Tecuci, Wan Ching Ho, and Ningxuan Wang	14
Short- and Long-term Adaptation of Visual Place Memories for Mobile Robots Feras Dayoub, Tom Duckett, and Grzegorz Cielniak	21
I can (almost) remember what <i>you</i> are doing: from actions to tasks Rudolf Kadlec and Cyril Brom	27
Extending Soar with Dissociated Symbolic Memories Nate Derbinsky and John E. Laird	31
Exploring the Space of Computational Memory Models Nate Derbinsky and Nicholas A. Gorski	38
Forgetting and Generalisation in Memory Modelling for Robot Companions: a Data Mining Approach Patricia A. Vargas, Alex A. Freitas, MeiYii Lim, Sibylle Enz, Wan Ching Ho, and Ruth Aylett	42
Human-like Memory Systems for Interactive Robots: Desiderata and Two Case Studies utilizing Grounded Situation Models and Online Social Networking Nikolaos Mavridis and Michalis Petychakis	46

36th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2010)

**Leicester, United Kingdom
29 March – 1 April 2010**

Part 4 of 11

ISBN: 978-1-62993-963-6

Contents

Session 1

- A hierarchical task network planner for pathfinding in real-time strategy games*.....1
Munir Naveed, Diane Kitchin and Andrew Crampton
- A flexible bio-affective gaming interface*.....9
Jorge Arroyo-Palacios and Daniela M. Romano

Session 2 – AI performance

- Improving games' AI performance using grouped hierarchical level of detail*.....19
David Osborne and Patrick Dickinson
- Group emotion modelling and the use of middleware for virtual crowds in video-games*.....25
Olivier Szymanczyk and Grzegorz Cielniak
- Digital Footprints – recording bot movement and behaviour to improve AI opponents in FPS games*.....31
Thomas Welsh, Alastair Hebson and David C. Moffat

Session 3 – AI for game design

- Procedural content generation and level design for computer games*.....35
Simon Cooper, Abdennour El Rhalibi, Madjid Merabti and Jon Wetherall
- Evolving pixel shaders for the prototype video game Subversion*.....41
Andrew Howlett, Simon Colton and Cameron Browne

Session 4 – Player modelling

- AEINS: The role of interactive narrative in fostering character education*.....47
Rania Hodhod, Daniel Kudenko and Paul Cairns
- Using a cognitive architecture for opponent target prediction*.....55
Simon Butler and Yiannis Demiris
- Towards automatic player behaviour characterisation using multiclass-linear discriminant analysis*.....63
Robin Baumgarten

Poster session

- EDEE: a flexible environment for research*.....67
Ningxuan Wang, Christopher Cullen and Andrew Nuxoll
- A design and implementation of 3D image interactive vision system*.....69
Sang Heon Han, Chang Ok Yun, Jung hoon Kim, Jae Ik Jo, Tae Soo Yun & Dong Hoon Lee
- Distributed drama management: integrating levels of narrative responsibility*.....71
Allan Weallans and Sandy Louchart
- Towards the use of trait inheritance for flocks of navigating agents*.....73
Piotr Piasecki and Christopher Peters
- Towards a Goal Oriented Action Planning Approach for predator-prey simulation*.....75
Justyna Pultowicz and Christopher Peters

Demo session

- Digital Footprints – a tool for generating heat maps and capturing data from FPS games*.....77
Alastair Hebson, Thomas Welsh and David C. Moffat

36th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2010)

**Leicester, United Kingdom
29 March – 1 April 2010**

Part 5 of 11

ISBN: 978-1-62993-963-6

Table of Contents

Recommendations for Better Quality Ontology Matching Evaluations	1
<i>Aliaksandr Autayeu, Vincenzo Maltese, Pierre Andrews</i>	
Exploring Ontology Merging with Examples	5
<i>Liwei Deng</i>	
Automatizing the Evaluation of Model Matching Systems	7
<i>Kelly Garces, Wolfgang Kling, Frédéric Jouault</i>	
A Framework for Mapping Refinement Specification	13
<i>Faycal Hamdi, Chantal Reynaud, Brigitte Safar</i>	
Adaptive user interface assistance in smart environments	18
<i>Maximilian Kern, Frank Trollmann, Marco Blumendorf, Sahin Albayrak</i>	
The Role of Taxonomy Properties in Information Content Metrics	22
<i>Raúl Ernesto Menéndez-Mora, Ryutaro Ichise</i>	
Evaluation of Error Taxonomy for OWL2	27
<i>Naseer Ahmed Sajid, Muhammad Abdul Qadir</i>	
Integrating Technical Terms into Thesaurus using Extracted Related Words	34
<i>Yoshimi Suzuki, Fumiyo Fukumoto</i>	
An Evidence-based Approach to Collaborative Ontology Development . . .	39
<i>Emma Tonkin, Heather D. Pfeiffer, Andrew Hewson</i>	
Studying Concept Shift in Political Ontologies	42
<i>Shenghui Wang, Stefan Schlobach, Janet Takens, Wouter van Atteveldt</i>	

36th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2010)

**Leicester, United Kingdom
29 March – 1 April 2010**

Part 6 of 11

ISBN: 978-1-62993-963-6

Content

Jackie Chappell and Susannah Thorpe. AI-Inspired Biology: Does AI Have Something to Contribute to Biology?	1
Raúl Arrabales, Agapito Ledezma and Araceli Sanchis. On the practical nature of artificial qualia	8
Bart Baddeley, Paul Graham, Andrew Philippides and Philip Husbands. Route Learning Through Classification	14
Luisa Damiano and Lola Cañamero. Constructing Emotions: Epistemological groundings and applications in robotics for a synthetic approach to emotions	20
Frank Guerin. Advancing Knowledge of Cognitive Development Sequences in Infancy	29
Christoph Böhme and Dietmar Heinke. Modeling visual Affordances: The Selective Attention for Action Model (SAAM)	37
Martin Hülse and Mark Lee. The Logic of Robotics Inspired Biology	43
Dean Petters and Everett Waters. AI, Attachment Theory and Simulating Secure Base Behaviour: Dr. Bowlby meet the Reverend Bayes	51
Zoe Demery, Veronica Arriola Rios, Aaron Sloman, Jeremy Wyatt and Jackie Chappell. Construct to Understand: Learning through Exploration	59
Alexey Gribovskiy, Francesco Mondada, José Halloy and Jean-Louis Deneubourg. The PoulBot: a mobile robot for ethological studies on domestic chickens	62
Verena Kersken, Juan-Carlos Gómez and Klaus Zuberbühler. Context-Specific Vocalisations in Human Infants (Homo sapiens): Can Computer Modelling Help to Bring Further Insight into Categorical Perception?	64
Emilian Lalev. Generation of Biological Motion Patterns and Their Emergent Transitions with a Trainable Neural Network Oscillator	67

Thomas Parslow, Andrew Philippides and Paul Graham. Innate movement strategies for view-based homing	69
Michael Zillich, Michael Baumann, Wolfgang Knefel and Christoph Längauer. Corvid: A Versatile Platform for Exploring Mobile Manipulation	71
Mary Felkin and Yves Kodratoff. Modelling H-CogAff global alarm system improves robot performance	73
Fawad Jamshed and Christian Huyck. Grounding Symbols: Learning and Grounding 2D Shapes using Cell Assemblies that emerge from fLIF Neurons	81
Aaron Sloman. The Design-Based Approach to the Study of Mind (in humans, other animals, and machines) Including the Study of Behaviour Involving Mental Processes	87
Margaret Boden. What's Life Got To Do With It? (Invited speakers)	95
Margaret Boden. Chapter 17: What Next? (Invited speakers)	103
Richard Cooper. Forward and Inverse Models in Motor Control and Cognitive Control (Invited speakers)	108
Richard Lewis, Satinder Singh and Andrew Barto. Where Do Rewards Come From? (Invited speakers)	111
Kim Bard. Social Cognition: Views from developmental and comparative psychology, and robotics on the role of emotion in joint attention (Invited speakers)	117
Nick Chater. Biological and cultural foundations of human language: Insights from computer simulations (Invited speakers)	118
Antje Meyer. The role of vision and attention in language processing (Invited speakers)	119

Anil Seth. Causal Networks in Neural Systems: from Brain-Based Devices to Consciousness (Invited speakers)	120
Murray Shanahan. Why Can't We Build Robots that are as Clever as Crows? (Invited speakers)	121

36th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2010)

**Leicester, United Kingdom
29 March – 1 April 2010**

Part 7 of 11

ISBN: 978-1-62993-963-6

Contents

Rationale of the mathematical joke <i>Andrew Aberdein</i>	1
Interpreting Naproche – An algorithmic approach to the derivation-indicator view <i>Merlin Carl and Peter Koepke</i>	7
Applying the GC combined reasoning framework to mathematical discovery <i>John Charnley</i>	11
Origins of spatial–numerical bias <i>Martin H. Fischer and Peter Brugger</i>	14
Singing numbers ... in cognitive space <i>Martin H. Fischer, Marianna Riello, Bruno L. Giordano and Elena Rusconi</i>	16
Interpretation is an action: Understanding diagrams by manipulating them <i>Valeria Giardino</i>	18
The body in Renaissance arithmetic: From mnemonics to embodied cognition <i>Albrecht Heeffner</i>	21
Dynamic construals, static formalisms: Evidence from co-speech gesture during mathematical proving <i>Tyler Marghetis and Rafael Núñez</i>	23
If learning maths requires a teacher, where did the first teachers come from? <i>Aaron Sloman</i>	30

36th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2010)

**Leicester, United Kingdom
29 March – 1 April 2010**

Part 8 of 11

ISBN: 978-1-62993-963-6

Content

Ahmad Kalhor, Babak N. Araabi and Caro Lucas. An Online Predictor Model as Adaptive Linear model and Evolving Takagi-Sugeno Model	1
Di Wang, Xiao-Jun Zeng and John Keane. A Structure Evolved Learning Method for Mamdani Fuzzy Systems	7
Elton Lima, Rosangela Ballini and Fernando Gomide. Dynamic Analysis of the Participatory Learning Algorithm	13
Gancho Vachkov. Incremental Classification of Images by Human Assisted Fuzzy Similarity Analysis	17
Jose de Jesus Rubio, Jaime Pacheco and Raul Rivera. Clustering to train an evolving radial basis function	23
Vitaliy Kolodyazhniy and Yevgeniy Bodyanskiy. Cascaded Multiresolution Spline-based Fuzzy Neural Network	26
Katharina Tschumitschew and Frank Klawonn. The Need for Benchmarks and Meta-Models in Evolving Systems	30
Rashmi Dutta Baruah and Plamen Angelov. Clustering as a Tool for Self-generation of Intelligent Systems: A Survey	34
Mario Gongora and David Irvine. Reactive-adaptive Methodology to encode Evolving Intelligent Agents in Serious Games	42
Borja Santos-Diez, Francisco Bellas, Andres Faina and Richard Duro. Lifelong Learning by Evolution in Robotics: Bridging the Gap from Theory to Reality	48
Jose Antonio Iglesias, Agapito Ledezma and Araceli Sanchis. An Evolving Framework for Clustering Computer Users	54
Clive Cheong Took and D. P. Mandic. New Developments in Statistical Signal Processing of Quaternion Random Variables with Applications in Wind Forecasting	58
Paul Morley and Jeff Johnson. Application of ANN-GA Hybrid to run a conveyor control system	63

36th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2010)

**Leicester, United Kingdom
29 March – 1 April 2010**

Part 9 of 11

ISBN: 978-1-62993-963-6

Table of Contents

SNAMAS Symposium Preface	2
<i>Guido Boella, Giulia Andrighetto, Ugo Pagallo, Serena Villata</i>	
What is Power ? Articulating perspectives from sociology, multi-agents systems and network analysis	4
<i>Matthias Maillard and Christophe Sibertin-Blanc</i>	
Optimizing the Core Computation with Social Networks	10
<i>Luigi Sauro and Serena Villata</i>	
A Process Based on the Fuzzy Set Theory for Evaluation of Link Prediction Methods	16
<i>Elisandra Aparecida Alves da Silva, Marco Tulio Carvalho de Andrade</i>	
Social Aspects of Video Recording	22
<i>Alessandro Basso, Marco Milanese, Andre Panisson</i>	
Agent-based economic modeling with finite state machines	28
<i>Ivan Gnïlomedov and Sergey Nikolenko</i>	
The hidden path from delegation to obligations: a logical analysis	34
<i>Emiliano Lorini</i>	
Power Laws and Levels of Abstraction in Understanding Legal Systems ..	41
<i>Ugo Pagallo</i>	
Temporal Reasoning and MAS	46
<i>Clara Smith, Antonino Rotolo, Giovanni Sartor</i>	
NorMAS Symposium Preface	53
<i>Paul Davidsson, Davide Grossi, Harko Verhagen</i>	
Contract Argumentation in Virtual Organizations	55
<i>N. Criado, S. Heras, E. Argente, V. Julian</i>	
Norm Emergence in Regulatory Compliance	61
<i>Brigitte Burgemeestre, Joris Hulstijn and Yao-Hua Tan</i>	
Non-taking up as a normative behaviour	67
<i>Y. Saillard</i>	
An Analysis of Norm Emergence in Axelrods Model	73
<i>Samhar Mahmoud, Nathan Griffiths, Jeroen Keppens, Michael Luck</i>	
Modelling the social fabric for normative NPCs in MMOGs	79
<i>Magnus Johansson and Harko Verhagen</i>	

36th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2010)

**Leicester, United Kingdom
29 March – 1 April 2010**

Part 10 of 11

ISBN: 978-1-62993-963-6

Contents

Exactly Solved Models for Collective Behaviour and Complex Systems Gérard H.E. Duchamp	1
From Ants To Robots: A Decentralised Task Allocation Model For A Swarm of Robots Sifat Momen and Amanda J.C. Sharkey	3
Application of CACS Approach for Distributed Logistic Systems Sami Al-Maqtari, Habib Abdulrab and Eduard Babkin	13
Swarm Intelligence to Distribute Simulations in Computational Ecosystems Antoine Dutot, Damien Olivier and Guilhelm Savin	25

36th Annual Convention of the Society for the Study of Artificial Intelligence and the Simulation of Behaviour

(AISB 2010)

**Leicester, United Kingdom
29 March – 1 April 2010**

Part 11 of 11

ISBN: 978-1-62993-963-6

Content

Juan Camilo Espejo-Serna. <i>Connecting the dots my own way: Sphex-test and flexibility in artificial cognitive agents.</i>	1
Paul Schweizer. <i>Causal and Communal Factors in a Comprehensive Test of Intelligence</i>	7
Huma Shah and Kevin Warwick. <i>From the Buzzing in Turing's Head to Machine Intelligence Contests</i>	12
Alessio Plebe and Pietro Perconti. <i>Qualia Turing Test - Designing a Test for the Phenomenal Mind</i>	16
Marc Schroeder and Gary McKeown. <i>Considering Social and Emotional Artificial Intelligence</i>	20
Chris White and David Bell. <i>Actions and Observations - demonstrating aspects of understanding in a simple world</i>	24
Ed Keedwell. <i>Towards a Staged Developmental Intelligence Test for Machines</i>	28
Antoni Diller. <i>How to Detect an Android</i>	33
Drew McDermott. <i>Don't Improve the Turing Test, Abandon It</i>	37
Pawel Dybala, Rafal Rzepka and Kenji Araki. <i>Computer system that likes chess (Panel Communication)</i>	42
Stefan Riegelnik. <i>Man, Machine, and Interpretation. Donald Davidson on Turing's Test (Panel Communication)</i>	45
Hugh Loebner. <i>Some Misconceptions Regarding The Turing Test (Panel Communication)</i>	50
Darren Abramson. <i>The original test: it's harder than you might think</i>	52

Marc Schröder, Sathish Pammi, Roddy Cowie, Gary McKeown, Hatice Gunes, Maja Pantic, Michel Valstar, Dirk Heylen, Mark ter Maat, Florian Eyben, Björn Schuller, Martin Wöllmer, Elisabetta Bevacqua, Catherine Pelachaud and Etienne de Sevin.

Demo: Have a Chat with Sensitive Artificial Listeners (Demo Poster)

62

Doug Samuelson.

A Proposed Replacement for the Turing Test (Poster)

63
