28TH INTERNATIONAL SYMPOSIUM ON RAREFIED GAS DYNAMICS 2012

Zaragoza, Spain 9 – 13 July 2012

Volume 1

EDITORS

Michel Mareschal

ZCAM (Zaragoza Center for Advanced Modeling), Zaragoza, Spain

Andrés Santos

Universidad de Extremadura, Badajoz, Spain

All papers have been peer reviewed.

SPONSORING ORGANIZATIONS

Ministry of Economy and Competitivity, Spain
Government of Aragon, Department of Industry and Innovation
ARAID (Aragoneese Agency for Research and Development)
The University of Zaragoza
ZCAM (Zaragoza Scientific Center for Advanced Modeling)
BiFi, Institute for Biocomputation and Study of Complex Systems
PIDSMC (Parallel Interface Direct Simulation Monte Carlo) Software Inc.

AIP Conference Proceedings, Volume 1501
28th International Symposium on Rarefied Gas Dynamics 2012

Table of Contents

VOLUME 1

Preface: 28th International Symposium on Rarefied Gas Dynamics
Michel Mareschal, Andrés Santos, and Alfonso Tarancón Lafita 1

PLENARY – HAROLD GRAD LECTURE

Kinetic theory for active and granular particles
James W. Dufty and Aparna Baskaran 11

PLENARY – LLOYD THOMAS LECTURE

Experiments with size-selected clusters: From condensation in molecular beams to dust particles in the Enceladus plume
U. Buck 21

PLENARY – GRAEME A. BIRD LECTURE

Computer experiments on the onset of turbulence
Todd H. Weisgraber and Berni J. Alder 30

KINETIC AND TRANSPORT THEORY, BOLTZMANN AND RELATED EQUATIONS

Analytical and numerical computations for high frequency MEMS
Laurent Desvillettes and Silvia Lorenzani 34

Moment method and non-equilibrium thermodynamics of rarefied gas mixture
Vladimir M. Zhdanov and Vjacheslav I. Roldughin 43

Nonlinear resonant gas oscillation accompanied with evaporation and condensation
Masashi Inaba, Takeru Yano, Kazumichi Kobayashi, and Masao Watanabe 53

On the second-order slip and jump coefficients for the general theory of slip flow
Shigeru Takata and Masanari Hattori 59

Automated Boltzmann collision integrals for moment equations
Vinay Kumar Gupta and Manuel Torrilhon 67

Model kinetic description for mixtures
V. V. Belyi 75

On the non-equilibrium thermodynamics of rarefied gases: Relationships between the Chapman-Enskog and moment methods
Vjacheslav I. Roldughin and Vladimir M. Zhdanov 83

Hot atom populations in the terrestrial atmosphere. A comparison of the nonlinear and linearized Boltzmann equations
Reinel Sospedra-Alfonso and Bernie D. Shizgal 91

Transport processes and new types of boundary Knudsen layers in a gas flows through thin permeable membranes
A. I. Erofeev and O. G. Friedlander 99

Reaction rates and reaction rate constant conception. One-temperature case
Evgeniy G. Kolesnichenko and Yuriy E. Gorbachev 107

Numerical analysis of nonlinear acoustic wave propagation in a rarefied gas
Tetsuro Tsuji and Kazuo Aoki 115

The sign change effect of the energy flux and other effects in the transitional regime for the Couette problem
Alexander A. Abramov and Alexander V. Butkovsky 123

Generating a wave from a wall with changing temperature
A. Sakurai, M. Tsukamoto, and S. Takahashi 131

Influence of reaction heat on time dependent processes in a chemically reacting binary mixture
Wilson Marques Jr., Gilberto M. Kremer, and Ana Jacinta Soares 137

An ES-BGK model for a gas mixture with bimolecular chemical reaction
M. Groppi and G. Spiga 145

A BGK model for gas mixtures
S. Brull, V. Pavan, and J. Schneider 153

The Boltzmann equation in special and general relativity
Gilberto M. Kremer 160

Transport properties of five-component nitrogen and oxygen ionized mixtures with electronic excitation
V. A. Istomin and E. V. Kustova 168

New forms of two-particle and one-particle kinetic equations
V. L. Saveliev and S. Yonemura 175

New possibilities of kinetic description of nonequilibrium structures
Vladimir Aristov, Anna Frolova, and Sergei Zabelok 183

Robust hyperbolic moment closures for CFD
James McDonald and Manuel Torrilhon 191

Regularized 13 moment equations for hard spheres
Henning Struchtrup and Manuel Torrilhon 199

Slow rarefied gas flow past a cylinder: Analytical solution in comparison to the sphere
Armin Westerkamp and Manuel Torrilhon 207

Study of the shock wave structure by regularized Grad's set of equations
I. E. Ivanov, I. A. Kryukov, M. Yu. Timokhin, Ye. A. Bondar, A. A. Kokhanchik, and M. S. Ivanov 215

Boundary layers for the nonlinear discrete Boltzmann equation: Condensing vapor flow in the presence of a non-condensable gas
N. Bernhoff 223

Hydrodynamic model for molecular gases in thermal nonequilibrium
Thierry E. Magin, Benjamin Graille, and Marc Massot 231

Lattice group models: GPU acceleration and numerics
Stefan Brechtken 239

Heat and mass transfer in gases due to pressure and temperature gradients in a laser radiation field
I. V. Chermyaninov and V. G. Chernyak 247

Symmetric extensions of normal discrete velocity models
A. V. Bobylev and M. C. Vinerean 254

NUMERICAL SOLUTIONS OF KINETIC EQUATIONS AND HYBRID METHODS

Direct numerical solution of model kinetic equations for flows in arbitrary three-dimensional geometries
V. A. Titarev 262

"Small" kinetic models for transitional flow simulations
Hans Babovsky 272

Deterministic solution of the Boltzmann equation using a discontinuous Galerkin velocity discretization
A. Alekseenko and E. Josyula 279

Numerical solution of the moment equations using kinetic flux-splitting schemes
Anirudh S. Rana, Manuel Torrilhon, and Henning Struchtrup 287

Kinetic solvers with adaptive mesh in phase space
Robert R. Arslanbekov, Vladimir I. Kolobov, and Anna A. Frolova 294

Multipoint conservative projection method for computing the Boltzmann collision integral for gas mixtures
O. I. Dodulad and F. G. Tcheremissine 302

Gas-kinetic unified algorithm for aerodynamics covering various flow regimes by solving a Boltzmann model equation
Zhihui Li, Aoping Peng, Junlin Wu, and Lin Li 310

Discrete velocity scheme for solving the Boltzmann equation with the GPGPU
E. A. Malkov, S. O. Poleshkin, and M. S. Ivanov 318

Conservative deterministic spectral Boltzmann solver near the grazing collisions limit
Jeffrey R. Haack and Irene M. Gamba 326

High performance computing with a conservative spectral Boltzmann solver
Jeffrey R. Haack and Irene M. Gamba 334

Extension of a hybrid particle-continuum method for a mixture of chemical species
Ashley M. Verhoff and Iain D. Boyd 342

Comparison of discrete BGK-Shakhov system with DSMC
D. M. Bond, M. N. Macrossan, and V. Wheatley 350

Immersed boundary method for Boltzmann model kinetic equations
Cem Pekardan, Sruti Chigullapalli, Lin Sun, and Alina Alexeenko 358

A moving mesh approach for the numerical simulation of gas micro flows
G. Dechristé and L. Mieussens 366

A novel discrete velocity method for solving the Boltzmann equation including internal energy and non-uniform grids in velocity space
P. Clarke, P. Varghese, D. Goldstein, A. Morris, P. Bauman, and D. Hegermiller 373

A Runge-Kutta discontinuous Galerkin solver for 2D Boltzmann model equations: Verification and analysis of computational performance
Wei Su, Alina A. Alexeenko, and Guobiao Cai 381

Locally refined discrete velocity grids for deterministic rarefied flow simulations
C. Baranger, J. Claudel, N. Hérouard, and L. Mieussens 389

Investigation of nonequilibrium internal energy excitation in shock waves by means of a spectral-Lagrangian Boltzmann solver
Alessandro Munafò, Jeffrey R. Haack, Irene M. Gamba, and Thierry E. Magin 397

Reduced number of discrete velocities for a flow description by lattice Boltzmann theory
Jae Wan Shim 405

Molecular kinetic approach to the problem computing sound-wave propagation
M. Tsukamoto, A. Sakurai, and R. Iwatsu 409

Unified flow solver for transient rarefied-continuum flows
Vladimir I. Kolobov, Robert R. Arslanbekov, Vladimir V. Aristov, Anna A. Frolova, and Sergey A. Zabelok 414

Simulation of nonequilibrium turbulent flows on the basis of the Boltzmann equation
V. V. Aristov and O. I. Rovenskaya 422

GPU accelerated kinetic solvers for rarefied gas dynamics
Sergey A. Zabelok, Vladimir I. Kolobov, and Robert R. Arslanbekov 429

Application of hybrid N-S/DSMC method in hypersonic transitional flow
Zhonghua Li, Zhihui Li, Haiyan Li, and Yanguang Yang 435

A discontinuous Galerkin method for conservation laws coupled with algebraic-type nonlinear constitutive equations
N. T. P. Le and R. S. Myong 443

Hybrid continuum particle simulations of unsteady flows
Sarantis Pantazis 451

Slip effects in compressible turbulent channel flow
P. A. Skovorodko 457

Rarefied gas flow through a long circular pipe into vacuum
V. A. Titarev and E. M. Shakhov 465

Efficient solution method for rarefied gas flow in long finite-length channels
E. M. Shakhov and V. A. Titarev 473

A gas-kinetic scheme for the simulation of turbulent flows
Marcello Righi 481

DSMC AND RELATED SIMULATIONS

A comparative study of no-time-counter and majorant collision frequency numerical schemes in DSMC
A. Venkattraman, A. A. Alexeenko, M. A. Gallis, and M. S. Ivanov 489

Rarefied gas flow through a grid of cylinders
M. Yu. Plotnikov and A. K. Rebrov 496

Comparison of different approaches to evaluation of statistical error of the DSMC method
M. Yu. Plotnikov and E. V. Shkarupa 503

Efficient CUDA implementation in the DSMC method
A. V. Kashkovsky, A. A. Shershnev, and M. S. Ivanov 511

A directional rotational relaxation model for nitrogen using molecular dynamics simulation
Paolo Valentini, Chongling Zhang, and Thomas E. Schwartzentruber 519

Simulation of electrons in rarefied hypersonic flow fields
E. Farbar and I. D. Boyd 527

Investigation on a coupled CFD/DSMC method for continuum-rarefied flows
Zhenyu Tang, Bijiao He, and Guobiao Cai 535

DSMC methods for multicomponent plasmas
Alexander V. Bobylev, Irina F. Potapenko, and Stanislav A. Karpov 541

On the outflow boundary conditions for subsonic rarefied external flows
M. Cevdet Çelenligil 549

Statistical simulation of internal energy exchange in shock waves using explicit transition probabilities
Erik Torres and Thierry Magin 557

DSMC study of homogeneous condensation of water in supersonic expansions
Arnaud Borner, Zheng Li, and Deborah A. Levin 565

DSMC-based uncertainty quantification for a hypersonic shock interaction flow
Jonathan M. Burt, Eswar Josyula, and Isaiah M. Blankson 573

Development of a chemistry model for DSMC simulation of the atmosphere of Io using molecular dynamics
Neal Parsons, Deborah A. Levin, and Adri C. T. van Duin 579

Development of an adaptive weighting scheme for DSMC and its application to an axisymmetric jet
Cyril Galitzine and Iain D. Boyd 587

DSMC simulations of shock tube experiments for the dissociation rate of nitrogen
G. A. Bird 595

Computational efficiency of the inflow boundary conditions in DSMC simulation
Aránzazu Pérez and José A. Moríñigo 601

DSMC collision algorithms based on Kac stochastic model
Stefan Stefanov 609

Low noise fractional NTC collisions for DSMC
Robert Scott Martin and Jean-Luc Cambier 615

Confirmation of non-classical laws in nonequilibrium gases and application of conservation laws to verification of DSMC
R. S. Myong and J. H. Park 621

1D PIC-DSMC simulations of breakdown in microscale gaps
Chris H. Moore, Matthew M. Hopkins, Paul S. Crozier, Jeremiah J. Boerner, Lawrence C. Musson, Russell W. Hooper, and Matthew T. Bettencourt 629

Accuracy analysis of DSMC chemistry models applied to a normal shock wave
Sergey Gimelshein, Ingrid Wysong, Yevgeny Bondar, and Mikhail Ivanov 637

On the velocity distribution of molecular species in pulsed optical lattices
T. C. Lilly, B. M. Cornella, S. F. Gimelshein, and A. D. Ketsdever 645

State specific vibrational relaxation and dissociation models for nitrogen in shock wave regions
Zheng Li, Ilyoup Sohn, and Deborah A. Levin 653

Monte Carlo simulation of rarefied gas flow induced by wall temperature gradient
Hiroaki Matsumoto and Kyoshiro Kanamori 661

Dispersion of sound induced by a non-resonant interaction of an optical lattice with collisional gases
Mikhail Shneider and Sergey Gimelshein 667

Effects of rarefaction on the shock wave/boundary layer interaction in hypersonic regime
Gennaro Zuppardi and Chiara Boffa 673

Sensitivity analysis of the Gupta and Park chemical models on the heat flux by DSMC and CFD codes
Luigi Morsa, Giandomenico Festa, and Gennaro Zuppardi 680

DSMC simulation of rarefied gas flows under cooling conditions using a new iterative wall heat flux specifying technique
H. Akhlaghi, E. Roohi, and R. S. Myong 687

MICROFLUIDICS

Fluctuating hydrodynamics and direct simulation Monte Carlo
Kaushik Balakrishnan, John B. Bell, Aleksandar Donev, and Alejandro L. Garcia 695

Asymptotic modelling of isothermal gaseous flow in microchannels by using Burnett equations
R. Gatignol 705

A kinetic model for capillary flows in MEMS
Paolo Barbante, Aldo Frezzotti, Livio Gibelli, Paolo Legrenzi, Alberto Corigliano, and Attilio Frangi 713

Transition regime analytical solution to gas mass flow rate in a rectangular micro channel
S. Kokou Dadzie and Nishanth Dongari 720

Repulsion and attraction caused by radiometric forces
Austin Ventura, Andrew Ketsdever, Rebecca Webb, Alina Alexeenko, Natalia Gimelshein, and Sergey Gimelshein 727

Linearized Boltzmann equation: A preliminary exploration of its range of applicability
Gian Pietro Ghiroldi, Livio Gibelli, Paride Dagna, and Alice Invernizzi 735

Asymptotic modeling of the flow of a binary gas mixture in a microchannel
M. Reyhanian Mashhadi, C. Croizet, and R. Gatignol 742

Application of radiometric force to microactuation and energy transformation
Nathaniel Selden, Natalia Gimelshein, Sergey Gimelshein, and Andrew Ketsdever 750

Effects of thermal creep and high order slip/jump on natural convection in microchannels
Behnam Rahimi and Hamid Niazmand 757

Numerical study of the Poiseuille and thermal creep flow of nitrogen in long capillaries
V. A. Titarev and E. M. Shakhov 765

VOLUME 2

MICRO-NANO SCALE FLOWS AND DEVICES

Velocity inversion and predicting velocity slip on curved surfaces
Ali Dinler, Robert W. Barber, David R. Emerson, and Stefan K. Stefanov 771

Rarefaction effects in gas flows over curved surfaces
Nishanth Dongari, Craig White, Thomas J. Scanlon, Yonghao Zhang, and Jason M. Reese 778

A simple model for flows around moving vanes in Crookes radiometer
Satoshi Taguchi and Kazuo Aoki 786

Numerical analysis on gas separator with thermal transpiration in micro channels
Hiroshi Sugimoto and Masaya Hibino 794

A kinetic approach for the evaluation of damping in micro-electro-mechanical systems devices vibrating at high frequencies
Silvia Lorenzani and Laurent Desvillettes 802

A numerical study for transport phenomena of nanoscale gas flow in porous media
Tomoya Oshima, Shigeru Yonemura, and Takashi Tokumasu 809

Study of gas separation in micro devices by solving the Boltzmann equation
O. I. Dodulad, I. D. Ivanova, Yu. Yu. Kloss, P. V. Shuvalov, and F. G. Tchremissine 816

Experimental research of gas flows through isothermal and non-isothermal membranes
Yu. V. Nikolskiy and O. G. Friedlander 824

Poiseuille flow in a capillary at all regimes of rarefied gas flows
V. V. Zhvick and O. G. Friedlander 830

Prototype of calorimetric flow microsensor
Oleg Sazhin 837

2D numerical simulation of gas flow interaction with a solid wall by regularized Grad's set of equations
M. Yu. Timokhin, I. E. Ivanov, and I. A. Kryukov 843

PARTICLE METHODS FOR FLOWS SIMULATIONS

Efficiency and stability of the DSBGK method
Jun Li 849

Transient gas flow studied by a test particle Monte Carlo approach with ProVac3D
Xueli Luo, Thomas Giegerich, and Christian Day 857

Molecular simulation of small Knudsen number flows
Fei Fei and Jing Fan 864

Moment preserving adaptive particle weights using octree velocity distributions for PIC simulations
Robert Scott Martin and Jean-Luc Cambier 872

Statistical error and optimal parameters of the test particle Monte Carlo method
M. Yu. Plotnikov and E. V. Shkarupa 880

MOLECULAR DYNAMICS

Modeling of an ionic liquid electrospray using a molecular dynamics model
Arnaud Borner, Zheng Li, and Deborah A. Levin 887

Molecular dynamics simulations of high speed rarefied gas flows
Nishanth Dongari, Yonghao Zhang, and Jason M. Reese 895

Slip effects at the vapor-liquid boundary
Aldo Frezzotti and Maurizio Rossi 903

Molecular dynamics simulation on rarefied gas flow in different nanochannel geometries
J. H. Kim, A. J. H. Frijns, S. V. Nedea, and A. A. van Steenhoven 911

Molecular dynamics simulation of deposition and growth of Cu thin film on Si substrate
Jun Zhang, Chong Liu, Yonghua Shu, and Jing Fan 919

Molecular dynamics study of nonequilibrium processes of evaporation and condensation at a vapor-liquid interface
Takeru Yano 926

Computation of unstable rarefied gas flow in channels with different scattering functions
O. A. Aksenova and I. A. Khalidov 931

Multi-potential interactions in plasma adopting a GPU version of the reaction ensemble Monte Carlo method
A. D'Angola, M. Tuttafesta, M. Guadagno, P. Santangelo, A. Laricchiuta, G. Colonna, and M. Capitelli 938

Thermal transpiration of nanoscale gas flow
Gulru Babac, Nishanth Dongari, Yonghao Zhang, and Jason M. Reese 946

Fluid properties from equations of state compared with direct molecular simulations for the Lennard-Jones system
H.-O. May and P. Mausbach 954

GRANULAR SYSTEMS

Heat flux in a granular gas
J. J. Brey and M. J. Ruiz-Montero 961

On the linear Boltzmann equation with rough granular collisions and spin
Rolf Pettersson 971

Steady representation of the homogeneous cooling state of a granular mixture
M. J. Ruiz-Montero and J. Javier Brey 977

Velocity distribution and cumulants in the unsteady uniform longitudinal flow of a granular gas
Antonio Astillero and Andrés Santos 985

Hydrodynamics at the Navier-Stokes level applied to fast, transient, supersonic granular flows
Lidia Almazán, Clara Salueña, Vicente Garzó, José A. Carrillo, and Thorsten Pöschel 993

Time dependent Ginzburg-Landau equation for sheared granular flow
Kuniyasu Saitoh and Hisao Hayakawa 1001

Which reference state for a granular gas heated by the stochastic thermostat?
P. Maynar, M. I. García de Soria, and E. Trizac 1009

Energy non-equipartition in a system with a granular impurity under Couette-Fourier flow
F. Vega Reyes and V. Garzó 1017

Homogeneous states in granular fluids driven by thermostats
Moisés G. Chamorro, Francisco Vega Reyes, and Vicente Garzó 1024

Grad's moment method for a low-density granular gas. Navier-Stokes transport coefficients
Vicente Garzó 1031

Slow dynamics near jamming
Kuniyasu Saitoh, Vanessa Magnanimo, and Stefan Luding 1038

Relative entropy of a freely cooling granular gas
Andrés Santos and Gilberto M. Kremer 1044

REACTION AND RELAXATION PROCESSES

The effect of internal energy on chemical reaction rates as predicted by Bird's quantum-kinetic model
Michael A. Gallis and John R. Torczynski 1051

Relaxation of rotational-vibrational energy and volume viscosities in H/H_2 mixtures
D. Bruno, F. Esposito, and V. Giovangigli 1061

Macroscopic kinetic model for air in nozzle flow
Gianpiero Colonna, Lucia Daniela Pietanza, and Mario Capitelli 1071

Scalar forces/fluxes and reciprocity relations in flows with strong thermal and chemical non-equilibrium
E. V. Kustova 1078

Normal mean stress in non-equilibrium viscous N_2/N flows with dissociation and electronic excitation
E. V. Kustova, D. V. Makarkin, and M. A. Mekhonoshina 1086

Equilibrium and non-equilibrium rate constants of oxygen dissociation at high temperatures
L. B. Ibraguimova, O. P. Shatalov, and Yu. V. Tunik 1094

The influence of CO_2 kinetics on the hypersonic flow near blunt bodies
E. V. Kustova, E. A. Nagnibeda, Yu. D. Shevelev, and N. G. Syzranova 1102

EquilTheTA: Thermodynamic and transport properties of complex equilibrium plasmas
G. Colonna and A. D'Angola 1110

CO_2 state-to-state kinetics and transport in a hypersonic boundary layer: Preliminary results
I. Armenise and E. Kustova 1116

Assessment of high-enthalpy air chemistry models for hypervelocity ground-based experiments
Marat Kulakhmetov, Yevgeniy A. Bondar, Mikhail S. Ivanov, and Alina A. Alexeenko 1122

GAS-SURFACE INTERACTIONS

Molecular dynamics study of hydrogen atom recombination over silica, based on a new analytical DFT potential energy surface
P. Gamallo, M. Rutigliano, S. Orlandini, M. Cacciatore, and R. Sayós 1129

A finite-rate model for oxygen-silica catalysis through computational chemistry simulation
Paul Norman and Thomas Schwartzentruber 1137

Numerical analysis of vapor-liquid two-phase system based on the Enskog-Vlasov equation
Kazumichi Kobayashi, Kotaro Ohashi, and Masao Watanabe 1145

Influence of surface characteristics on scattering behavior in Couette flow with heat transfer
Hideki Takeuchi and Toru Hyakutake 1152

Application of Gaussian random field theory to direct simulation of rarefied gas flow near rough surface
Olga A. Aksenova, Iskander A, Khalidov, and Victoria I. Sviridovich 1160

The influence of roughness of the surface on the interchange of momentum between gas flow and solid surface
A. I. Erofeev, O. G. Friedlander, A. P. Nikiforov, S. B. Nesterov, and R. A. Nezhmetdinova 1168

On the Maxwell gas-wall interaction model for micro/nano gas flows
Tengfei Liang, Qi Li, and Wenjing Ye 1175

EXPERIMENTAL PROCEDURES IN RGD

Measurements of time-of-flight distributions of shock-heated molecular beams
K. Osuka, Y. Yoshimoto, N. Miyoshi, I. Kinefuchi, S. Takagi, and Y. Matsumoto 1182

Response of the Patterson probe in the transition flow regime
Martin Grabe 1188

Coherent Rayleigh-Brillouin scattering in high intensity laser fields
B. M. Cornella, S. F. Gimelshein, T. C. Lilly, and A. D. Ketsdever 1195

Rarefied gas flow through porous media: Experiments and numerical simulation
E. Afrasiabian, L. Marino, and C. M. Casciola 1202

Mass spectrometry of pyrolysis products of hexafluoropropylene oxide during adiabatic expansion of a supersonic jet
M. N. Andreev, I. S. Bespalov, A. K. Rebrov, A. I. Safonov, and N. I. Timoshenko 1208

Coupling particle simulation with aerodynamic measurement in hypersonic rarefied wind tunnel in JAXA
Toshiyuki Suzuki, Takashi Ozawa, and Kazuhisa Fujita 1213

JETS AND PLUMES

Far field deposition of scoured regolith resulting from lunar landings
A. B. Morris, D. B. Goldstein, P. L. Varghese, and L. M. Trafton 1220

Experimental and numerical study of supersonic jets of N_2, H_2, and N_2+ H_2 mixtures
P. A. Skovorodko, A. Ramos, G. Tejeda, J. M. Fernández, and S. Montero 1228

Para-hydrogen narrow filament evaporation at low temperature
T. G. Elizarova, A. A. Gogolin, and S. Montero 1236

Numerical analysis of a binary jet mixture impinging on a plate
L. Marino and C. Spernanzoni 1242

Rarefied planar jet and jet impingement flows
C. Cai, C. Zou, X. Huang, L. Wang, and Q. Sun 1249

CLUSTERS, AEROSOLS AND ELECTROSPRAYS

Chemical reactions studied at ultra-low temperature in liquid helium clusters
Friedrich Huisken and Serge A. Krasnokutski 1257

Supercritical-state expansions which cross the binodal line before reaching the nozzle throat
Eldon L. Knuth and J. Peter Toennies 1267

Gas dynamic optimization of the atomic nanocluster deposition system
Petr A. Skovorodko, Simon A. Brown, and Domagoj Belić 1274

Application of DSMC method for size-corrected theory of homogeneous nucleation
Nikolay Y. Bykov and Yuriy E. Gorbachev 1282

Bulk condensation in the dust-laden flow of vapor/gas mixture
N. M. Kortsenshteyn and A. K. Yastrebov 1290

MOLECULAR BEAMS AND MOLECULAR COLLISIONS

Experiments on microjets of undercooled liquid hydrogen
José M. Fernández, Matthias Kühnel, Guzmán Tejeda, Anton Kalinin, Robert E. Grisenti, and Salvador Montero 1296

Diagnostics of H_2O and H_2+He supersonic jets by Raman spectroscopy
G. Tejeda, J. M. Fernández, and S. Montero 1305

Microscopic linear liquid streams in vacuum: Injection of solvated biological samples into X-ray free electron lasers
R. B. Doak, D. P. DePonte, G. Nelson, F. Camacho-Alanis, A. Ros, J. C. H. Spence, and U. Weierstall 1314

Quantum decoherence mechanism in atom-molecule - collisions: NO + Ar case study
J. Tornero, M.-S. Chao, K. C. Lin, S. Stolte, and A. González Ureña 1324

Vibrational excitation and relaxation of NO molecules scattered from a Au(111) surface
Christof Bartels, Kai Golibrzuch, Alexander Kandratsenka, Russell Cooper, Igor Rahinov, Daniel J. Auerbach, and Alec M. Wodtke 1330

Dynamics of alkali ions-neutral molecules reactions: Radio frequency-guided beam experimental cross-sections and direct quasiclassical trajectory studies
J. Aguilar, J. de Andrés, J. M. Lucas, M. Albertí, F. Huarte-Larrañaga, D. Bassi, and A. Aguilar 1340

Measurement of the rotational temperature in a nitrogen molecular beam by REMPI
H. Yamaguchi, T. Moriyama, K. Ide, J. Ito, Y. Matsuda, and T. Niimi 1350

Femtosecond resolved dynamics in small polyatomic molecules by velocity map imaging
Valérie Blanchet 1355

Radical-neutral chemical reactions studied at low temperature with VUV synchrotron photoionization mass spectrometry
Satchin Soorkia, Stephen R. Leone, and Kevin R. Wilson 1365

Reactivity of Ba and Ca atoms with N_2O molecules deposited on van der Waals clusters and helium droplets
Marc-André Gaveau, Marc Briant, and Jean-Michel Mestdagh 1373

Cluster growth in supersonic jets of CO_2 through a slit nozzle
A. Ramos, G. Tejeda, J. M. Fernández, and S. Montero 1383

PLASMA FLOWS AND PROCESSING

Physics of Hall-effect thruster by particle model
Francesco Taccogna, Pierpaolo Minelli, Mario Capitelli, and Savino Longo 1390

Self-consistent coupling of chemical, electron and radiation models for shock wave in Jupiter atmosphere
Gianpiero Colonna, Lucia Daniela Pietanza, Giuliano D'Ammando, and Mario Capitelli 1400

Toward hybrid simulation of flow generation in DBD plasma actuator
Kazuya Sugimoto and Naofumi Ohnishi 1408

Modeling of neutral entrainment in an FRC thruster
Jeremiah Brackbill, Natalia Gimelshein, Sergey Gimelshein, Jean-Luc Cambier, and Andrew Ketsdever 1416

Experimental investigation of supersonic low pressure air plasma flows obtained with different arc-jet operating conditions
Viviana Lago and Abdoul-Aziz Ndiaye 1423

PIC simulation of electrodeless plasma thruster with rotating electric field
Ryosuke Nomura, Naofumi Ohnishi, and Hiroyuki Nishida 1431

Gas dynamic aspects of silicon thin layers deposition using excitation of a free jet of the working gas mixture by an electron beam
P. A. Skovorodko, R. G. Sharafutdinov, V. G. Shchukin, and V. O. Konstantinov 1437

RGD IN ASTROPHYSICS AND AERONOMY. SPACE VEHICLES AERODYNAMICS

Experimental and numerical investigation of aerodynamic effects induced by a glow discharge over a cylinder in rarefied supersonic regime
Viviana Lago, Jean Denis Parisse, Jerome Pons, Emmanuelle Tinon, and Alexey N. Kudryavtsev 1443

Simulations of hypersonic, high-enthalpy separated flow over a 'tick' configuration
J. N. Moss, S. O'Byrne, N. R. Deepak, and S. L. Gai 1453

Analysis of low-density effects in suborbital flight of FAST20XX
Raffaele Votta, Marco Marini, Luigi Morsa, Giorgio Fels, Gennaro Zuppardi, Tobias Schwanekamp, and Martin Sippel 1461

Applications of underexpanded jets in hypersonic aerothermodynamics research
Vladimir V. Riabov 1469

Numerical investigation of a drag increase achievable in electrodynamic aerobraking of a reentry vehicle
Hiroshi Katsurayama and Takashi Abe 1477

Rarefied aerothermodynamics for Mars aero-flyby sample collection mission
T. Ozawa, T. Suzuki, H. Takayanagi, and K. Fujita 1485

Hypersonic aerodynamics of a flat plate: Bridging formula and wall temperature effects
Yuan Hu, Song Chen, and Quanhua Sun 1493

Comparative study of various approaches for modeling transitional hypersonic rarefied gas flows over blunt bodies
I. G. Brykina, B. V. Rogov, G. A. Tirskiy, V. A. Titarev, and S. V. Utyuzhnikov 1500

Treatment of differently weighted particles in reactive re-entry flows with DSMC
D. Petkow, A. Mirza, G. Herdrich, and S. Fasoulas 1507

Study of the coupling between real gas effects and rarefied effects on hypersonic aerodynamics
Song Chen, Yuan Hu, and Quanhua Sun 1515

Wind compensation by radiometer arrays in high altitude propulsion
Natalia Gimelshein, Sergey Gimelshein, Andrew Ketsdever, and Marcus Young 1522

Heat transfer on a hypersonic sphere with gas injection
Vladimir V. Riabov 1529

DSMC aero-thermo-dynamic analysis of a sample-return capsule
Gennaro Zuppardi, Raffaele Savino, Chiara Boffa, and Valerio Carandente 1535

Numerical analysis of Io's atmospheric behavior during eclipse based on a model Boltzmann equation
Shingo Kosuge and Kazuo Aoki 1541

The development of a combined effects space simulation facility
Carlos A. Maldonado, Taylor C. Lilly, and Andrew D. Ketsdever 1549

Climatic effects of the Chicxulub impact ejecta
Devon Parkos, Marat Kulakhmetov, Brandon Johnson, Henry J. Melosh, and Alina Alexeenko 1557
