# ITM 2014 Proceedings

## Table of Contents

### PLENARY SESSION

<a href="#"><u>Ubiquitous Positioning: A Pipe Dream or Reality?</u></a> T. Moore, The University of Nottingham, UK	1 - 36
<a href="#"><u>Policy and Privacy Considerations in a GPS World</u></a> A. Eisenstadt, National Coordination Office United States of America	37 - 55

### Advanced RAIM and Autonomous Integrity 1 and 2

<a href="#"><u>The Effect of Nominal Signal Deformation Biases on ARAIM Users</u></a> R.E. Phelts, J. Blanch, T. Walter, P. Enge, Stanford University	56 - 67
<a href="#"><u>Impact of Nominal Bias Bounding Techniques on Final ARAIM User Performance</u></a> C. Macabiau, C. Milner, Q. Tessier, ENAC, France; M. Mabilieu, J. Vuillaume, EGIS-AVIA, France; N. Suard, C. Rodriguez, CNES, France	68 - 77
<a href="#"><u>Satellite Selection and RAIM for GNSS Reliability Enhancement in Multi-Constellation</u></a> F.C. Meng, S. Wang, B. C. Zhu, Peking University, China	78 - 88
<a href="#"><u>Reduced Subset Analysis for Multi-Constellation ARAIM</u></a> T. Walter, J. Blanch, P. Enge, Stanford University	89 - 98
<a href="#"><u>Exclusion for Advanced RAIM: Requirements and a Baseline Algorithm</u></a> J. Blanch, T. Walter, P. Enge, Stanford University	99 - 107
<a href="#"><u>GNSS Signal in Space Outliers Analysis Based on Historical Navigation Data</u></a> Y. Liu, Beihang University, China; Y. Zhu, Aviation Data Communication Corporation, China	108 - 114
<a href="#"><u>Integrity Monitoring and Error Identification of Ultra-tightly Integrated GNSS/INS Navigation System</u></a> F. Qin, X. Zhan, S. Jing, Shanghai Jiao Tong University, China	115 - 126
<a href="#"><u>Design and Performance Evaluation of Airspace-Ground Cooperative GPS/BeiDou Dual-constellation RAIM Algorithm</u></a> Y. Liu, Beihang University, China; Y. Zhu, Aviation Data Communication Cooperation, China	127 - 136
<a href="#"><u>An Improved Fault Tolerance Method of GPS/INS Integrated Navigation System</u></a> L. Cong, X. Huang, D. Yang, Beihang University, China	137 - 144

### Urban, Indoor and Terrestrial Applications

<a href="#"><u>Foot- and Knee-mounted INS for Firefighter Localization</u></a> J. Rantakokko, P. Strömbäck, P. Anderson, Swedish Defence Research Agency, FOI, Sweden	145 - 153
<a href="#"><u>Performance Analysis of UWB Technology for Indoor Positioning</u></a> Z. Koppányi, C.K. Toth, D.A. Grejner-Brzezinska, G. Jozkow, The Ohio State University	154 - 165
<a href="#"><u>Altimeter Slant Range Analysis and Compensation</u></a> P. Spiegel, B. Braun, J. Dambeck, F. Holzappel, Institute of Flight System Dynamics, TUM, Germany	166 - 174
<a href="#"><u>Improving Low-Cost INS/GPS Positioning Accuracy Using Quantile Regression Forests</u></a> S. Adusumilli, D. Bhatt, H. Wang, V. Devabhaktuni, University of Toledo	175 - 180
<a href="#"><u>Application of the Recursive Signal Processing of the Floating Solution in Multipath Environment</u></a> S-L. Cho, C. Park, S-J. Lee, Chungnam National University, South Korea	181 - 185
<a href="#"><u>Pedestrian Dead Reckoning Indoor Positioning with Step Detection Based on Foot-mounted IMU</u></a> H. Yin, H. Guo, X. Deng, Nanchang University, China; M. Yu, Jiangxi Normal University, China; J. Xiong, Nanchang University, China	186 - 192
<a href="#"><u>Research on the SOOP Relative Distribution Modeling Method</u></a> Z. Lei, Z. Jun, Z. Yanbo, X. Rui, Beihang University, China	193 - 200

### Augmentation Systems (SBAS, GBAS, etc.) 1 and 2

<a href="#"><u>Assessment of Methods to Trigger Transition Between Multiple SBAS</u></a>	201 - 211
J. Dennis, Innovative Solutions International, a Pragmatics company; M. Hemstad, TetraTech AMT Inc.	
<a href="#"><u>Research on the Ionospheric Delay Correction Methods in SBAS of Compass</u></a>	212 - 218
S. Wang and B. Zhu, Peking University, China	
<a href="#"><u>Korean SBAS Development Progress and Test Results of Pseudolite-Based SBAS Demo System</u></a>	219 - 222
D. Han, H. Yun, O. Kim, C. Kim, C. Kee, Seoul National University, South Korea	
<a href="#"><u>Algorithm and Configuration Availability Tool for Integrity Monitoring Test Bed</u></a>	223 - 233
C-W. Lin, S-S. Jan, National Cheng Kung University, Taiwan	
<a href="#"><u>Business Aircraft Multipath Analysis for GBAS CAT II/III</u></a>	234 - 245
J. Dvorska, M. Musil, M. Orejas, O. Kutik, Honeywell International	
<a href="#"><u>Tracking Error Modeling in Presence of Satellite Imperfections</u></a>	246 - 253
M. Vergara, M. Sgammini, Y. Zhu, S. Thoelet, F. Antreich, Germany Aerospace Center (DLR), Germany	
<a href="#"><u>Multiple Satellite Navigation Systems for the Ground Based Augmentation System</u></a>	254 - 264
M. Stanisak, M. Bitter, T. Feuerle, Technische Universität Braunschweig, Germany	
<a href="#"><u>Dual Frequency Ephemeris Ground Monitor for GBAS</u></a>	265 - 271
J. Jing, S. Khanafseh, S. Langel, F-C. Chan, B. Pervan, Illinois Institute of Technology	
<a href="#"><u>Investigation and Modeling of Effects of Ionospheric Plasma Bubbles on GBAS Availability and Its Mitigation by GPS/INS Integration</u></a>	272 - 279
T. Fujiwara, T. Tsujii, T. Kubota, Institute of Aeronautical Technology, Japan Aerospace Exploration Agency, Japan	
<a href="#"><u>Augmenting EGNOS with an E5b Channel</u></a>	280 - 291
H. Al Bitar, M. Raimondi, D. Kubrak, Thales Alenia Space, France; L. Ries, CNES, France	
<a href="#"><u>Improvement of DGPS Positioning Accuracy for Low Cost Receiver Using FKP Correction Message</u></a>	292 - 296
J. Kim, J. Song, H. No, C. Kee, Seoul National University, South Korea; M. Yang, M. Park, Mando Corporation, South Korea; S. Lee, National Geographic Information Institute, South Korea	

## **Interference and Spectrum Management 1 and 2**

<a href="#"><u>Effects of Multipath and CW Interference on Code Tracking Loop with EML Discriminator</u></a>	297 - 303
B. Qu, J. Wei, Huazhong University of Science and Technology, China; S. Zhang, L. Bi, Space Star Technology Co. Ltd, China	
<a href="#"><u>Detection, Location and Mitigation of GNSS Interference</u></a>	304 - 310
N. Ward, G. Shaw, General Lighthouse Authorities of the UK and Ireland; C. Hill, University of Nottingham, UK	
<a href="#"><u>Jammer Detection and Localization Using Maximum Time Interval Error</u></a>	311 - 315
H.H Choi, Y.S. Choi, J.H. Lee, S.J. Lee, Chungnam National University, South Korea; C. Park, Chungbuk National University, South Korea	
<a href="#"><u>A Multiple COTS Receiver GNSS Spoof Detector -- Extensions</u></a>	316 - 326
P.F. Swaszek, University of Rhode Island; R.J. Hartnett, U.S. Coast Guard Academy	
<a href="#"><u>Design and Assessment of a Dual Frequency GPS Intelligent Signal Tracking Loop for Interference Mitigation</u></a>	327 - 339
A.M. Kamel, Military Technical College, Egypt	
<a href="#"><u>Effects of Rotor Blade Modulation on GNSS Array Antenna Anti-jamming Algorithms</u></a>	340 - 348
F. Barbiero, ONERA/ISAE/Thales Avionics, France; F. Vincent, ISAE, France; T. Deloues, ONERA, France; F. Letestu, Thales Avionics, France	
<a href="#"><u>Further Investigations into C/A-to-C/A Interference</u></a>	349 - 361
A.P. Cerruti, J.W. Betz, J. Rushanan, The MITRE Corporation	
<a href="#"><u>Improved Array Interpolation for Reduced Bias in DOA Estimation for GNSS</u></a>	362 - 370
M.A.M. Marinho, German Aerospace Center (DLR), Germany/ Universidade de Brasília, Brazil; F. Antreich, German Aerospace Center (DLR), Germany; J.P. Carvalho Lustosa da Costa, Universidade de Brasília, Brazil	
<a href="#"><u>Low-Cost, High-Fidelity Data Acquisition System for Precision GNSS Adaptive Antenna Arrays</u></a>	371 - 376
A.J. O'Brien and I.J. Gupta, The Ohio State University	

## **Alternatives Sensors and Emerging Navigation Technologies**

<a href="#"><u>Hardware-Independent Automatic Crowdsourcing-Based Hybrid WLAN-RFID Adaptive Indoor Tracking System Using Fast Orthogonal Search and Multiple Particle Filters</u></a>	377 - 383
C. Donnelly, M.M. Atia, Royal Military College of Canada; M.J. Korenberg, Queen's University at Kingston, Canada; A. Noureldin, Royal Military College of Canada, Canada	
<a href="#"><u>Model-Aided Navigation for a Quadrotor Helicopter: A Novel Navigation System and First Experimental Results</u></a>	384 - 406
P. Crocoll, J. Seibold, G. Scholz, G.F. Trommer, Karlsruhe Institute of Technology (KIT), Germany	
<a href="#"><u>Results of Model-Aided Navigation with Real Flight Data</u></a>	407 - 412
L. Görcke, J. Dambeck, F. Holzapfel, Technische Universität München, Germany	
<a href="#"><u>Containing a Difficult Target: Techniques for Mitigating DME Multipath to Alternative Position Navigation and Timing (APNT)</u></a>	413 - 423
S. Lo, Y.H. Chen, B. Segal, B. Peterson, P. Enge, Stanford University; R. Erikson, Federal Aviation Administration; R. Lilley, Aviation Management Associates	
<a href="#"><u>LiDAR-based Relative Positioning for Swarm Exploration on Mars</u></a>	424 - 430
T. Krüger, S. Nowak, J. Matthaei, P. Hecker, Technische Universität Braunschweig, Germany	
<a href="#"><u>A Fairy Tale Approach to Cooperative Vehicle Positioning</u></a>	431 - 440
S. Stephenson, X. Meng, T. Moore, University of Nottingham, UK; A. Baxendale, T. Edwards, MIRA Ltd, UK	

## Quasi-Zenith Satellite System

<a href="#"><u>Positioning Technology with QZSS Signals</u></a>	441 - 449
A. Veitsel, A. Lebedinsky, D. Nikitin, Topcon Positioning Systems, Russia	
<a href="#"><u>Decimeter Level Vehicle Navigation Combining Multi-GNSS with Existing Sensors in Dense Urban Areas</u></a>	450 - 459
N. Kubo, R. Hou, T. Suzuki, Tokyo University of Marine Science and Technology, Japan	
<a href="#"><u>Evaluation of Precise Point Positioning Using MADOCA-LEX via Quasi-Zenith Satellite System</u></a>	460 - 470
T. Suzuki, N. Kubo, T. Takasu, Tokyo University of Marine Science and Technology, Japan	
<a href="#"><u>Ionospheric Correction at the Southwestern Islands for the QZSS L1-SAIF</u></a>	471 - 482
T. Sakai, K. Hoshino, K. Ito, Electronic Navigation Research Institute, Japan	
<a href="#"><u>Application of Ionosphere Correction for Enhanced Multi-GNSS Positioning</u></a>	483 - 487
H. Yamada, T. Takasu, N. Kubo, Tokyo University of Marine Science and Technology, Japan	
<a href="#"><u>The Use of Multiple GNSS Constellations with Strict Quality Constraints for Achieving High Accuracy in Urban Environments</u></a>	488 - 498
H. Tokura, H. Yamada, N. Kubo, Tokyo University of Marine Science and Technology, Japan; S. Pullen, Stanford University, USA	

## GNSS Processing and Integration 1 and 2

<a href="#"><u>Characteristics and Tracking Methods of TD-AltBOC Signal</u></a>	499 - 512
D. Yang, Y. Kou, J. Sui, Beihang University, China	
<a href="#"><u>Detailed Analysis of the Impact of the Code Doppler on the Acquisition Performance of New GNSS Signals</u></a>	513 - 524
M. Foucras, ABBIA GNSS Technologies / ENAC, France; O. Julien, C. Macabiau, ENAC, France; B. Ekambi ABBIA GNSS Technologies, France	
<a href="#"><u>Development of a Real-time GNSS Software Receiver for Evaluating RAIM in Multi-constellation</u></a>	525 - 533
Y-H. Chen, S. Lo, Stanford University; D.M. Akos, University of Colorado at Boulder; M. Choi, J. Blanch, T. Walter, P. Enge, Stanford University	
<a href="#"><u>A Modified Real-time Orbit Determination Algorithm for LEO Satellites</u></a>	534 - 540
X. Lin and L. Li, Zhejiang University, China	
<a href="#"><u>Cost-effective Cooperative RTK Positioning of Rowing Boats</u></a>	541 - 550
J.J. Kiam, Advanced Navigation Solutions – ANavS/ Technische Universität München Germany; J.M. Cárdenas, Advanced Navigation Solutions – ANavS, Germany; P. Henkel, Advanced Navigation Solutions – ANavS/ Technische Universität München, Germany	
<a href="#"><u>Robust Inertial Aided Beamforming for GNSS</u></a>	551 - 561
A. Grosch, M. Sgammmini, A. Konovaltsev, F. Antreich, German Aerospace Center (DLR), Germany	
<a href="#"><u>A New Carrier Phase Multipath Mitigation Technique for Ionosphere-free Combination</u></a>	562 - 567
R. Moradi, W. Schuster, S. Feng, W. Ochieng, Imperial College London, UK	
<a href="#"><u>Application of the Constraint Moving Horizon Estimation Method for GPS/SINS Integrated Navigation System</u></a>	568 - 573
X. Zhao, H. Qin, L. Cong, D. Yang, Beijing University of Aeronautics and Astronautics, China	

## Marine Applications

- [eLoran for e-Navigation – The Requisite Co-Primary Source for Position, Navigation, Time and Data](#)  
G. Offermans, E. Johannessen, C. Schue, A. Grebnev, S. Bartlett, UrsaNav, Inc. 574 - 582
- [Enhanced Radar Positioning](#)  
N. Ward, J. Safar, A. Grant, General Lighthouse Authorities of the UK & Ireland; T. Kojima, Furuno Electric Co. Ltd.; P. Mueller, Tideland Signal Corporation 583 - 587
- [A Method of Providing Integrity for eLoran](#)  
C. Hargreaves, P. Williams, General Lighthouse Authorities of the UK and Ireland 588 - 593
- [Senior Project Design of a Two Meter Autonomous Sailboat](#)  
B. Williamsz, J. Kane, R.J. Hartnett, United States Coast Guard Academy; P.F. Swaszek, University of Rhode Island 594 - 600

## Aviation Applications

- [ARAIM Operational Performance Tested in Flight](#)  
M. Rippl, I. Martini, B. Belabbas, German Aerospace Center/DLR, Germany; M. Meurer, German Aerospace Center/DLR/ RWTH Aachen University, Germany 601 - 615
- [Hybrid DFMC GNSS/INS to Support Approach Operations](#)  
M. Orejas, J. Dunik, Honeywell International 616 - 628
- [Availability Analysis of RTK for UAV Shipboard Landing](#)  
C.-J. Huang, S-S. Jan, National Cheng Kung University, Taiwan 629 - 637
- [Improvement of INS-Aided GPS Tracking Performance under Strong Ionospheric Scintillation](#)  
T. Tsujii, T. Fujiwara, T. Kubota, Japan Aerospace Exploration Agency (JAXA), Japan 638 - 644
- [Evaluation of Dual Frequency GBAS Performance Using Flight Data](#)  
M-S. Circiu, M. Felux, P. Remi, L. Yi, B. Belabbas, German Aerospace Center (DLR), Germany; Sam Pullen, Stanford University 645 - 656

## MEMS, Timing and Micro PNT

- [A Study on Practical Use of CSAC \(Chip Scale Atomic Clock\) for GBAS Ground Subsystem](#)  
T. Yoshihara, S. Saito, K. Hoshinoo, Electronic Navigation Research Institute (ENRI), Japan 657 - 661
- [Evaluation of ASF Correction Age and Timing Variance in eLORAN Disciplined OCXO](#)  
S-W. Hwang, Y.S. Choi, S-R. Yeo, S.J. Lee, Chungnam National University, South Korea; S-H. Yang, Korea Research Institute of Standards and Science, South Korea; C. Park, S.J. Lee, Chungbuk National University, South Korea 662 - 665

## Space and Atmospheric Weather 1 and 2

- [Conceptual Study of Real-time Ionospheric Threat Adaptation Using Space Weather Forecasting for GNSS Augmentation Systems](#)  
J. Lee, Korea Advanced Institute of Science and Technology, KAIST, South Korea; J. Lee, Korea , Tetra Tech AMT and Advanced Institute of Science and Technology, KAIST, South Korea; S. Pullen, Stanford University; S. Datta-Barua, Illinois Institute of Technology 666 - 676
- [Ionosphere Impact on GNSS Based Civil Aviation Applications During Maximum Solar Activity](#)  
E. Robert, EUROCONTROL, Belgium; M. Mabilieu, Egis Avia, France; P. Ladoux, DSNA/DTI, France; D. Duchet, EUROCONTROL, Belgium 677 - 689
- [Ionospheric Reconstructions for Various Solar, Seasonal, and Geomagnetic Conditions Obtained from the Global Assimilation of Ionospheric Measurements – Gauss Markov \(GAIM-GM\) Model](#)  
L.C. Gardner, R.W. Schunk, L. Scherliess, L. Zhu, J.J. Sojka, Utah State University 690 - 694
- [An Analysis for Irregularity of Tropospheric Delay Error Between Network Stations During Local Atmospheric Change](#)  
M.Y. Shin, Y. Han, D.J. Cho, Korea Research Institute of Ships and Ocean Engineering, Republic of Korea 695 - 699
- [Investigation of the Impact of Solar Storms on the Global Positioning System Receivers at High Latitudes](#)  
R.J. Morton, Talawanda High School (Ohio) 700 - 708
- [An Inverse Diffraction Technique for Scaling Measurements of Ionospheric Scintillations on the GPS L1, L2, and L5 Carriers to Other Frequencies](#)  
C.S. Carrano, K.M. Groves, S.H. Delay, P.H. Doherty, Institute for Scientific Research, Boston College 709 - 719

<a href="#"><u>Real Time Ionospheric Disturbance Analysis and Monitoring with GEONET Real Time Data</u></a>	720 - 724
S. Saito, T. Yoshihara, Electronic Navigation Research Institute, Japan; M. Yamamoto, Kyoto University, Japan	
<a href="#"><u>Multimodel Ensemble Prediction System for Space Weather Applications</u></a>	725 - 729
R.W. Schunk, L. Scherliess, V. Eccles, L.C. Gardner, J.J. Sojka, L. Zhu, Utah State University; X. Pi, A.J. Mannucci, M. Butala, B.D. Wilson, A. Komjathy, Jet Propulsion Laboratory; C. Wang, G. Rosen, University of Southern California	
<a href="#"><u>Algorithms and Results of Tracking BeiDou Signals During Strong Ionospheric Scintillation Over Ascension Island</u></a>	730 - 735
D. Xu, Y. Morton, S. Taylor, Miami University (Ohio)	

## Emerging GNSS and Modernization 1 and 2

<a href="#"><u>Autonomous Time Synchronization Technique for GNSS Constellation with Ridge Regression Method</u></a>	736 - 742
S. Jing, X. Zhan, F. Qin, Shanghai Jiao Tong University, China	
<a href="#"><u>Mitigating the Impact of Predicted-satellite-clock Errors on GNSS PPP Positioning</u></a>	743 - 750
C. Hackman, United States Naval Observatory	
<a href="#"><u>Effect of GPS NAV and CNAV/CNAV-2 Message Truncation Error on SISRE</u></a>	751 - 760
Y. Liu, Beijing Institute of Tracking and Telecommunication Technology, China; L. Wang, D. Yang, Beihang University, China	
<a href="#"><u>Performance Analysis of L2 and L5 CNAV Broadcast Ephemeris for Orbit Calculation</u></a>	761 - 768
H. Yin, Y. Morton, M. Carroll, Miami University (Ohio); E. Vinande, Air Force Research Laboratory	
<a href="#"><u>New GNSS Signals Demodulation Performance in Urban Environments</u></a>	769 - 780
M. Roudier, CNES, France; A. Garcia-Pena, O. Julien, ENAC, France; T. Grelier, L. Ries, CNES, France; C. Poulliat, M-L. Boucheret, ENSEEIHT, France; D. Kubrak, Thales Alenia Space, France	
<a href="#"><u>Applications and Low-complexity Implementation of ACE-BOC Multiplexing</u></a>	781 - 791
J. Zhang, Z. Yao, M. Lu, Tsinghua University, China	
<a href="#"><u>Comparative Analysis of Dual-Frequency Constant Envelop Multiplexing Techniques for ARNS Band</u></a>	792 - 801
Y. Zhu, Z. Yao, X. Cui, M. Lu, Tsinghua University, China	
<a href="#"><u>Differential Code Bias Estimation Using Multi-GNSS Observations and Global Ionosphere Maps</u></a>	802 - 812
O. Montenbruck, A. Hauschild, DLR/GSOC, Germany; P. Steigenberger, TUM/IAPG, Germany	
<a href="#"><u>Modeling the Galileo Full Operational Capability (FOC) Transmit Antenna and its Impact on Future Space Missions</u></a>	813 - 824
S. Ramakrishnan and P. Enge, Stanford University	
<a href="#"><u>Coefficients Optimization Based Quasi-constant Envelope Multiplexing Technique and Its Applications</u></a>	825 - 834
T. Yan, J. Wei, Z. Tang, Y. Cao, Huazhong University of Science and Technology, China	
<a href="#"><u>CS-POCET: A Dual-frequency Constant Envelope Multiplex Method for GNSS Signals</u></a>	835 - 843
Z. Zhou, J. Wei, Z. Tang, T. Yan, Huazhong University of Science and Technology, China	

## Receivers and Antenna Technology

<a href="#"><u>Approaching Millimeter Accuracy of GNSS Positioning in Real Time with Large Impedance Ground Plane Antennas</u></a>	844 - 848
D. Tatarnikov and A. Astakhov, Topcon Positioning Systems, Russia	
<a href="#"><u>De-spreading Delay-and-multiplication Method for GPS Signal Acquisition</u></a>	849 - 852
J. Fan and G. Ma, National Astronomical Observatories, Chinese Academy of Sciences, China	
<a href="#"><u>Experimental BOC Tracking Hardware Platform</u></a>	853 - 867
P. Neumaier, F. Garzia, P. Sommer, A. Rügamer, G. Rohmer, Fraunhofer Institute for Integrated Circuits IIS, Germany; J. Wendel, F.M. Schubert, Astrium GmbH, Germany	
<a href="#"><u>Ambiguity Peak Resolution for Navigation Receiver</u></a>	868 - 875
J-J. Floch, F. Soualle, J. Wendel, Airbus Defence and Space, Germany	
<a href="#"><u>A Two-dimension Tracking Based Multipath Mitigation Method for BOC Signals</u></a>	876 - 883
Y. Gao, Z. Yao, Y. Zhu, M. Lu, Tsinghua University, China	
<a href="#"><u>A Standalone Approach for Ultra-Tightly Coupled High Sensitivity GNSS Receiver</u></a>	884 - 897
T. Ren, M. Petovello, University of Calgary, Canada; C. Basnayake, General Motors, USA	
<a href="#"><u>Prediction of Antenna Induced Biases for Precision GNSS Receivers</u></a>	898 - 903
Y.C. Chuang, M. Buchanan, A. O'Brien, I.J. Gupta, The Ohio State University	
<a href="#"><u>A Centering Correction Method for GNSS Antenna Diversity: Theory and Implementation using a Software Receiver</u></a>	904 - 908
P. Zhang, Wuhan University, China and University of Nottingham, UK; F. Sun, Y. Xu, J. Zou, Wuhan University, China; W. Dai, Central South University, China and University of Nottingham, UK; X. Meng, University of Nottingham, UK
