

**2nd Asian/Australian Rotorcraft Forum
and the 4th International Basic
Research Conference on Rotorcraft
Technology 2013**

**Tianjin, China
8-11 September 2013**

Editors:

Pinqi Xia

**Renliang Chen
Zhengfei Tang**

ISBN: 978-1-63266-282-8

Table of Contents

INVITED KEYNOTE LECTURES

Chair: Prof. Quanyuan Jin

Conference Room , 2nd Floor, Grand Skylight Hotel

Numerical Study of Shipborne Rotors.....	1
<i>Professor George N. Barakos, AWLARC Academic Director School of Engineering The University of Liverpool, UK</i>	

Session 1 Presentations: Aerodynamics

Chair: Prof. Sejong Oh and Prof. Qijun Zhao

Meeting Room 1, 2nd Floor, Grand Skylight Hotel

Assessment of BVI Noise Reduction by an Active Tab through Numerical Simulations	29
<i>Hideaki Sugawara, Engineering Solution Division Ryoyu Systems Co., Ltd Ryoko South Bldg, Japan</i>	

Flow Field Simulation of Rotor in Ground Effect for Steady and Transition Flight with Low Forward Speed.....	38
<i>Chen Ren-liang, Xin Ji and Li Pan, Lab. of Rotorcraft Aeromechanics Nanjing University of Aeronautics and Astronautics, China</i>	

Derivation of Convective Kirchhoff's Formula for Far-field Propagation of Sound...50	
<i>Yong Woo Lee and Duck Joo Lee, Division of Aerospace Engineering School of Mechanical Aerospace & Systems Engineering KAIST, Korea</i>	

Study on a New Anti-Torque System of Rotor.....	57
<i>Tang Min, Tang Zheng-fei and Wu Hao-dong, Lab. of Rotorcraft Aeromechanics Nanjing University of Aeronautics and Astronautics, China</i>	

Prediction of Fuselage Surface Pressure in Rotor-Fuselage Interactions Using an Integral Formulation of Poisson Equation.....	64
<i>Ji Sung Jang, Dynamics Research Department Advanced Technology InstituteHyundai Heavy Industries, Se Hwan Park and Duck Joo Lee, Aeroacoustics Laboratory, Division of Aerospace Engineering School of Mechanical, Aerospace and Systems Engineering, KAIST, Korea</i>	

PIV Test Investigation of Hovering Rotor Tip Vortex and Free Vortex Wake Simulation	73
<i>Wu Jie, Yang Yong-dong and Huang Ming-qi, China Aerodynamics Research and development Center, Mianyang, China</i>	

BVI Noise Control Through Feedback Based on Pressure Signals on Blade.....	81
---	-----------

Yasutada Tanabe, Rotary Aircraft Section Aircraft Systems Research Group, Japan Aerospace Exploration Agency, Japan, Hideaki Sugawara, Engineering Solution Division East Japan Engineering Group, Japan

Experimental Investigations on the Tip Vortex Trajectory and Core for Helicopter Rotors.....88

Lin Yongfeng, Huang Shuilin and Deng Jinghui, China Helicopter Research and Development Institute, AVICopter, Jingdezhen, China, Zhao Qinjun, Lab. of Rotorcraft Aeromechanics, College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

Design, Performance Evaluation and Contribution of Each Component of Ducted Fan UAV in Hover.....96

Minjun Park, Division of Aerospace Engineering, KAIST, Daejeon, Korea, Jisung Jang, Dynamics Research Department, Advanced Technology Institute, HYUNDAI Heavy Industries, Ulsan, Korea, Duck-Joo Lee, Division of Aerospace Engineering, KAIST, Daejeon, Korea

Analysis on Aerodynamic and Acoustic Characteristics for Scissors Tail-Rotors in Forward Flight.....105

Fan Feng, Shi Yong-Jie and Xu Guo-Hua, Lab. of Rotorcraft Aeromechanics, College of Aerospace Engineering, Nanjing University of Aeronautics and Astronautics, China

Implementation of Adaptive Wavelet Method for Hovering Rotor Aerodynamic Analysis118

Sanghyun Chae, Sejong Oh and Kwanjung Yee, Department of Aerospace Engineering Pusan National University, Korea

Session 2 Presentations: Dynamics

Chair: Prof. Ed Smith and Dr. Dong Han

Meeting Room 2, 2nd Floor, Grand Skylight Hotel

Active Control of Electrically Controlled Rotor for Both Primary Control and Active Vibration Reduction.....130

Ma Jinchao, Lu yang, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

Dynamic Characteristic Study of Hingeless Blade Stiffness Reinforcement for Bearingless Rotor Whirl Tower Test.....136

Taejoo Kim, Chulyong Yun, Youngjoong Kee and Seung-ho Kim, Rotor Department Rotorcraft Technology Division Korea Aerospace Research Institute, Korea, Sungnam Jung, Department of Aerospace Information Engineering, Konkuk University, Korea

Analysis of Dynamic Characteristics of Asymmetric Bifilar Pendulum Absorber.....143

Si Ying-zhan, Gao Ya-dong and Wang Hua-ming, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

Corotational Formulation for Nonlinear Static and Dynamic Analysis of Thin Shells with Finite Rotation.....150

Yang Jinsong and Xia Pinqi, Lab. of Rotorcraft Aeromechanics College of Aerospace

Engineering Nanjing University of Aeronautics and Astronautics, China

Controlled Parameters Optimization and Active Control of Helicopter Vibration by Using Piezoelectric Stack Actuators.....161

Laishou Song, De Meng and Pinqi Xia, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

Trim Analysis of a Bearingless Rotor based on Improved Flexible Multi-body Dynamics172

Wonjong Eun, Haeseong Cho, Hanyeol Ryu and SangJoon Shin, School of Mechanical and Aerospace Engineering Seoul National University, Korea, YoungJung Kee, Korea Aerospace Research Institute, Korea

Helicopter dynamic components life prediction technology of individual aircraft based on flight state recognition.....180

Xinmin Li and Shenfang Yuan, College of Aerospace Engineering, Nanjing University of Aeronautics and Astronautics, China, Benyin Zeng and Xiaoqiang Jin, China Helicopter Research and Development Institute, AVICopter, Jingdezhen, China

Influence of Aeroelastically Tailored Wing Extensions and Winglets on Whirl Flutter Stability.....188

Jianhua Zhang and Edward Smith, Vertical Lift Research Center of Excellence, The Pennsylvania State University, USA

Fluidlastic Absorbers for Lagwise Loads Reduction of Rotor Blades.....201

Dong Han, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China, Edward C. Smith, Vertical Lift Research Center of Excellence, The Pennsylvania State University, USA

Dynamic Analysis and Model Identification of an Unmanned Helicopter.....214

Guanlin Wang, Hongli Chen, Song Han and Yu Yan, Institute of Unmanned Aerial Systems Engineering China Aerospace Science and Technology Beijing, China

The Integration Modeling Simulation Methodology for Birdstrike Impact Prediction on Helicopter Composite Material Structures.....222

Lü Lefeng and Wu Wenke, China Helicopter Research and Development Institute, AVICopter, Jing Dezheng, China, Sun Jinbo, Shen Yang Aircraft Airworthiness Certification Center, CAAC, China

Session 3 Presentations: Design and Flight Control

Chair: Prof. Prashant Pawar and Prof. Robert Kunz

Meeting Room 3, 2nd Floor, Grand Skylight Hotel

Fourteen Years of Autonomous Rotorcraft Research at the Georgia Institute of Technology.....229

Eric N. Johnson, John G. Mooney and Henrik Christophersen Unmanned Aerial Vehicle Research Facility School of Aerospace Engineering Georgia Institute of Technology, USA

Influence of Rotor's Position on the Stability of a Coaxial Helicopter.....	239
<i>Wang Qiang, Chen Ming and Song Yang, School of Aeronautic Science and Engineering, Beihang University, Beijing, China</i>	
Identification Method for Constructing Helicopter Flight Dynamics Model with Rotor Degrees of Freedom.....	246
<i>Wu Wei and Chen Renliang, Lab. of Rotor Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China</i>	
Longitudinal Slung-Load Guidance for Autonomous Rotorcraft Using Rapidly-Exploring Random Trees.....	252
<i>Eric N. Johnson and John G. Mooney, Unmanned Aerial Vehicle Research Facility School of Aerospace Engineering Georgia Institute of Technology, USA</i>	
The Flight Control System of FanWing UAV Design and Simulation.....	261
<i>Du Siliang and Tang Zhengfei, Lab. of Rotorcraft Aeromechanics, College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China</i>	
The Key Facts of Establishing NH90 NFH Shipboard Operational Limitations.....	270
<i>Lieutenant Alrik Hoencamp and Douwe Stapersma, Experimental Flight Test Engineer Netherlands Defense Academy, Marilena D. Pave, Delft University of Technology, Netherlands</i>	
Analysis of Causes and Countermeasures of Helicopter Accident from the Engineering Viewpoint.....	286
<i>Myeang-Hyen Bae, Research Associate, Division of Aerospace Engineering, KAIST, Korea, Yeon-Bok Chu and Duck-Joo Lee, Division of Aerospace Engineering, KAIST, Korea</i>	
Morphing Airfoil Technology with Rotorcraft Applications.....	290
<i>Lakshmi N. Sankar, Yung H. Yu, School of Aerospace Engineering, Georgia Institute of Technology, USA, Byung Yung Min, United Technologies Research Center, USA, Chee Tung (Retired), US Army Aeroflightdynamics Directorate, NASA Ames Research Center, USA</i>	
The Effects of Cyclic Pitch Control on the Aerodynamic Characteristics of Main Rotors for ABC Helicopters.....	300
<i>Lu Weiliang and Xu Guo-Hua, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China</i>	
Forward Flight Simulation of Composite Rotor Blades with Matrix Cracking and Uncertainties.....	311
<i>Babruvahan P. Ronge and Prashant M. Pawar, SVERI's College of Engineering, Pandharpur, India</i>	
Design and Aeroelastic Stability Test of Five-Blades Froude Scaled Model Rotor.....	324
<i>Heping Hu, Yun Zhou and Wei Meng, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China</i>	

Session 4 Presentations: Aerodynamics

Chair: Dr. Michel Costes and Prof. Qijun Zhao

Meeting Room 1, 2nd Floor, Grand Skylight Hotel

Experimental and Numerical Investigations for Aerodynamic and Noise Characteristics of the Rotor with Improved CLOR Blade-Tip.....329

Zhao Qi-Jun, Wang Bo, Xu Guo-Hua and Zhu Zheng, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

Investigation of vorticity confinement techniques for rotorcraft wake simulation.....340

M. Costes, R. Boisard, T. Renaud, F. Richez, B. Rodriguez and G. Reboul ONERA, The French Aerospace Lab France

Analysis the different rotational velocity impact on eccentric vortex inside of the Fanwing.....352

Wu Hao-dong, Tang Zheng-fei and Tang Min, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

Parametric Effect Investigation on Aerodynamic Interaction Characteristics for Tandem Rotors in Forward Flight.....358

Huang Shuilin, China Helicopter Research and Development Institute, AVICopter, Jingdezhen, China , Xu Guohua, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China, Lin Yongfeng, Huang Jianping and Liu Zhangwen, China Helicopter Research and Development Institute, AVICopter, Jingdezhen, China

Study on Performance Enhancement of Electrically Controlled Rotor Based on 2/rev Flap Input.....368

Wang Chao, Lu Yang, Chen Renliang, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

Session 5 Presentations: Ice Accretion and Optimization

Chair: Prof. Chee Tung and Dr. Yadong Gao

Meeting Room 2, 2nd Floor, Grand Skylight Hotel

Enhancement of Ultrasonic De-icing via Transient Excitation.....376

Nicola DiPlacido, Jared Soltis and Edward Smith, Vertical Lift Research Center of Excellence, The Pennsylvania State University, USA

Helicopter Rotor Performance Loss Prediction For Ice Accretion.....385

Zhang Wei and Pan Xiying, China Helicopter Research and Development Institute, AVICopter, Jingdezhen, China

Numerical Simulation of Airfoil Ice Accretion Phenomena.....392

Jeewoong Kim, Lakshmi N. Sankar, School of Aerospace Engineering, Georgia Institute of Technology Atlanta USA, Christine M. Brown, Robert F. Kunz, Jules W. Lindau, Michael P.

Kinzel, Department of Aerospace Engineering and Applied Research Laboratory The Pennsylvania State University, Richard E. Kreeger, NASA Glenn Research Center, USA

Flexure Section Optimization Using Advanced Particle Swarm-Assisted Genetic Algorithm.....408

Manoj Kumar Dhadwal, Sung Nam Jung and Chang Joo Kim, Department of Aerospace Information Engineering, Konkuk University, Korea, Tae Joo Kim, Rotor Department, Rotorcraft Program Office Korea Aerospace Research Institute, Korea

Aerodynamic Shape Optimization of Rotor Airfoil Using a Viscous Continuous Adjoint Method.....418

Wu Qi, Zhao Qi-Jun and Wang Qing, Lab. of Rotorcraft Aeromechanics Nanjing University of Aeronautics and Astronautics, China

Session 6 Presentations: CFD/CSD

*Chair: Prof. Renliang Chen and Dr. Masahiko Sugiura
Meeting Room 3, 2nd Floor, Grand Skylight Hotel*

Analysis of Rotor Airloads Based on CFD/CA Loose Coupling.....429

Xiao Yu, Xu Guo-Hua and Shi Yong-Jie, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

Evaluation of a Hybrid Method of CFD and Prescribed Wake Model for Rotary Wings in Hover.....439

Shigeru Takeda, Tokyo Metropolitan University, Japan, Hideaki Sugawara, East Japan Engineering Group, Ryoyu Systems Co., Ltd., Nagoya, Aichi, Japan, Masahiko Sugiura, Institute of Aeronautical Technology, Japan Aerospace Exploration Agency, Japan, Masahiro Kanazaki, Tokyo Metropolitan University, Japan, Yasutada Tanabe, Institute of Aeronautical Technology, Japan Aerospace Exploration Agency, Japan, Masatoshi Harigae, Tokyo Metropolitan University, Japan

Research on Circulation Controlled Tail Boom with Irregular Slots Using CFD.....446

Chen Chen, Gao Ya-dong and Wang Hua-ming, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

Improvements to the Hybrid Method of CFD and Prescribed Wake Model for Rotorcraft Aeroacoustics and Aerodynamics Prediction.....453

Masahiko Sugiura and Yasutada Tanabe, Aircraft Systems Research Group Institute of Aeronautical Technology Japan Aerospace Exploration Agency, Japan, Hideaki Sugawara Engineering Solution Division, East Japan Engineering Group, Ryoyu Systems Co., Ltd., Nagoya, Aichi, Japan

Aeroelastic Characteristics Analysis of Helicopter Rotors Based on CFD/CSD Coupling Method.....462

Wang Junyi, Zhao Qijun and Xiao Yu, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

Modal Measurement of Gimbaled Tilt Rotor with Advanced Geometry Blades.....471

Linghua Dong, Weidong Yang and Peng Hou, Lab. of Rotorcraft Aeromechanics College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China

CFD Calculations on the Unsteady Aerodynamic Force of Tiltrotor in Conversion Mode	477
<i>Li Peng and Zhao Qi-Jun, National Key Laboratory of Rotorcraft Aeromechanics Nanjing University of Aeronautics and Astronautics, China</i>	
Integrated Analyses about Aerodynamic and Stealth Characteristics of Airfoil Based on CFD/CEM Coupling Method	485
<i>Jiang Xiang-wen, Zhao Qi-Jun and Zhao Guo-Qing, National Key Laboratory of Rotorcraft Aeromechanics Nanjing University of Aeronautics and Astronautics, China</i>	
Unmanned Helicopter Parameter Identification Based on Modified Gain Kalman Filter Algorithm	499
<i>Zhang Xingwen, School of Aeronautic Science and Engineering Beijing University of Aeronautic and Astronautic, China, Chen Ming, School of Aeronautic Science and Engineering Beijing University of Aeronautic and Astronautic, China, Wang Qiang, School of Aeronautic Science and Engineering Beijing University of Aeronautic and Astronautic, China</i>	
Detailed Aerodynamic Analysis of Ducted Tail Rotor Using an Structured Moving-embedded Grid and Multi-grid Method	506
<i>Ni Tong-Bing and Zhao Qi-Jun, National Key Laboratory of Rotorcraft Aeromechanics Nanjing University of Aeronautics and Astronautics, China</i>	
An Improved Dynamic Stall Model for Rotor Airfoil Based on Experimental Investigations	516
<i>Wang Qing, Zhao Qi-jun and Zhao Guo-qing, National Key Laboratory of Rotorcraft Aeromechanics, Nanjing University of Aeronautics and Astronautics, China</i>	
Modeling and Parameter Sensitivity Analysis of Helicopter Main Rotor Bifilar Vibration Absorber	525
<i>Jun Zhao, Mingzhong Wu, China Helicopter Research and Development Institute, China</i>	
Nonlinear Control of Twin Helicopter with Slung Load	536
<i>Yanguo Song, Huanjin Wang, College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China</i>	
Thermodynamic Model of Ice Accretion on Rotor Blades Considering of the Centrifugal Force	550
<i>Chen Xi and Zhao Qi-Jun, National Key Laboratory of Rotorcraft Aeromechanics Nanjing University of Aeronautics and Astronautics, China</i>	
Investigation on the Flow Field over a Rotor using Overset-grid Method	559
<i>Niu Song, Zhang Wei and Cao Pusun, AVIC helicopter research & development institute, China</i>	

Algorithm Design of a Distributed Strap-down Inertial Navigation System for Unmanned Rotorcraft	566
<i>Jiandong Guo, Yanguo Song, College of Aerospace Engineering Nanjing University of Aeronautics and Astronautics, China</i>	
Active Flow Control on Separation and Post-Stall of Rotor Airfoil by Using Synthetic Jet and Parametric Analyses	577
<i>Zhao Guo-Qing and Zhao Qi-Jun, National Key Laboratory of Rotorcraft Aeromechanics Nanjing University of Aeronautics and Astronautics, China</i>	
An Active Fuzzy Control for Vibration Reduction of a Smart Rotor with Trailing-edge Flap	587
<i>Yamin Wang, China Helicopter Research and Development Institute, China</i>	
Study on the Numerical Simulation of Helicopter Nacelle Ventilation Cooling System	596
<i>Wang Xianwei, Kuang Chuanshu and Yu jing, AVIC Helicopter Research and Development Institute, China</i>
