# TABLE OF CONTENTS

|                                                                                                                                     |            |
|-------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>The Aerodynamic Behavioral Study of Two Wing's Wake Flow in Tandem Arrangement .....</b>                                         | <b>1</b>   |
| <i>H.Y. Chou, Y.C. Liu, F.B. Hsiao</i>                                                                                              |            |
| <b>Computational Aerodynamics and Flight Stability of Wing-In-Ground (WIG) Craft.....</b>                                           | <b>15</b>  |
| <i>H. Wang, C.J. Teo, B.C. Khoo, C.J. Goh</i>                                                                                       |            |
| <b>A Novel Pulsed Microblowing Technique to Improve Flow Separation Over Flap .....</b>                                             | <b>25</b>  |
| <i>Y.K. Wang, P. Zhou, X.Y. Deng, Q. Li, D.J. Zhao</i>                                                                              |            |
| <b>Low-speed Wind-tunnel Test Results of a BWB-UCAV Model.....</b>                                                                  | <b>50</b>  |
| <i>H.J. Shim, S.O. Park</i>                                                                                                         |            |
| <b>Performance Investigation and Optimization of a Vertical Axis Wind Turbine with the Omni-Direction-Guide-Vane .....</b>          | <b>59</b>  |
| <i>Y.C. Lim, W.T. Chong, F.B. Hsiao</i>                                                                                             |            |
| <b>Prediction of Commercial Aircraft Price Using the COC &amp; Aircraft Design Factors.....</b>                                     | <b>70</b>  |
| <i>D.I. Lee, W. Jin</i>                                                                                                             |            |
| <b>High Altitude Cycloidal Wind Turbine System Design .....</b>                                                                     | <b>78</b>  |
| <i>I.S. Hwang, W. Kang, S.J. Kim</i>                                                                                                |            |
| <b>Mixed-fidelity Efficient Global Optimization Applied to Design of Supersonic Wing.....</b>                                       | <b>85</b>  |
| <i>M. Kanazaki, H. Takagi, Y. Makino</i>                                                                                            |            |
| <b>H8 Control of Switched Systems with Nonideal Switchings and its Application to Morphing Aircraft .....</b>                       | <b>100</b> |
| <i>C.Y. Dong, W. Li, Q. Wang</i>                                                                                                    |            |
| <b>Aero-optical Effects in Spatial Developing Compressible Mixing Layer .....</b>                                                   | <b>110</b> |
| <i>K.T. Shi, H.D. Ma</i>                                                                                                            |            |
| <b>RFID-based Wireless Health Monitoring System Design.....</b>                                                                     | <b>117</b> |
| <i>J.M. Lin, C.H. Lin</i>                                                                                                           |            |
| <b>Efficiency Investigation of Conventional Satellite Initial Acquisition Control with the Consideration of Orbital Motion.....</b> | <b>128</b> |
| <i>H.C. Chang, W.L. Chiang, Y.Y. Lian</i>                                                                                           |            |
| <b>Route Planning for Light-sport Aircraft in Constrained Airspace.....</b>                                                         | <b>140</b> |
| <i>W.C. Lu, M.T. Lee, M.W. Wang</i>                                                                                                 |            |
| <b>Study on Judgment Method of Combustion Mode on Dual-mode Scramjet .....</b>                                                      | <b>147</b> |
| <i>Q. Chen, L.H. Chen, H.B. Gu, X.Y. Zhang, P. Wang</i>                                                                             |            |
| <b>Flight Trajectory Visual Simulation Technology of Space-based Reentry Vehicles .....</b>                                         | <b>155</b> |
| <i>X. Chen, Y.S. Liu</i>                                                                                                            |            |
| <b>Comparison of MDO Methods for an Earth Observation Satellite .....</b>                                                           | <b>166</b> |
| <i>X.H. Wang, R.J. Li, R.W. Xia</i>                                                                                                 |            |
| <b>A Guidance to Grid Size Design for CFD Numerical Simulation of Hypersonic Flows.....</b>                                         | <b>178</b> |
| <i>H.R. Zhang, Y. Yu</i>                                                                                                            |            |
| <b>Discovery of Breathing Phenomena in Continuously Rotating Detonation .....</b>                                                   | <b>188</b> |
| <i>Y.H. Wang, J.P. Wang, T.Y. Shi, Y.S. Liu, Y.S. Li, Y. Li</i>                                                                     |            |
| <b>Linear Unsteady CFD of Vibrating Blades of Turbomachinery.....</b>                                                               | <b>197</b> |
| <i>H. Ishida, N. Yamasaki, M. Aotsuka</i>                                                                                           |            |
| <b>Aerodynamic and Aerothermal Performance of Power-law Shaped Leading Edge of Hypersonic Waveriders .....</b>                      | <b>207</b> |
| <i>F.M. Wang, H.Q. Han, M.F. Lei, J. Zhang</i>                                                                                      |            |
| <b>Mixing Effectiveness Study in Scramjet Combustion.....</b>                                                                       | <b>218</b> |
| <i>Y.S. Chen, Y.Y. Lian, T.H. Chou, Alfred Lai, J.S. Wu</i>                                                                         |            |
| <b>The Basis of an Industry-standard Aerodynamic Computation and its Theoretical Basis with Inferences and Applications.....</b>    | <b>230</b> |
| <i>Z. Gao</i>                                                                                                                       |            |
| <b>A Ghost Cell Method for Turbulent Compressible Viscous Flows on Adaptive Cartesian Grids .....</b>                               | <b>241</b> |
| <i>O. Hu, N. Zhao, J.M. Liu</i>                                                                                                     |            |
| <b>Forebody Flow During the Wing Rock Over Low Swept Wing/Body Configuration in High Rate Pitching-up .....</b>                     | <b>250</b> |
| <i>S.W. Xu, X.Y. Deng, Y.K. Wang, W. Tian</i>                                                                                       |            |
