

7th International Scientific Symposium on Electric Power Engineering

(ELEKTROENERGETIKA 2013)

**Stara Lesna, Slovakia
18-20 September 2013**

Editors:

**Michal Kolcun
Iraida Kolcunová
Juraj Kurimský**

ISBN: 978-1-63266-382-5

Invited Lectures

Birkner Peter, Cimbala Roman, Jeromin Ingo Development and implementation of an integrated and autonomous smart distribution grid in Frankfurt	15
Vostracký Zdeněk Three important tasks for high voltage transmission system	19
Máslo Karel R&D projects and solution of power flows problems in the Central European region	23

Generation of Electricity, Transmission, Distribution and Consumption of Electricity

Kocman Stanislav, Orság Petr, Hrubý Tomáš Measurement and analysis of selected parameters of induction motors in controlled and uncontrolled drives	28
Ilenin Stanislav Use of programmable relays in extensive electrical installations	32
Varga Ladislav, Ilenin Stanislav Swing up of external power line conductor depending on wind speed	36
Fukala Bogdan, Paleček Josef Investigation of the voltage unbalance factor course on the model of the traction supply system 25 kV, 50 Hz	40
Kanálík Martin, Kolcun Michal The principle of actual short-circuit power determination in different nodes of the power system	44
Kováč Matúš, Heretik Pavol, Eleschová Žaneta Ferroresonance analysis	48
Eleschová Žaneta, Beláň Anton, Kováč Matúš, Liška Martin, Kósa Karol Analysis of the voltage stability – influence of selected power system equipment maintenance	52
Gurecký Jiří Selected aspects of design of power-factor compensation equipment	56
Jakubčák Roman, Beňa Lubomír, Kmec Miroslav, Kolcun, jr. Michal Possibilities of active power losses minimization in power systems using PSO method by FACTS devices	60
Hropko Daniel, Ivanecký Ján, Altus Juraj Application of phasor measurement units (PMUs) in the model of 22 kV network	64
Orság Petr, Kocman Stanislav, Hrubý Tomáš Identification of equivalent parameters of the traction transformer	68
Carbol Zbynek, Snobl Jaroslav, Novák Tomas, Sokanský Karel Power losses in public lighting grid	72
Sobota Pavel, Rusnok Stanislav, Svoboda Pavel, Šprlák Roman, Zajaczek Stanislav Research of distribution of the electric current of the motor supplied by the inverter	75
Svoboda Pavel, Rusnok Stanislav, Sobota Pavel, Zajaczek Stanislav, Slivka Martin Measurements of electric fields in tramway track vicinity	79
Gayibov Tulkin, Reymov Kamal Optimization of modes of electrical power systems with the control of power consumption	83
Čonka Zsolt, Novák Matúš , Hocko Pavol, Kolcun Michal, Medved' Dušan Impact of the regulators on the size of the short-circuit currents	86
Georgiev Georgi, Zicmane Inga, Kovalenko Sergey Express estimation of the system stability after switching on a cross-border line	90
Hocko Pavol, Čonka Zsolt, Novák Matúš, Medved' Dušan, Kolcun Michal Analysis of PV influence to power system long-term dynamics	94
Jedinák Martin, Šmidovič Rastislav, Janíček František The impact of unplanned transits of power flows on transmission system operation	98
Straka Milan Reconfiguration in power system of slovak republic	101

Sikora Tadeusz, Kral Vladimír Generic loads for testing small low voltage alternated current power sources	105
Rusek Stanislav, Slivka Martin, Goňo Radomír, Szkutnik Jerzy, Gawlak Anna Automatic data conversion of failures in distribution network	109
Gyurov Valentin, Chikov Vladimír, Makedonski Nikola, Kirov Rumen Statistical analysis and energy planning of electrical distribution network with intelligent control	113
Svoboda Pavel, Šprlák Roman, Sobota Pavel, Rusnok Stanislav, Mlčák Tomáš, Zajaczek Stanislav Simulation of electrical field around track	117
Kirov Rumen, Gyurov Valentin, Makedonski Nikola, Stefanov Stoimen Study on power and energy losses for different branches of industry in Republic of Bulgaria	121
Skala Petr, Dětrich Václav Simulation of overhead line reliability taking into account failure causes	125
Bewszko Tadeusz Multi-criteria decision aid in the electrical energy management	129
Dvorský Emil, Hejtmánková Pavla Terms of bundle conductors use in overhead lines 110 KV	133
Rusek Andrzej, Chaban Andriy , Tchaban Wasil , Lis Marek Interdisciplinary modeling of electromechanical processes in long shaft of powerful industrial robots	137
Szkutnik Jerzy The analysis of elements of the raising of the energy safety and efficiency in distribution network	141
Goldstein Valery, Shishkov Evgeny, Vedernikov Alexander, Kolcun Michal Calculation of steady state of multichain overhead power transmission line in phase coordinates	145
Kryuchkov Igor, Georgiev Georgi Determination the operating effects providing input of steady state of electrical power system in admissible area at the minimum shutdown of consumers	149
Šnajdr Jaroslav, Vostracký Zdeněk, Sedláček Jan Evaluation of theoretical results of overhead line ampacity model	152
Rusek Andrzej, Shchur Ihor, Nowak Marcjan, Patro Marek Mathematical model of the load of drive system for rolling stand and roller table with the parameters of the rolled material taken into account	155
Rusek Andrzej, Shchur Ihor, Nowak Marcjan, Patro Marek Analysis of selected dynamical states of the drive system for a rolling stand and a roller table considered as two-mass system with elastic connection	159
Janicek Frantisek, Cerman Anton, Kéry Július Noise reduction in chosen power substation	164
Smoček Martin, Hradílek Zdenek Photovoltaic power plants, extreme change of power difference	168
Vaculik Jan, Moldrik Petr, Hradílek Zdenek, Minarik Daniel Storing solar energy in hydrogen	172
Medvec Zdenek, Marcinčin Oliver Active charging stations for electric cars	176
Böszörményi Ladislav, Kapalo Peter, Bujanská Alena, Bujanský Peter Use of thermal water enthalpy on the electricity production in a hybrid heat power plant	180
Škorpil Jan, Benešová Hana Photovoltaic power energy systems and some aspects of their utilization	184
Noháč Karel, Noháčová Lucie Detection of nonstandard states in networks with renewable energy sources	188
Slíva Ladislav, Mišák Stanislav, Folvarčný Aleš Usage energetic potential from renewable sources	192
Vramba Jakub, Stuchlý Jindřich , Kosmak Jakub Off-grid conception of family house	196

Ptacek Michal, Matousek Antonin The implementation of the dynamic experiments of the low-temperature fuel cell stack with the buck DC/DC converter	200
Bartłomiejczyk Mikołaj, Stýskala Vítězslav, Hrbáč Roman, Pořom Marcin Trolleybus with traction batteries for autonomous running	204
Tkáč Ján Operational problems of renewable energy sources utilization	207
Minařík Daniel, Moldřík Petr, Vaculík Jan Various ways of hydrogen storage	211
Smitkova Miroslava, Janicek Frantisek Efficiency of the Westinghouse cycle	215
Jasminská Natália, Brestovič Tomáš Possibilities of hydrogen storage	218
Kurzak Lucjan, Grabowski Przemyslaw The role of biomass in energy supply in Poland	222
Kurzak Lucjan, Sašek Robert, Nowakowska –Grunt Joanna The meaning and use of photovoltaic energy	226
Kurzak Lucjan, Grabowski Przemyslaw Role of renewable energy in the European Union	229
Rybář Radim, Beer Martin, Horodníková Jana Metal foam in use as heat exchange chamber of parallel flow manifold header for vacuum tube solar collector	233
Bejvl Martin, Šimek Petr, Škramlík Jiří, Valouch Viktor Current control strategies of converter-based microgrids under disturbances	236
Kováč Miroslav, Bracíník Peter, Höger Marek A modelling of autonomous control system for intelligent fault restoration in medium voltage networks	240
Uher Marián Influence of renewable resources operating to the smart grid power flow	244
Pavlov Luboš, Lago Jozef Analysis of electrical losses caused by line asymmetry using PMU devices	248
Turcik Mario, Oleinikova Irina, Kolcun Michal End-users' energy management strategies in market environment	252
Kopička Marek, Toman Petr The development of smart grids pilot projects in Europe	256
Novák Tomáš, Šumpich Jan, Vaňuš Jan, Sokanský Karel, Koziorek Jiří, Hrbáč Roman Possibility to achieve the energy savings by the light control in smart houses	260
Rozehnal Petr, Unger Jan, Krejčí Petr Development of complaints about the quality of electricity in the Czech Republic	264
Tesařová Miloslava, Kašpírek Martin Evaluation of long-term voltage dip monitoring in the distribution system	268
Džmura Jaroslav, Petráš Jaroslav, Balogh Jozef Overvoltage phenomena in low voltage network	272
Pětvaldský Petr, Bilík Petr Testing gapless measurement of PQA according to IEC 62586-2	276
Otčenášová Alena, Peter Bracíník, Miroslav Dubovský Voltage dips in the power system and their spread	280
Rusnok Stanislav, Sobota Pavel, Svoboda Pavel, Hrbáč Roman, Zajaczek Stanislav, Šprlák Roman Influence energy stored in inductance of induction motor to starting current during repeated starting	284
Hrubý Tomáš, Kocman Stanislav Analysis of the drive disturbance of bucket loader	288
Makedonski Nikola, Kirov Rumen, Gyurov Valentin, Chikov Vladimír Application of GINAPT for analyse on power delivery of linear and non-linear loads	292

Staš Peter, Slíva Ladislav, Mišák Stanislav New concept of power supply unit for steel materials contact stress testing device	296
Reguľa Michal, Szabó Dominik, Otčenášová Alena Voltage quality characteristics analyses in laboratory environment	300
Bilik Petr, Prauzek Michal, Teng Zhaosheng, Wen He Energy meter accuracy under nonsinusoidal conditions	304
Bilik Petr, Horínek Marek PMU testing under dynamic signal changes	308
Bilik Petr, Matohlava Marek, Wittassek Tomas Phasor data concentrator for testing and educational purposes	312
Unger Jan, Rozehnal Petr, Krejčí Petr Analysis of measured data from wind turbines Vestas V90 - 2,0 MW	316
Rot David, Jiřinec Stanislav, Kožený Jiří Starting the induction melting process of ZrO in a segmented cold crucible	319
Zajaczek Stanislav, Ivánek Lubomir, Svoboda Pavel, Rusnok Stanislav, Sobota Pavel, Hrbáč Roman Current load of the rail mast pad during surge absorber breakdown	323
Doležel Ivo, Musálek Lubomír, Doubek Jiří Induction heating in magnetic field produced by permanent magnets	327
Bachorec Tibor, Saska Miroslav Heating test simulation of Generator's Outlet	331
Kačor Petr, Hytka Zdeněk CFD analysis of temperature rise of oil-cooled power transformer	335
 High Voltage Technique and Diagnostics in Power Engineering	
Tadzhibaev A.I., Nazarychev A.N., Pugachev A.A. The problems of and prospects for securing power facilities reliability on the basis of applying electrical equipment diagnostics	339
Beerboom Dominik, Johae Christopher, Zdrallek Markus, Klöker Peter, Schultze Nico Realistic condition assessment of medium-voltage substation	345
Brandt Martin, Seewald Róbert, Michalík Ján Diagnostic of radial interturn short circuit on the 3- phase distribution transformer 100 kVA	349
Hamacek Štefan, Bartłomiejczyk Mikołaj, Ivánek Lubomír, Stýskala Vítězslav analysis and detection of faults at insulated conductors of overhead medium voltage lines	352
Dolník Bystrík, Miháč Maroš Contribution to the method of accelerated aging on ZnO ceramics with voltage stress at increased temperature ...	356
German-Sobek Martin, Cimbala Roman, Király Jozef, Sklenárová Vieroslava The effect of thermal aging on dielectric parameters of XLPE cable insulation	359
Lelák Jaroslav, Váry Michal Estimation of underground PE insulated identification cable critical stray currents loading	363
Dudkin S., Tadzhibaev A.I., Titkov V.V. Thermal conditions in three-phase cable lines of medium and high voltages, featuring plastic insulation	366
Polanský Radek, Čermák Michal, Bartůňková Monika Influence of cross-linking on the properties of cable insulation based on XLPE	370
Đurman Vladimír, Lelák Jaroslav, Šály Vladimír Polarization processes in thermoplastic polyurethane insulation	374
Folvarčný Aleš, Mišák Stanislav, Slíva Ladislav Experimental analysis of the influence of temperature on the No-load current of toroidal and conventional transformers	377
Sklenárová Vieroslava, Cimbala Roman, Király Jozef, German-Sobek Martin Degradation mechanism in the oil insulation	381

Király Jozef, Cimbala Roman, German-Sobek Martin, Sklenárová Vierošlava Influence of temperature on transformer oil based magnetic fluid using irc analysis	385
Kolcunová Iraida, Lisoň Lukáš Frequency dependence of permittivity and loss factor of liquid dielectrics depending on the temperature	389
Cimbala Roman, Molnár Lukáš Hamon approximation of current responses of liquid insulation systems	393
Šprlák Roman, Opluštil Josef, Chlebiš Petr Construction of the liquid cooling heat sink for inverter	397
Dončuk Jan, Mentlík Václav, Velek Jiří, Ullman Ivo Investigation of a power transformer's insulation and cooling system functionality	401
Hrinko Marián, Kolcunová Iraida, Kurimský Juraj, Lisoň Lukáš Influence of thermal stress of partial discharge activity	405
Mráz Petr, Mentlík Václav, Pihera Josef Partial Discharge Apparent Charge Measurement	409
Balogh Jozef, Petráš Jaroslav, Džmura Jaroslav Linear and toroidal sensors and their usage for partial discharge measurements on high voltage coils	413
Petráš Jaroslav, Marton Karol, Džmura Jaroslav, Balogh Jozef Theoretical analysis of impedance proportions on conductors during overvoltage activity	417
Tarko Rafał, Nowak Wiesław, Benesz Mariusz Analysis of disturbances in electric power systems caused by lightning discharges	421
Vyrva Ye.A., Kolychev A.V., Tadzhibaev A.I., Titkov V.V. Optimization of screen systems of non-linear overvoltage limiters rated for high voltage classes	425
Marton Karol, Džmura Jaroslav, Balogh Jozef, Petráš Jaroslav Transient effects in HV and EHV transformers	430
damyan Yu.E., Vyrva .., Krivosheyev S.I., Tadzhibaev A.I., Titkov V.V. Pulse field diffusion and electromagnetic forces in hard ferromagnetics	434
Zbojovský Ján , Mészáros Alexander, Medveď Dušan, Kolcun Michal, Kolcunová Iraida, Dolník Bystrík, Kurimský Juraj, Pavlík Marek Simulation the influence of shielding materials to the distribution of electromagnetic field	439
Pavlík Marek, Kolcunová Iraida, Dolník Bystrík, Kurimský Juraj, Mészáros Alexander, Medveď Dušan, Kolcun Michal, Zbojovský Ján Measuring of dependence of shielding effectiveness of electromagnetic field on the moisture in the high frequency range 443	
 Power Systems Relaying, Faults Analysis	
Bermann Jiří The effectivity of a single-phase auto-reclosing with a distance protection depending on the line transmission capability 446	
Hvizdoš Marek Possibilities of communication between protection devices in substations	451
Kmec Miroslav, Jakubčák Roman Verification of protective functions of the ground protection RYo	455
Lomane Tatjana, Rubcovs Sergejs Estimation of earth fault distance protection for high voltage mixed network	459
Orságová Jaroslava, Topolánek David, Toman Petr, Dvořák Jaromír Method of the short time additional earthing of healthy phase for localization of the earth fault	463
Daboul Mayada, Orságová Jaroslava Verification of the performance of IEC 61850 sampled values in the process bus	466
Morva György The effect of the introducing of IEC 61850 to substation's secondary technologies	470

Egamnazarov Georgiy Calculating the currents in shield wires at short circuits in overhead power transmission lines	474
Petrichenko Roman, Zicmane Inga, Kolcun Michal, Novák Matúš The application of the combined method for selection of optimal excitation parameters.....	476
Rubcovs Sergejs, Strelkovs Vadims Estimation of asynchronous active power oscillations at phase plane	480
Medved' Dušan, Kolcun Michal, Hocko Pavol, Čonka Zsolt, Novák Matúš Simulation of faults in the power system and their elimination in the EMTP-ATP.....	484
Heretík Pavol, Beláň Anton, Kováč Matúš, Volčko Vladimír Protecting of PV power plant - model of current transformer	488
Ferková Želmíra, Vladimír Ivančo Simulation of Dynamic Response of the Switch Disconnecter	492
 Power System Control, Liberalisation of Electricity Market	
Kašpírek Martin, Mezera David Voltage quality impact of the renewable distributed energy sources.....	496
Prokop Lukáš , Mišák Stanislav, Horák Aleš , Prymek Miroslav Agent-based control system for small off-grid power system	500
Sadecký Bohumil, Havrda Marek, Wittassek Tomáš Wide area monitoring system (WAMS) for the Czech transmission grid	504
Tadzhibaev A.I., Nazarychev A.N., Andreyev D.A. Methodological foundations for controlling the technical status of electrical equipment at power industry facilities	508
Perduková Daniela, Fedor Pavol Design rules of a fuzzy controller using genetic algorithms	513
Perduková Daniela Fuzzy model based control applied to a DC drive.....	517
Hrbáč Roman, Mičák Tomáš, Kolář Václav, Nečas Jan, Rusnok Stanislav Phase Winding Resistance Estimation during Operation of the Switched Reluctance Motor.....	521
Beláň Anton, Cintula Boris, Eleschová Žaneta, Viglaš Dominik, Volčko Vladimír Impact of automatic reclosing on the dynamic stability of synchronous generator.....	525
Novák Matúš, Kolcun Michal, Čonka Zsolt, Hocko Pavol, Petričenko Roman, Zicmane Inga, Medved' Dušan Modelling of excitation system influence to transient stability of power system using PSLF	531
Knápek Jaroslav, Vašíček Jiří Analysis of possible impacts of regulatory framework on the district heating systems development – case example of the Czech Republic	535
Wiśniewska-Sałek Anna, Nowakowska Aleksandra Optimization of supply management in power industry.....	539
Vávrová Kamila, Vašíček Jiří, Knápek Jaroslav Biomass as the energy source for critical situations	543
Varfolomejeva Renata, Umbrasko Inga, Mahnitko Anatolij, Gerhards Janis Small-scale hydropower plant operating regime optimization	547
Krokavec Dušan, Filasová Anna, Hladký Vratislav On Takagi-Sugeno fuzzy modeling of the synchronous generators	551
Kuznecovs Timurs , Mahnitko Anatolij, Lomane Tatjana, Rimarevs Viktors, Dambis Ainars Transfer capacities and reliability	555
Kot Sebastian, Slusarczyk Beata The role of biomass in the energy production in the European Union countries.....	559
Pachura Piotr, Nowicka-Skowron Maria The prosumer energy market - the epistemological overview	562
Dudiak Jozef, Hocko Pavol, Novák Matúš, Kolcun Michal Analysis of influence from the renewable energy sources to the power system	565

Grabara Janusz K., Grabara Iwona	
Polish policy in the field of alternative energy sources' use – the present state and further actions	568
Szkutnik Jerzy, Gawlak Anna	
The energy efficiency in the Polish energy sector against on the background of the European Union.....	572
Oprea Diana	
Supporting system for the producing electricity from renewable energy sources in European Union	576
Frák Peter	
Actual particularities in asset management of distribution grid - expenditures planning and determination of measures	
580
