NUMERICAL ANALYSIS AND APPLIED MATHEMATICS

International Conference on Numerical Analysis and Applied Mathematics 2009

Rethymno, Crete, Greece *18 – 22 September 2009*

Volume 1

EDITORS

Theodore E. Simos
University of Peloponnese
Tripolis, Greece

George Psihoyios
University of Buckingham
Buckingham, United Kingdom

Ch. Tsitouras
Technological Educational Institution of Chalkis
Psahna, Greece

All papers have been peer-reviewed.

SPONSORING ORGANIZATIONS
Greek Ministry of Education and Religious Affairs
European Society of Computational Methods in Sciences and Engineering (ESCMSE)

AMERICAN INSTITUTE OF PHYSICS

Melville, New York, 2009
AIP CONFERENCE PROCEEDINGS ■ 1168

VOLUME 1

INVITED PAPERS

Long-Time Integration of Non-Stiff and Oscillatory Hamiltonian Systems **3**
E. Hairer
B-Series and B-Series Coefficients **7**
J. C. Butcher
Nonlinear Waves in Optics and Fluid Dynamics **11**
M. J. Ablowitz
Towards Adaptive Numerical Integration of Dynamical Contact Problems **16**
P. Deuflhard
Virtual Slow Manifolds: The Fast Stochastic Case **17**
C. W. Gear, D. Givon, and I. G. Kevrekidis
Highly Stable General Linear Methods for Differential Systems **21**
R. D'Ambrosio, G. Izzo, and Z. Jackiewicz
Monge-Kantorovich Approach for Grid Generation **25**
M. Sulman, J. F. Williams, and R. D. Russell
Two-Point Boundary Value Problems for Curves: The Case of Minimum Free Energy Paths **29**
R. D. Skeel
Symmetries of PDE's in Clifford Analysis and Their Applications **32**
V. Souček
Approximation of Inverse Problems **36**
S. L. Cotter, M. Dashti, and A. M. Stuart
Numerical Treatment of Singular BVPs: The New MATLAB Code bvpsuite **39**
G. Kitzhofer, O. Koch, and E. Weinmüller

NORMAL SUBMISSIONS

The Minimum Number of Inputs Required for the Controllability of Linear Differential Algebraic Equations **45**
A. A. Shcheglova
Output Regulation Problem for Differentiable Families of Linear Systems **49**
A. Compta, J. Ferrer, and M. Peña
Dihedral f-Tilings of the Sphere by Isosceles Triangles and Isosceles Trapezoids **53**
C. P. Avelino and A. F. Santos
Symbolic Computation of the Solution to an Homogeneous ODE with Constant Coefficients **57**
J. F. Navarro and A. Perez
Remarks on Interpolation Function of Higher Order *(h, q)*-Bernoulli Numbers **61**
A. Ahmet Aygunes and Y. Simsek
Solving Stiff Problems Using Generalized Picard Iterations **65**
V. V. Bobkov, B. V. Faleichik, P. A. Mandrik, and V. I. Repnikov
Runge-Kutta Pairs of Orders 5(4) Using the Minimal Set of Simplifying Assumptions **69**
Ch. Tsitouras

Exact Periodic Solitary Wave Solutions and Propagation for the Potential Kadomtsev-Petviashvili Equation **73**
C. Liu
Cubic Spline Wavelets Satisfying Homogeneous Boundary Conditions for Fourth-order Problems **77**
D. Černá and V. Finěk
Identification of an Unknown Coefficient Approximately **81**
E. Ozbilge and A. Demir
Analysis of the Large-n Limit of Multiple Orthogonal Polynomials and Non-Intersecting Brownian Motions **85**
L. M. Alonso and E. Medina
Homogenization of Multi-Spieces Reaction-diffusion Systems in Domains with Rough Boundaries **89**
C. Mocenni, E. Sparacino, and J. P. Zubelli
Optimal Stability of Bivariate Tensor Product Bases **93**
E. Mainar and J. M. Peña
The Stability of Spiral Waves **96**
F. Amdjadi and R. Wallace
Quaternionic Numerical Ranges of Normal Quaternion Matrices **100**
F. Lianggui
Overdetermined Infinite Linear Systems **107**
B. Finta
Positive Solutions for Nonlinear Singular Four-Order m-Point Eigenvalue Problems with Bending Term **110**
J. Wang and F. Xu
An Automaton Model on Curvilinear Grids for the Simulation of Pedestrian Flow **115**
H. Schwandt, M. Chen, and G. Bärwolff
Analysis of Blood Flow in a Partially Blocked Bifurcated Blood Vessel **119**
H. Abdul-Razzak, Y. Elkassabgi, P. K. Punati, and N. Nasser
New Exact Solutions for the Variant of Boussinesq Equations **123**
H. Chen
On the Numerical Solution of Improved Boussinesq Equation by the Method of Lines **127**
I. Th. Famelis
Helicopter Rotor Blade Shape Optimization Using NURBS for Airfoil Shape Parameterization **131**
I. Ivanović, Z. Petrović, and S. Stupar
Vortex Solutions of the Defocusing Discrete Nonlinear Schrödinger Equation **135**
J. Cuevas, G. James, P. G. Kevrekidis, and K. J. H. Law
Determination of Resonance Parameters by Use of Padé III Approximation **139**
J. Horáček
Cohomology of a Family of Substitutions that Force the Border **143**
J. García Escudero
Near-optimal Embedding by Genetic Algorithms for Time Series Prediction **148**
J. Ragulskiene, K. Lukoseviciute, and M. Ragulskis
Feedback Stabilization Methods for the Numerical Solution of Systems of Ordinary Differential Equations **152**
I. Karafyllis and L. Grüne
Modeling of Droplet Evaporation for Gas Turbine Inlet Fogging Systems with Different Water Injection Ratios **156**
K. Hoon Kim, H.-J. Ko, and Y.-S. Park
L^1-Uniqueness of Weak Solution for One-dimensional Mass Transport Equation **160**
L. D. Lemle, T. Bînzar, and F. Pater
Hypergroups Associated with Graphs and Automata **164**
Ch. G. Massouros and G. G. Massouros
An Algebraic Construction of the First Integrals of the Stationary KdV Hierarchy **168**
M. Matsushima and M. Ohmiya
Apollonious Identity in Linear 2-Normed Spaces **173**
M. Açikgöz, Y. Karakuş, N. Aslan, N. Köşkeroğlu, and S. Araci
On Some New Sequence Spaces via Orlicz Function in a Seminormed Space **178**
A. Esi and M. Açikgöz

A Class of Parallel Finite Difference Method for Convection-Diffusion Equations **185**
Q. Feng
Parallel AGE Method for Solving Convection-diffusion Equation **189**
Q. Feng
On the Boyd-Kadomstev System for the Three-wave Coupling Problem **193**
R. Sentis
Mass and Momentum Conservation of the Least-squares Spectral Collocation Method for the Time-dependent Stokes Equations **197**
T. Kattelans and W. Heinrichs
Some Extensions of a B. Sz.-Nagy Type Theorem with Application in the Stochastic Processes **201**
T. Bînzar, F. Pater, and L. D. Lemle
Discontinuous Galerkin Methods of the Hermite Type for Solving Elliptic PDEs **205**
V. Ruas and J. H. Carneiro de Araujo
Uniqueness of Meromorphic Functions Concerning Their Differential Polynomials **209**
W. Lü and Z. Wang
Numerical Computation of Secondary Electron Yield by a Two-fluxes Method **212**
A. Aoufi and G. Damamme
The Extended Discrete (G'/G)-Expansion Method and Its Application to the Relativistic Toda Lattice System **216**
İ. Aslan
Line Geometry in CAGD: Ruled Surfaces and Topological Properties of Related Line Congruencies . . **220**
M. Kmeťová and T. Kmeť
Networked Ising-Sznajd AR-β Model **224**
T. Nagao and M. Ohmiya
An Application of the Modified Equation to Reduce Some Numerical Instabilities **228**
F. J. Marco and M. J. Martínez
Computational Thermomechanical Modelling of Early-age Silicate Composites **232**
J. Vala, S. Šťastník, and V. Kozák
Modeling Of Economy Considering Crisis **236**
L. F. Petrov
Particle Swarm Optimization Approach in a Consignment Inventory System **240**
M. Sharifyazdi, A. Jafari, Z. Molamohamadi, M. Rezaeiahari, and R. Arshizadeh
Travelling Wave Solutions of the $K(m,n)$ Equation with Generalized Evolution **244**
M. S. Bruzón and M. L. Gandarias
Turbulence Modeling in Smoothed Particle Hydrodynamics Methodology: Application in Nozzle Flow . . **248**
P. K. Koukouvinis, J. S. Anagnostopoulos, and D. E. Papantonis
Algebraic Construction of Exact Difference Equations from Symmetry of Equations **252**
T. Itoh
On Some Emden-Fowler Type Equations **256**
F. Gamze Düzgün and K. N. Soltanov
Types of Solutions and Approximation of Solutions of Second Order Nonlinear Boundary Value Problems **260**
M. Dobkevich and F. Sadyrbaev
Modeling of Chaotic Dynamics in a Heterogeneous Catalytic Reaction **264**
G. A. Chumakov and N. A. Chumakova
Bernoulli, Euler, Riccati and Solitons **267**
G. Rządkowski
Singular Perturbation Analysis and Gene Regulatory Networks with Delay **271**
I. Shlykova and A. Ponosov
A p-adic Look at the Diophantine Equation $x^2+11^{2k}=y^n$ **275**
I. Naci Cangul, G. Soydan, and Y. Simsek
Analysis and Computation of Eigenvalues of Symmetric Fuzzy Matrices **278**
J. De Vlieger and K. Meerbergen
New Trends in Taylor Series Based Computations **282**
J. Kunovský, M. Kraus, and V. Šátek
Application of State-Space Smoothing to fMRI Data for Calculation of Lagged Transinformation between Human Brain Activations **286**
J. Watanabe

Fully Conservative, Skew Symmetric and Compact Finite Difference Schemes **290**
J. Reiss and J. Sesterhenn
Efficient Numerical Solution of Time-dependent Multichannel One-dimensional or Radial Problems in Quantum Mechanics **293**
K. Houfek
On Some Semilinear Elliptic Equations **298**
K. Kallıı and K. N. Soltanov
Multistep and Multistage Boundary Integral Methods for the Wave Equation **302**
L. Banjai
A Road Traffic Model with Overtaking: Continuation of Periodic Patterns Using Symmetry **306**
L. Buřič and V. Janovský
Numerical Estimation of the Lyapunov Exponents of Chaotic Time Series Corrupted by Noises of Large Amplitude **310**
M. E. Mera and M. Morán
A New Preconditioner on Gauss-Seidel Method for *H*-Matrices **314**
M. T. Darvishi and M. Azimbeigi
Plastic Design of Composites by Direct Methods **319**
A. Hachemi, M. Chen, and D. Weichert
Optimal Die Design in Extrusion Process Using Adaptive Finite Element Method **324**
A. Lotfi and G. Molnarka
One-Shot Multigrid for the Optimal Neumann Boundary Control of Time-Periodic Partial Differential Equations **329**
D. Abbeloos, M. Diehl, and S. Vandewalle
A New Approach for Controlling of Chaos in Lorenz System **333**
A. Sanayei
Differential Inclusions and Filippov Solutions in the Analysis of Piecewise Linear Models Describing Gene Regulatory Networks **339**
A. Machina and A. Ponossov
The Weakly Nonlocal Limit of a One—Population Wilson—Cowan Model **343**
A. Oleynik, J. Wyller, and I. Wertgeim
The Scatter Search Based Algorithm to Revenue Management Problem in Broadcasting Companies . . **346**
A. Pishdad, M. Sharifyazdi, and R. Karimpour
Development of Dual-Reciprocal Extended Boundary-Node Method **350**
A. Saitoh, T. Itoh, and A. Kamitani
Local Fourier Analysis for Tensor-Product Multigrid **354**
B. Vandereycken and S. Vandewalle
A Family of Multistep Collocation Methods for Volterra Integro-Differential Equations **358**
A. Cardone, D. Conte, and B. Paternoster
Minimization Method for Combined Sewage Overflow in Urban Drainage **362**
C. Liqun, W. Jianzhong, and L. Renquan
Quadratic One Sided Quaternionic Polynomials **367**
D. Janovská and G. Opfer
Applications of an Improved (G'/G)-Expansion Method to Nonlinear PDEs in Mathematical Physics . . **371**
E. M. E. Zayed and S. Al-Joudi
On Some Yamabe Type Eauations **377**
E. Öztürk and K. N. Soltanov
Level-Crossing Ordering of *M*/*M*/*c* Retrial Queues **381**
F. Ferreira and A. Pacheco
Reliability of a *k-out-of-n*:*G* System with Identical Repairable Elements **385**
M. Sharifi, A. Torabi Nia, P. Shafie, F. Norozi-Zare, and A. Sabet-Ghadam
Multifractal Analysis of Global Total Column Ozone Image **390**
M.-G. Hu and J.-F. Wang
Medial Representations for Shells of Variable Thickness **394**
M. L. Szwabowicz
A Simple Iterative Solution of Nonlinear Algebraic Systems **398**
M. Gousidou and C. Koutitas
Frequencies of Trapped Modes and Resonances for Water Waves in Infinite Channels **403**
M. I. Romero Rodríguez and P. Zhevandrov

Exact Solutions for a Generalized Ostrovsky Equation **406**
M. L. Gandarias and M. S. Bruzon
A Compact High Order Finite Volume Scheme for Advection-Diffusion-Reaction Equations **410**
M. J. H. Anthonissen and J. H. M. ten Thije Boonkkamp
A Sequential Method to Estimate the Strength of Heat Source of Inverse Bioheat Transfer Problem . . **415**
M.-J. Shiau and C. Yang
High Dimensional Model Representation Supported by Products of Univariate Functions **420**
M. Demiralp
An Orthonormal Decomposition Method for Multidimensional Matrices **424**
M. Demiralp and E. Demiralp
Fluctuationless Univariate Integration through Taylor Expansion with Remainder by Using Oscillatory Function Basis Sets **428**
N. A. Baykara, E. Gürvit, and M. Demiralp
Taylor Series Expansion with the Fluctuation Freely Approximated Remainder Over Highly Oscillatory Basis Functions **432**
E. Gürvit, N. A. Baykara, and M. Demiralp
Modeling of a Vertical Cavity Surface Emitting Laser with a Resonant Array of Quantum Wells **436**
N. N. Elkin, A. P. Napartovich, D. V. Vysotsky, B. M. Lavrushin, and V. I. Kozlovsky
A Study of the Robustness of Iterative Methods for Linear Systems **440**
O. Diene and A. Bhaya
Runge-Kutta-Nyström Stability for a Class of General Linear Methods for $y''=f(x,y)$ **444**
R. D'Ambrosio and B. Paternoster
Unstaggered Central Schemes for Hyperbolic Systems **448**
R. Touma
Component Reuse in Iterative Solvers for the Solution of Fuzzy Partial Differential Equations **452**
S. Corveleyn and S. Vandewalle
Using Pattern Recognition and Discriminance Analysis to Predict Critical Events in Large Signal Databases **456**
J. Feller, S. Feller, B. Mauersberg, and W. Mergenthaler
Dynamic Stochastic Analysis of Radial Displacement in Functionally Graded Thick Hollow Cylinder Using Hybrid Numerical Method and Monte Carlo Simulation **460**
S. Mahmoud Hosseini and F. Shahabian
The Jacobi-Maupertuis Principle in Variational Integrators **464**
S. Nair, S. Ober-Blöbaum, and J. E. Marsden
On One-Point Iterations and DIIS **468**
H. H. B. Sørensenand O. Østerby
Approximation of Antenna Data with Rational Radial Basis Function Interpolation **473**
S. Jakobsson, B. Andersson, and F. Edelvik
Feed Forward Neural Network and Optimal Control Problem with Control and State Constraints . . . **478**
T. Kmet' and M. Kmet'ová
A Method of Normal Estimation from Node Coordinates by Implicit Function with an Appropriate Constraints **482**
T. Itoh
Modeling the MagnetoencephaloGram (MEG) of Epileptic Patients Using Genetic Programming and Minimizing the Derived Models Using Genetic Algorithms **486**
K. Theofilatos, E. Georgopoulos, and S. Likothanassis
An Adaptive Method for Solving Chemical Master Equations Using a Sparse Wavelet Basis **489**
T. Udrescu and T. Jahnke
Computational Method and a Numerical Algorithm for Finding the Optimal Control Policy for a Partially Observable System **493**
V. Makis, M. J. Kim and R. Jiang
Solving a Discrete Contact Problem via a Path-following Technique **497**
V. Janovský
Fast Accurate Algorithms for Tail Conditional Expectation **501**
B. Chen, W. W. Y. Hsu, and M.-Y. Kao
A Reliable Vector-valued Rational Interpolation and Its Existence Study **505**
X. Zhu

Kinetic Growth Aggregation (Leath Algorithm) Approach for Continuum Percolation Model **509**
K. Yamamoto, H. Yoshinaga, and S. Miyazima
On the Solvability and Approximate Solution of a Two-dimensional Coefficient Inverse Problem for Transport-like Equation **513**
B. Heydarov and Z. Ustaoglu
The Analysis of a Mathematical Model Associated to an Economic Growth Process **517**
O. Bundău, F. Pater, and A. Juratoni
On Some Yosida Type Approximation Theorems **521**
F. Pater, L. D. Lemle, and T. Bînzar
The Second Deconvolution Theorem **525**
L. Pingan and M. Chang
Application of the R-matrix Theory to Low-energy Potential Scattering **531**
M. Šulc and J. Horáček
Numerical Simulation of Flow Induced Vibration of a Two-dimensional Airfoil **535**
S. Gharedaghi Mollahajloo and M. Hassan Rahimian
Solitary Waves of the MRLW Equation by Variational Iteration Method **539**
S. M. Hassan and D. G. Alamery
Meteorological Assimilation Formulated as a Nonlinear Optimization Problem **543**
Y. Horibata
The Use of Phase-Lag and Amplification Error Derivatives in the Numerical Integration of ODEs with Oscillating Solutions **547**
D. F. Papadopoulos, Z. A. Anastassi, and T. E. Simos
A Zero Dispersion RKN Method for the Numerical Integration of Initial Value Problems with Oscillating Solutions **550**
D. F. Papadopoulos, Z. A. Anastassi, and T. E. Simos
Asynchronous Evaluation as an Efficient and Natural Way to Compute Neural Networks **554**
W. Taouali, F. Alexandre, A. Hutt, and N. P. Rougier
Multinomial Approximations for Identification of Nonlinear Dynamic System'S Parameters **559**
I. A. Boguslavsky
On the Effect of Friend Feedbacks **564**
A. Compta, J. Ferrer, and M. Peña
Applications of Hecke Operator to Generalized Dedekind Eta Functions **568**
M. Açikgöz, I. N. Cangul, D. Kim, and Y. Simsek

VOLUME 2

SYMPOSIA

Preface of the 4th Symposium on Numerical Analysis of Fuid Flow and Heat Transfer **575**
P. Kosinski
Unstructured Adaptive Mesh Refinement and Coarsening for Fluid Flow at All Speeds Using a Coupled Solver **577**
M. Darwish, J. Rached, and F. Moukalled
Comparison between the NWF and DC Methods for Implementing HR Schemes within a Fully Coupled Finite Volume Solver **581**
F. Moukalled, A. Abdel Aziz, and M. Darwish
Modelling and Simulation of Explosion Suppression by a Cloud of Particles **585**
P. Kosinski
Equation of State for Cavitating Flows with Thermodynamic Effects **589**
E. Goncalvès and R. F. Patella
Simulation of Microchannel Flows Using a Semiclassical Lattice Boltzmann Method **593**
J.-Y. Yang, L.-H. Hung, and S.-H. Hu
Optimization of the Iteration Parameters of the Simulation of Incompressible Flow by a Genetic Algorithm **597**
A. Arbel and A. Shklyar
Numerical Approximation for a One-dimensional Two-phase Mixture Conservation Laws **601**
D. Zeidan

Identification of Heat Transfer Dynamics for Nonmodal Stability Analysis of Thermoacoustic Systems . . 605
F. Selimefendigil, R. I. Sujith, and W. Polifke
Influence of Moving Bottom Outlet Gate on Downpull Force by FLOW3D 609
A. Khosrojerdi and B. Ghasemi-Panah
Influence of Inflow Conditions on Saltation Movement of Spherical Particles 613
Z. Chara, I. Ivanova, N. Lukerchenko, and P. Vlasak
Jet-Vortex Interaction: A Numerical Study 617
C. G. Ilea, P. Kosinski, and A. C. Hoffmann
Mathematical Modelling of Two-phase Transonic Compressible CO_2 Flow through Heat Pump Ejector 621
J. Smolka, Z. Bulinski, A. Fic, K. Banasiak, and A. J. Nowak
Advantages of Using a Block Unstructured Grid in a Casting Scenario 625
E. Monteiro, R. De Almeida, L. Gonsalves, and A. Rouboa
Study of Mixing in Microvortices Generated in Diamond-shaped Microchamber 629
V. K. Sin and I. K. Wong
On a Numerical Flux for the Shallow Water Equations 633
J. Felcman and O. Havle
Natural Elements Method for Free Surface Flow 637
M. Darbani, A. Ouahsine, and P. Villon
Large Eddy Simulation of the Vortex End in Reverse-flow Centrifugal Separators 641
G. I. Pisarev, A. C. Hoffmann, W. Peng, and H. A. Dijkstra
Numerical Simulations of Blood Flow in a Stenosed Vessel under Different Flow Rates Using a Generalized Oldroyd-B Model 645
T. Bodnár, A. Sequeira, and L. Pirk
Numerical Solution of Laminar Incompressible Generalized Newtonian Fluids Flow 649
R. Keslerová and K. Kozel
Spectral-POD Model for Large-scale Structures in a Fully Developed Turbulent Channel Flow 653
E. Eljack
Modeling Migration of Chemical Impurities in Non-homogeneous Multilayer Systems 657
V. Tosa, K. Kovács, P. Mercea, and O. Piringer
Numerical Solution of Fluid-Structure Interaction Problems by Finite Element Method 661
P. Sváček
FEM for Incompressible Flows and Its Application in Study of Fluid-Structure Interaction and Vorticity 665
P. Moses
Multipoint Correlations in Direct Numerical Simulations 669
B. Stoevesandt, A. Shishkin, R. Stresing, and J. Peinke
Two Phase Flow Modelling for Low Concentration Spherical Particle Motion through a Newtonian Fluid 673
J. M. Wilms, G. J. F. Smit, and G. P. J. Diedericks
LES of Particle-laden Turbulent Channel Flow with Transverse Roughness Elements on One Wall . . . 677
C. D. Dritselis
Effects of Pressure on Spray Evaporation in a Planar Jet 681
M. Nakamura
Unsteady 3D Turbulent Flow Separation around an ROV Body 685
C. Ungureanu and A. Lungu
Numerical Simulation of the Turbulent Flow around a Strut Mounted on a Plate 689
C. Ungureanu and A. Lungu
Numerical Study of the Hull-Propeller-Rudder Interaction 693
A. Lungu and F. Pacuraru
3D Viscous Free-surface Flow around a Combatant Ship Hull 697
F. Pacuraru, A. Lungu, and V. Maria
Properties and Representation of the Mean Values of a Function over a Sphere and Its Associated Ball in R^3 701
A. Toma

Preface of the Second Symposium on Recent Trends in the Numerical Solution of Differential Equations **705**
L. Brugnano
On the Periodic Solutions of Discrete Hamiltonian Systems **707**
L. Aceto and D. Trigiante
A Deferred Correction Approach to the Solution of Singularly Perturbed BVPs by High Order Upwind Methods: Implementation Details **711**
P. Amodio and G. Settanni
Hamiltonian BVMs (HBVMs): A Family of "Drift Free" Methods for Integrating Polynomial Hamiltonian Problems **715**
L. Brugnano, F. Iavernaro, and D. Trigiante
A Time-adaptive Integrator Based on Radau Methods for Advection Diffusion Reaction PDEs **719**
S. Gonzalez-Pinto and S. Perez-Rodriguez
Hamiltonian BVMs (HBVMs): Implementation Details and Applications **723**
L. Brugnano, F. Iavernaro, and T. Susca
Index Determination of DAEs—A Wide Field for Automatic Differentiation **727**
R. Lamour and D. M. Diaz
The Role of the Precise Definition of Stiffness in Designing Codes for the Solution of ODEs **731**
L. Brugnano, F. Mazzia, and D. Trigiante
On the Preservation of Lyapunov Functions by Runge-Kutta Methods **735**
M. Calvo, M. P. Laburta, J. I. Montijano, and L. Rández
Structure of B-series for Some Classes of Geometric Integrators **739**
E. Celledoni, R. I. McLachlan, B. Owren, and G. R. W. Quispel
Optimization of Spatial and Minimum Storage RK Schemes for Computational Acoustics **743**
M. Calvo, J. M. Franco, J. I. Montijano, and L. Rández
Numerical Solution of Obstacle and Parabolic Obstacle Problems Based on Piecewise Linear Systems . . **746**
L. Brugnano and A. Sestini
Multiparameter Exponentially-Fitted Methods Applied to Second-Order Boundary Value Problems . . . **750**
M. Van Daele, D. Hollevoet, and G. Vanden Berghe

Preface of the Symposium on Clifford Structures in Mathematics, Physics, and Engineering **754**
K. Guerlebeck and W. Sproessig
On the Growth Behavior of Hypermonogenic Functions on Upper Half-Space **757**
D. Constales, R. De Almeida, and R. S. Kraußhar
Spherical Wavelets, Kernels and Symmetries **761**
S. Bernstein and S. Ebert
On an Orthonormal Basis of Solid Spherical Monogenics Recursively Generated by Anti-holomorphic $\bar{z}$-Powers **765**
S. Bock and K. Gürlebeck
Ozone and Cavitation Combination **769**
E. Carreon and L. Traversoni
Diffusion Wavelets on Conformally Flat Cylinders and Tori **773**
S. Bernstein, S. Ebert, and R. S. Krausshar
A Spherical Harmonic Expansion of the Hilbert Transform on the Two-Sphere **777**
O. Fleischmann, L. Wietzke, and G. Sommer
Real Clifford Algebra $Cl_{n,0}$, $n=2,3 \pmod 4$ Wavelet Transform **781**
E. Hitzer
Least Null Trajectories in Lorentzian Geometries and Their Application in Physics **785**
J. Keller
A Quaternionic Approach to Treat the Ideally Stationary Magnetohydrodynamic Equations **789**
K. Gürlebeck, R. S. Kraußhar, and S. Poedts
On the Structure of Monogenic Multi-vector Valued Polynomials **793**
R. Lávička
Local Properties of Monogenic Mappings **797**
K. Gürlebeck and J. Morais
Symmetries of PDEs in Clifford Analysis and Their Applications **801**
V. Souček

Exponentials of the Dirac Operator and an Application **805**
W. Sprössig
Dynamics of Coupled and Driven Harmonic Oscillators Using Dual Quaternions **809**
L. Traversoniand R. Reséndiz
A Full Symmetry for Basic Differential Operators in Hermitean Clifford Analysis **813**
Z. Vlasáková
The Solution of the Interference-Problem of 2D Waves by Means of Clifford Structures **817**
L. Wietzke, O. Fleischmann, and G. Sommer

Preface of the Symposium on Mathematical Theory, Experiment, Modeling and Simulation in Nano and Biological Science for Fabrication of Materials **821**
L. Rakesh
Generalized Wavelet Formulation of Hysteresis Models for Smart Material Systems **824**
E.-B. Lin
Molecular Modeling of Interaction between Diabetic Drug and Antioxidant in Controlling Sucrose . . . **827**
L. Rakesh and C. Lee
Modeling and Biomolecular Self-assembly via Molecular Dynamics and Dissipative Particle Dynamics **832**
L. Rakesh
Redundancy in Metabolic Networks **836**
M. M. Domach
Development of "Smart" Particles for Enhanced Intracellular Delivery of Therapeutic Nucleic Acids . . **840**
M. E. H. El-Sayed, Y.-L. Lin, G. H. Jiang, and L. Birrell

Preface of the Symposium on Asymptotic and Numerical Modelling of Composite Materials **842**
I. Andrianov
Generalized Continua for Fiber Reinforced Materials **844**
J. Soubestre and C. Boutin
Shear Waves Dispersion in Viscoelastic Composite with Elastic Parallelpiped Inclusions **848**
I. V. Andrianov, V. V. Danishevs'kyy, H. Topol, and D. Weichert
Boundary Layers in Fibre Composite Materials **852**
I. V. Andrianov, V. V. Danishevs'kyy and D. Weichert

Preface of the Mini-symposium on Ordinary Differential Equations and Dynamical Systems **855**
K. Nipp and D. Stoffer
Σ_2-Chaos in Iterates of the Classical Hénon Mapping **857**
B. Bánhelyi, T. Csendes, and B. M. Garay
Graph Transform and Blow-up in Singular Perturbations **861**
K. Nipp, D. Stoffer, and P. Szmolyan
Travelling Waves in a Nonlinearly Supported Beam: A Computer-assisted Existence and Multiplicity Proof **869**
B. Breuer, J. Horák, P. J. McKenna, and M. Plum
Multiple Positive Solutions in the Second Order Autonomous Nonlinear Boundary Value Problems . . . **873**
S. Atslega and F. Sadyrbaev
Geometric Integration of Weakly Dissipative Systems **877**
K. Modin, C. Führer, and G. Söderlind
Similarities in Circuit and Multibody Systems Modeling **878**
C. Tischendorf

Preface of the Symposium on Structure-preserving Methods for Differential Equations **882**
X.-Y. Wu
Some Efficient Algorithms for Anisotropic Laplace-like Equation Over an Exterior Two-dimensional Domain **884**
D. Qikui, Z. Wei, and C. Qing
A Dissipative Linearly-implicit Scheme for the Ginzburg-Landau Equation **888**
T. Matsuo and E. Torii

An Energy Conservative Numerical Scheme on Mixed Meshes for the Nonlinear Schrödinger Equation **892**
T. Yaguchi, T. Matsuo, and M. Sugihara
On Multidimensional ARKN Methods for Systems of Perturbed Oscillators **896**
X. Wu and X. You
Multi-symplectic Exponentially Fitted RKN Methods for Wave Equations **900**
W. Shi, X. You, and X. Wu
New Runge-Kutta Method for Stiff Oscillatory Problems with Two Frequencies **904**
Y. Fang, and Q. Ming
Applications of the Multisymplectic Euler-box Scheme **908**
Y. Wang and B. Wang
Piecewise Integration of Differential Variational Inequality **912**
Z. Wang and X. Wu

Preface of the Symposium on Validated Computations and Computer-assisted Proofs **916**
M. Plum and K. Nagatou
A Database Schema for the Analysis of Global Dynamics **918**
Z. Arai, W. Kalies, H. Kokubu, K. Mischaikow, H. Oka, and P. Pilarczyk
Spectral Problem on 3-D Photonic Crystals **922**
K. Nagatou, M. Brown, M. Kim, Y. Watanabe, and I. Wood
On Verified Computations of the Optimal Constant in the a priori Error Estimates for H^2_0 Projection . . **926**
M. T. Nakao and T. Kinoshita
A Computer-assisted Band-gap Proof for 3D Photonic Crystals **930**
H. Behnke, M. Brown, V. Hoang, and M. Plum
Computer-asstisted Existence and Uniqueness Proofs for Semilinear Elliptic Boundary Value Problems **932**
D. Roth
On the Chaotic Behaviour of the Hénon Map **936**
F. Antognini and D. Stoffer

Preface of the Symposium on Optimal Control, Functional Analysis, and Economic Theory **939**
N. Sagara
Some Extensions of Discrete Fixed Point Theorems and Their Applications to the Game Theory **941**
H. Kawasaki
Incentive Contracting for Venture Capital Fund Managers **945**
D. P. J. Leisen
Range Adjusted Measure Network DEA Model **949**
Y. Maruyama
A Note on Local Stability Conditions for Two Types of Monetary Models with Recursive Utility **953**
K. Miyazaki and H. Utsunomiya
Representation of Preference Orderings with an Infinite Horizon: Time-Additive Separable Utility in Continuous Time **957**
N. Sagara
Investment under Uncertainty with Manager-Shareholder Conflict **961**
T. Shibata and M. Nishihara
History-dependent Random Discounting **965**
Y. Higashi, K. Hyogo, and N. Takeoka

Preface of the Symposium on Industrial Organization and Game Theory **969**
F. A. Ferreira and F. Ferreira
Privatization and Entry of a Foreign Firm with Demand Uncertainty **971**
F. A. Ferreira
Quantity-setting Competition with Differentiated Goods under Uncertain Demand **975**
F. A. Ferreira and F. Ferreira
Universal Fluctuations of the S&100 Stock Index Returns **979**
R. Gonçalves and A. Pinto
On a Game of Large-scale Projects Competition **982**
O. I. Nikonov and M. A. Medvedeva

Signalling in an International Cournot Model **987**
F. A. Ferreira, H. A. Moreira, and A. A. Pinto
Industrial Production Forecasting with Kalman Filtering **991**
M. F. Teodoro
Euclidean Jordan Algebras and Inequalities on the Parameters of a Strongly Regular Graph **995**
L. A. de Almeida Vieira
The Proportional Set **999**
C. Vilella

Preface of the Symposium on DAEs and Their Applications **1004**
L. O. Jay
An Elastic Rod Model and Its Hamiltonian Structure **1005**
E. Celledoni and N. Säfström
Defect-based *a posteriori* Error Estimation for Index 1 DAEs with a Singularity of the First Kind . . . **1009**
W. Auzinger, H. Lehner, and E. Weinmüller
Variational Discretizations: Discrete Tangent Bundles, Local Error Analysis, and Arbitrary Order Variational Integrators **1013**
G. W. Patrick
On Modified Newton Iterations for SPARK Methods Applied to Constrained Systems in Mechanics . . **1017**
L. O. Jay
Convergence Analysis of a Coupled Circuit- and Device-Simulation **1021**
M. Matthes and C. Tischendorf
DAE-based Modeling of Electrical Circuits: Classical Methods Revisited and Recent Results **1025**
R. Riaza
Regularity Regions of Differential Algebraic Equations **1029**
R. März

Preface of the Symposium on Numerical Aspects of Mathematical Modelling **1033**
V. Berinde
Overdetermined Infinite Linear Systems **1035**
B. Finta
Quasistatic Frictioal Contact in Solid Mechanics **1038**
N. Pop
Mathematical Modeling of Organic Compounds and of Their Physical Properties **1042**
Z. M. Berinde

Preface of the Symposium on Modeling, Simulation and Industrial Mathematics **1046**
M. Bracke and T. Götz
Proposed Solutions to Industrial Mathematics Problems **1048**
M. K. Banda
Optimal Control of Non-isothermal Polymer Crystallization Processes in a Deterministic Model **1051**
L. A. Fernández and R. Escobedo
Motion Planning of Solid-Liquid Interfaces in Crystal Growth Processes **1055**
M. Hinze and S. Ziegenbalg
A Second Order Semi-discrete Cosserat Rod Model Suitable for Dynamic Simulations in Real Time . . **1057**
H. Lang and J. Linn
Space Mapping and Optimal Control of Radiative Transfer **1061**
R. Pinnau and G. Thömmes

Preface of the Symposium on The Big Challenge of Gravitational Waves, A New Window into the Universe **1064**
C. Corda
An Exploration of CUDA and CBEA for Gravitational Wave Data-Analysis **1065**
J. Breitbart and G. Khanna
Gravitons, Dark Matter, and Classical Gravitation **1068**
M. S. Berman
Gravitomagnetic Effect in Gravitational Waves **1072**
L. Iorio and C. Corda

Entropy Growth in the Early Universe and Confirmation of Initial Big Bang Conditions **1077**
A. Beckwith
Charge Separation within Superconductors in the Presence of Tidal Gravitational Fields **1084**
S. J. Minter, K. Wegter-McNelly, and R. Y. Chiao
Massive Waves in an "Elastic" Space-Time **1087**
N. Radicella and A. Tartaglia
Will Gravitational Waves Confirm Einstein's General Relativity? **1090**
C. Corda
Bursts of Gravitational Waves Emitted during Ejection of Jet Superluminal Components in Active Galactic Nuclei Dynamically Dominated by Bardeen-Petterson Effect **1094**
H. J. Mosquera Cuesta, A. Caproni, and Z. Abraham
Gravitational Waves Generated by Solar Oscillations **1101**
A. G. Polnarev, D. Baskaran, and I. W. Roxburgh

Preface of the Symposium on Numerical Methods for Stiff Problems **1105**
G. Russo
IMEX Runge-Kutta Schemes and Hyperbolic Systems of Conservation Laws with Stiff Diffusive Relaxation **1106**
S. Boscarino, L. Pareschi, and G. Russo
Enhancing the Capture of Two-dimensional, Shock-induced Detonation Fronts Using Harten's Artificial Compression Method on Underresolved Cartesian Grids **1112**
O. Rouch

Preface of the Symposium on Genetic Algorithms and Evolutionary Computation **1116**
W. Kosiński and S. Kotowski
Asymptotic and Pointwise Stability of Evolutionary Algorithms **1117**
W. Kosiński and S. Kotowski

Preface of the Symposium on Modelling Complex Materials: Materials Behavior below the Scale of the Representative Volume Element **1121**
M. Zaiser and T. Hochrainer
Interface-dislocation Interaction on Submicron Scales **1123**
K. E. Aifantis and M. Zaiser
The Connection between Size Effects and Strain Bursts in Microscale Plasticity **1127**
V. Beato, M. Zaiser, and S. Zapperi
Stochastic Modeling of Dislocation Dynamics and Mesoscale Deformation of Metals **1128**
A. el-Azab
Crack Nucleation in Thin Films on Disordered Substrates **1129**
J. Heierli and M. Zaiser
Dislocation Transport and Line Length Increase in Averaged Descriptions of Dislocations **1133**
T. Hochrainer, M. Zaiser, and P. Gumbsch
Interfacial Shear Cracks in Thin Films on Disordered Substrates **1137**
A. Konstantinidis, M. Zaiser, and E. C. Aifantis
Heterogeneous Dynamics and Internal Stress Distributions Near Dislocation Jamming **1138**
L. Laurson, I. Corominas, M. Alava, and M. C. Miguel
Plastic Deformation in Microscopic Colloidal Crystals **1139**
P. Moretti, B. Cerruti, and M.-C. Miguel
Stochasticity in Material Elastostatics and Deformation **1143**
A. H. W. Ngan
Continuum Dislocation Dynamics (CDD) Modeling of Thin Film Microplasticity **1144**
N. Nikitas and M. Zaiser
Expansion of Quasi-discrete Dislocation Loops in the Context of a 3D Continuum Theory of Curved Dislocations **1148**
S. Sandfeld, M. Zaiser, and T. Hochrainer
Continuum Modeling of Dislocation Systems **1152**
C. Schwarz, R. Sedláček, and E. Werner

Preface of the Mini-symposium on High Order Finite Difference Schemes for Partial Differential Equations **1156**
M. M. Gupta
Splitting Wavelet Method for Solving 2D Conservation Laws **1158**
A. de Jesus Kozakevicius and A. A. Schmi
An Approach to Improve the Convergence Order in Finite Volume and Finite Element Methods **1162**
A. Bradji
Simulation of the Laminar Flow Past a Square Cylinder by the ψ-ν Formulation **1166**
J. C. Kalita and M. M. Gupta
Analysis of a Semi-circulant Preconditioner for a High-order Compact Approximation of a Convection-diffusion Model Problem **1170**
R. Boojhawon, Y. D. Tangman, M. Bhuruth, and M. S. Sunhaloo
An Exponential Compact Higher Order Scheme **1174**
Y. V. S. S. Sanyasiraju and N. Mishra

Preface of the Symposium on Numerical Methods for Time-dependent PDEs **1178**
P. Birken and A. Meister
Efficient Nonlinear Solver to Compute Unsteady Flows Solved with Higher Order Implicit Time Integration Schemes **1180**
H. Bijl and P. Lucas
On Higher Order Time Integration for Thermal Coupling **1184**
P. Birken, S. Hartmann, A. Meister, and K. Quint
An Explicit High Order Accurate Predictor-Corrector Time Integration Method with Consistent Local Time-Stepping for Discontinuous Galerkin Schemes **1188**
G. Gassner and M. Haas
A Spectral Time-Domain Method for Computational Electrodynamics **1192**
J. V. Lambers
Perturbation Results for Exponential Rosenbrock-Type Methods **1196**
J. Schweitzer
Semi-Implicit Solution of the Convection-Diffusion Problems with Applications in Fluid Dynamics . . **1200**
V. Dolejší, M. Holík, J. Hozman, and M. Vlasák

Preface of the Symposium on Properties Preserving Numerical Schemes for Differential Equations . . **1204**
J. M.-S. Lubuma
Reliable Simulations for Applied Dynamical Models **1205**
R. Anguelov and E. Popova
Comparison of Some Standard and Nonstandard Numerical Methods for the MSEIR Epidemiological Model **1209**
R. Anguelov, Y. Dumont, J. Lubuma, and M. Shillor
Dynamically Consistent Non-Standard Finite Difference Schemes for the MSEIR Epidemiological Model **1213**
R. Anguelov, Y. Dumont, J. M.-S. Lubuma, and M. Shillor

Preface of the Symposium on Nonlinear Waves and Singularities in Optics, Hydrodynamics, and Plasmas **1217**
I. R. Gabitov and P. M. Lushnikov
Nonlocal Reformulations of Water and Internal Waves and Asymptotic Reductions **1219**
M. J. Ablowitz
Fast Electromagnetic Response of a Thin Film of Resonant Atoms with Permanent Dipole **1222**
J.-G. Caputo, E. Kazantseva, and A. Maimistov
Near Field Amplification in Metamaterials **1224**
I. Gabitov, B. Kennedy, A. Maimistov, and V. Roytburd
Regularity and Decay of Dispersion Management Solitons **1225**
M. B. Erdoğan, D. Hundertmark, and Y.-R. Lee
On Dissipation Function of Ocean Waves Due to Whitecapping **1229**
V. E. Zakharov, A. O. Korotkevich, and A. O. Prokofiev

Q-Factor Improvement of Phase Noise Degraded DPSK Signals Using Asymmetric Saturated Regeneration **1232**
H. Chaouch, E. Parsons, T. von Lerber, M. Mattila, A. Tervonen, W. Weiershausen, and F. Kueppers
Inhomogeneous and Guided-wave Metamaterials: Linear and Nonlinear Optics **1233**
N. M. Litchinitser, T. Gibson, I. R. Gabitov, A. I. Maimistov, and V. M. Shalaev
Collapse Turbulence in Nonlinear Schrödinger Equation **1235**
Y.-J. Chung, P. M. Lushnikov, and N. Vladimirova
Femtosecond Bullets for Laser Inscription of Photonic Structures **1239**
V. Mezentsev and H. Schmitz
Optical Feedback to Enhance Supercontinuum Generation **1240**
F. Mitschke, C. Mahnke, and F. Bremerkamp
Global Behavior of Solutions to the Focusing 3d Cubic Nonlinear Schrödinger Equation **1244**
J. Holmer and S. Roudenko
Near-Linear Dynamics in KdV with Periodic Boundary Conditions **1248**
M. B. Erdoğan, N. Tzirakis, and V. Zharnitsky

Preface of the Mini-symposium on Digraphs **1250**
V. Petrović
Schwenk-like Formulas for Weighted Digraphs **1251**
F. Belardo, E. M. Li Marzi, and S. K. Simić
Kings in Multipartite Tournaments and Hypertournaments **1255**
D. Brcanov and V. Petrovic

Preface of the Symposium on Modeling of Materials and Simulation of Flows in Polymer and Food Process Engineering **1258**
M. Dressler
A Stochastic Semi-Lagrangian Micro-Macro Model for Liquid Crystalline Solutions **1259**
R. Bermejo, J. L. Prieto, P. Ilg, and M. Laso
Re-entrant Corner Singularity of the Giesekus Fluid **1263**
J. D. Evans

Preface of the Symposium on the Homogenization, Fluid Dynamics, and Porous Media **1267**
M. Lazar and A. Mikelić
Roughness-induced Effect at Main Order on the Reynolds Approximation **1269**
C. Choquet, L. Chupin, and M. Gisclon
Fully Discrete Scheme for the Equations Describing Unsaturated Flow in Porous Media with Dynamic Capillary Pressure **1273**
J. Bodin and T. Clopeau
A Hyperbolic Model for Taylor's Dispersion **1277**
A. Mikelić

Preface of the Symposium on PDEs: Solutions and Asymptotics **1279**
P. A. Krutitskii
The Dirichlet Problem for the Propagative Helmholtz Equation in a Cracked Domain without Compatibility Conditions at the Tips of the Cracks **1280**
P. A. Krutitskii
Nonlinear Internal Wave Equations: Spectral Properties and Long-Wave Asymptotics **1284**
N. Makarenko and Z. Maltseva
Smoothing and Quadratic Spline Collocation Method for Weakly Singular Integral Equations **1288**
R. Pallav and A. Pedas
Asymptotics for Kinetic Energy of Ideal Fluid with Two Moving Spheres of Variable Radii Near Their Contact **1292**
A. Petrov and O. Voinov
Cordial Volterra Integral Operators and Equations **1296**
G. Vainikko
Analysis of Degenerate Solutions to ODEs with Variational Equations of Higher Order **1300**
V. Varin

Preface of the Symposium on Mathematical Methods in Biophysics and Genomics **1304**
J. C. Mitchell and S. Boatto
A Method for Assessing Kinetic Changes of Histone H1 after Post-translational Modifications **1306**
G. Carrero, N. Raghuram, J. Th'ng, and M. Hendzel

Preface of the Symposium on Optimal Control of Partial Differential Equations **1310**
E. Casas
Error Estimates in the Approximation of Boundary Control Problems on Curved Domains **1312**
E. Casas and J. Sokolowski
Necessary Conditions for Optimal Controls of Semilinear Parabolic Equations with Control in the Leading Term **1316**
H. Lou
Numerical Approximation of Elliptic Control Problems with Finitely Many Pointwise Constraints . . . **1318**
E. Casas and M. Mateos
On Some New Adjoining Approaches for State-constrained Elliptic Optimal Control Problems **1322**
S. Bechmann, M. Frey, H. J. Pesch, and A. Rund

Preface of the Symposium on Taylor Model Methods and Applications **1324**
M. Neher
Application of Constraint Solving and ODE-Enclosure Methods to the Analysis of Hybrid Systems . . **1326**
A. Eggers, M. Fränzle, and C. Herde
Preface of the Mini-symposium: Workshop on Maple **1331**
M. Siddique
Construction of Orthonormal Wavelets Using Symbolic Algebraic Methods **1333**
D. Černá and V. Finěk

Preface of the Symposium on Numerical Methods for Computation of Fluid Flows **1337**
M. K. Banda
Reduced Models for Gyrokinetic Turbulence **1339**
N. Besse, P. Bertrand, P. Morel, and E. Gravier
Peaceman-Rachford ADI Scheme for the Two-dimensional Flow of a Second-Grade Fluid **1343**
E. Momoniat and C. Harley
Multi-Level Acceleration for Sub-Iterations in Partitioned Fluid-Structure Interaction **1347**
A. H. van Zuijlen and H. Bijl
Stabilized Finite Element Method for Compressible-Incompressible Interface Flows **1351**
M. Billaud, G. Gallice, and B. Nkonga
Preface of the Symposium on Numerical Optimization **1353**
A. I. Pereira and M. F. P. Costa
Constrained Multi-global Optimization Using a Penalty Stretched Simulated Annealing Framework . . **1354**
A. I. Pereira and E. M. G. P. Fernandes
On Using Quadratic Interpolation of the Determinant Function to Estimate the Step-Length in a Predictor-Corrector Variant for Semidefinite Programming **1358**
A. Teixeira and F. Bastos
Motion of Red Blood Cells in a Glass Microchannel: A Global Optimization Approach **1362**
D. Pinho, A. I. Pereira, and R. Lima
Recognition of Graphs with Convex Quadratic Stability Number **1366**
M. F. Pacheco and D. M. Cardoso
Comparison of Filter Line Search Algorithms in the Primal-Dual Barrier Approach for Nonlinear Programming **1370**
M. F. P. Costa and E. M. G. P. Fernandes
Overview on Mixed Integer Nonlinear Programming Problems **1374**
F. P. Fernandes, M. F. P. Costa, and E. M. G. P. Fernandes
A Genetic Algorithm Approach for the TV Self-promotion Assignment Problem **1378**
P. A. Pereira, F. A. C. C. Fontes, and D. B. M. M. Fontes
Necessary Conditions of Optimality for Calculus of Variations Problems with Inequality Constraints . . **1382**
S. O. Lopes and F. A. C. C. Fontes
Optimization of Dengue Epidemics: A Test Case with Different Discretization Schemes **1385**
H. S. Rodrigues, M. T. T. Monteiro, and D. F. M. Torres

Preface of the Symposium on Complementarity Problems **1389**
F. A. Potra
Dynamics of Equilibrium Problems: A Hybrid Systems Approach **1391**
M. G. Cojocaru and S. Greenhalgh
Some Convergence Results in Rigid-Body Dynamics **1396**
B. Gavrea
An Algorithm for Linear Complementarity and Its Application in American Options Pricing **1400**
L. Feng, V. Linetsky, J. L. Morales, and J. Nocedal
An Infeasible Interior Point Method for Linear Complementarity Problems Over Symmetric Cones .. **1403**
F. A. Potra
New Existence Conditions for Order Complementarity Problems **1407**
S. Z. Németh
Multirate Time Discretizations for Hyperbolic Partial Differential Equations **1411**
A. Sandu and E. M. Constantinescu
Some New Results for Linear Transformations on Euclidean Jordan Algebras **1415**
J. Tao
Preface of the Mini-symposium on Shallow Water Flows: Numerical Methods and Applications **1420**
J. Balbás
A Central Scheme for Two-layer Shallow Water Flows with Area Variation **1421**
J. Balbás and S. Karni
A Well-balanced Node-Centered Finite Volume Scheme for Shallow Water Flows with Wetting and Drying **1425**
A. I. Delis and I. K. Nikolos
Realistic Applications of a Tidal 2d Two-Layer Shallow Water Model to the Strait of Gibraltar **1429**
M. J. Castro, J. M. González-Vida, J. Macías, and C. Parés
A Scheme for ShallowWater Flow with Area Variation **1433**
S. Karni and G. Hernández-Dueñas
River Sediment Transport and Deposition Modeling **1437**
T. Morales de Luna, M. J. Castro Díaz, and C. Parés Madroñal

Preface of the Symposium on Mathematical Modelling of Extremes **1441**
M. J. McGuinness
Exploding Rocks **1442**
M. J. McGuinness, A. C. Fowler, B. Scheu, and W. T. Lee
Magmatic Diapirism in the Continental Crust **1446**
M. Vynnycky and M. O'Brien
Applying the Combined Integral Method to One-dimensional Ablation **1450**
S. L. Mitchell and T. G. Myers
A Model for the Reactive Transport and Self-desiccation in Concrete **1453**
M. Chapwanya and J. M. Stockie
Overheating Steel in an Annealing Furnace **1457**
S. W. Taylor and S. Wang
Blowing Polysilicon Fuses **1461**
W. Lee, O. Power, A. Fowler, S. Healey, and J. Browne
Spin Coating Over a Varying Geometry **1465**
J. P. F. Charpin
A Shunt Model of the Inner Medullary Nephron with Pre-Bend Transitions **1469**
M. T. Gonzalez, A. F. Hegarty, and S. R. Thomas
Preface of the Mini-symposium on Variational Inequalities and Equilibrium Problems: Existence and Duality Theory and Computation **1472**
M. Milasi, A. Barbagallo
Duality for Weighted Traffic Equilibrium Problem and Computational Procedure **1474**
A. Barbagallo, R. Di Vincenzo, and S. Pia
Nonautonomous Projected Dynamical Systems **1479**
M. G. Cojocaru
The Variational Formulation for a Walrasian Economic Equilibrium **1483**
M. Milasi, M. B. Donato, and C. Vitanza

Some Results on Weighted Variational Inequalities and Applications to Traffic Equilibrium Problem .. **1486**
A. Barbagallo, S. Pia, and R. Reyes Calvo
Multiobjective Optimization Problems **1490**
L. Pusillo
Recent Advances in Homogeneous Herz Spaces and PDEs **1492**
M. A. Ragusa
Time-Depending Parametric Variational Approach for an Economic General Equilibrium Problem of Pure Exchange with Application **1496**
F. Scaramuzzino
A Competitive Equilibrium Model for a Pure Exchange Economy with Its Variational Formulation: A Brief Overview **1500**
C. Vitanza, M. B. Donato, and M. Milasi

Preface of the Symposium on Recent Advances and Current Research in the Stochastic Finite Element Method and Its Applications **1504**
S. Kadry
A Novel SFEM Algorithm Using the Probabilistic Transformation Method **1505**
A. AbouJaoude, S. Kadry, K. EL-Tawil
Life Time Estimation under Probabilistic Fatigue of Cracked Plates for Multiple Limits States **1510**
K. EL-Tawil, S. Kadry, and A. AbouJaoude

Preface of the Symposium on Recent Advances on the Parareal in Time Algorithms **1515**
Y. Maday
An Enhanced Parareal Algorithm for Partitioned Parabolic-Hyperbolic Coupling **1517**
F. Chouly and M. A. Fernández
Application of the Parareal Algorithm for Acoustic Wave Propagation **1521**
D. Mercerat, L. Guillot, and J.-P. Vilotte

Preface of the Symposium on Biomathematics **1525**
M. Aguiar and E. Venturino
The Higher Moments Dynamic on SIS Model **1527**
A. Pinto, J. Martins, and N. Stollenwerk
A Virtual Hog Farm **1531**
A. Costamagna, B. Sona, and E. Venturino
Age-structured and Size-structured Population Dynamics Models **1535**
M. O. El-Doma
Switching Feeding among Sound and Infected Prey **1536**
I. S. Hotopp, H. Malchow, and E. Venturino
On Hybrid Models in Stochastic Reaction Kinetics **1540**
T. Jahnke
HIV Stages Contributions to the Epidemic, due to a Changing Viral Load **1544**
J. Combadão and M. G. M. Gomes
Reaction-Superdiffusion Systems in Epidemiology: An Application of Fractional Calculus **1548**
N. Stollenwerk and J. P. Boto
A Mathematical Model of Antiretroviral Therapy Evaluation for HIV Type 1 . . . . . **1552**
S. M. Raimundo, E. Venturino, and H. M. Yang
Multi-strain Deterministic Chaos in Dengue Epidemiology: A Challenge for Computational Mathematics **1555**
M. Aguiar, B. W. Kooi, and N. Stollenwerk
From Dynamical Processes to Likelihood Functions: An Application to Internet Surveillance Data for Influenza-like Illnesses **1559**
N. Stollenwerk
Some Observations about the Nearest-neighbor Model of the Error Threshold **1564**
P. J. Gerrish
Monte Carlo Simulations of a SIS-Diffusion Model in Heterogeneous Metapopulations **1569**
D. Juher, J. Ripoll, and J. Saldaña
Population Model with a Dynamic Food Supply **1573**
R. Dickman and J. da Silva Nascimento

Numerical Approximation of a Nonlinear Boundary Value Problem for a Mixed Type Functional Differential Equation Arising in Nerve Conduction **1577**
M. F. Teodoro, P. M. Lima, N. J. Ford, and P. M. Lumb
Preface of the Symposium on the Numerical Solution of Differential Equations and Their Applications **1581**
Z. A. Anastassi
Solution of the Two-dimensional Time-dependent Schrödinger Equation Applied to Nuclear Proton Decay **1582**
M. Rizea and N. Carjan
Efficient Computation of Sturm-Liouville Eigenvalues Using Modified Neumann Schemes **1586**
V. Ledoux and M. Van Daele
Coupled IVPs to Investigate a Nuclear Reactor Poison Burn Up **1590**
F. Faghihi and M. Saidi-Nezhad
A Phase-fitted Symplectic Partitioned Runge-Kutta Methods for the Numerical Solution of the Schrödinger Equation **1595**
Th. Monovasilis, Z. Kalogiratou, and T. E. Simos
Conditions for Trigonometrically Fitted Runge-Kutta Methods **1600**
Z. Kalogiratou, Th. Monovasilis, and T. E. Simos
A Modified Zero Dispersion and Zero Dissipation RKN Method for the Numerical Solution of the Radial Schrödinger Equation **1604**
D. F. Papadopoulos, Z. A. Anastassi, and T. E. Simos
Linear Multistep Methods for the Efficient Integration of the Schrödinger Equation **1608**
Z. A. Anastassi and T. E. Simos
Interface and Surface Effects in the Plastic Response of Crystalline Materials **1612**
M. Koslowski

Author Index **A1**
