

7TH INTERNATIONAL CONFERENCE ON CONCENTRATING PHOTOVOLTAIC SYSTEMS

CPV-7

Las Vegas, Nevada, USA 4 – 6 April 2011

All papers have been peer reviewed.

SPONSORING ORGANIZATIONS

Gold

Amonix, Inc.
AZUR SPACE Solar Power GmbH
Boeing Spectrolab Inc.
Soitec
Entech Solar, Inc.
SolFocus, Inc.

Silver

Abengoa Solar
Cosma International
Emcore Corporation, EPV
Evonik Cyro LLC
JDSU

Bronze

Aescusoft GmbH
Concentrator Optics GmbH
Cyrium Technologies, Inc.
Diemat, Inc.
Opel Solar, Inc.

Exhibitor

AXT, Inc.
Boschman Technologies b.v.
Docter Optics, Inc.
EKO Instruments USA Inc.
Eschenbach Optik GmbH
Nihon Tokushu Kogaku Jushi Co., Ltd.
P4Q USA, Inc.

AIP Conference Proceedings, Volume 1407
7th International Conference on Concentrating Photovoltaic Systems

Table of Contents

Preface: 7th International Conference on Concentrating Photovoltaic Systems Frank Dimroth, Sarah Kurtz, Gabriel Sala, and Andreas W. Bett	1
CPV-7 Committee	2
CONCENTRATOR SOLAR CELLS, CELL ASSEMBLIES, AND RELATED MATERIALS	
III-V multijunction solar cells—New lattice-matched products and development of upright metamorphic 3J cells W. Guter, R. Kern, W. Köstler, T. Kubera, R. Löckenhoff, M. Meusel, M. Shirmow, and G. Strobl	5
42% 500X bi-facial growth concentrator cells S. Wojtczuk, P. Chiu, X. Zhang, D. Pulver, C. Harris, and B. Siskavich	9
Extended triple-junction solar cell 3D distributed model: Application to chromatic aberration-related losses I. Garcia, P. Espinet-González, I. Rey-Stolle, E. Barrigón, and C. Algora	13
CPV solar cell metal adhesion: How good is good enough? Ian Aeby, Michael Winter, Amos Gutierrez, James Foresi, Greg Flynn, Pravin Patel, Tansen Vargese, and Ben Cho	17
Energy harvest predictions for a spectrally tuned multiple quantum well device utilising measured and modelled solar spectra Alison Dobbin, Matthew Norton, George E. Georghiou, Matthew Lumb, and Tom N. D. Tibbits	21
Considerations for how to rate CPV Sarah Kurtz, Matthew Muller, Bill Marion, Keith Emery, Robert McConnell, Sandheep Surendran, and Adrienne Kimber	25
Estimating saturation current based on junction temperature and bandgap John R. Wilcox, Alexander W. Haas, Jeffery L. Gray, and Richard J. Schwartz	30
Development and on-sun performance of dish-based HCPV Roger Angel, Tom Connors, Warren Davison, Matt Rademacher, Blake Coughenour, Guillaume Butel, and David Lesser	34
Wafer processing aspects of high efficiency multi-junction solar cells Dhananjay Bhusari, Anna Ly, Jack Serra, Adam Crouch, Scott Diamond, Hoon Lee, Maggy Lau, and Richard King	38
Atmospheric variations and the optimum number of junctions in a multijunction concentrator system Ngai Lam Alvin Chan, Helen E. Brindley, and Nicholas J. Ekins-Daukes	P IC

Silicon based photovoltaic cells for concentration—Research and development progress in laser grooved buried contact cell technology	
A. Cole, I. Baistow, L. Brown, S. Devenport, K. Drew, K. C. Heasman, D. Morrison, T. M. Bruton, L. Serenelli, S. De Iuliis, M. Izzi, M. Tucci, E. Salza, and L. Pirozzi	46
Temperature-dependent quantum efficiency of quantum dot enhanced multi-junction solar cells	
Olivier Thériault, Jeffrey F. Wheeldon, Alex Walker, Paul Bitar, Mark D. Yandt, Christopher E. Valdivia, and Karin Hinzer	50
CONCENTRATING OPTICS AND RELATED MATERIALS	
Effects of temperature on hybrid lens performance	
Steve Askins, Marta Victoria, Rebeca Herrero, César Domínguez, Ignacio Antón, and Gabriel Sala	57
Concentrating optics: From giant astronomical telescopes to low-cost HCPV	
Roger Angel	61
Fresnel lens concentrator with improved thermal behavior	
Thorsten Hornung, Martin Neubauer, Andreas Gombert, and Peter Nitz	66
High performance concentrating photovoltaic module designs employing reflective lens optics	
Sergey V. Vasylyev and Viktor P. Vasylyev	70
Performance modeling of Fresnel-based CPV systems: Effects of deformations under real operation conditions	
A. Cvetkovic, R. Mohedano, O. Gonzalez, P. Zamora, P. Benitez, P. M. Fernandez, A. Ibarreche, M. Hernandez, J. Chaves, and J. C. Miñano	74
Choosing a silicone encapsulant for photovoltaic applications	
Michelle Velderrain	79
Experimental set-up to evaluate the degradation of the optical components of a CPV module	
Jaione Bengoechea, Mikel Ezquer, Iñigo Petrina, and Ana Rosa Lagunas	84
Ultra-high efficiency, high-concentration PV system based on spectral division between GaInP/GaInAs/Ge and BPC silicon cells	
P. Benítez, R. Mohedano, M. Buljan, J. C. Miñano, Y. Sun, W. Falicoff, J. Vilaplana, J. Chaves, G. Biot, and J. López	88
Analytical investigation of diffraction in Fresnel lens concentrators	
Thorsten Hornung and Peter Nitz	93
Estimation of the influence of Fresnel lens temperature on energy generation of a concentrator photovoltaic system	
Thorsten Hornung, Marc Steiner, and Peter Nitz	97
Optical design and manufacturing of Fresnel lenses for the first Korean high concentration solar PV system	
Kwangsun Ryu, Goo-Hwan Shin, Wonho Cha, Seongwon Kang, Youngsik Kim, and Gi-Hwan Kang	101

Simple Köhler homogenizers for image-forming solar concentrators Roland Winston and Weiya Zhang	105
Towards 35% efficient concentrator modules based on LPI Köhler concentrators with external confinement cavities Pablo Zamora, Pablo Benítez, Juan Carlos Miñano, Yang Li, and Marina Buljan	109
LOW CONCENTRATION CPV SYSTEMS	
Advanced predictive model and real-world results for medium concentration CPV Bruce Karney and Marc Finot	115
Low-cost 20X silicon-cell-based linear Fresnel lens concentrator panel Mark O'Neill, A. J. McDanal, Don Spears, Clay Stevenson, and David Gelbaum	120
Performance of low and medium concentrating systems in Pakistan Humayun A. Mughal	125
On-field demonstration results of medium concentration system HSun[®] J. Mendes-Lopes, L. Pina, F. Reis, S. Coelho, J. Wemans, G. Sorasio, and N. Pereira	129
Long term outdoor testing of low concentration solar modules Lewis Fraas, James Avery, Leonid Minkin, H. X. Huang, Tim Hebrink, Rik Hurt, and Robert Boehm	133
Energy yield analysis of tracking and non-tracking holographic planar concentrators Raymond K. Kostuk, Jose Castro, and Deming Zhang	137
Silicon cell technology enabling cost effective CPV system Marc Finot, Aster Mayo, and Bob MacDonald	141
Performance of a low-cost, low-concentration photovoltaic module Kara A. Shell, Scott A. Brown, Mark A. Schuetz, Bob J. Davis, and Roger H. French	146
The effect of shadow lines on a low concentrating photovoltaic system H. J. J. Janssen, P. J. Sonneveld, G. L. A. M. Swinkels, B. A. J. van Tuijl, and H. F. de Zwart	150
InPhoCUS (Inflated photovoltaic ultra-light mirror concentrators): First results of the project and future perspectives Mauro Pravettoni, Maurizio Barbato, Thomas Cooper, Andrea Pedretti, Gianluca Ambrosetti, and Aldo Steinfeld	154
Static linear Fresnel lenses as LCPV system in a greenhouse P. J. Sonneveld, G. L. A. M. Swinkels, B. A. J. van Tuijl, H. J. J. Janssen, and H. F. de Zwart	158
Performance of organic luminescent solar concentrator photovoltaic systems Chunhua Wang, Roland Winston, Weiya Zhang, Lun Jiang, Dave Pelka, and Sue Carter	163

CHARACTERIZATION OF CELLS, MODULES, AND SYSTEM COMPONENTS

Equipment for static characterization of angular transmission and misalignments of CPV R. Herrero, S. Askins, C. Domínguez, I. Antón, and G. Sala	171
Outdoor test setup for concentrating photovoltaic and thermal (CPVT) systems Henning Helmers, Alexander Boos, Felix Jetter, Anna Heimsath, Maike Wiesenfarth, and Andreas W. Bett	175
Quantifying the solar simulator requirements for indoor testing of CPV modules Steve Askins, César Domínguez, Ignacio Antón, and Gabriel Sala	180
High performance concentrated photovoltaic module development using temperature sensors Osvaldo Arenas, Louis-Michel Collin, Simon Chow, Francine Proulx, Karin Hinzer, Vincent Aimez, Luc G. Fréchette, and Richard Arès	184
Thermal test platform for solar cell modules in concentrated photovoltaics Louis-Michel Collin, Osvaldo Arenas, Luc G. Fréchette, and Richard Arès	188
Assessment and comparison of concentrator cell carrier efficiencies under very high fluxes Alain Dollet, Osvaldo Arenas, Arnaud Perona, Alexis Vossier, Richard Ares, Vincent Aimez, Jérôme Barrau, Daniel Chemisana, and Joan I. Rosell	192
Sun-shape and -irradiance profile measurements at ESTI Attilio Gambardella, Roberto Galleano, and Thomas Huld	196
Calibration of collimated flash tester for high-concentration photovoltaic panels Evan Green, Steve Horne, Sean Taylor, Jon O'Bryan, and Xin Luo	200
Verification of simulator concentration level and CPV cell linearity R. P. Kenny, T. Aitasalo, and R. Galleano	204
Thermal modeling of a PV receiver for CPV applications F. Reis, D. Pera, L. Pina, J. M. Lopes, S. Coelho, J. Wemans, G. Sorasio, and M. C. Brito	208
Solar simulator for characterization of the large-area HCPV modules V. D. Rummyantsev, V. R. Larionov, D. A. Malevskiy, P. V. Pokrovskiy, and N. A. Sadchikov	212
Temperature characteristics analysis of triple-junction solar cell under concentrated conditions using spice diode model Yuya Sakurada, Yasuyuki Ota, and Kensuke Nishioka	216
Efficiency measurements and simulations of GaInP/InGaAs/Ge quantum dot enhanced solar cells at up to 1000-suns under flash and continuous concentration Jeffrey F. Wheeldon, Alex Walker, Christopher E. Valdivia, Simon Chow, Olivier Theriault, Richard Beal, M. Yandt, Denis Masson, Bruno Riel, David McMeekin, Norbert Puetz, Steven G. Wallace, Vincent Aimez, Richard Arès, Trevor J. Hall, Simon Fafard, and Karin Hinzer	220

A new on-sun test facility at the ‘SUNRISE’ quantum-dot-enhanced CPV module demonstration system	
M. D. Yandt, J. F. Wheeldon, C. E. Valdivia, S. Chow, O. Thériault, A. Johnson, F. Szadkowski, M. Armstrong, L. Motte, T. Cassidy, I. Sivillà, J. Berrios, B. Rosier, S. G. Wallace, S. Fafard, M. Swinton, F. Shepherd, J. Cook, and K. Hinzer	224
HIGH CONCENTRATION CPV MODULES, COMBINED HEAT, AND POWER SYSTEMS	
Ultra-high-concentration photovoltaic-thermal systems based on microfluidic chip-coolers	
M. Müller, W. Escher, R. Ghannam, J. Goicochea, B. Michel, C. L. Ong, and S. Paredes	231
Concentrix Solar’s progress in developing highly efficient modules	
Sascha van Riesen, Andreas Gombert, Eckart Gerster, Tobias Gerstmaier, Joachim Jaus, Fabian Eltermann, and Andreas W. Bett	235
Multi-kilowatt CPV installation employing low-cost, highly concentrating wave-guiding optics	
R. M. Beal, M. Wilkins, J. F. F. Wheeldon, J. E. Haysom, C. E. Valdivia, M. Yandt, P. Dufour, S. Myrskog, J. Fan, H. Navarro, J. P. Morgan, T. J. Hall, and K. Hinzer	239
Photovoltaic cavity converter as a means of enhancing the performance of state-of-the-art multijunction and multibandgap concentrator systems	
Ugur Ortabasi, John P. Waszczak, and Steven L. Allen	243
Efficient, low cost dish concentrator for a CPV based cogeneration system	
Haim Chayet, Ori Kost, Rani Moran, and Ilan Lozovsky	249
FluidReflex concentrator: From elementary unit to module	
M. Victoria, S. Askins, C. Domínguez, I. Antón, and G. Sala	253
Linear Fresnel reflector based solar radiation concentrator for combined heating and power	
Aveek Chatterjee, Eva Bernal, Satya Seshadri, Oliver Mayer, and Mikal Greaves	257
Evaluation of electrical and thermal performance of a linear hybrid CPV-T micro-concentrator system	
Vernie Everett, Judy Harvey, Sachin Surve, Elizabeth Thomsen, Daniel Walter, Marta Vivar, Andrew Blakers, Andrew Tanner, Mikal Greaves, and Peter Le Leivre	262
Latest ATIR module performance and a vision of things to come	
Chris Grimmer, Shondip Ghosh, David Schultz, Hunter Mack, and Ken Rakestraw	266
Progress in Fresnel-Köhler concentrators	
Rubén Mohedano, Aleksandra Cvetković, Pablo Benítez, Julio Chaves, Juan C. Miñano, Pablo Zamora, Maikel Hernandez, and Juan Vilaplana	270
The value of CPV module efficiency	
Xiaoting Wang and Allen Barnett	274

TRACKING AND RELATED COMPONENTS

Tracking error analysis of concentrator photovoltaic module using total 3-dimensional simulator Yasuyuki Ota and Kensuke Nishioka	281
Exploring one-axis tracking configurations for CPV application G. Gaspar, F. Reis, L. Pina, G. Sorasio, J. Wemans, and M. C. Brito	285
Unbounded binary search for a fast and accurate maximum power point tracking Yong Sin Kim and Roland Winston	289
Collective optimization of sun-tracking trajectories Carlos Costa, Luis Pina, and Miguel Ayala Botto	293

RELIABILITY OF CPV SYSTEMS, COMPONENTS, AND ACCELERATED TESTING PROCEDURES

CPV cell infant mortality study Nick Bosco, Cassi Sweet, Timothy J. Silverman, and Sarah Kurtz	299
Are electro-luminescence defects in concentrator III-V cells responsible to thermal runaway and sudden death? Kenji Araki, Omar Al Taher, Hirokazu Nagai, Peter Hebert, and Juan Valles	303
Methods to prove 20+ year life of CPV products (in less than 20 years) John Bowman and Mark Spencer	307
Analysis of soiling rates at the Victor Valley Community College CPV site John Bowman, Steffen Jensen, and Mark McDonald	312
Evaluation of performance and reliability for components of a linear hybrid micro-concentrator system V. Everett, M. Greaves, J. Harvey, P. L. Lievre, S. Surve, A. Tanner, E. Thomsen, M. Vivar, and D. Walter	317

FIELD PERFORMANCE, UTILITY SCALE INSTALLATIONS, GRID INTEGRATION AND ENERGY PREDICTION, CODES AND STANDARDS

Two years operating CPV plants: Analysis and results at ISFOC F. Rubio, M. Martínez, D. Sánchez, R. Aranda, and P. Banda	323
Field experience of Concentrix Solar's CPV systems in different climatic conditions A. Gombert, I. Heile, M. Gomez, T. Gerstmaier, M. Röttger, and J. Wüllner	327
Determining outdoor CPV cell temperature Matthew Muller, Chris Deline, Bill Marion, Sarah Kurtz, and Nick Bosco	331
Minimizing variation in outdoor CPV power ratings Matthew Muller, Bill Marion, Jose Rodriguez, and Sarah Kurtz	336

Output comparison of CPV and flat-plate systems in Japanese meteorological condition Naoki Shibata, Yasuyuki Ota, Yuya Sakurada, Yasuhiro Takahashi, Isao Kumagai, Kenji Araki, and Kensuke Nishioka	341
Performance of Emcore third generation CPV modules in the low latitude marine environment of Hawaii Richard Hoffman, Damien Buie, David King, and Thomas Glesne	345
First CPV installation in Morocco: Made by Isofoton Miguel A. Vázquez, Vicente Diaz, Javier Cabrera, Khalid Loudiyi, Tarik Mrabti, and Abdelhaquim El Moussaoui	349
On-sun performance of a novel microcell based HCPV system located in the southwest US Kanchan Ghosal, John Gabriel, Doug Lilly, Bruce Furman, Etienne Menard, Matthew Meitl, Salvatore Bonafede, David Kneeburg, Baron Kendrick, Rudolf Bukovnik, Wolfgang Wagner, Steven Seel, Scott Burroughs, Peter Krause, and Michael Fiedler	354
CPV energy production analysis Francisco J. Gómez-Gil, Xiaoting Wang, and Allen Barnett	358
Short term electricity storage for CPV power plants C. Desrumaux, A. Auberton, A. Gombert, I. Heile, and M. Röttger	362
Validation of the PVSyst performance model for the Concentrix CPV technology Tobias Gerstmaier, María Gomez, Andreas Gombert, André Mermoud, and Thibault Lejeune	366
Optimal spacing of dual-axis trackers for concentrating photovoltaic systems Yong Sin Kim and Roland Winston	370
Comparative performance assessment for central receiver CPV systems John B. Lasich, Ian Thomas, Pierre J. Verlinden, Allan Lewandowski, Wolfgang Heartag, and Mark Wright	374
Advances in mismatch identification and power loss evaluation of concentrating photovoltaic multijunction module A. Minuto, G. Timò, and P. Groppelli	378
Solar spectrum prediction and comparison with measurements Matthew Norton, Alison Dobbin, and George E. Georghiou	382
DoubleSun[®] performance across mainland Portugal F. Reis, J. Silva, R. Leandro, D. Botelho, J. Wemans, G. Sorasio, and M. C. Brito	386
A review on suitable standards for hybrid photovoltaic/thermal systems Marta Vivar, Matthew Clarke, Tom Ratcliff, and Vernie Everett	390

CPV MANUFACTURING ASPECTS

Control of critical CPV panel assembly parameters through manufacturing automation Evan Green, Sanjay Sheth, Bruce Payette, and Xin Luo	399
Increasing the energy yield of CPV modules through optimized solar cell interconnection Marc Steiner, Josko Medvidovic, Gerald Siefer, and Andreas W. Bett	404
Author Index	409
