FIRST STARS IV - From Hayashi to the Future-

Table of Contents

Preface: FIRST STARS IV - From Hayashi to the Future - Masayuki Umemura and Kazu Omukai	1
Conference Photograph	3

SPECIAL SESSION

Hayashi Memorial Talks

Biography of Professor Hayashi Humitaka Sato	7
Prof. Hayashi's work on the pre-main sequence evolution and brown dwarfs Takenori Nakano	15

SESSION I

Development of Star Formation Theory from the Hayashi Era

1961–2011: Fifty years of Hayashi tracks Francesco Palla	22
Present-day star formation: Protostellar outflows and clustered star formation Fumitaka Nakamura and Zhi-Yun Li	30
Hayashi and the thermal physics of star-forming clouds Richard B. Larson	38

SESSION II

Formation of Pop III Stars

Physics of primordial star formation Naoki Yoshida	43
Formation and evolution of primordial protostellar systems Thomas H. Greif, Volker Bromm, Paul C. Clark, Simon C. O. Glover, Rowan J. Smith, Ralf S. Klessen, Naoki Yoshida, and Volker Springel	51
The fragmentation of primordial gas Paul C. Clark	57
The ejection of low mass clumps during star formation Shantanu Basu, Eduard I. Vorobyov, and Alexander L. DeSouza	63
Radiative feedback from proto-first-stars Hajime Susa	67
First stars and WIMP dark matter: A state of the art review Fabio Iocco	71
Magnetic fields and angular momentum in population III star formation Matthew J. Turk, Jeffrey S. Oishi, Tom Abel, and Greg L. Bryan	77
Laboratory measurements of primordial chemistry D. W. Savin	81
Turbulence and small scale dynamo action in population III star formation Jeffrey S. Oishi, Matthew J. Turk, Tom Abel, and Greg Bryan	87
Radiative feedback from primordial protostars and final mass of the first stars Takashi Hosokawa, Kazuyuki Omukai, Naoki Yoshida, and Harold W. Yorke	91
Mass growth of the first stars under radiative feedback Athena Stacy, Thomas H. Greif, and Volker Bromm	97
Detecting population III galaxies with HST and JWST E. Zackrisson	101

SESSION III

Pop III to Pop II Transition

The transition from pop III to pop II stars Raffaella Schneider	105
Star formation at low metallicities Ralf S. Klessen, Simon C. O. Glover, Paul C. Clark, and Gustavo H. Dopcke	113
Evolution of dust abundance and grain size distribution at high redshift Hiroyuki Hirashita	119
The imprint of pop III stars on the first galaxies John H. Wise, Tom Abel, Matthew J. Turk, Michael L. Norman, and Britton D. Smith	123
The effects of x-rays on star formation and black hole growth in young galaxies Marco Spaans, Aycin Aykutanalp, John H. Wise, and Rowin Meijerink	129
The formation of the first second generation star Britton D. Smith, John H. Wise, and Brian W. O'Shea	135
A possible signature of primordial stellar populations in $z = 3$ Lyman α emitters Akio K. Inoue	139

SESSION IV

Metal-Poor Stars and Galaxies in the Local Universe

Extremely metal-poor stars in the Milky Way Galaxy Wako Aoki	143
A near field cosmology study of heavy elements in very metal-poor stars C. J. Hansen	151
The s-process at low metallicity Richard J. Stancliffe, Maria A. Lugaro, Amanda I. Karakas, and Carlos Rijs	156

Detailed abundances in EMP dwarfs from SDSS Luca Sbordone, Elisabetta Caffau, and Piercarlo Bonifacio	160
The CaterPillar project – Exploring the dark matter substructure of Milky Way Galaxies Anna Frebel, Phillip Zukin, and Gregory Dooley	163
On the reionization history of the Milky Way P. Ocvirk and D. Aubert	168
Metal-poor galaxies in the local universe Eva K. Grebel	172
Ultra-faint dwarfs: The living fossils of the first galaxies Stefania Salvadori	184
Small-scale hero: Massive-star enrichment in the Hercules dwarf spheroidal Andreas Koch, Francesca Matteucci, and Sofia Feltzing	190
SESSION V	
First Supernovae and Gamma Ray Bursts	
Detecting the first supernovae with JWST and WFIRST Daniel J. Whalen	194
Pair-instability and super-luminous supernova discoveries at $z = 2.05$, $z = 2.50$, and $z = 3.90$ Jeff Cooke, Mark Sullivan, Avishay Gal-Yam, Raymond G. Carlberg, Richard S. Ellis, Elizabeth J. Barton, Emma V. Ryan-Weber, Chuck Horst, Yuuki Omori, and C. Gonzalo Díaz	200
The evolution and explosion of mass-accreting population III stars Ken'ichi Nomoto	204
High-z core-collapse supernova survey with shock breakout Nozomu Tominaga, Tomoki Morokuma, and Sergei I. Blinnikov	214
High redshift GRBs Neil Gehrels and John K. Cannizzo	218

SESSION VI

Formation of Primordial Galaxies and Observations of High-z Universe

Formation of the first galaxies Volker Bromm	226
Assembly of the first disk galaxies under radiative feedback from pop III stars Andreas H. Pawlik, Miloš Milosavljević, and Volker Bromm	234
The brightest of reionizing galaxies (BoRG) survey Michele Trenti	238
Analytical modeling of galaxies at $z \gtrsim 6$: Star formation and black hole growth Joseph A. Muñoz	244

SESSION VII

Cosmic Reionization and Background Radiation

Simulating cosmic reionization and the radiation backgrounds from the epoch of reionization Paul R. Shapiro, Ilian T. Iliev, G. Mellema, Kyungjin Ahn, Yi Mao, Martina Friedrich, Kanan Datta, Hyunbae Park, Eiichiro Komatsu, Elizabeth Fernandez, Jun Koda, Mia Bovill, and Ue-Li Pen	248
The colors of galaxies at $4 < z < 8$ and their contribution to reionization Steven L. Finkelstein	261
Impacts of ultraviolet radiation feedback on the cosmic reionization history Kenji Hasegawa and Benoit Semelin	267
Lower redshift analogues of the sources of reionization Michael Rauch	271
Spectroscopic Confirmation of three z-dropout galaxies at $z = 6.844\text{--}7.213$: Demographics of Lyα Emission in $z \sim 7$ galaxies Yoshiaki Ono	277

Using the cosmic infrared background to deduce properties of high redshift stars	
Elizabeth Fernandez, Ilian T. Iliev, Eiichiro Komatsu, Herve Dole, and Paul Shapiro	281

New constraints on the cosmic optical background	
Y. Matsuoka, N. Ienaka, K. Kawara, and S. Oyabu	285

SESSION VIII

Growth of Massive Black Holes at High-z

The first massive black holes	
Marta Volonteri	289

Feedback-regulated accretion onto the first black holes	
Massimo Ricotti and KwangHo Park	297

Self-regulating the early growth of black holes through global warming	
Zoltán Haiman, Takamitsu Tanaka, and Rosalba Perna	303

Supermassive black hole formation by the cold accretion shocks in the first galaxies	
K. Inayoshi and K. Omukai	309

The growth of the stellar seeds of supermassive black holes	
Jarrett L. Johnson, Bhaskar Agarwal, Daniel J. Whalen, Claudio Dalla Vecchia, Christopher L. Fryer, Sadegh Khochfar, Hui Li, and Mario Livio	313

SUMMARY

First stars IV: Summary talk	
Andrea Ferrara	317

POSTER PRIZE TALKS

Black hole feedback on the first galaxies	
Myoungwon Jeon, Andreas H. Pawlik, Thomas H. Greif, Simon C. O. Glover, Volker Bromm, Miloš Milosavljević, and Ralf S. Klessen	325

Lyman-Werner radiation delayed collapse of metal-free gas in the first galaxies	
Chalence Safranek-Shrader, Meghann Agarwal, Christoph Federrath, Anshu Dubey, Milos Milosavljevic, and Volker Bromm	329
On the effects of rotation during the formation of population III protostars	
Jayanta Dutta, Paul C. Clark, and Ralf S. Klessen	333
POSTERS	
Collapse and fragmentation of a primordial filamentary cloud revisited	
S. Bessho and T. Tsuribe	337
Fates of the most massive primordial stars	
Ke-Jung Chen, Alexander Heger, Ann Almgren, and Stan Woosley	340
Supernova explosions and star formation in the early universe	
G. Chiaki, N. Yoshida, and T. Kitayama	343
The burst mode of accretion in primordial star formation	
Alexander L. DeSouza, Eduard I. Vorobyov, and Shantanu Basu	346
Dissipation of magnetic fields in low-metallicity clouds	
Kentaro Doi, Hajime Susa, and Kazuyuki Omukai	349
The stellar IMF at very low metallicities	
Gustavo Dopcke, Simon C. O. Glover, Paul C. Clark, and Ralf S. Klessen	352
Nucleosynthesis in a neutrino-driven supernova explosion of first stars	
Shin-ichiro Fujimoto, Masa-aki Hashimoto, Masaomi Ono, and Kei Kotake	355
The evolution and C, N and O yields of intermediate-mass $Z = 10^{-5}$ stars in isolation and in close binary systems	
P. Gil-Pons, C. L. Doherty, T. Suda, S. W. Campbell, H. Lau, S. M. Guilani, and J. C. Lattanzio	358

Nonaxisymmetric instabilities in self-gravitating disks: Linear and quasi-linear regimes	
K. Z. Hadley, P. Fernandez, J. N. Imamura, E. Keever, and R. Tumblin	361
I Zw 18, a template for high-redshift galaxies	
Sara R. Heap	364
Three-dimensional modelling of proton ingestion episodes in low-mass stars	
Stuart A. Heap, Richard J. Stancliffe, John C. Lattanzio, and David S. P. Dearborn	367
Can the near-IR fluctuations arise from known galaxy populations?	
Kari Helgason, Massimo Ricotti, and Alexander Kashlinsky	370
Radiative cooling implementations in simulations of primordial star formation	
Shingo Hirano and Naoki Yoshida	373
The first supernovae: Source density and observability of pair instability supernovae	
Jacob A. Hummel, Andreas H. Pawlik, Miloš Milosavljević, and Volker Bromm	376
Chemical abundances of the Milky Way thick disk and stellar halo	
Miho N. Ishigaki, Wako Aoki, and Masashi Chiba	379
The formation and evolution of first dark matter microhalos	
Tomoaki Ishiyama, Junichiro Makino, and Toshikazu Ebisuzaki	382
Precise abundance analysis of the outer halo globular cluster M 75	
Nikolay Kacharov and Andreas Koch	385
A hierarchical model for the galactic chemical evolution and r-process elements of extremely metal-poor stars	
Yutaka Komiya, Shimako Yamada, Takuma Suda, and Masayuki Y. Fujimoto	388
Type II_n superluminous supernovae from collision of supernova ejecta and dense circumstellar medium	
T. J. Moriya, S. I. Blinnikov, N. Tominaga, N. Yoshida, M. Tanaka, K. Maeda, and K. Nomoto	391

High-z galaxy formation, reionization of the universe, and the impact of H_2-based star formation model	
Kentaro Nagamine, Jason Jaacks, and Robert Thompson	394
Long duration x-ray flash from low mass population III stars	
Daisuke Nakauchi, Yudai Suwa, Kazumi Kashiyama, and Takashi Nakamura	397
Elemental compositions of hyper-metal-poor stars formed in dust-enriched dense shells of population III supernova remnants	
Takaya Nozawa, Takashi Kozasa, Ken'ichi Nomoto, Keiichi Maeda, Nozomu Tominaga, Hideyuki Umeda, and Asao Habe	400
Cosmological pseudobulge formation	
Takashi Okamoto	403
Dry minor mergers and size evolution of high-z compact massive early-type galaxies	
Taira Oogi and Asao Habe	406
Statistical properties of dark matter mini-halos	
Mei Sasaki, Paul C. Clark, Ralf S. Klessen, Simon C. O. Glover, Volker Springel, and Naoki Yoshida	409
Lyman alpha emitters in cosmological simulations: Lyman alpha escape fraction and statistical properties	
Ikkoh Shimizu, Naoki Yoshida, and Takashi Okamoto	412
Low-metallicity star formation in high-redshift galaxies at $z \sim 8$	
Yasuhiro Shioya, Yoshiaki Taniguchi, and Johnathan R. Trump	415
Dark matter annihilation feedback: Effects upon collapse and fragmentation	
Rowan J. Smith, Fabio Iocco, Simon C. O. Glover, Dominik Schleicher, Ralf S. Klessen, Thomas Greif, Naoki Yoshida, and Shingo Hirano	418
Transition of the initial mass function in the galaxy based on binary population synthesis	
Takuma Suda, Yutaka Komiya, Shimako Yamada, Yutaka Katsuta, Wako Aoki, Pilar Gil-Pons, Carolyn L. Doherty, Simon W. Campbell, Peter R. Wood, and Masayuki Y. Fujimoto	421
First gamma-ray bursts imprinting population III progenitor structure	
Yudai Suwa	424

Radiation pressure and photoionization on accretion disks in massive star formation	427
Kei E. I. Tanaka and Taishi Nakamoto	
Successive merger of multiple massive black holes in a primordial galaxy and its effect on the galactic structure	430
Ataru Tanikawa and Masayuki Umemura	
Discovery of a protocluster at $z \sim 6$	433
Jun Toshikawa, Nobunari Kashikawa, and Kazuaki Ota	
Identification of subclasses of long gamma-ray bursts with cumulative light curve morphology	436
Ryo Tsutsui, Takashi Nakamura, Daisuke Yonetoku, and Keitaro Takahashi	
Nonaxisymmetric instabilities in self-gravitating disks: Angular momentum transport	439
R. Tumblin, P. Fernandez, K. Z. Hadley, J. N. Imamura, and E. Keever	
The cosmological lithium problem and light element cosmic evolution with intermediate mass pop III stars	442
Elisabeth Vangioni	
Enrichment history of elements in the galactic stars based on the SAGA database	445
S. Yamada, T. Suda, Y. Komiya, and M. Y. Fujimoto	
The role of dust in the early universe: The nature of cosmological reionization sources	448
Daisuke Yamasawa, Asao Habe, Kazuyuki Omukai, Takashi Kozasa, Takaya Nozawa, and Hiroyuki Hirashita	
List of Participants	452
Author Index	455
