## Contents

<b>Preface</b>	<b>i</b>
Contents . . . . .	iii
<b>Papers</b>	<b>ix</b>
SUPB001 – Analyzing Surface Roughness Dependence of Linear RF Losses . . . . .	1
SUPB003 – Feasibility Study of Short Pulse Mode Operation for Multi-turn ERL Light Source . . . . .	4
SUPB004 – Linac Optics Design for Multi-turn ERL Light Source . . . . .	7
SUPB006 – Study of Beam-Based Alignment for Shanghai Soft X-Ray FEL Facility . . . . .	10
SUPB007 – On-Line Dispersion Free Steering for the Main Linac of CLIC . . . . .	13
SUPB008 – Specifications of the Distributed Timing System for the CLIC Main Linac . . . . .	16
SUPB009 – Linear Accelerator based on Parallel Coupled Accelerating Structure . . . . .	19
SUPB010 – Measurements of a Reduced Energy Spread of a Recirculating Linac by Non-Isochronous Beam Dynamics . . . . .	22
SUPB011 – Computational Model Analysis for Experimental Observation of Optical Current Noise Suppression Below the Shot-noise Limit . . . . .	25
SUPB012 – Status of CH Cavity and Solenoid Design of the 17 MeV Injector for MYRRHA . . . . .	29
SUPB013 – The Beam Commissioning Plan of Injector II in C-ADS . . . . .	32
SUPB014 – RF Setup of the MedAustron RFQ . . . . .	35
SUPB015 – Production and Quality Control of the First Modules of the IFMIF-EVEDA RFQ . . . . .	38
SUPB016 – RFQ With Improved Energy Gain . . . . .	41
SUPB017 – Tuning Studies on 4-rod-RFQs . . . . .	44
SUPB018 – Studies of Parasitic Cavity Modes for Proposed ESS Linac Lattices . . . . .	47
SUPB019 – The Multipacting Simulation for the New-Shaped QWR using TRACK3P . . . . .	50
SUPB020 – Structural Analysis of the New-Shaped QWR for HIAF in IMP . . . . .	53
SUPB022 – First Measurements on the 325 MHz Superconducting CH Cavity . . . . .	56
SUPB023 – Status of the Superconducting CW Demonstrator for GSI . . . . .	59
SUPB024 – Development of Permanent Magnet Focusing System for Klystrons . . . . .	62
SUPB025 – Development of Superconducting Radio-Frequency (SRF) Deflecting Mode Cavities and Associated Waveguide Dampers for the APS Upgrade Short Pulse X-Ray Project . . . . .	65
SUPB026 – Multipacting Analysis of High-velocity Superconducting Spoke Resonators . . . . .	68
SUPB027 – Mechanical Study of the First Superconducting Half-wave Resonator for Injector II of CADS Project . . . . .	71
SUPB028 – The Superconducting CH Cavity Development in IMP* . . . . .	74
SUPB029 – Impact of Trapped Flux and Systematic Flux Expulsion in Superconducting Niobium . . . . .	77
SUPB031 – The Nonresonant Perturbation Theory Based Field Measurement and Tuning of a Linac Accelerating Structure . . . . .	80
SUPB032 – The C-band RF Pulse Compression for Soft XFEL at SINAP . . . . .	83
SUPB035 – RF Photoinjector and Radiating Structure for High-power THz Radiation Source . . . . .	86
SUPB037 – The Development of Timing Control System for RFQ . . . . .	89
SUPB038 – Multipole Field Effects for the Superconducting Parallel-Bar Deflecting/Crabbing Cavities . . . . .	92
SUPB039 – Compact Superconducting Crabbing and Deflecting Cavities . . . . .	95
MO1A01 – Operational Experience and Future Goals of the SARAF Linac at SOREQ . . . . .	100
MO1A02 – Status of the European XFEL – Constructing the 17.5 GeV Superconducting Linear Accelerator . . . . .	105
MO1A03 – SRF Linac Technology Development at Fermilab . . . . .	110
MO2A02 – Increased Understanding of Beam Losses from the SNS Linac Proton Experiment . . . . .	115
MO3A01 – Development of H-mode Linacs for the FAIR Project . . . . .	120
MO3A02 – Commissioning of a New Injector for the RIKEN RI-Beam Factory . . . . .	125
MO3A03 – FRANZ – Accelerator Test Bench and Neutron Source . . . . .	130
MO3A04 – Accelerator/Decelerator of Slow Neutrons . . . . .	133
MOPLB01 – Emittance Control for Different FACET Beam Setups in the SLAC Linac . . . . .	138
MOPLB02 – Positron Injector Linac Upgrade for SuperKEKB . . . . .	141
MOPLB03 – Advances in Beam Tests of Dielectric Based Accelerating Structures . . . . .	144
MOPLB04 – A 10 MeV L-band Linac for Irradiation Applications in China . . . . .	147
MOPLB05 – Applications of Compact Dielectric-Based Accelerators . . . . .	150
MOPLB06 – Fermilab 1.3 GHz Superconducting RF Cavity and Cryomodule Program for Future Linacs . . . . .	153
Contents	iii

MOPLB07 – Non-destructive Inspections for SC Cavities . . . . .	156
MOPLB08 – Normal Conducting Deflecting Cavity Development at the Cockcroft Institute . . . . .	159
MOPLB09 – Status of the C-Band RF System for the SPARC-LAB High Brightness Photoinjector . . . . .	162
MOPLB10 – FRIB Technology Demonstration Cryomodule Test . . . . .	165
MOPLB11 – The Upgraded Argonne Wakefield Accelerator Facility (AWA): a Test-Bed for the Development of High Gradient Accelerating Structures and Wakefield Measurements . . . . .	168
MOPLB12 – X-Ray Local Energy Spectrum Measurement on Tsinghua Thomson Scattering X-Ray Source (TTX) . . . . .	171
MOPB001 – Emittance Control for Different FACET Beam Setups in the SLAC Linac . . . . .	174
MOPB002 – Positron Injector Linac Upgrade for SuperKEKB . . . . .	177
MOPB003 – Recent Improvements to the Control of the CTF3 High-Current Drive Beam . . . . .	180
MOPB004 – Design and Operation of a Compact 1 MeV X-band Linac . . . . .	183
MOPB005 – High Gradient Operation of 8 GeV C-Band Accelerator in SACLA . . . . .	186
MOPB007 – Study of Microbunching Instability in the Linac of the Shanghai Soft X-Ray Free Electron Laser Facility . . . . .	189
MOPB011 – Photoinjector of the EBTF/CLARA Facility at Daresbury . . . . .	192
MOPB012 – First RF Measurement Results for the European XFEL SC Cavity Production . . . . .	195
MOPB013 – Experimental Results on the PHIL Photo-injector Test Stand at LAL . . . . .	198
MOPB014 – Electron Model of a Dogbone RLA with Multi-Pass Arcs . . . . .	201
MOPB016 – In-situ Measurement of Beam-induced Fields in the S-band Accelerating Structures of the Diamond Light Source linac . . . . .	204
MOPB017 – Integration of the European XFEL Accelerating Modules . . . . .	207
MOPB018 – Analyzing Surface Roughness Dependence of Linear RF Losses . . . . .	210
MOPB020 – LLRF System Improvement for HLS Linac Upgrade . . . . .	213
MOPB021 – Bunch-by-bunch Phase Modulation for Linac Beam-loading Compensation . . . . .	216
MOPB022 – RF Characteristic Studies on the Whole Accelerating Structure for the BEPCII Linear Accelerator . . . . .	219
MOPB023 – Progress on the Design and Construction of the 100 MeV / 100 kW Electron Linac for the NSC KIPT Neutron Source . . . . .	222
MOPB024 – Beam Dynamics Simulation and Optimization for 10 MeV Superconducting e-Linac Injector for VECC-RIB Facility . . . . .	225
MOPB025 – 1ms Multi-bunch Electron Beam Acceleration by a Normal Conducting RF Gun and Superconducting Accelerator . . . . .	228
MOPB026 – TRIUMF/VECC e-Linac Injector Beam Test . . . . .	231
MOPB029 – Commissioning of the X-Band Test Area at SLAC . . . . .	234
MOPB030 – Performance of First C100 Cryomodules for the CEBAF 12 GeV Upgrade Project . . . . .	237
MOPB031 – Vibration Response Testing of the CEBAF 12 GeV Upgrade Cryomodules . . . . .	240
MOPB032 – Stabilization of the Beam Intensity in the Linac at the CTF3 CLIC Test Facility . . . . .	243
MOPB033 – High Power Coupler Test for TRIUMF E-linac SC Cavities . . . . .	246
MOPB034 – Novel Technique of Suppressing TBBU in High-energy ERLs . . . . .	249
MOPB035 – The Linear Accelerating Structure Development for HLS Upgrade . . . . .	252
MOPB036 – Feasibility Study of Short Pulse Mode Operation for Multi-turn ERL Light Source . . . . .	255
MOPB037 – Linac Optics Design for Multi-turn ERL Light Source . . . . .	258
MOPB038 – Single Shot Bunch-by-Bunch Beam Emittance Measurement of the SPring-8 Linac . . . . .	261
MOPB041 – Advances in Beam Tests of Dielectric Based Accelerating Structures . . . . .	264
MOPB042 – On-line Dispersion Free Steering for the Main Linac of CLIC . . . . .	267
MOPB043 – Detailed Analysis of the Long-Range Wakefield in the Baseline Design of the CLIC Main Linac . . . . .	270
MOPB045 – Specifications of the Distributed Timing System for the CLIC Main Linac . . . . .	273
MOPB046 – A 10 MeV L-band Linac for Irradiation Applications in China . . . . .	276
MOPB047 – Applications of Compact Dielectric Based Accelerators . . . . .	279
MOPB048 – Linear Accelerator Based on Parallel Coupled Accelerating Structure . . . . .	282
MOPB049 – Design of Compact C-Band Standing-Wave Accelerator for Medical Radiotherapy . . . . .	285
MOPB051 – Changing Attitude to Radiation Hazards and Consequent Opportunities for LINAC Applications . . . . .	288
MOPB052 – Fermilab 1.3 GHz Superconducting RF Cavity and Cryomodule Program for Future Linacs . . . . .	291
MOPB053 – Non-destructive Inspections for SC Cavities . . . . .	294
MOPB054 – Test Results of Tesla-style Cryomodules at Fermilab . . . . .	297

MOPB055 – Development of Superconducting Radio-Frequency (SRF) Deflecting Mode Cavities and Associated Waveguide Dampers for the APS Upgrade Short Pulse X-Ray Project . . . . .	300
MOPB056 – Multipacting Analysis of High-Velocity Superconducting Spoke Resonators . . . . .	303
MOPB057 – Mechanical Study of the First Superconducting Half-wave Resonator for Injector II of CADS Project . . . . .	306
MOPB059 – The Superconducting CH Cavity Development in IMP* . . . . .	309
MOPB060 – RF Surface Impedance Characterization of Potential New Materials for SRF-based Accelerators . . . . .	312
MOPB061 – The New 2nd Generation SRF R&D Facility at Jefferson Lab: TEDF . . . . .	315
MOPB062 – A New Internal Optical Profilometry System for Characterization of RF Cavity Surfaces – CYCLOPS . . . . .	318
MOPB063 – Superconducting RF Linac for eRHIC . . . . .	321
MOPB064 – Developing of Superconducting RF Guns at BNL . . . . .	324
MOPB065 – Impact of Trapped Magnetic Flux and Systematic Flux Expulsion in Superconducting Niobium . . . . .	327
MOPB066 – Alternative Approaches for HOM-Damped Cavities . . . . .	330
MOPB067 – Results and Performance Simulations of the Main Linac Design for BERLinPro . . . . .	333
MOPB069 – Study of HPR Created Oxide Layer at Nb Surfaces . . . . .	336
MOPB070 – Quality Control of Cleanroom Processing Procedures of SRF Cavities for Mass Production . . . . .	339
MOPB071 – Process Developments for Superconducting RF Low Beta Resonators for the ReA3 LINAC and Facility for Rare Isotope Beams . . . . .	342
MOPB072 – Multipole Expansion of the Fields in Superconducting High-Velocity Spoke Cavities . . . . .	345
MOPB073 – Cold Testing of Superconducting 72 MHz Quarter-wave Cavities for ATLAS . . . . .	348
MOPB074 – Thermo-Mechanical Simulations of the Frequency Tuning Plunger for the IFMIF Half-Wave Resonator . . . . .	351
MOPB077 – Lorentz Force Detuning Compensation Studies for Long Pulses in ILC type SRF Cavities . . . . .	354
MOPB079 – Normal Conducting Deflecting Cavity Development at the Cockcroft Institute . . . . .	357
MOPB080 – Status of the C-Band RF System for the SPARC-LAB High Brightness Photoinjector . . . . .	360
MOPB081 – Travelling Wave Accelerating Structures with a Large Phase Advance . . . . .	363
MOPB082 – RF Parameters of the TE - Type Deflecting Structure for S-Band Frequency Range . . . . .	366
MOPB083 – Operational experience with the FERMI@Elettra S-band RF System . . . . .	369
MOPB084 – Design of a C-band Disk-loaded Type Accelerating Structure for a Higher Pulse Repetition Rate in the SACLA Accelerator. . . . .	372
MOPB086 – The Nonresonant Perturbation Theory Based Field Measurement and Tuning of a Linac Accelerating Structure . . . . .	375
MOPB087 – S-Band Loads for SLAC Linac . . . . .	378
MOPB088 – Fabrication Tests for IMP 162.5 MHz RFQ . . . . .	381
MOPB089 – X-Ray Local Energy Spectrum Measurement at Tsinghua Thomson Scattering X-Ray Source (TTX) . . . . .	383
MOPB090 – FRIB Technology Demonstration Cryomodule Test . . . . .	386
MOPB091 – The Injector Cryomodule for the ARIEL e-Linac at TRIUMF . . . . .	389
MOPB093 – The Upgraded Argonne Wakefield Accelerator Facility (AWA): a Test-Bed for the Development of High Gradient Accelerating Structures and Wakefield Measurements . . . . .	392
MOPB094 – Simulation Study on the Longitudinal Bunch Shape Measurement by RF Chopper at J-PARC Linac . . . . .	395
MOPB095 – Design of MEBT for the Project X Injector Experiment at Fermilab . . . . .	398
MOPB096 – Beam Loss Mitigation in J-PARC Linac after the Tohoku Earthquake . . . . .	401
MOPB098 – Planning for Experimental Demonstration of Transverse Emittance Transfer at the GSI UNILAC through Eigen-Emittance Shaping . . . . .	404
TU1A01 – Status of the IFMIF-EVEDA 9 MeV 125 mA Deuteron Linac . . . . .	407
TU1A03 – Chinese ADS Project and Proton Accelerator Development . . . . .	412
TU1A04 – FRIB Accelerator Status and Challenges . . . . .	417
TU1A05 – Status and Commissioning Plan of the PEPF 100-MeV Linear Accelerator . . . . .	422
TU2A02 – Overview of SACLA Machine Status . . . . .	427
TU2A03 – LCLS Operation Experience and LCLS-II Design . . . . .	432
TU2A04 – High Current ERL at BNL . . . . .	437
TUPLB01 – The Swiss FEL RF Gun: RF Design and Thermal Analysis . . . . .	442

TUPLB02 – Deflecting Structures with Minimized Level of Aberrations . . . . .	445
TUPLB04 – Results of Testing of Multi-beam Klystrons for the European XFEL . . . . .	448
TUPLB05 – Computational Model Analysis for Experimental Observation of Optical Current Noise Sup- pression below the Shot-Noise Limit . . . . .	451
TUPLB06 – Status of the Rare Isotope Science Project in Korea . . . . .	455
TUPLB07 – Reduced-beta Cavities for High-intensity Compact Accelerators . . . . .	458
TUPLB08 – R&D Towards CW Ion Linacs at ANL . . . . .	461
TUPLB09 – Design and Beam Test of Six-electrode BPMs for Second-order Moment Measurement . . . . .	464
TUPLB10 – Non-destructive Real-time Monitor to Measure 3D-bunch Charge Distribution with Arrival Tim- ing to Maximize 3D Overlapping for HHG-seeded EUV-FEL . . . . .	467
TUPLB12 – Development of Permanent Magnet Focusing System for Klystrons . . . . .	470
TUPB001 – The Fine Structure of the Zone of Particle Interaction with a Finite Length Periodic Structure . . . . .	473
TUPB002 – Deflecting Structures with Minimized Level of Aberrations . . . . .	476
TUPB004 – Results of Testing of Multi-beam Klystrons for the European XFEL . . . . .	479
TUPB005 – Computational Model Analysis for Experimental Observation of Optical Current Noise Sup- pression Below the Shot-noise Limit . . . . .	482
TUPB006 – Stability Performance of the Injector for SACLA/XFEL at SPring-8 . . . . .	486
TUPB008 – Major Trends in Linac Design for X-ray FELs . . . . .	489
TUPB009 – C-Band Accelerating Structure Development and Tests for the SwissFEL . . . . .	492
TUPB010 – The Swiss FEL RF Gun: RF Design and Thermal Analysis . . . . .	495
TUPB011 – The Swiss FEL S-Band Accelerating Structure: RF Design . . . . .	498
TUPB012 – The Swiss FEL C-Band Accelerating Structure: RF Design and Thermal Analysis . . . . .	501
TUPB013 – Update on the Commissioning Effort at the SwissFEL Injector Test Facility . . . . .	504
TUPB014 – Comparative Design of Single Pass, Photo-cathode RF-LINAC FEL for the THz Frequency Range: Self Amplification vs. Enhanced Super-radiance . . . . .	507
TUPB015 – Warm Beamlines and Infrastructure in the European XFEL . . . . .	510
TUPB018 – Study of Beam-Based Alignment for Shanghai Soft X-Ray FEL Facility . . . . .	513
TUPB019 – Second CW and LP Operation Test of XFEL Prototype Cryomodule . . . . .	516
TUPB020 – Status of the European XFEL 3.9 GHz system . . . . .	519
TUPB021 – Study of Plasma Effect in Longitudinal Space Charge Induced Microbunching Instability . . . . .	522
TUPB022 – A Passive Linearizer for Bunch Compression . . . . .	525
TUPB023 – The Optimization of RF Deflector Input Power Coupler . . . . .	528
TUPB026 – Measurements of a Reduced Energy Spread of a Recirculating Linac by Non-isochronous Beam Dynamics . . . . .	531
TUPB028 – Status of the Rare Isotope Science Project in Korea . . . . .	534
TUPB029 – Beam Intensity and Energy Control for the SPIRAL2 Facility . . . . .	537
TUPB030 – Overview of the Superconducting Linacs of the Rare Isotope Science Project . . . . .	540
TUPB031 – Beam Envelope Analysis and Simulation . . . . .	543
TUPB032 – Beam Dynamics of the Linac ALPI-PIAVE in View of Possible Upgrades Scenario for the SPES Project. . . . .	546
TUPB033 – Piezoelectric Actuator Based Phase Locking System for IUAC Linac . . . . .	549
TUPB034 – A Helium Injector for Coupled RFQ and SFRFQ Cavity Project at Peking University . . . . .	552
TUPB035 – A New Design of the RFQ Channel for GSI HITRAP Facility . . . . .	555
TUPB036 – Design of Re-Buncher Cavity for Heavy-ion LINAC in IMP . . . . .	558
TUPB039 – Conceptual Design of Superconducting Heavy Ion Linear Injector for HIAF . . . . .	561
TUPB040 – Status of the Linac SRF Acquisition for FRIB . . . . .	564
TUPB041 – Scattering of H <sup>-</sup> Stripped Electrons from SEM Grids and Wire Scanners at the CERN LINAC4 . . . . .	567
TUPB042 – Progress on RFQIII Fabrication in J-PARC Linac . . . . .	570
TUPB043 – One Design of Heavy Ion Linac Injector for CSRm . . . . .	573
TUPB044 – Cryogenic System for the ADS Injector II in IMP, CAS . . . . .	576
TUPB046 – R&D Towards CW Ion Linacs at ANL . . . . .	579
TUPB047 – Status of the Superconducting RF Activities for the HIE ISOLDE Project . . . . .	582
TUPB048 – Discussion of the Optimisation of a Linac Lattice to Minimise Disruption by a Class of Parasitic Modes . . . . .	585
TUPB049 – Superconducting Low Beta Niobium Resonator for Heavy Ions . . . . .	588
TUPB052 – Studies of Parasitic Cavity Modes for Proposed ESS Linac Lattices . . . . .	591

TUPB053 – Main Coupler Design for Project X . . . . .	594
TUPB054 – Coherent Effects of High Current Beam in Project-X Linac . . . . .	597
TUPB055 – R&D of IMP Superconducting HWR for China ADS . . . . .	600
TUPB056 – The Multipacting Simulation for the New-shaped QWR using TRACK3P . . . . .	603
TUPB057 – Structural Analysis of the New-Shaped QWR for HIAF in IMP . . . . .	606
TUPB058 – An Analytical Cavity Model for Fast Linac-Beam Tuning . . . . .	609
TUPB060 – Multipacting Suppression Modeling for Half Wave Resonator and RF Coupler* . . . . .	612
TUPB061 – ADRC Control for Beam Loading and Microphonics . . . . .	615
TUPB062 – Longitudinal Dynamic Analysis for the Project X 3-8 GeV Pulsed Linac . . . . .	618
TUPB066 – Reduced-beta Cavities for High-intensity Compact Accelerators . . . . .	621
TUPB067 – Development of a Superconducting Half-Wave Resonator for PXIE . . . . .	624
TUPB068 – Cryomodule Designs for Superconducting Half-Wave Resonators . . . . .	627
TUPB069 – BEAMDULAC-SCL Code for Complex Approach of Beam Dynamic Investigation in SC LINAC . . . . .	630
TUPB070 – Development of Proton Therapy at the SC Linac with BEAMDULAC-SCL Code . . . . .	633
TUPB071 – First Measurements on the 325 MHz Superconducting CH Cavity . . . . .	636
TUPB072 – Status of the Superconducting CW Demonstrator for GSI . . . . .	639
TUPB073 – Design and Simulation of a Test Model for a Tri-Spoke Cavity at RIKEN . . . . .	642
TUPB074 – Superconducting CW Heavy Ion Linac at GSI . . . . .	645
TUPB075 – Beam Dynamics Design of China ADS Proton Linac . . . . .	648
TUPB077 – Thorium Energy . . . . .	651
TUPB079 – Design and Beam Test of Six-Electrode BPMs for Second-Order Moment Measurement . . . . .	654
TUPB080 – Non-destructive Real-time Monitor to Measure 3D Bunch Charge Distribution with Arrival Timing to Maximize 3D Overlapping for HHG-Seeded EUV-FEL . . . . .	657
TUPB081 – Beam Diagnostics Development for Triumf E-Linac . . . . .	660
TUPB082 – Beam Loss Track Measurements by a Fast Trigger Scheme in J-PARC Linac . . . . .	663
TUPB084 – High Dynamic-Range High Speed Linac Current Measurements . . . . .	666
TUPB090 – Development of Permanent Magnet Focusing System for Klystrons . . . . .	669
TUPB091 – 176 MHz Solid State Microwave Generator Design . . . . .	672
TUPB092 – High Power Amplifier Systems for SARAF Phase II . . . . .	675
TUPB093 – Compact 4 kW Variable RF Power Coupler for FRIB Quarter-wave Cavities . . . . .	678
TUPB094 – High Power Tests of TRASCO RFQ Couplers . . . . .	681
TUPB095 – Design of Coupler for Direct Coupled Amplifier to Drift Tube Linac Cavities of the Injector RILAC2 for RIKEN RI Beam Factory . . . . .	684
TUPB097 – The C-band RF Pulse Compression for Soft XFEL at SINAP . . . . .	687
TUPB099 – Input Coupler of the J-PARC DTL . . . . .	690
TUPB100 – Recovery and Status Report of DTL/SDTL for the J-PARC After Earthquake . . . . .	693
TUPB101 – Beam Loss Occurred at DTL Cavity in J-PARC Linac . . . . .	696
TUPB102 – Design and Performances of Phase Monitor in J-PARC Linac . . . . .	699
TUPB103 – CSNS DTL Prototyping and RF Tuning . . . . .	702
TUPB104 – Study of the Beam Dynamics in the RISP Driver Linac . . . . .	705
TUPB107 – Amplitude and Phase Control of the Accelerating Field in the ESS Spoke Cavity . . . . .	708
TUPB108 – Uppsala High Power Test Stand for ESS Spoke Cavities . . . . .	711
WE1A01 – ERL-Based Light Source Challenges . . . . .	714
WE1A02 – Status and Future of the CLIC Study . . . . .	719
WE1A03 – Application of X-band Linacs . . . . .	724
WE1A04 – The ARIEL Superconducting Electron Linac . . . . .	729
WE1A05 – Linac-Based Laser Compton Scattering X-Ray and Gamma-Ray Sources . . . . .	734
WE2A01 – RF Power Production at the Two Beam Test Stand at CERN . . . . .	738
WE2A02 – Solid State Marx Modulators for Emerging Applications . . . . .	743
TH1A01 – Results Achieved by the S1-Global Collaboration for ILC . . . . .	748
TH1A02 – Compact Superconducting Crabbing and Deflecting Cavities . . . . .	753
TH1A03 – Superconducting Spoke Cavities for Electron and High-Velocity Proton Linacs . . . . .	758
TH1A04 – Superconducting Linac and Associated Developments at IUAC Delhi . . . . .	763
TH2A01 – The ESS Linac Design . . . . .	768
TH2A02 – SPIRAL2 Accelerator Construction Progress . . . . .	773
TH2A03 – Design and Construction of the Linac4 Accelerating Structures . . . . .	778

TH2A004 – Computational Model Analysis for Experimental Observation of Optical Current Noise Suppression Below the Shot-noise Limit . . . . .	783
TH3A01 – Status of ILC . . . . .	787
TH3A02 – The 12 GeV Energy Upgrade at Jefferson Laboratory . . . . .	792
TH3A03 – ERL-Based Lepton-Hadron Colliders: eRHIC and LHeC . . . . .	797
TH3A04 – Plasmas, Dielectrics and the Ultrafast: First Science and Operational Experience at FACET . . . . .	802
THPLB01 – Linac Construction for China Spallation Neutron Source . . . . .	807
THPLB02 – Performance of Ferrite Vector Modulators in the LLRF system of the Fermilab HINS 6-Cavity Test . . . . .	810
THPLB03 – Front-End Linac Design and Beam Dynamics Simulations for MYRRHA . . . . .	813
THPLB04 – Preliminary Study of Proton Beam Transport in a 10 MeV Dielectric Wall Accelerator . . . . .	816
THPLB05 – R&D Activities on High Intensity Superconducting Proton Linac at RRCAT . . . . .	819
THPLB06 – The New Option for a Front End of Ion Linac . . . . .	822
THPLB07 – Experience with a 4-Rod CW Radio Frequency Quadrupole . . . . .	825
THPLB08 – High-Power RF Conditioning of the TRASCO RFQ . . . . .	828
THPLB09 – Status of E-XFEL String and Cryomodule Assembly at CEA-Saclay . . . . .	831
THPLB11 – Experimental and Simulation Study of the Long-path-length Dynamics of a Space-charge-dominated Bunch . . . . .	834
THPLB12 – Photoinjector SRF Cavity Development for BERLinPro . . . . .	837
THPB002 – Preliminary Study of Proton Beam Transport in a 10 MeV Dielectric Wall Accelerator . . . . .	840
THPB003 – R&D Activities on High Intensity Superconducting Proton Linac at RRCAT . . . . .	843
THPB004 – Current Status of the RAL Front End Test Stand (FETS) Project . . . . .	846
THPB005 – Front-End Linac Design and Beam Dynamics Simulations for MYRRHA . . . . .	849
THPB006 – Post Acceleration of Laser-generated Proton Bunches by a CH-DTL . . . . .	852
THPB007 – A Pulsed Linac Front-end for ADS Applications . . . . .	855
THPB008 – A Coupled RFQ-IH Cavity for the Neutron Source FRANZ . . . . .	858
THPB009 – Status of CH Cavity and Solenoid Design of the 17 MeV Injector for MYRRHA . . . . .	861
THPB010 – Progress in the Construction of Linac4 at CERN . . . . .	864
THPB011 – Linac4 45 keV Proton Beam Measurements . . . . .	867
THPB012 – High Resolution Emittance Measurements at SNS Front End . . . . .	870
THPB013 – Diagnostics Tools for Beam Halo Investigation in SNS Linac . . . . .	873
THPB014 – Lattice Design and Beam Dynamics Studies for Project X . . . . .	876
THPB015 – Performance of Ferrite Vector Modulators in the LLRF system of the Fermilab HINS 6-Cavity Test . . . . .	879
THPB016 – Concept: Low Energy, Low Intensity NF from ProjectX . . . . .	882
THPB017 – A Concept: 8GeV CW Linac, Staged Approach . . . . .	885
THPB020 – Annular-ring Coupled Structure for the Energy Upgrade of the J-PARC Linac . . . . .	888
THPB021 – Recovery Efforts from the Tohoku Earthquake and Energy Upgrade Preparation of the Beam Transport from the J-PARC Linac to the 3-GeV Synchrotron . . . . .	891
THPB022 – Beam Phase Measurement for PEPF Linear Accelerator . . . . .	894
THPB023 – Linac Construction for China Spallation Neutron Source . . . . .	897
THPB024 – Main Linac Physics Design Study of the C-ADS Project . . . . .	900
THPB025 – 325 MHz CW Room Temperature High Power Bunching Cavity for the China ADS MEBT1 . . . . .	903
THPB026 – The Beam Commissioning Plan of Injector II in C-ADS . . . . .	906
THPB027 – Progress of one of 10 MeV superconducting proton linear Injectors for C-ADS . . . . .	909
THPB028 – The ESS Low Energy Beam Transport Line Design . . . . .	912
THPB029 – The ESS RFQ Beam Dynamics Design . . . . .	915
THPB030 – DTL Design for ESS . . . . .	918
THPB031 – Status Report on the French High-intensity Proton Injector Project at SACLAY (IPHI) . . . . .	921
THPB032 – Beam Dynamics Design Aspects for a Proposed 800 MeV H <sup>-</sup> ISIS Linac . . . . .	924
THPB034 – Status of the FAIR 70 MeV Proton Linac . . . . .	927
THPB035 – Experience with a 4-Rod CW Radio Frequency Quadrupole . . . . .	930
THPB036 – The New Option for a Front End of Ion Linac . . . . .	933
THPB037 – Iron Beam Acceleration with DPIS . . . . .	936
THPB038 – Assembly and RF Tuning of the Linac4 RFQ at CERN . . . . .	939
THPB039 – Design of a Four-Vane RFQ for China ADS Project . . . . .	942

THPB040 – High-Power RF Conditioning of the TRASCO RFQ . . . . .	945
THPB042 – Production and Quality Control of the First Modules of the IFMIF-EVEDA RFQ . . . . .	948
THPB043 – The RFQ injector for the Radioactive Ion Beam of SPES Project . . . . .	951
THPB044 – Plans for an Integrated Front-End Test Stand at the Spallation Neutron Source . . . . .	954
THPB046 – RF Setup of the MedAustron RFQ . . . . .	957
THPB047 – Test RFQ for the MAX Project . . . . .	960
THPB049 – Tuning Studies on 4-Rod-RFQs . . . . .	963
THPB050 – RFQ With Improved Energy Gain . . . . .	966
THPB051 – Improvements at the BNL 200 MeV Linac . . . . .	969
THPB052 – Recent Progress with the J-PARC RFQs . . . . .	972
THPB055 – Numerical Simulations of ProjectX/PXIE RFQ . . . . .	975
THPB061 – Experimental and Simulation Study of the Long-path-length Dynamics of a Space-charge-dominated Bunch . . . . .	978
THPB062 – Multipole Field Effects for the Superconducting Parallel-Bar/RF-Dipole Deflecting/Crabbing Cavities . . . . .	981
THPB063 – Simulated Performance of the CARIBU EBIS Charge Breeder Transport Line . . . . .	984
THPB064 – Beam Dynamics Tools for Linacs Design . . . . .	987
THPB065 – Status of the Beam Dynamics Code DYNAC . . . . .	990
THPB066 – Photoinjector SRF Cavity Development for BERLinPro . . . . .	993
THPB068 – First Observation of Photoemission Enhancement from Copper Cathode Illuminated by Z-Polarized Laser Pulse . . . . .	996
THPB069 – Beam Dynamics Studies for SRF Photoinjectors . . . . .	999
THPB073 – Initial RF Tests of the Diamond S-Band Photocathode Gun . . . . .	1002
THPB074 – RF Photoinjector and Radiating Structure for High-power THz Radiation Source . . . . .	1005
THPB076 – Design Issues of the Proton Source for the ESS Facility . . . . .	1008
THPB079 – Development of a Superconducting Focusing Solenoid for CADS . . . . .	1011
THPB081 – The Development of Timing Control System for RFQ . . . . .	1014
THPB083 – Status of E-XFEL String and Cryomodule Assembly at CEA-Saclay . . . . .	1017
THPB084 – A Low-Level RF Control System for a Quarter-Wave Resonator . . . . .	1020
THPB085 – LLRF Automation for the 9mA ILC Tests at FLASH . . . . .	1023
THPB086 – Precision Regulation of RF Fields with MIMO Controllers and Cavity-based Notch Filters . . . . .	1026
THPB089 – Magnetic Characterization of the Phase Shifter Prototypes Built by CIEMAT for E-XFEL . . . . .	1029
THPB091 – Machine Protection Issues and Solutions for Linear Accelerator Complexes . . . . .	1032
THPB092 – Recent Improvements in SPring-8 Linac for Early Recovery from Beam Interruption . . . . .	1035
THPB094 – Performance of Beam Chopper at SARAF via RF Deflector Before the RFQ . . . . .	1038
THPB095 – Designing of a Phase-mask-type Laser Driven Dielectric Accelerator for Radiobiology . . . . .	1041
THPB096 – High-power Sources of RF Radiation Driven by Periodic Laser Pulses . . . . .	1044
THPB097 – FRIB Front End Design Status . . . . .	1047
FR1A01 – Heavy Ion Strippers . . . . .	1050
FR1A02 – Light Ion ECR Sources State of the Art for Linacs . . . . .	1055
FR1A04 – In Flight Ion Separation using a Linac Chain . . . . .	1059
FR1A05 – SARAF Phase II P/D 40 MeV Linac Design Studies . . . . .	1064
FR2A01 – Recovery of the J-PARC Linac from the Earthquake . . . . .	1069
