MATERIALS PROCESSING AND DESIGN

Modeling, Simulation and Applications

NUMIFORM '07

Proceedings of the 9th International Conference on Numerical Methods in Industrial Forming Processes

Porto, Portugal 17 – 21 June 2007

PART I

EDITORS
J. M. A. César de Sá
Abel D. Santos
Faculty of Engineering, University of Porto
Porto, Portugal

All papers have been peer reviewed.

SPONSORING ORGANIZATIONS
Faculty of Engineering of the University of Porto (FEUP)
Institute of Mechanical Engineering and Industrial Management (INEGI)

AMERICAN INSTITUTE OF PHYSICS

CONTENTS

Preface . . . . . **xix**
Organization . . . . . **xxi**

PART I

PLENARY LECTURES

Constitutive Descriptions for Metal Forming Simulations **3**
F. Barlat
Three-dimensional Modeling of Void Growth in Friction Stir Welding of Stainless Steel **25**
Y. He, D. E. Boyce, and P. R. Dawson
Computational Modelling of a Thermoforming Process for Thermoplastic Starch **35**
D. Szegda, J. Song, M. K. Warby, and J. R. Whiteman
Computational Strategies for Polymer Coated Steel Sheet Forming Simulations **49**
D. R. J. Owen, F. M. Andrade Pires, and M. Dutko
Convection of Local Level Set Function for Moving Surfaces and Interfaces in Forming Flow **61**
T. Coupez
The Role of a General Purpose Code in Forming Simulations **67**
N. Rebelo, J. Nagtegaal, D. Fox, S. Sinha, and J. Brouwer

MINI SYMPOSIA

Prediction of Necking and Fracture in Metal Sheets
In memory of Prof. Alf Samuelsson
Organized by: K. Mattiasson

Predictions of Necking with Analytical Criteria and Comparisons with Experimental Results **81**
M. Brunet and P. Clerc
Influence of the Plastic Material Behaviour on the Prediction of Forming Limits **87**
H. Vegter, C. H. L. J. ten Horn, and A. H. van den Boogaard
On Necking, Fracture and Localization of Plastic Flow in Austenitic Stainless Steel Sheets **93**
A. S. Korhonen, T. Manninen, and K. Kanervo
Possibilities and Influencing Parameters for the Early Detection of Sheet Metal Failure in Press Shop Operations **99**
J. Gerlach, L. Kessler, U. Paul, and H. Rösen
Damage Prediction in Sheet Metal Forming **105**
K. Saanouni and H. Badreddine
Modelling of Local Necking and Fracture in Aluminium Alloys **111**
D. Achani, M. Eriksson, O. S. Hopperstad, and O.-G. Lademo
Formability Prediction of Aluminum Sheet in Automotive Applications **117**
C. Leppin, D. Daniel, R. Shahani, H. Gese, and H. Dell
SEM-EBSD Based Realistic Modeling and Crystallographic Homogenization FE Analyses of LDH Formability Tests **123**
H. Kuramae, N. Ngoc Tam, Y. Nakamura, H. Sakamoto, H. Morimoto, and E. Nakamachi
On the Prediction of Plastic Instability in Metal Sheets **129**
K. Mattiasson, M. Sigvant, and M. Larsson
Prediction of Ductile Failure in the Stretch-Forming of AA2024 Sheets **135**
C. Vallellano, C. Guzmán, and F. J. García-Lomas
Forming Limit Predictions for the Serrated Strain Paths in Single Point Incremental Sheet Forming **141**
P. Eyckens, S. He, A. Van Bael, P. Van Houtte, and J. Duflou
About the Neglected Influence of Gradients on Strain Localisation **147**
A. Col and T. Balan
Prediction of Formability in Sheet Metal Forming Processes Using a Local Damage Model **153**
P. Teixeira, A. D. Santos, J. César de Sá, F. Andrade Pires, and A. Barata da Rocha

Anisotropy and Formability in Sheet Metal Forming **159**
P. Van Houtte, A. Van Bael, and S. He
CrachFEM—A Comprehensive Approach for the Prediction of Sheet Metal Failure **165**
H. Dell, H. Gese, and G. Oberhofer
Increasing the Robustness of the Sheet Metal Forming Simulation by the Prediction of the Forming Limit Band **171**
D. Banabic, M. Vos, L. Paraianu, and P. Jurco

Recent Developments in Forming Processes
On the occasion of the 60th anniversary of Prof. Jean-Loup Chenot
Organized by: Lionel Fourment, Thierry Coupez and Francisco Chinesta

A General Arbitrary Lagrangian Eulerian Formulation for the Numerical Simulation of 3D Forming Processes **179**
R. Boman, L. Papeleux, and J. P. Ponthot
Error Estimation and Accurate Mapping Based ALE Formulation for 3D Simulation of Friction Stir Welding **185**
S. Guerdoux and L. Fourment
Numerical Modelling of Metal Flow in the Cold Forming of Industrial Fasteners **191**
P. Hartley
Finite Element Simulation of Plastic Joining Processes of Steel and Aluminum Alloy Sheets **197**
K. Mori, Y. Abe, and T. Kato
Meshless Simulation of Friction Stir Welding **203**
I. Alfaro, L. Fratini, E. Cueto, F. Chinesta, and F. Micari
From Steady-State to Cyclic Metal Forming Processes **209**
P. Montmitonnet
Development of Multi-Scale Finite Element Analysis Codes for High Formability Sheet Metal Generation **215**
E. Nakamachi, H. Kuramae, N. Ngoc Tam, Y. Nakamura, H. Sakamoto, and H. Morimoto
Multi Scale Modeling of Phenomena Caused by Changes of the Deformation Path in Materials Forming **221**
L. Madej, P. D. Hodgson, and M. Pietrzyk
Finite Element Prediction of Sheet Forming Defects Using Elastic-Plastic, Damage and Localization Models **227**
B. Haddag, F. Abed-Meraim, and T. Balan
Anisotropic Volume Mesh Generation Controlled by Adaptive Metric Space **233**
B. Głut, T. Jurczyk, and J. Kitowski
Improved Contact Algorithms for Implicit FE Simulation of Sheet Forming **239**
S. Zhuang, M. G. Lee, Y. T. Keum, and R. H. Wagoner
Failure Prediction in Forming Processes **245**
J. M. A. César de Sá and C. Zheng
Milling Process FEM Simulation for Identification of Material Parameters Directly from Experiments **251**
A. Maurel, M. Fontaine, S. Thibaud, G. Michel, and J. C. Gelin
3D FEM Simulation of the Flow Forming Process Using Lagrangian and ALE Methods **257**
M. Houillon, E. Massoni, E. Ramel, and R. Logé
Optimum Structural Topology and Shape Design Using Three Phase Hybrid GA and Artificial Density Method **263**
C. V. Ramakrishnan, N. Singh, and D. K. Sehgal
Cimlib: A Fully Parallel Application for Numerical Simulations Based on Components Assembly **269**
H. Digonnet, L. Silva, and T. Coupez
Design Optimization for Three-dimensional Extrusion Processes **275**
D.-Y. Yang, S.-R. Lee, and K.-J. Kim
Numerical Forming Simulations and Optimisation in Advanced Materials **281**
J. Huétink, A. H. van den Boogaard, H. J. M. Geijselears, and T. Meinders

Numerical Simulation of Polymer Processing
Organized by: Thierry Coupez, L. Silva and Jean-François Hétu

Advanced Multiscale Modelling of Composite Welding Processes **289**
F. Chinesta, A. Ammar, F. Lemarchand, P. Beauchene, and F. Boust
Integrated Simulation of an Aspheric Lens Combining Injection Moulding Analysis with Ray Tracing **295**
K. Park and W. Joo
Three-dimensional Numerical Simulation of Segregation in Dense Suspensions **301**
F. Ilinca and J.-F. Hétu
A New Approach for the Validation of Filling Simulations in Micro Injection Moulding **307**
A. Gava, G. Tosello, H. N. Hansen, M. Salvador, and G. Lucchetta
Numerical Simulation of the Flow Behavior and Breakthrough Phenomenon in Co-injection Molding **313**
F. Ilinca and J.-F. Hétu
Fluid Structure Interaction Techniques for Extrusion and Mixing Processes **319**
R. Valette, B. Vergnes, and T. Coupez
An Accurate Simulation of Thermoforming and Blow-molding Processes Using the Space Fiber Rotation (SFR) Concept **325**
T. Ghomari, R. Ayad, and N. Talbi
The Use of Elasto-visco-plastic Material Model Coupled with Pressure-volume Thermodynamic Relationship to Simulate the Stretch Blow Molding of Polyethylene Terephthalate **331**
H. Mir, Z. Benrabah, and F. Thibault
Simulation of the Cooling of a Semi-Crystalline Polymer in the Injection Molding Process Including PVT Behavior **337**
N. Brahmia, M. Zinet, M. Boutaous, P. Chantrenne, P. Bourgin, and D. Garcia
Rheology of Suspensions Derived from Numerical Simulation **343**
M. Ahamadi and O. G. Harlen
Numerical Modeling of the Deformation in Polymer Blends under Shear Flow **349**
A. Shahshahani, S. Dufour, and M.-C. Heuzey
Injection Molding Simulation: Taking into Account the Process History to Predict the Anisotropy in the End-use Properties **355**
L. Silva, H. Miled, P. Laure, and T. Coupez
Two-Phase Model of Liquid-Liquid Interactions with Interface Capturing: Application to Water Assisted Injection Molding **361**
L. Silva, R. Lanrivain, W. Zerguine, A. Rodriguez-Villa, and T. Coupez

Numerical Representations of Microstructures and Modeling of Their Evolutions
Organized by: Roland Logé

Full-field Model and Experimental Validation of Subgrain Texture and Microstructure Evolution of Polycrystalline Copper **369**
R. A. Lebensohn, R. Brenner, and O. Castelnau
Development of Numerical Tools for the Multiscale Modelling of Recrystallization in Metals, Based on a Digital Material Framework **375**
M. Bernacki, H. Digonnet, H. Resk, T. Coupe, and R. Logé
Crystal-plasticity-based FE Modelling of a Dual-phase Microstructure in Which Grains Have Non-Uniform Shape and Size **381**
M. A. Melchior, J.-F. Remacle, and L. Delannay
Reducing Computational Cost and Allowing Automatic Remeshing in FEM Models of Metal Forming Coupled with Polycrystal Plasticity **387**
R. E. Logé, M. Béringhier, Y. B. Chastel, and L. Delannay
Modeling of 3D Aluminum Polycrystals during Large Deformations **393**
A. M. Maniatty, D. J. Littlewood, J. Lu, and D. Pyle
Study of Axes Rotation during Simple Shear Tests on Aluminum Sheets **399**
L. Duchêne, B. Diouf, T. Lelotte, P. Flores, S. Bouvier, and A. M. Habraken

Design and Optimization of Forming Processes
Organized by: Subir Roy

Robust Design of Parameters Fluctuations Based on Finite Element Method and Orthogonal Array in Springback **407**
C. Lei, Q. Xi, and W. Junbiao
3D Simulation and Validation of Tube Piercing Process **413**
E. Ceretti, C. Giardini, and A. Attanasio
3D FEM Geometry and Material Flow Optimization of Porthole-die Extrusion **419**
E. Ceretti, L. Mazzoni, and C. Giardini
Numerical Prediction of Elastic Springback in an Automotive Complex Structural Part **425**
L. Fratini, G. Ingarao, F. Micari, and A. Lo Franco
Measuring of Geometrical Precision of Some Parts Obtained by Asymmetric Incremental Forming Process after Trimming **431**
G. Ambrogio, L. Filice, L. Fratini, G. Ingarao, and L. Manco
Numerical Design of Experiments to Analyse the Contact Conditions in Microforming **437**
C. Barbier, S. Thibaud, P. Picart, and J. Chambert
On the Determination of the Blank Shape Contour for Thin Precision Parts Obtained by Stamping **443**
M. Azaouzi, A. Delamézière, H. Naceur, D. Sibaud, J. L. Batoz, and S. Belouettar
Topology Optimization of a Stamping Die **449**
A. Nilsson and F. Birath
Response Surface Method for the Rapid Design of Process Parameters in Tube Hydroforming **455**
M. S. Chebbah, H. Naceur, M. Hecini, and S. Belouettar
Sensitivity Analysis and Optimization of Tube Bending Coupled with Pressure Test **461**
E. Beauchesne, M. Safieddine, G. Marin, and E. Herbay
Optimization of Forming Processes with Different Sheet Metal Alloys **467**
L. C. Sousa, C. F. Castro, and C. C. António

Optimization and Robustness in Forming
Organized by: A.H. van den Boogaard and Lionel Fourment

Gradient, Non-Gradient and Hybrid Algorithms for Optimizing 3D Forging Sequences with Uncertainties **475**
L. Fourment
A Study for Efficiently Solving Optimisation Problems with an Increasing Number of Design Variables **481**
S. Trichon, M. H. A. Bonte, A. H. van den Boogaard, and J.-P. Ponthot
3D Die Shape Optimization Using Direct Compensation and Surface Approximation **487**
B. Lu, H. Ou, and C. G. Armstrong
A Robust Optimisation Strategy for Metal Forming Processes **493**
M. H. A. Bonte, A. H. van den Boogaard, and R. van Ravenswaaij
A Simplified Methodology for Estimating the Variance of Material Properties, in FE Analysis under Uncertainty of Sheet and Tube Metal Forming Processes **499**
M. Strano

Tools Optimisation in Forming Processes
Organized by: Fabrice Schmidt and Hakim Naceur

A Fully Coupled Simulation and Optimization Scheme for the Design of 3D Powder Injection Molding Processes **507**
G. Ayad, J. Song, T. Barriere, B. Liu, and J. C. Gelin
Implementation of the Artificial Neural Networks to Control the Springback of Metal Sheets **513**
A. Crina

Simulation of the Two Stages Stretch-Blow Molding Process: Infrared Heating and Blowing Modeling **519**
M. Bordival, F. M. Schmidt, Y. Le Maoult, and V. Velay
Cooling Channel Optimization for Injection Molding **525**
N. Pirc, F. Bugarin, F. M. Schmidt, and M. Mongeau
Geometrical Optimization in Clinch Forming Process Using the Response Surface Method **531**
M. Oudjenea, L. Ben-Ayed, and J.-L. Batoz
Optimizations of Coat-Hanger Die, Using Constraint Optimization Algorithm and Taguchi Method **537**
N. Lebaal, F. Schmidt, and S. Puissant

Forming Processes of Magnesium Alloys and Their Computer Simulation
Organized by: Shi-Hong Zhang

Applications of Computer Simulation Methods in Plastic Forming Technologies for Magnesium Alloys **545**
S. H. Zhang, W. T. Zheng, Y. L. Shang, X. Wu, G. Palumbo, and L. Tricarico
Finite Element Simulation of Magnesium AZ31 Alloy Sheet in Warm Hydroforming **551**
M. Steffensen and J. Danckert
Study on Numerical Simulation and Experiment of Fabrication Magnesium Semisolid Slurry by Damper Cooling Tube Method **557**
S. Xie, G. Huang, X. Zhang, and H. Yang
Warm Deep Drawing of Rectangular Parts of AZ31 Magnesium Alloy Sheet Adopting Variable Blank Holder Force **563**
Y. Peng, Q. Chang, D. Li, and X. Zeng
Numerical Modeling of Magnesium Alloy Sheet Metal Forming at Elevated Temperature **569**
M. Lee, H. Kim, H. Kim, Y. Choi, and S. Oh
Warm Deep Drawing of Rectangular Cups with Magnesium Alloy AZ31 Sheets **575**
L. M. Ren, G. Palumbo, S. H. Zhang, and L. Tricarico
Design Optimization of Roller Straightening Process for Steel Cord Using Response Surface Methodology **581**
J.-S. Lee, H. Huh, J.-G. Bae, J.-W. Lee, and D.-T. Kim

Constitutive Modeling and Mechanics for Metal Forming
Organized by: Rui P.R. Cardoso and Jeong-Whan Yoon

Evaluation of Flow Stresses of Tubular Materials Considering Material's Anisotropy **589**
Y. Hwang and B. Chen
On the Adequate Representation of Velocity Fields in a Narrow Layer Near Maximum Friction Surfaces **595**
Se. Alexandrov, G. Tzou, and T. Chen
Study of Titanium Alloy Sheet during H-Sectioned Rolling Forming Using the Taguchi Method **601**
D. Chen, W. Gu, and Y. Hwang
On Using Homogeneous Polynomials to Design Anisotropic Yield Functions with Tension/Compression Symmetry/Assymetry **607**
S. Soare, J. W. Yoo, and O. Cazacu
Asymmetric Rolling Process Simulations by Dynamic Explicit Crystallographic Homogenized Finite Element Method **613**
N. Ngoc Tam, Y. Nakamura, T. Terao, H. Kuramae, E. Nakamachi, and H. Sakamoto
Compressive Instability Phenomena during Springback **619**
J.-B. Kim, J. W. Yoon, and D. Y. Yang
Comparison of Two Commercial FE-Codes for Sheet Metal Forming **625**
A. Revuelta, K. Kanervo, P. Myllykoski, J. Larkiola, and A. S. Korhonen
A New Modelling of Blanking for Thin Sheet in Copper Alloys with Dynamic Recrystallization **631**
A. Touache, S. Thibaud, J. Chambert, and P. Picart

Flow Stress Curves Using New Volume Measurement Method for Hydraulic Bulge Test **637**
L. M. Smith, Y. Hadad, R. Thotakura, S. Gunala, and S. Manthipragada
Finite Element Simulation of Sheet Metal Forming Using Anisotropic Strain-Rate Potentials **643**
M. Rabahallah, T. Balan, S. Bouvier, B. Bacroix, and C. Teodosiu
Study on the Hemisphere Deep Drawing Process of Metal Sheet Based on the FEM Simulation **649**
G. Tzou, Y. Hwang, H. Hu, W. Chien, and J. Hu
Modelling the Material Behaviour of Metastable Stainless Steels **655**
K. Datta, H. J. M. Geijselaers, J. Post, J. Beyer and J. Huètink
Modeling of Deformation of FCC Polycrystalline Aggregates Using a Dislocation-based Crystal Plasticity Model **661**
G. Abrivard, E. P. Busso, G. Cailletaud, and S. Forest
Constitutive Modeling of Magnesium Alloy Sheets **667**
M. G. Lee, K. Piao, R. H. Wagoner, J. K. Lee, K. Chung, and H. Y. Kim
Convolute Cut-Edge Design for a Circular Cup Based on FEM and an Analytical Approach **673**
R. E. Dick, J. W. Yoon, and F. Barlat
Material Models to Study the Bauschinger Effect on an Aluminum Shear Test Specimen **679**
R. P. R. Cardoso, J.-W. Yoon, and J. J. Grácio
Earing Prediction in Cup Drawing Based on Non-Associated Flow Rule **685**
J. W. Yoon, T. B. Stoughton, and R. E. Dick
Kinematic Hardening: Characterization, Modeling and Impact on Springback Prediction **691**
J. L. Alves, S. Bouvier, M. Jomâa, R. Billardon, M. C. Oliveira, and L. F. Menezes

Developments in Finite Element Technologies for Forming Processes
Organized by: Robert A.F. Valente, Renato M.N. Jorge and Ricardo A. Sousa

Adaptive Through-thickness Integration Strategy for Shell Elements **699**
I. A. Burchitz, T. Meinders, and J. Huétink
Tube Drawing Process Modelling by a Finite Element Analysis **705**
M. Palengat, G. Chagnon, C. Millet, and D. Favier
Micro Wire-Drawing: Experiments and Modelling **711**
G. A. Berti, M. Monti, M. Bietresato, and L. D'Angelo
Gurson's Model: ALE Formulation and Strain Localization **717**
L. A. B. da Cunda and G. J. Creus
Towards Efficient Modelling of Macro and Micro Tool Deformations in Sheet Metal Forming **723**
R. A. Lingbeek and T. Meinders
Fluid Structure Interaction Analysis in Manufacturing Metal/Polymer Macro-Composites **729**
R. Baesso and G. Lucchetta
Integrated Modelling of Damage and Fracture in Sheet Metal Forming **735**
R. H. J. Peerlings, J. Mediavilla, and M. G. D. Geers
An Overview of Sheet Metal Forming Simulations with Enhanced Assumed Strain Elements **741**
R. A. F. Valente, R. J. A. de Sousa, R. M. N. Jorge, R. P. R. Cardoso, F. Simões, J. W. Yoon, and J. Grácio
Analysis of BCC Sheet Metal Forming by Polycrystalline Plasticity Method **747**
S. Zhang, Y. Peng, D. Li, and L. Hu
A New Solid-Shell Finite Element Technology Incorporating Plastic Anisotropy in Forming Simulations **753**
S. Reese, I. N. Vladimirov, and M. Schwarze
Integration of Heat Transfer Coefficient in Glass Forming Modeling with Special Interface Element **759**
P. Moreau, J. César de Sá, S. Grégoire, and D. Lochegnies

PART II

GENERAL TOPICS

Sheet Forming

Finite Element Simulation of Sheet Metal Forming and Springback Using a Crystal Plasticity Approach 769
A. Bertram, T. Böhlke, A. Krawietz, and V. Schulze

Residual Stress in Sheet Metal Parts Made by Incremental Forming Process 775
S. Tanaka, T. Nakamura, K. Hayakawa, H. Nakamura, and K. Motomura

Sensitivity Analysis of Technological and Material Parameters in Roll Forming 781
A. Gehring and H. Saal

Crashworthiness of Aluminium Tubes; Part 1: Hydroforming at Different Corner-fill Radii and End Feeding Levels 787
G. D'Amours, A. Rahem, B. Williams, M. Worswick, and R. Mayer

Crashworthiness of Aluminium Tubes; Part 2: Improvement of Hydroforming Operation to Increase Absorption Energy 793
G. D'Amours, A. Rahem, R. Mayer, B. Williams, and M. Worswick

Numerical Prediction of Springback Shape of Severely Bent Sheet Metal 799
N. Iwata, H. Tsutamori, M. Niihara, H. Ishikura, Y. Umezu, A. Murat, and Y. Yogo

Springback Simulation of High Strength Steel Sheet Using Local Interpolation for Tool Surfaces 805
T. Hama, C. Teodosiu, A. Makinouchi, H. Fujimoto, and H. Takuda

A Study on Process Design Methods of Redrawing Square Cups 811
K. Isobe

Research on the Effects of the Movable Die and Its Counter Force on Sheet Hydroforming 817
L. X. Zhou, S. H. Zhang, and B. X. Wang

Slip Line Field Applied to Deep Drawing 823
V. Miguel, J. Benet, J. Coello, A. Calatayud, and A. Martínez

Control of Springback in Sheet Metal U-bending through Design Experiment 829
B. Chirita and G. Brabie

Incremental Volumetric Remapping Method: Analysis and Error Evaluation 835
A. J. Baptista, J. L. Alves, M. C. Oliveira, D. M. Rodrigues, and L. F. Menezes

Influence of Drawbeads in Deep-drawing of Plane-strain Channel Sections: Experimental and FE Analysis 841
M. C. Oliveira, A. J. Baptista, J. L. Alves, L. F. Menezes, D. E. Green, and A. Ghaei

Study on the Influence of the Refinement of a 3-D Finite Element Mesh in Springback Evaluation of Plane-Strain Channel Sections 847
R. Padmanabhan, M. C. Oliveira, A. J. Baptista, J. L. Alves, and L. F. Menezes

Deep Drawing Simulation of High and Ultrahigh Strength Steels under Consideration of Anisotropic Hardening 853
K. Roll, A. Faust, and L. Keßler

Error Analysis in Explicit Finite Element Analysis of Incremental Sheet Forming 859
M. Bambach and G. Hirt

Process Development and Simulation for Cold Fabrication of Doubly Curved Metal Plate by Using Line Array Roll Set 865
D. S. Shim, C. G. Jung, D. Y. Seong, D. Y. Yang, J. M. Han, and M. S. Han

The Material Rolling Direction Influence on Springback Effect in Case of a U-shape Part Made from Tailor Welded Stripes 871
A. Aurelian

The Effect of Temperature Rise in a Fine Blanking Tool 877
S. Kim, J. J. Kang, D. Lee, K.-Y. Lee, H.-Y. Kim, and H.-T. Kim

Experimental Campaign Definition for Sheet Hydroforming through CAE Tools Usage 883
A. Del Prete, A. Anglani, and G. Papadia

Experimental and Numerical Investigations in Single Point Incremental Sheet Forming 889
S. Dejardin, S. Thibaud, and J. C. Gelin

Investigation of Forming Performance of Laminated Steel Sheets Using Finite Element Analyses . . . 895
W. Liu, X. Sun, R. Ruokolainen, and X. Gayden
Study the Effect of Curvature on Spring Back of Double Curved Steel Sheet Using New Method . . . 901
M. H. Parsa, M. Kazemi, and H. Pishbin
Further Experimental Verification of a Proposed Localized Necking Criterion . . . 907
Q. Situ, M. K. Jain, and M. Bruhis
Some Considerations in Modeling Axisymmetric Deep Drawing and Redrawing Process and LDR Prediction . . . 913
S. Han, M. Bruhis, and M. K. Jain
FETI-INDEED: New Perspectives in Metal Forming Simulation . . . 919
K. Kassem-Manthey, M. Grauer, R. Lenz, and R. Menzel
Impact of Elastic Modulus Degradation on Springback in Sheet Metal Forming . . . 925
M. Halilovič, M. Vrh, and B. Štok
A Study on Segmented Multiple-step Forming of Doubly Curved Thick Plate by Reconfigurable Multi-Punch Dies . . . 931
Y. H. Ko, M. S. Han, and J. M. Han
Adaptive Refinement Procedure for Sheet Metal Forming . . . 937
A. Cherouat, L. Giraud-Moreau, and H. Borouchaki
Correlation of FEA Prediction and Experiments on Dual-phase Steel Automotive Rails . . . 943
C. Du, X. M. Chen, T. Lim, T. Chang, P. Xiao, and S.-D. Liu
Computationally Efficient Finite Element Analysis Method Incorporating Virtual Equivalent Projected Model for Metallic Sandwich Panels with Pyramidal Truss Cores . . . 949
D. Seong, C. Jung, and D. Yang
Sectional Finite Element Analysis on Viscous Pressure Forming of Sheet Metal . . . 955
J. Liu, Z. Wang, and Y. Liu

Bulk Forming

A Comparison between the Properties of Solid Cylinders and Tube Products in Multi-pass Hot Radial Forging Using Finite Element Method . . . 963
A. Abedian, M. Poursina, and H. Golestanian
Practice of Process Modeling of Metal Forming in Manufacturing Environment . . . 969
M. He
A New Method for Reducing Dimensional Variability of Extruded Hollow Sections . . . 975
T. Welo, H. A. Baringbing, and O. P. Søvik
Analytic Model for Estimation of Cold Bulk Metal Forming Simulations . . . 981
M. Skunca, Z. Keran, and M. Math
Process Modelling of IN718 for Free Forging . . . 987
H. Yoshida, T. Hatta, T. Hironaka, and S. Isogawa, and H. Sekiguchi
Effect of Flaw Removal on Billets in Rolling . . . 993
K. Yoshida and T. Shinohara
Investigations on Forging Dies with Ceramic Inserts by Means of Finite-element Analysis . . . 999
B.-A. Behrens, F. Schäfer, and M. Bistron
The Relevance of the Preform Design in Coining Processes of Cupronickel Alloy . . . 1005
G. Buffa, L. Fratini, and F. Micari
Analysis of Axisymmetrical Compression Processes by the Finite Element Method . . . 1011
A. M. Camacho, M. Marin, L. Sevilla, and M. A. Sebastian
Elasto-plastic Simulation Concepts for Profile Transfer and Flatness Prediction in Flat Hot Rolling . . . 1017
A. Kainz, E. Parteder, M. Widder, and K. Zeman
Numerical Simulation of Damage during Forging with Superimposed Hydrostatic Pressure by Active Media . . . 1023
B.-A. Behrens, T. Hagen, S. Röhr, and K. B. Sidhu
Computer Simulation of Material Flow in Warm-forming Bimetallic Components . . . 1029
T. F. Kong, L. C. Chan, and T. C. Lee

Flash Design Optimization in Blade Forging Using FEM Method **1035**
D. Shahriari, M. H. Sadeghi, M. Cheraghzadeh, and M. Taghipour
Optimal Cluster Mill Pass Scheduling with an Accurate and Rapid New Strip Crown Model **1041**
A. S. Malik, R. V. Grandhi, and M. E. Zipf
Use of a TiBN Multilayer Coating for Wear Reduction **1047**
B. Behrens, F. Bach, K. Moehwald, T. A. Deißer, and M. Bistron

Casting, Molding, Quenching

Simulation of an Aspheric Glass Lens Forming Behavior in Progressive GMP Process **1055**
S. H. Chang, Y. M. Lee, T. S. Jung, J. J. Kang, S. K. Hong, G. H. Shin, and Y. M. Heo
A Model for Prediction of Shrinkage Defects in Long and Short Freezing Range Materials **1061**
A. Reis, Z. Xu, A. D. Santos, J. F. Duarte, and A. B. Magalhães
Application of Moldex3D for Thin-wall Injection Moulding Simulation **1067**
M. Šercer, D. Godec, and B. Bujanić
Numerical Simulation of Horizontal Continuous Casting Process of C194 Copper Alloy **1073**
G. Huang, S. Xie, L. Cheng, and Z. Cheng
Modeling and Simulation of the Flow of a Thermoplastic Polymer during Filling of a Cylindrical Micro-Cavity **1079**
M. Sahli, J. C. Gelin, C. K. Malek, and C. Roques-Carmes

Materials, Joining, and Powder Forming

Development of the Fast FE Method for Welding Deformation **1087**
Y. Yogo, N. Goto, N. Iwata, K. Nakanishi, and S. Yagishita
Stress-strain Analysis of Single-lap Tensile Loaded Adhesive Joints **1093**
P. Raos, D. Kozak, and M. Lucić
Development of Metal/Polymer Mixtures Dedicated to Macro and Micro-powder Injection Moulding: Experiments and Simulations **1099**
C. Quinard, T. Barrière, J. C. Gelin, J. P. Song, Z. Q. Cheng, and B. S. Liu
Thermo-mechanical Calculations of Hybrid Rotary Friction Welding at Equal Diameter Copper Bars and Effects of Essential Parameters on Dependent Special Variables **1105**
M. H. Parsa, H. Davari, A. M. Hadian, and M. N. Ahmadabadi
Numerical Simulation of Sintering Process in Ceramic Powder Injection Moulded Components **1111**
J. Song, T. Barriere, B. Liu, J. C. Gelin
Modelling and Simulation of Tensile Fracture in High Velocity Compacted Metal Powder **1117**
P. Jonsén and H-Å Häggblad
Numerical Analysis of the Resistance to Shear Test of Clinched Assemblies of Thin Metal Sheets **1123**
M. Jomâa and R. Billardon

Machining

New Modelling Strategies for Metal Cutting **1131**
P. A. R. Rosa, P. A. F. Martins, and A. G. Atkins
3D Simulation of Adiabatic Shear Bands in High Speed Machining **1137**
F. Delalondre, S. Guerdoux, and L. Fourment
Some Considerations on the FE Simulation of Orthogonal Cutting Using Different Classes of Numerical Codes **1143**
S. Rizzuti, L. Filice, and D. Umbrello
FE Thermal Modelling of Machining with Ball End Milling **1149**
A. Nasri, L. Sayari, M. Ben Said, W. Bouzid, and O. Tsoumarev
Modelling of Tool Wear and Residual Stress during Machining of AISI H13 Tool Steel **1155**
J. C. Outeiro, D. Umbrello, J. C. Pina, and S. Rizzuti
Analytical Modelling of Milling for Tool Design and Selection **1161**
M. Fontaine, A. Devillez, and D. Dudzinski

A Numerical Study of the Mechanical Behavior of Silicon Carbide due to Pressure-induced Phase Transformations during Nanoindentation **1167**
R. Mariayyah, K. Bose, and H. Cherukuri

Thermal Mechanical Processing

Warm Hydroforming of Lightweight Metal Sheets **1175**
A. Aginagalde, A. Orus, J. A. Esnaola, I. Torca, L. Galdos, and C. García
Simulation and Evaluation of Phase Transformations and Mechanical Response in the Hot Stamping Process **1181**
M. Oldenburg, P. Åkerström, G. Bergman, and P. Salomonsson
Mesh Re-zoning in Multi-stand Rolling **1187**
K. Subramanian, R. S. Minisandram, and H. P. Cherukuri
Analysis of Molding Process for Epoxy Resin Used for Electrical Insulator **1193**
Y. Kushizaki and T. Yamada
Simulation and Experimental Results of the Hot Metal Gas Forming Technology for High Strength Steel and Stainless Steel Tubes Forming **1199**
L. Vadillo, M. T. Santos, M. A. Gutierrez, I. Pérez, B. González, and V. Uthaisangsuk
Analysis of Deformation Behavior of Plastic during Lining on Steel Pipe with an FEM **1205**
T. Yamada, T. Maikawa, and Y. Kushizaki

Methods for Material and Process Design

Impact of the Material Variability on the Stamping Process: Numerical and Analytical Analysis **1213**
Y. Ledoux, A. Sergent, and R. Arrieux
Optimisation of Shape Parameters and Process Manufacturing for an Automotive Safety Part **1219**
E. Gildemyn, P. Dal Santo, A. Potiron, and D. Saïdane
Experimental and Numerical Investigation of Forging Process to Reproduce a 3D Aluminium Foam Complex Shape **1225**
L. Filice, F. Gagliardi, R. Shivpuri, and D. Umbrello
Determination of Slitting Criterion Parameter during the Multi Slit Rolling Process **1231**
A. Stefanik, S. Mróz, P. Szota, and H. Dyja
Application of Numerical Modelling to Ribbed Wire Rod Dimensions Precision Increase **1237**
P. Szota, S. Mróz, and A. Stefanik
Modelling of Rolling and Cooling Processes of the Bulb Bars HP220 . . . . . **1243**
S. Mróz, P. Szota, and B. Koczurkiewicz
Statistical Tools and Artificial Intelligence Approaches to Predict Fracture in Bulk Forming Processes **1249**
R. Di Lorenzo, G. Ingarao, and V. Fonti
Fatigue Life Prediction in Rapid Die Casting—Preliminary Work in View of Current Research **1255**
C. H. Ng, K.-H. Grote, and R. Bähr

Material Characterization

Forming Limit Prediction of Metastable Materials with Temperature and Strain Induced Martensite Transformation **1263**
J. Krauer, P. Hora, L. Tong, and B. Berisha
Plastic Deformation Characteristics of AZ31 Magnesium Alloy Sheets at Elevated Temperature **1269**
J. Park, J. Lee, B. You, S. Choi, and Y. Kim
Experimental and Numerical Study of the Thermomechanical Behavior of a Stamping Operation **1275**
L. Yann, L. Hervé, V. Pierre, and A. Robert
Tube Bulge Process: Theoretical Analysis and Finite Element Simulations **1281**
R. Velasco and N. Boudeau

Estimation of Rheological Law by Inverse Method from Flow and Temperature Measurements with an Extrusion Die **1287**
C. Pujos, N. Regnier, P. Mousseau, G. Defaye, and Y. Jarny

Inelastic Material Models

Elastic-plastic Constitutive Equation of WC-Co Cemented Carbides with Anisotropic Damage **1295**
K. Hayakawa, T. Nakamura, and S. Tanaka
Finite Stain Viscoelastic-plastic Deformation of Polymers Using Finite Element Simulation **1301**
K. Hasanpour and S. Ziaei-Rad
A Coupled Model of Flow Stress and Microstructure Evolution **1307**
D. S. Svyetlichnyy
On the Modeling of Plastic Deformation of Magnesium Alloys **1313**
S. Ertürk, D. Steglich, J. Bohlen, D. Letzig, and W. Brocks
A Flow Stress Formulation of Magnesium Alloy at Elevated Temperature **1319**
J. Liu, Z. Cui, and L. Ruan
Finite Element Analysis of Polycrystalline Deformation with the Rate-dependent Crystal Plasticity **1325**
J. H. Yoon, H. Huh, and Y. S. Lee
Accurate Hardening Modeling as Basis for the Realistic Simulation of Sheet Forming Processes with Complex Strain-path Changes **1331**
V. Levkovitch and B. Svendsen
A Mathematical Model for Plasticity and Cosmology **1337**
J. D. Muñoz-Andrade

Multi-Scale Modelling

A Multiscale Model Based on Intragranular Microstructure: Influence of Grain-scale Substructure on Macroscopic Behaviour of an IF-Steel during Complex Load Paths **1345**
G. Franz, F. Abed-Meraim, T. B. Zineb, X. Lemoine, and M. Berveiller
Forming Simulations of MMC Components by a Micromechanics Based Hierarchical FEM Approach **1351**
C. O. Huber, M. H. Luxner, S. Kremmer, S. Nogales, H. J. Böhm, and H. E. Pettermann
Three-dimensional Cellular Automata for Simulation of Microstructure Evolution during Recrystallization **1357**
D. S. Svyetlichnyy and J. L. Matachowski
3D Modeling of Sintering—Case of Two Grains **1363**
M. Ajdour, J. Léchelle, F. Valdivieso, and P. Goeuriot
Two-phase Multiscale FEM Modelling of Macrosegregation Formation in Steel Slabs **1369**
M. Bellet
The FEM Simulation of Cementite Lamellas Deformation in Pearlitic Colony during Drawing of High Carbon Steel **1375**
A. Milenin and Z. Muskalski
Multiscale Simulations of the Elastic Properties of Polycrystalline Silicon **1381**
H. Kim, W. Windl, J. Choi, J. K. Lee, and N. K. Lee

Damage Evolution and Failure

Damage Evolution on Mechanical Parts Under Cyclic Loading **1389**
P. Lestriez, F. Bogard, J. L. Shan, and Y. Q. Guo
Numerical Simulation of Burst Defects in Cold Extrusion Process **1395**
C. Labergère, P. Lestriez, and K. Saanouni
Stress Limit Model with Deformation Dependent Damage for Failure Prediction in Bulk Forming Processes **1401**
P. Hora, L. Tong, and B. Berisha

Prediction of the Fracture due to Mannesmann Effect in Tube Piercing **1407**
S. Fanini, A. Ghiotti, and S. Bruschi
Evaluation of Fracture in a Three Stage Forging Process Using Continuum Damage Mechanics **1413**
M. Mashayekhi, S. Ziaei-Rad, J. Parvizian, and H. Hadavinia
A Finite Element Approach to Mechanical Degradation and Failure of Ductile Materials **1419**
M. Vaz, Jr., N. de Santi, Jr., and E. A. de Souza Neto
Aging Damage Effects on Composite Structures **1425**
B. Freitas de Oliveira and G. J. Creus

Formability and Fracture

Evaluation of Forming Limit by the 3 Dimensional Local Bifurcation Theory **1433**
R. Nishimura, K. Ito, Y. Nakazawa, G. Uemura, and N. Mori
Formability Analysis of Magnesium Alloy Sheet Bulging Using FE Simulation **1439**
B. J. Mac Donald, D. Hunt, S. Yoshihara, and K. Manabe
Failure Analysis With a New Tool Geometry, X-Die, in Areas with High Tension/Compression Strains **1445**
A. Andersson and P. Thilderkvist
Numerical and Experimental Studies on Strain Distribution and Weld Line Movement in Stretch Forming of Tailor Welded Blanks **1451**
S. K. Panda and D. R. Kumar
Finite Element Modeling of Transition Zone in Friction Stir Welded Tailor-made Blanks **1457**
A. A. Zadpoor, J. Sinke, and R. Benedictus
Numerical and Experimental Investigations into Tailored Welded Blanks Formability **1463**
S. Gaied, F. Pinard, F. Schmidt, and J.-M. Roelandt

Numerical Methods and Applications

Development and Applications of Simulation System JSTAMP/NV for Tube Hydro-Forming **1471**
N. Ma, Y. Umezu, and Y. Watanabe
New Method to Evaluate and Compensate 3D-Springback **1477**
K. Ito, T. Kondou, G. Uemura, and N. Mori
Smoothed Particle Hydrodynamic Simulation of Iron Ore Pellets Flow **1483**
G. Gustafsson, H.-Å. Häggblad, and M. Oldenburg
Modeling the Interaction Effects between Tools and the Work Piece for Metal Forming Processes **1489**
M. Franzke, S. Puchhala, and H. Dackweiler
An eXtended Arbitrary Lagrangian-Eulerian Finite Element Model (X-ALE-FEM) in Large Plasticity Deformations **1495**
A. R. Khoei, M. Anahid, and K. Shahim
Decoupled Simulation Method for Incremental Sheet Metal Forming **1501**
G. Sebastiani, A. Brosius, A. E. Tekkaya, W. Homberg, and M. Kleiner
Coupling Finite Element and Meshless Methods to Deal with Contact and Friction in Forging Processes **1507**
C. F. Guedes and J. M. A. César de Sá
Finite Element Technology in Forming Simulations—Theoretical Aspects and Practical Applications of a New Solid-shell Element **1513**
M. Schwarze and S. Reese
Integration of the Security Sub-modules Elements in the Automotive Industry **1519**
C. Gallego, M. Fernández, A. S. Caires, and E. Cañibano
Numerical Simulations of Moving Interfaces by Level Set Method in the Partition of Unity Concept **1525**
M. Istrate and G. Winkelmuller
Predicting Distributive and Dispersive Mixing in Polymer Extrusion **1531**
N. Domingues, A. Gaspar-Cunha, and J. A. Covas

The Use of DEM to Capture the Dynamics of the Flow of Solid Pellets in a Single Screw Extruder **1537**
H. Hong, J. A. Covas, and A. Gaspar-Cunha
Level-Set Method Used to Track the Glass-air Interface in the Blow Step of Glass Containers **1543**
C. G. Giannopapa and J. A. W. M. Groot
Macroscopic Electromechanical Behavior of Polycrystalline Piezoelectric Materials $BaTiO_3$ and $PbTiO_3$; a 3D Analysis **1549**
K. P. Jayachandran, J. M. Guedes, and H. C. Rodrigues
Numerical Computation of the Heat Transfer Coefficient in the 2-D Inverse Design Stefan Problem **1555**
D. Słota
Adaptive Anisotropic Mesh Technique for Coupled Problems: Application to Welding Simulation **1561**
M. Hamide and M. Bellet
Identification of Constitutive Parameters Using Inverse Strategy Coupled to an ANN Model **1567**
H. Aguir, A. Chamekh, H. BelHadjSalah, and R. Hambli
Implementation of the eXtended Finite Element Method (X-FEM) in Frictional Contact Problems **1573**
A. R. Khoei, M. Anahid, I. Yadegaran, and M. Nikbakht
Parallel 3D Mesh Generation Using Geometry Decomposition **1579**
T. Jurczyk, B. Głut, and P. Breitkopf
On Scalability of Distributed Simulation and Optimization of Forming Processes **1585**
F. Thilo, M. Grauer, R. Menzel, and C. Müller
Integrated Forming Simulation Using State-of-the-Art Methodologies **1591**
D. Ling, J.-L. Babeau, M. Skrikerud, Y. Dammak, and F. El Khaldi
Thermal Conductivity of SWCNT Nanocomposites Determined Using Finite Element Method **1597**
H. Golastanian and M. Poursina
FE Simulation of Dieless Drawing Process for Small-size Non-circular Tubes **1603**
T. Furushima and K.-I. Manabe
A Nonconforming Multidomain Method for Contact Problems **1609**
J. A. Rodrigues
Problems of Numerical Modelling of Processes Determined by Shear Fracture **1615**
E. S. Dzidowski and S. Lawrusewicz
Warm Forming Simulation of Titanium Tailor-welded Blanks with Experimental Verification **1621**
C. P. Lai, L. C. Chan, and C. L. Chow
