

Airfield and Highway Pavement Conference 2013

Sustainable and Efficient Pavements

**Los Angeles, California, USA
9 - 12 June 2013**

Volume 1 of 2

Editors:

Imad L. Al-Qadi

Scott Murrell

ISBN: 978-1-63266-637-6

Table of Contents

Sustainable Pavement Materials and Construction

Sustainable Construction Practices in Aviation Facilities	1
E. M. VÉlez-Vega and D. R. Bardt	
Exploring Partnership Models to Promote Sustainable Rural Texas Highway Infrastructure and Energy Development	11
Timothy Miller and James Sassin	
Implementation of Ontario's Pavement Sustainability Rating System—GreenPave	22
S. Chan, B. Bennett, and T. Kazmierowski	
Sustainable Asphalt Concrete for Major Resurfacing and Rehabilitation of Runways and Taxiways	30
I. Widyatmoko, C. Fergusson, and J. Richardson	
Performance of Asphalt Mixtures with Recycled Roof Membrane	40
G. M. Merine, E. T. Hagos, and M. F. C. van de Ven	
A Laboratory Study of Warm Mix Asphalt for Moisture Damage Potential Using Surface Free Energy Method	54
Rouzbeh Ghabchi, Dharamveer Singh, Musharraf Zaman, and Qingyan Tian	
Sustainability and Effect of Rubber Tire Aggregates on the Compressive and Dynamic Strength of Concrete Used for Highway and Airfield Pavement	64
Hossein Ataei	
Demonstrating How Sustainability Can Effectively Be Incorporated into Pavement Engineering and Management	76
S. L. Tighe and D. D. Gransberg	
Life Cycle Assessment for Local Government Pavements: What Questions Should We Be Addressing and How?	92
J. Harvey, A. Kendall, D. J. Jones, and T. Wang	
Foamed Asphalt Stabilized Base: A Case Study	106
Sadaf Khosravifar, Charles W. Schwartz, and Dimitrios G. Goulas	
Evaluation of Warm Mix Asphalt (WMA): A Case Study	118
Qiang Joshua Li, Kelvin C. P. Wang, and Stephen A. Cross	
Laboratory Evaluation of Asphalt Mixtures Containing Bio-Binder Technologies	128
Louay N. Mohammad, Mostafa Elseifi, Samuel B. Cooper III, Harshavardhan Challa, and Prem Naidoo	

Airport and Highway Pavement Design and Analysis

LCCA and Pavement Design for the New Parallel Runway at Calgary International Airport	153
George Nowak	
Runway 10R/28L Replacement: A Case Study of a Large Airfield Project at the Port Columbus International Airport	165

Joseph S. Grubbs, Chris Decker, and Kevin Conti

Reconstruction of Runway 16L-34R at Seattle-Tacoma International Airport	177
Michelle Moshner, Denise Almojuela, Chris Sherwood, Ray Rawe, and Ralph Wessels	
Design and Construction of a New Taxiway Junction with an Existing Runway Using Expedient Pavement at Mumbai International Airport, India	191
P. J. McCullagh and N. Namachivayam	
Impact of Joint Filling Materials on Cracking in Concrete Gutters at Large Airfields	204
R. Breitenbuecher	
Influences of Cyclic Loadings on the Properties of Pavement Concrete	214
R. Breitenbuecher and S. Kunz	
Developing Optimized Concrete Pavement Designs Using the DARWin-ME/Mechanistic Empirical Pavement Design Guide and Cost Analysis	225
James W. Mack and Corey J. Zollinger	
Falling Weight Deflectometer Evaluation of Pavement Joint Looseness and Differential Slab Edge Settlements in Jointed Concrete Pavements	243
Christopher R. Byrum	
Development of a New Joint Load Transfer versus a Slab Temperature Modeling Procedure for Airfield Concrete Pavements	262
Christopher R. Byrum	
Application of the Hinged Dowel System for Increasing the Durability of Concrete Pavement Joints	282
Alireza Zeinali, Kamyar C. Mahboub, and Herbert F. Southgate	
Capillary Pressure-Controlled Concrete Curing in Pavement Construction	295
Markus Schmidt and Volker Slowik	
Load Capacity of Concrete Slabs with Recycled Aggregates	307
A. S. Brand, A. N. Amirkhanian, and J. R. Roesler	
The Influence of Crack Initiation on Deflection Responses under Moving Loads on PCC Overlays at the FAA NAPTF	321
Lin Yeh, Shelley M. Stoffels, Guangming Wang, and Dennis Morian	
Rehabilitation of a Continuously Reinforced Concrete Pavement in Virginia	336
Michael Sprinkel, Celik Ozyildirim, Mohamed Elfino, Shabbir Hossain, Chung Wu, and Affan Habib	
A Simple Approach to Estimating Dynamic Moduli from Resilient Moduli for the Mechanistic Empirical Design of Asphalt Pavements	350
Aboelkasim Diab and Zhanping You	
Effects of Pavement Conditions on the Effective Structural Number of In-Service Pavements	362
Karthik Dasari, Saman Salari, David J. Osborn, Mostafa A. Elseifi, and Kevin Gaspard	
Prediction of Asphalt Pavement Temperature	373
D. S. Gedafa, M. Hossain, and S. A. Romanoschi	
Theoretical Solution Based on the Volumetric Strain of Elastic Multi-Layered Structures under an Asymmetrically Distributed Load	383

Futoshi Kawana, Satoshi Horiuchi, Masaru Terada, Kazuyuki Kubo, and Kunihiro Matsui	
Pavement Design and Construction Technique Using High Strength Stone Interlock Cemented Aggregate Matrix	395
Gerhard van Blerk and Cara Fahey	
A New French Rational Design Method for Airfield Pavements	411
D. Mounier, S. Fauchet, and M. Broutin	
Advanced Modeling for Flexible Pavement Behavior under Dynamic Loadings	422
M. Broutin, D. Mounier, and S. Fauchet	
Confidence Interval of Pavement Layer Parameters Estimated from FWD Time Series Data	433
Satoshi Horiuchi, Futoshi Kawana, Masaru Terada, Kazuyuki Kubo, and Kunihiro Matsui	
Data Requirements from Falling Weight Deflectometer Tests for Accurate Backcalculation of Dynamic Modulus Master Curve of Asphalt Pavements	445
Sudhir Varma, M. Emin Kutay, and Karim Chatti	
Regional Sensitivity Analysis of the M-E Flexible Pavement Design Using the Monte Carlo Filtering Method	456
Xiaoming Yang and Zhong Wu	
Geosynthetics and Common Sense Give You Design Options	465
Mark L. Marienfeld	
Analysis of Flexible Pavement Serviceability Using ANN for Urban Roads	478
Yogesh U. Shah, S. S. Jain, Devesh Tiwari, and M. K. Jain	
Modeling Pavement Temperature Prediction Using Artificial Neural Networks	490
Mostafa A. Abo-Hashema	
Wheel Path Wandering Based on Field Data	506
Wenting Luo and Kelvin C. P. Wang	
Prep-ME: A Multi-Agency Effort to Prepare Data for DARWin-ME	516
Kelvin C. P. Wang, Qiang Joshua Li, Vu Nguyen, Mike Moravec, and iDoc Zhang	
Sensitivity of Input Variables for Rigid Pavement Rehabilitation Strategies in the MEPDG	528
Wouter C. Brink, Iman Harsini, Syed W. Haider, Neeraj Buch, Karim Chatti, Gilbert Y. Baladi, and Emin Kutay	
Sensitivity of Input Variables for Flexible Pavement Rehabilitation Strategies in the M-E PDG	539
Iman Harsini, Wouter C. Brink, Syed W. Haider, Karim Chatti, Neeraj Buch, Gilbert Y. Baladi, and Emin Kutay	
Impact of Tire Loading and Tire Pressure on Measured 3D Contact Stresses	551
Jaime A. Hernandez, Imad Al-Qadi, and Morris De Beer	
Hydroplaning of Rolling Tires under Different Operating Conditions	561
S. K. Srirangam, K. Anupam, A. Scarpas, and C. Kasbergen	
Selection of Non-Destructive Testing Technologies for Asphalt Pavement Construction	573
Robert L. Schmitt, Ahmed Faheem, and Imad L. Al-Qadi	

Airport and Highway Pavement Evaluation and Management

Electro-Optical Sensor Evaluation of Airfield Pavement	585
Stephanie W. Graves	
Development of Infrastructure Management Strategies for Small and Mid-Size Airfields	597
Juan Carlos Lam, James M. Bryce, Lucy P. Priddy, and Gerardo W. Flintsch	
Pavement Rehabilitation of Runway 14/32 at Zürich International Airport: Service Life Prediction Based on Updated Incremental Damage Approach	609
C. Rabaiotti, M. Amstad, and M. Schnyder	
Analysis and Recommendation of a Long-Term Rehabilitation Program on Runway 12R-30L at Lambert-St. Louis International Airport	628
Ty Sander and Gerald Beckmann	
Development of Airport Pavement Optimal Rehabilitation Timing System and Its Application to Airports in Japan	640
Y. Hachiya, T. Watanabe, and M. Kanno	
Pavement Performance Prediction through Fuzzy Logic Using Marine Corps Air Station Cherry Point, North Carolina, Measurements	650
S. Terzi, Ş. Sargin, and M. Saltan	
Ultrathin Multi-Functional Overlay	662
M. Coni	
Airport Rubber Removal: A Comparison of Ultra-High Pressure Water Runway Rubber Removal Systems	677
Aaron B. Pullen, Reza Ashtiani, Brian Cotter, Athar Saeed, and Lulu Edwards	
New Ways of Maintenance: Frankfurt Airport Example—Maintenance Planning and Determining Remaining Working Life	691
Manfred Hase and Gregor Rajewski	
Laboratory and Nondestructive Strength Evaluation of Airfield Pavements in New Mexico	704
M. U. Ahmed and R. A. Tarefder	
Pavement Management Using Real Time Traffic Data	714
Richard L. Boudreau and Quintin B. Watkins	
Arizona Airport Pavement Management	722
H. L. Hawkins and M. R. Covalt	
Runway Groove Identification and Evaluation Using 1 mm 3D Image Data	730
Kelvin Wang, Li Lin, Qiang Joshua Li, Vu Nguyen, Gordon Hayhoe, and A. L. Larkin	
Resurfacing the Runway to the Nation's Capital	742
Jason E. Frank, Gary K. Fuselier, Christopher S. Decker, and Richard G. Thuma	
Dynamic Contracting Mechanism for Pavement Maintenance Management	753
Hatice Cigdem Demirel and Hennes De Ridder	
Sensitivity of Predicted Pavement Performance on Climate Characteristics	760
Rui Li, Charles W. Schwartz, and Barton Forman	

Clustering Pavement Condition Data Based on Spatiotemporal Patterns	772
Siamak Saliminejad and Nasir G. Gharaibeh	
Improved Structural Condition Index for Pavement Evaluation at Network Level	781
B. H. Nam, M. R. Murphy, Z. Zhang, and M. Arellano	
A Multi-Purpose Pavement Testing Device: Applications of the Rolling Dynamic Deflectometer and the Stationary Dynamic Deflectometer in Pavements	791
B. H. Nam, K. H. Stokoe, M. Won, and J. A. Bay	
Improving the Strategy Selection Process in the Caltrans Maintenance Technical Advisory Guide	801
D. Cheng, R. G. Hicks, and P. Vacura	
Use of Wehner Schulze to Predict Skid Resistance of Irish Surfacing Materials	817
Shaun Friel, Malal Kane, and David Woodward	
Predicting the Development of Asphalt Surfacing Properties in Ireland	829
Shaun Friel and David Woodward	
Measuring Grip and the Contact Patch	841
D. Woodward, P. Millar, S. Friel, and C. Waddell	
Performance Evaluation of Pavement Preservation Using Long-Term Pavement Performance Data	855
Hao Wang and Zilong Wang	
Development of UK Proprietary Asphalt Surfacing Skid Resistance and Texture	865
I. Artamendi, P. Phillips, B. Allen, and D. Woodward	
Development of a Roadway Index for the North Texas Tollway Authority	875
Curt Beckemeyer and Jacob Walter	
Performance Assessment of Flexible Pavements Using Active Contour Models	887
Y. O. Adu-Gyamfi, Chandra Kambhamettu, and Nii Attoh Okine	
Effect of the Combined Traffic Load and Weathering on the Skid Resistance of the Aggregates for Road Surface	903
D. Wang, C. Yin, M. Oeser, B. Steinauer, and X. Chen	

Binder and Asphaltic Concrete Characterization and Performance

Thixotropic Properties of Mastics Incorporates Secondary Filler	913
M. Mostafa Hassan	
Experimental Investigation of Bitumen and Mastics under Shear Creep and Creep-Recovery Testing	921
M. Elnasri, G. Airey, and N. Thom	
Fatigue Behavior of Neat and Polymer Modified-Binders and Mastics	933
G. Peebles, Y. Mehta, A. Nolan, and R. Dusseau	
Microindentation Specification Grading of Thin Film Aged Asphalt Cements from a Northeastern Ontario Pavement Trial	943
Colleen W. Kinross and Simon A. M. Hesp	

Modulated Differential Scanning Calorimetry Study of Physical Hardening Rates in Asphalt Cements	955
Ryan M. Bricker and Simon A. M. Hesp	
Rheological Investigations on Foamed Bitumen	967
M. K. Nivedya, K. Lakshmi Roja, A. Veeraragavan, and J. Murali Krishnan	
Rheological Properties of Asphalt Binder Partially Substituted with Wood Lignin	977
Hao Wang and Kristen Derewecki	
Engineering Characterization of Hot-Mix Asphalt in Western Australia	987
Ainalem Nega, Hamid Nikraz, and Colin Leek	
Modeling the Stripping Potential of Asphalt Concrete	999
S. I. Sarsam and E. T. Al-Azawi	
Development of a Realistic Conditioning and Evaluation System to Study Moisture Damage of Asphalt Materials	1008
Aboelkasim Diab and Zhanping You	
A Material Testing Methodology for In Situ Quality Control of Low Temperature Performance in Asphalt Pavements	1018
Chun-Hsing Ho and Pedro Romero	
Evaluation of Stiffness and Fatigue Using 2 Point Bending and Indirect Tensile Fatigue Tests	1030
Cinzia Maggiore and Gordon Airey	
Effect of Aging on the Dynamic Modulus and Fatigue Life of Superpave Mixes	1040
D. S. Gedafa, M. Hossain, S. A. Romanoschi, and A. J. Gisi	
Influence of Compaction Direction on Performance Characteristics of Roller-Compacted HMA Specimens	1051
B. Hofko	
The Investigation of R-Curves of Asphalt Concrete	1064
Shu Yang and Andrew Braham	
Highly Modified Bitumen for the Prevention of Winter Damage in OGFCs	1075
R. Q. Kluttz, E. Jellema, M. F. Woldekidan, and M. Huurman	
The Use of Cryogenic Crumb Rubber in the Cold Recycling Technique	1088
M. Pettinari, G. Dondi, C. Sangiorgi, and F. Petretto	
Linear Viscoelastic Limits for the Determination of Dynamic Modulus of Bituminous Concrete Mixture in AMPT	1100
Pavitra Tejaswi, Jezna Fatima, A. Padmarekha, and J. Murali Krishnan	
Evaluation of the Fatigue Life of an Asphalt Mixture with High RAP Content Utilizing Innovative Scanning Method	1112
Hossein Ajideh, Hussain Bahia, Sergio Carnalla, and James Earthman	
Effect of Air Voids and Asphalt Content on Fatigue Damage Using the Viscoelastic Continuum Damage Analysis	1122
W. A. Zeiada, K. E. Kaloush, B. S. Underwood, and M. S. Mamlouk	

Aggregate Size Distribution and Hydraulic Permeability of HMA: A Full Simulation Study	1134
Andrea Umiliaco and Andrea Benedetto	
Long-Term Performance of SMA Mixtures with Added Crumb Rubbers in a Dry Process	1145
Zhaoxing Xie and Junan Shen	
The Importance of Simulating Moving Wheel Loads in the Mechanistic Analysis of Permanent Deformations in Flexible Pavements	1156
R. L. Carvalho and C. W. Schwartz	
Performance Evaluation of Mechanical Properties of Polymer-Modified Binders and Friction Course	1167
Xin Qiu, Winggun Wong, and Yuheng Kan	
Sulphur Utilization in Asphaltic Concrete Pavements	1175
Abdulgazi Gedik and Abdullah Hilmi Lav	
Use of Ground Tire Rubber in a Dense-Graded Asphalt Mixture on US 231 in Alabama: A Case Study	1192
J. Richard Willis	
Investigation of Aged Asphalt Pavement Moduli	1202
Jeremiah Thomas, Quinn Stenzel, and M. Hossain	
Use of Microwave Conditioning to Rapidly Age Asphalt Mixes	1211
Ruth Mitchell, David Woodward, and Donal Ryan	
Asphalt Concrete Stiffness Modulus Estimation Utilizing an Algorithm Approach	1219
C. Plati, K. Georgouli, and A. Loizos	
Effect of Anti-Icing Chemicals on the Stripping of Asphalt Concrete Mixtures for Airport Runway Wearing Courses	1229
Ezio Santagata, Orazio Baglieri, and Pier Paolo Riviera	
Rutting Potential of Thin and Durable Asphalt Wearing Courses: Laboratory Prediction and Field Performance	1240
Songsu Son, Imad L. Al-Qadi, and Thomas G. Zehr	

Unbound Materials Characterization and Field Performance

Comparison of the Morphological Properties of Different Types of Coarse Aggregates	1254
Dharamveer Singh, Musharraf Zaman, and Sesh Commuri	
Use of Recycled Concrete Materials As an Aggregate Base Layer	1264
Sung-Hee Kim, Reza Ashtiani, David Vaughan, Jeffrey Des Isles, and Samuel Beadles	
Assessment of Toughness Performance of Recycled Aggregates for Use in Highway Pavement	1278
V. Ayan, S. M. N. Azadani, J. R. Omer, and M. C. Limbachiya	
Effects of Geometrical Parameters on the Numerical Modeling of Pavement Granular Material	1291
Behzad Ghadimi, Hossein Asadi, Hamid Nikraz, and Colin Leek	
Use of the One-Point Proctor Modified Compaction Method in Family Compaction Curves Possessing a Limited Trend Characteristic	1304

M. Livneh and N. A. Livneh

Volumetric Moisture Content Analysis and the Implementation of Spring Load Restrictions on a Low Volume Road 1316

Q. Liu and A. Shalaby

Correlating the Resilient Modulus and Seismic Modulus of Subgrade Materials Incorporating Moisture and Density Variations 1328

Mehran Mazari, Eric Navarro, Jose Garibay, Imad Abdallah, and Soheil Nazarian

Inferring the Bearing Ratio of Unbound Materials from Dielectric Properties Using GPR: The Case of Runaway Safety Areas 1336

A. Benedetto and F. Tosti

Optimum Use of Local Materials for Roadway Bases and Subbases 1348

Biraj Gautam, Deren Yuan, and Soheil Nazarian

Improved Intelligent Pavement Performance (IIPP) Modeling for a Botswana District's Gravel Road Networks 1358

A. S. Oladele

In Situ Hydraulic Properties of Unbound Aggregate Layers Measured Using a Gas Permeameter Test (GPT) Device 1370

Yuanjie Xiao, Erol Tutumluer, and Maziar Moaveni

Pavement Instrumentation and Interlayer Systems

Repeatability of Earth Pressure Cell Measurements under Falling Weight Deflectometer Loading 1386

J. Richard Willis, Adam Taylor, and David Timm

A Full-Scale Instrumented Test Facility for Airport Pavement Modeling Improvements 1396

M. Broutin, S. Fauchet, and D. Mounier

Instrumentation Experience at the Kansas Accelerated Pavement Testing Facility 1409

Milad Saghefar, Elizabeth Frink, Brandon S. Bortz, and M. Hossain

Appropriate and Reliable Use of Pavement Instrumentation on In-Service Roads 1424

P. Leandri, R. Bacci, A. Di Natale, P. Rocchio, and M. Losa

Study of the Performance of Membrane Material between the Asphalt Concrete Surfacing Layers and the Decks of Steel Bridges 1434

X. Liu, A. Scarpas, J. Li, and G. Tzimiris

Pavement Layer Interface Shear Strength Using a Hyperbolic Mohr-Coulomb Model and Finite Element Analysis 1445

Hasan Ozer, Imad L. Al-Qadi, Khaled I. Hasiba, Hao Wang, and Alejandro Salinas

Numerical Simulations of Multilayer Surfacing Systems on Orthotropic Steel Deck Bridges 1457

J. Li, X. Liu, A. Scarpas, and G. Tzimiris
